JANUARY 1—8, 1955

A. FRANCE. — Paris Agreements on Germany and the Saar ratified by National Assembly.

At the end of a prolonged debate, which began on Dec. 21 and ended on Dec. 30, the French National Assembly ratified the Paris agreements providing for the rearming of the German Federal Republic, its entry into the NATO and the Western European Union, and the restoration of its sovereignty. The Franco-German agreement on the Saar, signed in Paris on Oct. 23, was approved at the same time

Prior to the opening of the debate, the various Commissions of the National Assembly had considered the Paris agreements on Germany and the Franco-German agreement on the Saar. Their recommendations to the Assembly were as follows:

Foreign Affairs Commission. (1) On the rearming of Western Germany and her entry into the NATO and the Western European Union—approved by 16 votes to 15 (a majority of only one vote), with 11 abstentions General Billotte (A.R S [Dissident Gaullist]) acted as *rapporteur* (2) On the restoration of West German sovereignty—approved by 24 votes to 15, with 3 abstentions (*rapporteur*—M. Isorni, *Paysan*) (3) On the Saar agreement—approved by 24 votes to 6, with 12 abstentions (*rapporteur*—M. Vendroux, Social Republican [Gaullist])

The 16 votes for the rearming of Germany were cast by the eight Socialist members of the Commission, five Independent Republicans and *Paysans*, two Dissident Gaullists, and a Radical, whilst the 15 opposing votes were cast by seven Communists and *Progressistes*, five Social Republicans, two Independent Republicans, and one Radical The abstentions included six M R.P. members and three Radicals, among them M. René Mayer.

In recommending the ratification of the Saar agreement, the *rapporteur* on this matter (M. Vendroux) said that the Commission did so with two essential reservations: (*a*) that the French interpretation of the agreement should be formally maintained and (*b*) that the restoration of German sovereignty should be conditional on German ratification of the Saar agreement.

Finance Commission. (1) On the rearming of Western Germany and her entry into the NATO and the W.E.U —rejected by 18 votes to 12, with 11 abstentions (2) On the restoration of West German sovereignty—approved by 20 votes to 7, with 11 abstentions (3) On the Saar agreement—the Commission recommended (by 21 votes to 10, with 10 abstentions) that the Assembly should adjourn its debate on this matter. M. Liautey (*Paysan*) acted as *rapporteur* in each case

Industrial Production Commission. (1) On the rearming of Western Germany, her entry into the NATO and the W E.U., and the restoration of West German sovereignty—approved by 13 votes to 10, with 15 abstentions (*rapporteur*—M. Lapie, Socialist) (2) On the Saar agreement—approved by 15 votes to 7, with 15 abstentions (*rapporteur*—M Chupin, U.D.S R)

National Defence Commission. This Commission recommended by 15 votes to 1, with 19 abstentions, that the National Assembly should adjourn its debate on all the agreements, including that on the Saar. M. Badie (Radical) acted as *rapporteur*.

Economic Affairs Commission. The ratification of all the agreements, including that on the Saar, was recommended by 10 votes to 7, with 10 abstentions M Hugues (Radical) acted as *rapporteur*

Overseas Territories Commission. The ratification of all the agreements, including that on the Saar, was recommended by 11 votes to 9, with 5 abstentions. M. Devinat (Radical) acted as *rapporteur*

The National Assembly's debate largely followed the same lines as the debates held on Oct. 7-8 (see 13859 A), Aug. 28-30 (see 13749 A), and earlier occasions. The principal speakers during the first three days (Dec. 21-23) were General Aumeran (Ind. Republican), M. Soustelle (Social Republican), M. Jules Moch (Socialist), M. Teitgen (M.R.P.), M. Paul Reynaud (Ind. Republican), M. Robert Schuman (M.R.P.), M. Herriot (Radical) and M. Mendès-France, the Prime Minister, extracts from whose speeches are given below.

General Aumeran declared that the first duty of France, "in the face of the German peril," was to look to her own defences, and to participate in the defence of other countries, before involving herself in "the system directed against Russia" Emphasizing the future dangers which the rearming of Germany might involve, he declared: "Once the German Army is formed, the Atlantic alliance runs the risk of finding itself confronted one day with a *fait accompli* In 15 years the NATO guarantee will disappear, and with them the American and British divisions. We shall then find ourselves face to face with Germany, and associated with her in a system whose duration is envisaged as 45 years. We are invited to negotiate with the Soviet Union from a 'position of strength'. To negotiate what? The reunification of Germany, postulating the return to that country of the territories now incorporated in Poland? Does anyone believe that Russia will consent to that? Will the Western countries go to war to satisfy the Germans' No! They [the Germans] must resign themselves to the fact that the territories beyond the Oder-Neisse line are definitely lost to them There is only one way in which we can prevent our children from being killed in new holocausts: to refuse to give arms to those who will use them, not to defend their country, but to extend it."

M. Soustelle expressed the fear that ratification of the Paris agreements might lead to the rupture of the Franco-Soviet alliance and to an eventual *rapprochement* between Germany and the Soviet Union, and—like General Aumeran—believed that Germany's entry into the NATO would give that organization an offensive instead of a defensive character He believed that Germany would attempt to utilize the North Atlantic alliance for territorial aggrandizement, and in this connexion, referred to the fact that Dr Adenauer in his memorandum to the *Bundestag* on the Saar agreement, had said that Germany considered her frontiers to be identical with those of 1937. M. Soustelle also opposed the ratification of the Saar agreement on the ground that Dr. Adenauer's subsequent interpretation of the agreement differed from that of France "For France," M. Soustelle declared "the [Saar] agreement is a final settlement but to Germany it is a 'point of departure'."

M. Jules Moch (who had been suspended from membership of the Socialist Party because of his opposition to the E D C Treaty—see 13767 A) argued that the Soviet Union showed no sign of launching an aggressive war, and dwelt on the horrors of atomic and nuclear warfare if a new conflict were to break out The ratification of the Paris agreements he said, would not only mark a new stage in the 'cold war' but might lead to the denunciation of the Franco-Soviet treaty by the U S S R and to "military counter-measures" by the Soviet bloc After expressing disquiet at Sir Anthony Eden's suggestion that negotiations with Russia should only be undertaken after the Paris agreements had been ratified M. Moch urged that such negotiations should commence immediately, and argued that, if successful, they would make the Paris agreements redundant.

M. Mendès-France, intervening in the debate, emphasized that there would be no question of any four-Power negotiations if the Assembly rejected the Paris agreements: in that case there might, at a later date, be a two-Power or three-Power meeting. In such an eventuality France would no doubt remain in the Atlantic alliance, but would no longer have any influence in that organization If, on the other hand, the agreements were ratified, France would have an important role to play both in the NATO and in any future four-Power negotiations Speaking "with the utmost gravity," the Prime Minister warned the National Assembly that acceptance of the Paris agreements "by a feeble majority" would be "as serious as a rejection"

Both **M. Teitgen** and **M. Paul Reynaud** compared the Paris agreements unfavourably with the E D C. Treaty, and expressed the view that Britain's participation in the Western European Union would block the movement towards greater European integration M Reynaud declared in this connexion that the new arrangements would give political hegemony in Western Europe to Britain and military hegemony to Germany **M. Daladier** (Radical), the pre-war Prime Minister, was also strongly critical of the agreements in all their aspects, and urged renewed negotiations with the Soviet Union in an attempt to resolve all outstanding problems.

M. Robert Schuman (the former Foreign Minister), in a conciliatory speech, dwelt on the importance of an integrated Europe in which Germany would take her place with equal rights and duties. He regretted that at present the only form of integration—and that of a solely military character—was within the framework of the Atlantic alliance, and urged that it should be supplemented by a 'solid, strong and durable" structure of specifically European character In his view, the Western European Union would be "a sort of Little Entente" within NATO, in which France, unfortunately, would not play the leading role. He agreed, nevertheless, that the Atlantic alliance should be strengthened in conformity with the Paris agreements, and, moreover, saw an important political advantage in those agreements—the fact that they would tend to check the "neutralist" tendencies which were growing increasingly stronger in Germany. After recalling that the Assembly had heeded Marshal Juin's criticisms of the E D.C., he appealed to it now to take heed of a recent warning by the Marshal of the need for strengthening and reinforcing the NATO forces. Although he [M. Schuman] believed that a minimum balance of strength was essential between East and West, he nevertheless felt that Russia had a right to safeguard her own security, and hoped that M Mendès-France would bear this in mind at the next four-Power conference

M. Herriot opposed the Paris agreements on the same grounds as those on which he had opposed the E D C (see 13749 A, page 13754), and announced that he could not vote for them. **M. Duclos** and other Communist speakers strongly attacked the Paris agreements—particularly the rearming of Germany—and called for immediate four-Power negotiations for a settlement of the German problem.

M. Mendès-France, replying to the debate on Dec 23, reiterated his warning that acceptance of the Paris agreements by only a small majority, or with many abstentions, would have a most unfavourable effect abroad. If the Assembly were to divide into three almost equal parts [i e. for the agreements against the agreements, and abstentions] the allies of France could have no confidence in the permanence of her decision, whilst the Soviet Union would be encouraged in speculating further on divisions among the Western allies. Whilst no-one could deny the "repugnance" felt in France at the prospect of even a limited rearmament of Germany, two facts had to be borne in mind that the Russians had been rearming Eastern Germany since 1950, and that France's allies had been insisting on the need for rearming Western Germany since the same year "Last September," M Mendès-France declared, "we were within one millimetre of seeing Germany rearmed without our consent and without controls [A reference to the situation that had arisen after the rejection of the E D C. by the French National Assembly] The Assembly must realize that even if it refuses German rearmament, it would come about just the same"

The aim of the Paris agreements, the Prime Minister continued, was the same as that of the E.D C —to "chain Germany to the West" How, he asked, could Germany escape from the West when British and American troops would be permanently stationed on her soil, and when her own forces would be under the control of the Supreme Allied Commander? The 'pessimistic prophecies" of M Soustelle and other members were, he believed, completely unfounded, and reflected only an "inferiority complex" which was prevalent in France After expressing his conviction that the effect of the agreements would be to restrain German territorial aspirations rather than encourage them, he declared: "These [territorial] claims will not disappear if Germany is rearmed and uncontrolled The risks then would be greater still Would she not then be free to enforce her claims? The agreements before you reduce these risks. They will be reduced if you vote for the agreements, but if you refuse to do so, the risks will be increased."

Whilst emphasizing his desire for four-Power talks with the Soviet Union, M. Mendès-France strongly criticized the entire trend of Soviet post-war policy. In this connexion he pointed out that, although France and Russia were allies, the U.S.S.R had not invited France to take part in the Yalta and Potsdam conferences, that she had attempted to prevent France from having a zone of occupation in Germany, and that, if France had such a zone today, "it is only due to Sir Winston Churchill and to the tenacity of General de Gaulle."

After an all-night sitting on Dec. 23-24, the Assembly voted at 5.30 a m. on Dec. 24 on three separate Bills:

(1) A Bill authorizing the President of the Republic to ratify the agreements relating to the admission of the German Federal Republic to the Western European Union (the expanded Brussels Treaty Organization), involving the rearming of Western Germany, and to the NATO This Bill consisted of the following three articles:

(i) Authorizing the President to ratify the agreements relating to the entry of Western Germany and Italy into the W.E.U., the raising of German armed forces within the framework of that organization, and the creation of an agency to control the armaments of W.E U. member-countries.

(ii) Authorizing the President to ratify the agreements relating to the entry of the German Federal Republic into NATO.

(iii) Making all the relevant agreements under (i) and (ii) above part of the Bill.

(2) A Bill authorizing the President to ratify (*a*) the agreements relating to the restoration of West German sovereignty and the ending of the occupation regime, and (*b*) the convention on the continued maintenance of American, British and French forces in Western Germany.

(3) A Bill authorizing the President to ratify the Franco-German agreement on the Saar which had been signed in Paris on Oct. 23 by M. Mendès-France and Dr. Adenauer.

The voting on these Bills was as follows:

(1) The first article of Bill (1)—that relating to the rearming of Western Germany and her admission to the W.E.U.—was rejected by 280 votes to 259, with 73 abstentions. The Assembly thereupon by-passed the remaining articles of that Bill and proceeded to vote on the second and third Bills.

(2) The Bill for the restoration of German sovereignty and the ending of the occupation regime was adopted by 393 votes to 180, with 38 abstentions.

(3) The Bill for the ratification of the Saar agreement, including the associated Franco-German economic and cultural agreements, was adopted by 361 votes to 147, with 102 abstentions.

In the voting on the first (rejected) article of the first-mentioned Bill, it was noteworthy that nearly 100 deputies who voted for the Government after the debate on the London Conference opposed the Government in the division on Dec. 24 —among them 26 Radicals, 25 Social Republicans (Gaullists) and 21 Socialists. Detailed voting figures in this division were as follows:

	For	Against	Abstentions
Communists and *Progressistes*	—	98	—
Socialists	83	21	—
Radicals	45	26	5
U D S R	18	2	4
M R P. (Popular Republicans)	6	61	16
Overseas Independents	8	5	—
Social Republicans (Gaullists)	34	25	12
Independent Republicans	23	15	14
Independent *Paysans*	11	4	13
Paysans	10	8	1
Dissident Gaullists (A R S.)	17	8	8
Non-inscrits	4	7	—

After these votes (none of which was made a question of confidence) had been taken, M. Mendès-France announced that when the Assembly re-convened on Dec. 27 after the Christmas recess he would ask for a vote of confidence on the second and third articles of the first Bill (i.e. those articles relating to Western Germany's admission to the NATO). He added that he would ask the Assembly at the same time.

(*a*) To approve the inclusion in the Bill of an amendment (moved by M Gaston Palewski, Gaullist, and accepted by the Government) declaring that all the Paris agreements should be regarded as an indissoluble whole, and that all instruments of ratification of the various protocols and conventions should be deposited simultaneously.

(*b*) To reject an amendment (moved by M Loustaunau-Lacau, *Paysan*) proposing that the Bill should only come into effect after the signature of an additional protocol by all member-countries promising the "strict implementation" of the Paris agreements

(*c*) To reject an amendment by M Palewski proposing that the agreements should only be ratified on Dec. 1, 1955, "if no agreement has been reached in the meantime by France, the U S.A , the U.K., and the Soviet Union on the terms of a general disarmament on the basis of the Franco-British proposals [i e. those presented to the U.N. Disarmament Commission in June, 1954—see 13681 C] and on the settlement of the German problem."

M. Mendès-France also announced that he would ask for a second vote of confidence on the Bill as a whole after the rejected Article 1 of the first Bill had been dealt with separately.

The debate on the remaining Articles of the first Bill was accordingly resumed on Dec. 27.

M. Mendès-France, speaking on that date, made an urgent appeal for the support of the 350 deputies who, in October, had voted for the Government after the debate on the London Conference decisions. Since then, he emphasized, Britain had made the historic decision to retain troops on the Continent, and France had obtained a settlement of the Saar question for which she had striven for ten years. A vote against the Government would not only nullify these advantages but would mean the complete isolation of France from her allies and in international affairs generally. To reject the agreements because they did not go far enough or speedily enough towards European integration would close the door to any such integration. As regards the demand for a last attempt at negotiating with the U S S.R. before ratification of the Paris agreements, the Prime Minister said that if he had thought that there was a serious chance of success, he would have regarded it as his duty to try it. He agreed with the British, however, that the chances of success would be greater after ratification Had the Soviet Union wished "to take a step forward," she had had ample opportunities for months past, especially after the rejection of the E.D C. treaty.

"It is the Atlantic pact which is at stake," the Prime Minister declared. "Either we keep our place in the Atlantic alliance or we become isolated We may go on sitting in NATO, but what will our presence be worth if we are opposed to all the other members? . . If we reject the agreements, our credit with our allies will be non-existent; and from the moment we are thus isolated, I doubt whether our credit with Russia will be worth much either . . . Not to ratify the agreements would make a four-Power conference more difficult than ever. There might be a two-Power or three-Power conference, but France might not be invited because she would, in effect, have left the Atlantic alliance . . ." In conclusion, M. Mendès-France emphasized that if the Assembly rejected the Paris agreements, he knew of no further alternative to propose to the Western allies. Moreover, he had no reason to believe that the allies would be willing to consider new negotiations

After further debate, during which M. Loustaunau-Lacau and M. Palewski agreed—in response to strong appeals by the Prime Minister—to withdraw their amendments [(*b*) and (*c*) above], M. Mendès-France was given a vote of confidence by 289 votes to 251, with 78 abstentions—a Government majority of 38. The voting by parties was as follows:

	For	Against	Abstentions
Communists and *Progressistes*	—	98	—
Socialists	86	17	—
Radicals	44	27	5
U D.S R.	18	3	3
M R P. (Popular Republicans)	17	50	17
Overseas Independents	8	5	2
Social Republicans (Gaullists)	38	18	14
Independent Republicans	30	11	12
Independent *Paysans*	14	3	11
Paysans	12	7	3
Dissident Gaullists (A R S.)	18	4	11
Non-inscrits	4	8	—

Analysis of the voting figures showed that the Government was supported by a number of deputies—principally from the M.R.P., Independent Republicans, and *Paysans* but also including some Gaullist and Socialists—who, in the division on Dec. 24, had either voted against the Government or had abstained.

During the early hours of Dec. 28, however, a procedural deadlock arose when the Assembly's Foreign Affairs Commission, by 20 votes to 19, refused to re-submit the first (rejected) article of Bill (1) to the Assembly, as had been demanded by M. Mendes-France. The Prime Minister thereupon re-introduced the disputed article in the form of a completely new Bill, returned it to the Foreign Affairs Commission in this form (at 3 30 a.m.), and announced that he would ask for a vote of confidence on it.

The redrafted Bill authorized the President of the Republic to ratify the agreements for the conversion of the Brussels Treaty Organization into the Western European Union, the admission of Western Germany and Italy to the W.E.U., the provision by member-countries, including Germany, of armed forces of agreed strength under the W.E.U. arrangements, and the creation of an armaments agency responsible to the Council of the Western European Union. It included an amendment by M. Léon Noel (Gaullist), which had been accepted by M. Mendès-France during the previous debate, providing for the setting-up of two parliamentary sub-committees (one in each House) which would observe the application of the W.E.U. agreements, and which would be consulted by the Government before it gave its agreement in time of peace to any increase in the permitted levels of the national forces of the Western European Union. In addition the new Bill incorporated M. Palewski's amendment declaring that all the Paris agreements should be regarded as an indissoluble whole, and that all ratifications of those agreements should be deposited simultaneously.

With the addition of M. Noel's and M. Palewski's amendments, the new Bill was therefore identical with the first Article of the original Bill which had been rejected by the Assembly on Dec. 24.

The Assembly's Foreign Affairs Commission approved the new Bill in the early hours of Dec. 28 by 18 votes to 17, with four abstentions, and re-submitted it to the National Assembly, which resumed its debate on Dec. 29 to consider the two confidence votes still outstanding, i.e. (*a*) the vote on the new Bill "reviving" Article 1 of the first Bill; (*b*) the vote on the remaining Articles (2 and 3) of the first Bill, taken "as a whole."

The principal speakers in the resumed debate were M. Guy Mollet, secretary-general of the Socialist Party, and M. Gaston Palewski (Gaullist).

M. Mollet, putting forward the majority view of the Socialist Party, emphasized that every Socialist in France was disturbed at the thought of a rearmed Germany only nine years after the ending of the Second World War. However, the policy pursued since 1945 by the Soviet Union had made a German military contribution to the defence of the free world essential, and it was only because of Russian policy since the end of the war that America, Britain, and other allies of France had insisted on the rearming of Germany. In a strong attack on Russian post-war policy, M. Mollet said that the Soviet Union had failed to demobilize its forces, had maintained a high level of armaments, and had destroyed the liberty of "a fantastic number of people"—all of which represented a threat to the free nations, who were necessarily forced to take measures for their own self-defence. He believed, nevertheless, that Russia would never unleash a war if she believed that the U.S.A. might be involved, and was therefore of the opinion that the presence of American forces in Europe provided the most effective means of avoiding war. Had there been even one American division in Europe in 1939, M. Mollet declared, the Second World War would never have taken place. He regretted that the German Social Democrats, alone among the Socialist parties of Western Europe, were opposed to a German military contribution to Western defence, but believed that this was explainable by their preoccupation with the question of German reunification, to the exclusion of all other considerations. In conclusion, M. Mollet promised the Socialist Party's full support for M. Mendès-France in the division.

M. Palewski contended that a straight ratification of the Paris agreements would constitute "an immense national defeat" by setting German rearmament automatically in motion without proper safeguards. If M. Mendès-France thought that he could retard this he was wrong, as it would be the other Allies who would determine the speed of German rearmament, wishing, as they did, to bring it about before the start of four-Power negotiations. Already, he pointed out, the Moscow Conference had decided on a tightening-up of the Soviet and "satellite" military machine in the face of West German rearmament. Whilst this "perhaps might only be bluff," no-one could deny that the delay of the last four years on the decision to rearm Germany, far from causing an increase in international tension, had brought about an increasing *détente*.

Mme. de Lipkowski (*non-inscrit* and a former Gaullist), in an impassioned appeal to the Assembly on behalf of the families of Resistance members and those who were deported by the Germans during the war, declared that a vote for the agreements would constitute "a crime against peace."

A further procedural difficulty arose, however, owing to the that fact M. Noel, shortly before the beginning of the debate, had withdrawn his amendment, which the Government had incorporated in the new Bill reviving Article 1. On the demand of several Communist deputies and other opponents of the Paris agreements, who maintained that the basis of the confidence motion had thereby been altered, it was eventually decided that the vote on this Bill should be postponed for another 24 hours to meet the constitutional requirements. Attempts to postpone also a final vote on the remainder of the first Bill (i.e. Articles 2 and 3, with the "Palewski amendment") failed, however, owing to the Prime Minister's insistence on an immediate vote. When this was taken in the early hours of Dec. 30, the Bill for the entry of Western Germany into NATO was adopted "as a whole" by 287 votes to 256, with 78 abstentions—a Government majority of 31.

Later on Dec. 30 the debate was resumed on the final vote of confidence on the new Bill relating to the Western European Union and the rearming of Western Germany, which was eventually adopted by 287 votes to 260, with 74 abstentions—a Government majority of 27. Detailed voting figures in the final division were as follows:

	For	Against	Abstentions
Communists and *Progressistes*	—	98	—
Socialists	86	18	—
Radicals	44	27	5
U.D.S.R.	18	2	4
M.R.P. (Popular Republicans)	16	53	15
Overseas Independents	8	5	3
Social Republicans (Gaullists)	37	23	11
Independent Republicans	30	11	12
Independent *Paysans*	14	3	11
Paysans	12	7	3
Dissident Gaullists (A.R.S.)	19	5	9
Non-inscrits	3	8	1

The votes cast by some of the prominent party leaders in the final division on this Bill are listed below:

Socialists. *For*—M. Felix Gouin, M. Daniel Mayer, M. Jules Moch, M. Guy Mollet. *Against*—M. Max Lejeune, M. Naegelen.

Radicals. *For*—M. Mendès-France (the Prime Minister), M. Bourgès-Maunoury, M. Delbos, M. Edgar Faure, M. André Marie, M. Martinaud-Déplat, M. René Mayer, M. Henri Queuille. *Against*—M. Daladier, M. Edouard Herriot.

U.D.S.R. *For*—M. Mitterrand, M. Claudius-Petit. *Abstained*—M. René Pleven.

M.R.P. *For*—M. Paul Coste-Floret, M. Pflimlin. *Against*—M. Letourneau, M. Louvel, M. de Menthon, M. Maurice Schumann, M. Teitgen. *Abstained*—M. Georges Bidault, M. Robert Schuman.

Social Republicans (Gaullists). *For*—M. Chaban-Delmas, General Corniglion-Molinier. *Against*—M. Gaston Palewski, M. Soustelle. *Abstained*—M. Pierre de Gaulle (brother of General Charles de Gaulle), General Koenig, General de Monsabert, M. Léon Noel.

Independent Republicans. *For*—M. Guy La Chambre, M. Jacquinot. *Against*—General Aumeran. *Abstained*—M. Pierre Montel, M. Antoine Pinay, M. Paul Reynaud.

Dissident Gaullists. *For*—General Billotte, M. Frédéric-Dupont.

Among the *non-inscrits*, M. André Marty and M. Auguste Lecoeur (both of whom had been expelled from the Communist Party) voted against the Government.

Five former Prime Ministers supported the Government (MM. Gouin, André Marie, Queuille, Faure and René Mayer), two voted against (MM. Daladier and Herriot), and five abstained (MM. Bidault, Reynaud, Schuman, Pleven, and Pinay). M. Laniel was absent through illness.

The final vote—the result of which was received in silence—marked the end of four years' discussions in the French National Assembly on the general question of a Western European defensive system, and on German rearmament within the framework of such a system. The debate on this matter had begun when the E.D.C. project—now superseded by the Western European Union—was first brought forward in 1950.

After the Assembly's session of Dec. 30 had ended, the Communist deputies—who had bitterly opposed the Government's Bills at all stages of the debate—demonstrated against M. Mendès-France and, in particular, against M. Mollet and other Socialist leaders, whom they denounced as "nazis" and "assassins."

The French Assembly's adverse vote on Dec. 24 had caused grave disquiet in Britain, America, and other NATO countries, the following statement being issued by the British Foreign Office on that date:

"The Paris treaties are still under discussion in the French Chamber and there is to be a further vote. . . . What is at stake is the unity of the Western Allies. The rejection of the Paris agreements would not mean that German rearmament would not take place. The

issue is not whether the German Federal Republic will rearm but how. The U.K. commitment to maintain British forces on the Continent of Europe depends on the ratification of the Paris agreements by all the parties."

Although no official statement was issued in Washington, the President's press secretary said that President Eisenhower regarded the National Assembly's vote with the "utmost seriousness." The President (who was then on holiday in Georgia) had two telephone conversations with Mr. Dulles after the result of the vote had become known in Washington, and Mr. Dulles had a conversation with the British Ambassador, Sir Roger Makins.

The final ratification of the Paris agreements by the National Assembly, however, was warmly welcomed in all the Western capitals, the following statement being issued by President Eisenhower on Dec. 30:

"The recent series of actions taken by the French Assembly is a matter of great gratification, not only to the United States but to the entire free world. There are, of course, further steps to be taken both in France and elsewhere before a satisfactory foundation for Western defence has been achieved. But of particular importance is the fact that the French Deputies, after initial hesitations against bringing Germany into Western defence arrangements, have now voted to ratify the new treaties signed in Paris last October . . . Once sovereignty is restored to the Federal Republic, with German participation in the NATO, there will be added defensive strength and general solidarity in Western Europe. As decisive co-operation supplants age-old antagonism, so the prospect for a general and lasting peace will be definitely improved, and a measure of encouragement may therefore even now be felt by all who are earnestly striving to maintain and improve the unity and harmony of the free world."

Statements welcoming the French Assembly's decision were also made by Dr. Adenauer, the Federal German Chancellor; by Signor Scelba, the Italian Prime Minister; by Mr. Lester Pearson, the Canadian Minister for External Affairs; and by the British, Belgian and Netherlands Foreign Offices.

Dr Adenauer expressed the satisfaction of the Federal Parliament, and of himself personally, at the French National Assembly's vote. "The proceedings of the National Assembly," he added, "have shown what extraordinary difficulties of a political and psychological character still remain on the way to a Europe capable of unified action. Many of these difficulties are explained by the tragic past, which, we hope, will be finally closed by the realization of the treaties. The Federal Republic will make its contribution with good will, persistence, and moderation to the common work of the European nations, in the conviction that the freedom and peace of the Western world can be maintained only in this way."

Signor Scelba paid tribute to the "courage and tenacity" which M. Mendès-France had displayed in facing "a not too easy parliamentary battle" and expressed his pleasure at the fact that the French Parliament, "faced with a hard choice between alternatives," had finally given its approval to the Paris agreements. "By this vote," he added, "another decisive lap in the consolidation of European unity has been covered." [The Italian Chamber of Deputies had ratified the agreements on Dec. 23—see 13974 D].

Mr. Lester Pearson issued the following statement in Ottawa: "We must now prove that the rearmament of Germany, not unlimited or uncontrolled but within the context of NATO and Western European Union, is not only no menace to France or to any other country, but, on the contrary, will help to associate Germany with the free Western world in such a way that peace and security will be strengthened."

In London, the Foreign Office said that the National Assembly's decision would "hearten all those who have joined together in the Atlantic alliance for the defence of the free world . . . A good start has now been made in France, Italy, Britain, and other countries. We must hope that the process of ratification can now be pushed on and completed as soon as possible"

The leader of the German Social Democrats, Herr Ollenhauer, said that his party's opposition to the Paris agreements remained unchanged, that it would continue to demand four-Power negotiations on German unification before Western Germany was rearmed, and that the closeness of the voting in the French National Assembly showed "how disputed these treaties are among the democratic forces in the partner-States." A. GERMANY. — Population Figures.

The Federal Statistics Office in Bonn stated on Jan. 4 that the total population of Germany was 71,581,249, distributed as follows: 49,652,000 in Western Germany, 17,600,000 in Eastern Germany, 2,194,600 in West Berlin, and 1,175,000 in East Berlin. The figure included the population of the Saar (959,649), which since the end of the war has been an independent territory closely linked with France. (Frankfurter Allgemeine Zeitung)

(Prev. rep. 11477 E.)

B. UNITED KINGDOM. — Railway Reorganization Scheme. - Membership of Railway Area Boards.

The six area boards which, under the railways' reorganization scheme, will be responsible (as from Feb. 1, 1955) for running the railways in the various regions of British Railways, were officially set up on Jan. 1. Their membership had been announced on Dec. 29, 1954, by the British Transport Commission, as follows:

London Midland Area. Chairman—Lord Rusholme, member of the Commission. Members—Mr. Leonard Cooke, vice-president, Co-operative Wholesale Society Ltd.; Sir Francis Glyn, chairman and managing director, Glyn Mills & Co. Ltd.; Major-General Sir John Kennedy, lately Governor of Southern Rhodesia; Sir Basil McFarland, director, Belfast Banking Co. Ltd.; Mr. R. F. Summers, director, United Steel Companies Ltd.

Eastern Area. Chairman—Sir Reginald Wilson, member of the Commission. Members—Sir Edmund Bacon, Lord-Lieutenant of Norfolk; Mr A. F. Pegler, vice-chairman, Northern Rubber Co. Ltd, Mr. Jack Tanner, ex-president, Amalgamated Engineering Union; Mr. H. U. Willink, Q.C., Master of Magdalene College, Cambridge.

North-Eastern Area. Chairman—Mr. T. H. Summerson, hon. vice-president, Association of British Chambers of Commerce, and chairman of the Tees-side Industrial Development Board. Members—Dr. James Armit, member of the Tees-side Conservancy Commission and the Tees-side Chamber of Commerce; Sir John Benstead, member of the Commission (his appointment to the Area Board was a temporary one), Sir Mark Hodgson, ex-president, Confederation of Shipbuilding and Engineering Unions; Mr. G. H. Kitson, member of the council of Leeds Chamber of Commerce; Mr. P. D. Priestman, president of Hull Chamber of Commerce.

Scottish Area. Chairman—Sir Ian Bolton, member of the Commission. Members—Lord Bilsland, chairman of the Scottish Council (Development and Industry); Lieut.-Colonel D. H. Cameron of Lochiel, member of the Commission; Mr. J. C. Denholm, president, Chamber of Shipping of the U.K. in 1954; Councillor Peter L. Meldrum, deputy chairman of Glasgow Corporation and chairman of the Clyde Valley Regional Planning Advisory Committee; Sir Hugh Rose, chairman, Scottish Provident Institution, and a director of the Union Bank of Scotland, Mr W. G. N. Walker, member of the Scottish Board for Industry.

Southern Area. Chairman—Sir Philip Warter, chairman of the Associated British Picture Corporation Ltd. Members—Mr. J. E. Binks, ex-president, National Union of Railwaymen; Mr. H. F. B. Iles, chairman, Margate Estates Co. Ltd.; Mr. H. L. R. Matthews, director, Abbey National Building Society; Mr K. Preston, chairman and managing director, J. Stone & Co. (Holdings) Ltd., and a director of the Midland Bank; Mr. A. B. B. Valentine, member of the Commission.

Western Area. Chairman—Sir Herbert Merrett, chairman of Powell Duffryn Ltd and Cory Bros. & Co. Ltd. Members—Mr. Arthur Chamberlain, managing director, Hercules Cycle & Motor Co. Ltd. and director, Tube Investments Ltd.; Alderman F. A. Parish, chairman, Bristol Dock Labour Board; Sir John Carew Pole, chairman of Cornwall County Council; Mr. John Ryan, member of the Commission; Captain Hugh Vivian, a director of Associated Electrical Industries Ltd.

A motion giving effect to the railways' reorganization scheme had been carried by the House of Commons on Nov. 23 by 286 votes to 266. The Labour Party maintained its opposition to devolution through area boards, contending that the Transport Commission possessed all the powers necessary to carry out reorganization.—(Times - Daily Telegraph)

(Prev. rep. Reorganization Scheme, 13698 A.)

C. PERSIA - SOVIET UNION. — Agreement on Soviet War Debt Payment and Frontier Delimitation.

An agreement was signed in Teheran on Dec. 2, 1954, under which (*a*) the Soviet Union agreed to pay its war debt to Persia, amounting to 11 tons of gold and over $8,000,000 (£2,700,000); (*b*) both countries agreed to map their common frontier, some points of which had been in dispute for over a century. The war debt settlement arose out of the agreement whereby the Soviet Army occupied northern Persia during the war, and represented the cost of billeting the Soviet occupation forces, their food, transport and communications facilities, and the use of plant.—(Times - Manchester Guardian)

(13172 B.)

D. KOREA. — U.N. Command. - Areas north of 38th Parallel transferred to South Korean Administration.

On the recommendation of the U.N. Commission for the Unification and Rehabilitation of Korea (UNCURK), the U.N. Command decided on Aug. 14, 1954, to transfer to the South Korean Government the responsibility for administering the 2,300 square miles of territory north of the 38th Parallel which remained under U.N. control after the signing of the armistice agreement (see map, page 13078). The area in question, with a population of 130,000, includes rich farmlands and several tungsten mines.—(New York Times)

(Prev. rep. Korea, 13874 A.)

A. SUDAN. — Cabinet Crisis. - Major Salem's Visit to Khartoum. - Cabinet Reorganization. - Mr. Azhari's Visit to Britain and Western Europe. - Appointment of Sudanese to Provincial Government Posts. - Resignation of Sir Robert Howe. - Sir Knox Helm appointed Governor-General of the Sudan.

A major crisis developed in the Sudanese Cabinet during December as a result of a difference between the Prime Minister, Mr Ismail Azhari, and a group of Ministers who favoured a more independent policy in relations with Egypt. The Ministers in question—Mr. Khalafalla Khalid (Defence), Mr. Mirghani Hamza (Education, Agriculture, and Irrigation), and Mr. Ahmed Jali (Minister of State), all of whom are closely associated with Sir Sayed Ali el-Mirghani, leader of the Khatmia sect—were removed from office on Dec. 23, the Cabinet being reconstituted two days later.

Signs of friction between the Khatmia sect and the pro-Egyptian Ministers drawn from the former Ashigga Party had appeared during September and October, when Mr. Khalid made a number of public statements declaring that the Government would never accept Egyptian domination, and that the Sudan must become and remain a sovereign State. As a result Major Salem, the Egyptian Minister for Sudanese Affairs, paid a sudden visit to Khartoum from Sept. 30 - Oct. 12, had talks with Mr. Azhari and other Ministers, and made a number of public statements in which he emphasized that Egypt did not intend to dominate the Sudan and wished to see the Anglo-Egyptian agreement "carried out in the letter and the spirit."

Major Salem's visit was strongly resented by the Umma Party, which alleged that it was "an open breach" of the Anglo-Egyptian agreement and formally protested against it to the Governor-General and to the British and Egyptian Governments. After a speech by Major Salem promising support to the Khatmia sect, the Umma Party threatened on Oct 12 that if the Government did not stop Egyptian interference in Sudanese affairs, it (the Umma Party) would refer the question to the United Nations. [The Umma Party draws its support mainly from the rival Ansar sect.]

Mr. Azhari, in a statement issued on Dec 19, revealed that when he had returned on Dec. 3 from his visit to Europe (see below) he had learned that "a certain Minister" (believed to be Mr. Jali) had asked for the removal of certain members of the Cabinet, and had given warning that "in the event of failure to meet the demand, the author of the message and other Ministers not named will co-operate with the pro-independence Opposition Umma Party, cause the Cabinet to fall, and form another Government." Although Mr. Azhari had considered this "most serious," he had preferred to postpone a decision until the Sudanization programme was completed, and on Dec. 12, before leaving for a visit to Darfur, had called a special Cabinet meeting at which he had emphasized the importance of completing that programme according to plan before Jan 1, 1955. "Another Minister" (believed to be Mr. Hamza), however, had refused to attend Cabinet meetings during his absence, and two others (Mr. Jali and Mr Khalid) had deliberately absented themselves, "thus hindering the Sudanization procedure owing to the lack of a quorum." In conclusion, Mr Azhari declared that this state of affairs would lead to "harmful consequences" for the country if it was allowed to continue.

Mr. Hamza, Mr. Khalid, and Mr Jali, in a statement issued on Dec. 20, denied that they had threatened to co-operate with the Umma Party to overthrow the Government, and accused the Prime Minister of having had secret meetings with Major Salem during his visit to the country, of favouring certain Ministers and giving them access to Government secrets, and of ignoring others who did not accept "Egyptian domination." "Azhari's allegations," the statement added, "cannot influence us to depart from our advocacy of Sudanese sovereignty and freedom. We maintain that the Government should define its political programme immediately."

At Mr. Azhari's request, the Governor-General (Sir Robert Howe) dismissed the three "rebel" Ministers from office on Dec. 23. A reconstruction of the Cabinet was announced on Dec. 25 as follows:

Mr. Ismail Azhari	Prime Minister, Interior, and Defence.
Mr. Hammad Tewfik	Finance.
Mr. Mubarak Zarouk	Communications.
Mr. Mudathir el-Bushi	Justice.
Mr. Ibrahim el-Mahallawi ..	Mineral Resources.
Mr. Santino Deng Teng ..	Stores and Supplies.
Mr. Dak Dei	Mechanical Transport.
Mr. Khader Hammad .. .	Irrigation.
Mr. Ali Abdel Rahman.. ..	Education.
Mr. Yahia el-Fadli	Social Affairs.
Mr. Mohammed Ahmed el-Mardi	Local Government.
Mr. Hassan Awadalla . .	Agriculture.
Mr. Ibrahim el-Mufti .. .	Economic Affairs.
Dr. Amin es-Sayed	Health.
Mr. Bullen Alir Debiar ..	Animal Husbandry.

The reconstituted Cabinet involved the creation of three new Ministries—those of Mineral Resources, Stores and Supplies, and Mechanical Transport.

In a broadcast from Cairo on Dec. 29, Major Salem violently attacked Mr Hamza, Mr. Khalid and Mr. Jali as "traitors" who had co-operated with the Umma Party and the British to serve "British imperialist purposes." Mr Azhari, however, made a strong protest to the Egyptian Government on Dec. 21 against "biassed and irresponsible" attacks on the three Ministers by the Egyptian radio and Press, which, he said, did not serve the cause of Sudanese - Egyptian relations.

Mr. Azhari, together with Mr. Yahia el-Fadli and Mr. Ali Abdel Rahman, had previously visited Britain from Nov. 8-18 as the guest of the British Government, and while in London was received by the Queen and met Sir Winston Churchill and Sir Anthony Eden. Mr. Fadli stated on Nov. 8 that the delegation would discuss the question of long-term credits to the Sudan, notably for public works in Kordofan Province. The three Ministers afterwards visited Paris from Nov. 18-21 at the French Government's invitation, and had talks with French Ministers, including M. Chaban-Delmas (Minister of Public Works and Transport), with whom Mr Azhari discussed the possibility of French technical and scientific aid to the Sudan. After leaving Paris Mr. Azhari visited Brussels, Bonn (where he met President Heuss and Dr. Adenauer) and Rome (where he had discussions with Signor Scelba), returning to Khartoum on Dec. 3.

Before his visit to Europe Mr. Azhari had made a tour from Oct. 15-26 in the Southern provinces of the Sudan, where demands had been put forward for a greater degree of autonomy for the South and for increased Southern representation in the Sudanese Government and the administration. Although in general he was given a friendly reception by the people, an attempt on his life was made at Malaki (Upper Nile Province) by a Southern official, who was arrested while attempting to stab the Prime Minister.

While Mr Azhari was making his tour of the Southern Sudan, some 500 tribal representatives took part in a conference at Juba on Oct. 18, which had been called by the Southern Party to discuss the attitude of the Southern Provinces toward constitutional questions. The organizers of the conference announced on Oct 26 that it had adopted a resolution advocating the establishment of an independent Sudanese republic and opposing union with Egypt, and that it had decided to send a message to the British and Egyptian Governments demanding that the Sudan should be organized on federal lines.

Mr. Azhari announced on Aug 17 that nine Sudanese administrators had been promoted to the posts of Provincial Governors, eight to Deputy Governors, 32 to District Commissioners, and 35 (including four Southerners) to Assistant District Commissioners, in place of British members of the Sudan Political Service. This was the first occasion on which Sudanese had been promoted to Provincial Government posts.

It was announced in Khartoum on Jan. 2-4, 1955, that all British members of the Sudan Judiciary had given notice of their resignation to the Governor-General, and had requested their release in February or March; that all five British specialists at the Ministry of Health had given similar notice of resignation; and that 71 British technicians had done likewise. All these notices of resignation were given under the compensation ordinance, which laid down that the service of every expatriate official could be terminated, either by the Government or by the official concerned, by six months' notice in writing given on or after Jan. 1, 1955. [When the present Sudanese Government came to power a year ago there were 1,344 British "expatriates" in Government employment, of whom 104 have since left.] The last British senior official in the Sudan Government (Mr. G. W. Bell, Permanent Under-Secretary of the Interior) left the country on Dec. 14.

The British Foreign Office announced on Dec. 30 that Sir Robert Howe had informed the British and Egyptian Governments of his wish to retire for personal reasons, and that Sir Knox Helm had been appointed to succeed him. In accordance with the procedure laid down in the Anglo-Egyptian Condominium Agreement of 1899, the appointment was formally made by the Egyptian Government on the British Government's recommendation. Sir Knox Helm (61) was formerly Minister to Hungary (1945-47), Minister to Israel (1947-51) and Ambassador to Turkey (1951-53).—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Cabinet, 13377 A; Relations with Egypt, 13929 A; Sudanization, 13729 E.)**

B. GENOCIDE CONVENTION. — Ratification by German Federal Republic.

The international Genocide Convention of 1951, outlawing the destruction of national, religious, ethnic or racial groups, was ratified on Nov. 24 by the German Federal Republic, which became the 47th country to deposit its instrument of ratification with the United Nations.
(Frankfurter Allgemeine Zeitung) **(Prev. rep. 13748 E.)**

A. UNITED KINGDOM. — Dock Labour Disputes. - The Hull and London Strikes. - Dispute between Transport and General Workers' Union and National Amalgamated Stevedores' and Dockers' Union. - Increase in Dockers' Guaranteed Minimum Wage.

A number of labour disputes involving serious stoppages of work took place at British ports during 1954, culminating in a strike which broke out in the Port of London at the beginning of October and quickly spread to other ports, until before the end of that month it was estimated that at least half of the country's overseas trade had been brought to a standstill. Details of the various strikes and disputes are given under cross-headings below.

The Hull Grain-handling Strike. This unofficial stoppage, which paralysed the port of Hull for about 10 days, began on Aug. 17, when 12 dockers who had been transferred by the National Dock Labour Board from Cardiff refused to fill sacks in the holds of vessels discharging grain (as is customary at Hull when elevator-equipped berths are not available) on the grounds that this practice was injurious to health because of the dust involved, and had been abandoned at other ports Although the Cardiff dockers were at once replaced by local men, these also subsequently ceased work, rejecting an appeal by officials of their union (the Transport and General Workers' Union) to remain at work pending negotiations with the employers. The strike spread rapidly throughout the port, and despite a union warning that the strikers would get no support from union funds, 4,600 dockers and 63 ships were idle by Aug 18. On Aug. 22, however, about one-quarter of the strikers voted to return to work, and on Aug. 26 (when the number of ships idle had risen to 88) the remainder decided to resume on the understanding that discussions between the port employers and the T.G.W.U. on grain handling would begin immediately. Brief stoppages had taken place at Goole on Aug 21-22 and Aug. 25-26 in protest against the alleged diversion to that port of small perishable cargoes originally destined for Hull.

Dispute between T.G.W.U. and National Amalgamated Stevedores' and Dockers' Union. Notwithstanding the resumption of work at Hull, much resentment was voiced by the former strikers at the refusal of the Transport and General Workers' Union to support the strike, and on Sept 14 it was announced that about 2,700 Hull dockers had applied to join the National Amalgamated Stevedores' and Dockers' Union (whose membership had hitherto been drawn exclusively from London port workers) and that their applications had been accepted. In a statement on Sept 15, Mr. Arthur Deakin (general secretary of the T G W U) denounced the N A S D.'s acceptance of the applications as an "infringement of the Bridlington agreement," and declared that, in consequence, the T.G W.U. could take no further joint action with the N.A.S.D., which could "no longer be regarded as a constituent part of the National Joint Council for the Port Industry" [The "Bridlington agreement" controls relations between unions affiliated to the T.U.C , and stipulates that no union may accept members of another union which is engaged in a trade dispute, or begin organizing activities at any industrial establishment where the majority of workers are members of another union which negotiates wages and conditions, except by arrangement with the union concerned.] Mr Deakin added · "What is taking place at Hull is not a revolt against the T.G W.U. but a studied attempt by the Stevedores' Union—amongst whose members are several well-known Communists—to create chaos and confusion at British ports. By imperilling accepted agreements they are doing a great disservice to dockers"

The N A S D. nevertheless decided on Sept. 17 to open an office at Hull, and on the same day dissatisfied dockers at Birkenhead urged their fellow-workers to break away from the T.G.W.U. and to join the N.A.S.D. Although the T.G.W.U. issued a statement pointing out that the Birkenhead port employers had been under agreement since 1912 to employ only T.G W U. members, 800 Birkenhead dockers voted on Sept. 19 in favour of leaving the T.G.W.U. and enrolling with the N.A S.D. On Sept. 22 the T.U.C General Council ordered the N.A S D to stop recruiting provincial members and to "reverse any action already taken to enrol them." It also warned the general secretary of the N.A S.D. (Mr. Barrett) that if, after investigation, his union was found to have contravened Rule 13 of the T U.C. Standing Orders (which forbids any union to engage in "activities detrimental to the trade union movement or the declared principles of Congress"), it would be liable to be suspended from T.U.C. affiliation until the next Congress.

In spite of the warning from the T U.C. General Council, the executive of the N.A.S.D. decided on Sept 25 to open membership recruiting offices at further ports. It was stated that applications to join the union had been received from 1,650 dockers at Birkenhead (about half the number employed there), as well as from many others at Liverpool and Manchester. The Birkenhead applicants were admitted to membership on Oct. 3 and members were also subsequently recruited at Liverpool, whereupon the T.U.C General Council, on Oct. 25, suspended the union from affiliation for disobedience [The N.A.S.D. had previously been expelled from T.U.C. affiliation for "poaching" members from the T.G.W.U. in 1925, and had not been readmitted until 1945.]

The London Meat-handling Strike. An unofficial stoppage took place at the London "Royal" docks on Sept. 28, when about 1,000 dockers handling meat cargoes ceased work in support of their demand for the reintroduction of the pre-war system of making special payments for sorting meat by grade and destination. These payments had been suspended during the period of meat rationing, when sorting was unnecessary, but when free trading in meat was restored the men had demanded their reintroduction because of the time involved in handling meat cargoes, which are paid for at piece-rates. The T.G.W U had agreed to negotiate with the employers and had eventually reached agreement with them, but the N A.S D., representing a minority of the men employed in meat handling, had held aloof from the talks The strike quickly spread to other ships in the Royal docks, but on Oct 1, when 2,200 men and 24 ships (only seven of them carrying meat) were idle, the strike was settled on the understanding that larger gangs would be employed for unloading and sorting meat, and that the men would be paid an extra 5s. per four-hour period whenever sorting took place.

The "Overtime" Strike. This strike, by far the most serious stoppage which had taken place at British ports for many years, broke out in the Port of London on Oct. 4 and lasted until Nov. 1. It had its origins, however, as far back as Jan. 3, 1954, when certain dockers, including an N.A S D official, were "disciplined" by the Dock Labour Board for refusing to work overtime when called upon to do so The N A S.D. (representing about 7,000 London port workers, compared with about 21,000 represented by the T.G.W.U) then declared a ban on overtime (see 13572 A) until the employers agreed that it was "voluntary" and not "compulsory," whereupon the employers refused to negotiate with the N.A.S.D. on any issues whatever until this ban was lifted

The strike was called by the N.A.S.D. on Oct. 4 following the employers' refusal to discuss with it the meat-handling dispute (see above); Mr Barrett explained to a mass meeting of N.A.S.D. members on that day that it was proposed to continue the stoppage until the employers agreed to discuss with the union all outstanding matters, including overtime Despite an appeal by Mr. Deakin to T.G.W.U. members not to take part in the strike (described by him as "a reckless attempt to throw British ports into chaos"), and a promise that the T G.W.U. would support any of its members who were precluded by the strike from working, the stoppage spread rapidly, and by Oct. 5 about 11,000 workers (including about 4,000 T.G.W.U men) had ceased work and 81 ships—more than half of those in the port—were idle. On the same day the T.G W.U. issued a statement saying that the trade union side of the National Joint Council for the Port Industry had decided to apply for an increase in all dockers' "attendance money" and "fall-back rates," and had confirmed its intimation to the N.A S D. that that union could "no longer be regarded as being a party to the joint negotiations in the dock industry."

The strike nevertheless continued to spread, and by Oct. 10 about 18,000 dockers and stevedores had ceased work, 114 ships were idle, and all loading and discharging had ceased throughout the port except at Tilbury and Northfleet, where 11 ships were still working. Although many men employed by the Port of London Authority on a weekly basis returned to work on Oct. 11, T.G.W.U. members at Tilbury decided to join the strike, whilst on Oct. 12 the executive of the Watermen, Tugmen, Lightermen and Bargemen's Union recommended their members to cease work in support of the demand for "voluntary" overtime, and the (unofficial) London dockers' strike committee threatened to call "sympathetic" strikes of dockers at all British ports.

On Oct. 14, when 132 ships throughout the port—i.e. all except one—were idle and 21,000 men were on strike (7,000 of them being N.A.S.D. members on official strike and 14,000 T.G.W.U. men who had stopped work in sympathy), Sir Walter Monckton, the Minister of Labour, invited representatives of the employers, the T.G.W.U., and the N.A S.D. to discuss the situation with him. These discussions, however, proved fruitless, and a strikers' meeting at the Albert Hall to hear a T.G.W.U. appeal for a return to work broke up in disorder. Afterwards, the employers issued a statement pointing out that the working of "reasonable overtime" at the docks had always been recognized as necessary, and was obligatory under the National Dock Labour Scheme The statement added that the interpretation of "reasonable overtime" presented no difficulty since individual dockers had the right to find substitutes if they themselves were unable or unwilling to work on. "The return to normal working conditions, including overtime," the statement concluded, "can and will be followed at once by conversations to settle any outstanding difficulties."

On Oct. 15 Sir Walter Monckton announced that the Government had decided to set up a court of inquiry into the dispute, which was "seriously affecting the export trades, endangering food supplies, and threatening to cause unemployment in other industries." He appealed to the strikers to resume work immediately, but stressed that the inquiry would be opened as soon as possible even if the stoppage continued, and that "resumption of work" did not necessarily mean the lifting of the ban on overtime before the court's findings had been promulgated. The composition of the court of inquiry was announced on Oct. 17 as follows : Sir Raymond Evershed, Master of the Rolls (chairman); Sir Godfrey Mitchell, chairman of George Wimpey and Co. Ltd (the contractors); and Mr. James Crawford, general secretary of the National Union of Boot and Shoe Operatives.

Meanwhile, however, London lightermen and tugmen had joined the strike on Oct. 15 and the "weekly" men at the Port of London Authority again came out, whilst on Oct. 17 the strike spread to Liverpool and Birkenhead. The number of dockers on strike on Merseyside rose by Oct. 19 to nearly 9,000 (about half the men employed at Liverpool and all those employed at Birkenhead), the total number of workers on strike at London, Liverpool and Birkenhead on that date being 25,000, or nearly one-third of the national total of 76,000. On Oct. 20 (when the strike spread to Hull) Sir

Walter Monckton announced in the House of Commons that the Government would "take any steps to protect the national interests," and the T.U.C. General Council issued a statement expressing "grave concern at the attempts being made to extend the dispute by unofficial and unconstitutional action in violation of workers' agreements and obligations." After stressing that the trade unions could not "stand aside and see the whole movement brought into disrepute and their members' well-being sacrificed by unilateral action of this kind," the statement appealed for an immediate end to "a dispute which can achieve nothing and which must finally be settled by the usual process of collective bargaining."

A further appeal by Sir Walter Monckton on Oct. 22 for a resumption of work, and a warning that the Government would introduce military labour at the docks if necessary, was followed by a decision by the P.L.A. "weekly" men (numbering about 2,000) to return by Oct. 25. Meanwhile, however, the strike had spread to Southampton, Garston, and Rochester, the number on strike on Oct. 22 being estimated at 35,000-37,000 and the number of ships held up at British ports being put at 324. On the same day a Ministry of Labour spokesman estimated the value of imports detained at the various ports at £58,000,000 - £65,000,000, and the value of exports held up as £45,000,000 - £50,000,000, the principal goods affected being motor-vehicles, cycles and motor-cycles, steel manufactures, cables and wire, machine-tools, photographic and cinematographic apparatus, watches and clocks, mechanical handling equipment, portable power plant, electronic equipment, food machinery, springs and screws, plastic manufacturing machinery, and chemicals.

On Oct. 23 the T.G.W.U. issued a further appeal to its members to return to work. It stressed that "with a resumption of work there can be a full discussion of the means by which overtime, which all unions agree is vitally necessary, can be worked without hardship to the individual," and gave a warning that prolongation of the strike would "menace the prospects of maintaining full employment."

The Committee of Inquiry published an interim report on Oct. 26 which upheld the employers' contention that dockers were required under the National Dock Labour Agreement to work overtime "in so far as is reasonable in the circumstances of each man," and which stressed that the "narrow overtime issue" should be "capable of solution without difficulty within the industry's negotiating machinery." It therefore found the N.A.S.D. "in breach of the dock labour scheme and of the national conciliation agreement in imposing the ban on overtime and calling the subsequent strike."

The publication of the Committee's report was followed by a partial resumption of work in London (where about 2,500 men returned), Hull, and Liverpool, although about 600 men ceased work on Oct. 26 at Manchester, and ships at Southampton, Birkenhead and Garston were reported on that date to be completely idle. On Oct. 29, however, a meeting in London of strike leaders from all the ports concerned decided to recommend a full resumption of work on Nov. 1, and to call a further meeting in a month's time to review the progress made "on the proposed agreement covering the principle of voluntary overtime." General resumption of work on Nov. 1 was nevertheless interrupted by a further stoppage of about 2,500 London dockers, who refused to load goods on to lorries driven by non-union men who were alleged to have accepted goods from ships during the main strike. These strikers returned to work on Nov. 3, but 6,840 other dockers came out at various ports on an unfounded report that the London men had been victimized; they resumed work on the following day.

Sir Walter Monckton stated on Nov. 1 that the total value of imports and exports held up by the "overtime" strikes at the various ports was estimated at about £200,000,000. Mr. Butler, the Chancellor of the Exchequer, gave a warning that the consequences "might be felt long after most of us have forgotten about the strikes," and said that "some of the damage can perhaps never be made good."

A national delegate conference of dockers, meeting in London on Jan. 6, 1955, accepted an offer of increases of 16s. 6d. weekly in the guaranteed minimum wage (the "fall-back" money) and of 1s. a turn in attendance money, bringing the rates up to £5. 4s. 6d. weekly and 6s. per turn respectively. [This meant that all dockers would be guaranteed a minimum wage of £5. 4s. 6d. if they reported daily for work, whether or not work was available for them at the moment.] These increases, which will affect about 70,000 dockers, were the first in "fall-back" and "attendance" money since the introduction of the national dock labour scheme in 1947. They had been proposed to the port employers by the three unions on the workers' side of the national joint council for the industry (after the exclusion of the N.A.S.D.)—i.e., the T.G.W.U., the Scottish T.G.W.U., and the National Union of General and Municipal Workers.—(Lloyd's List and Shipping Gazette - Times - Daily Telegraph - Manchester Guardian)

A. IRAQ.—Suspension of Diplomatic Relations with the Soviet Union.

It was announced in Baghdad on Jan. 3 that the Iraqi Government had informed the Soviet Union that it had decided to suspend diplomatic relations between the two countries for the time being. No official reason was given for the decision. The Iraqi Government had closed its Legation in Moscow on Nov. 6, 1954. (Times - Manchester Guardian)

B. CZECHOSLOVAKIA. — General Elections. - New Siroky Cabinet. - Cancellation of Arrears of Compulsory Agricultural Deliveries.

The first general elections held in Czechoslovaika since May, 1948, took place on Nov. 28, 1954, for the election—for a six-year term—of 368 deputies to the National Assembly and 104 to the Slovak National Council. Voting was compulsory, and employees in factories and offices and tenants of blocks of flats marched in procession to the polling stations headed by bands. Of the 8,708,102 persons (99.1 per cent of the electorate) who went to the polls, 97.8 per cent voted for the candidates put forward by the Communist-led National Front, while the remaining 2.2 per cent expressed their opposition by spoiling their ballot papers. Members of the German minority were allowed to vote for the first time.

Under a new electoral law (adopted in May, 1954) which increased the membership of the Assembly from 300 to 368, candidates were elected individually, as in the Soviet Union, instead of by the "fixed list" system previously used. Nomination of candidates was confined to the National Front (comprising the Communist, Czechoslovak Socialist, Czechoslovak People's, Slovak Revival, and [Slovak] Freedom parties, the trade union and youth movements, and "other organizations of the working people") and only one officially nominated candidate was put forward in each constituency. Public meetings were held before the elections in towns, villages, factories, barracks, etc., to approve the nominated candidates; according to the official Czechoslovak News Agency, in "rare instances where a suggested candidate did not meet with the approval of the electorate of a particular constituency" he was "replaced by a more suitable one."

The candidates elected, only one-quarter of whom had sat in the previous Assembly, included all members of the Government except Dr. Havelka (Minister for Church Affairs) and M. Maurer (Minister without Portfolio); 60 Communist Party officials, including the whole of the party's Politburo and about half the members of its Central Committee, about 20 Army officers, including General Svoboda (a former Vice-Premier and Defence Minister), who had played no part in public life since his removal from office in 1951; and 65 representatives of private and co-operative farmers.

The new Assembly met on Dec. 13 and unanimously re-elected Dr. Zdenek Fierlinger (a member of the Politburo of the Czechoslovak Workers' [Communist] Party, and a former Social Democratic leader) as its President. On the previous day the Prime Minister M. Siroky had tendered the resignation of his Government to President Zapotocky, who asked him to form a new Ministry. Its membership was announced on Dec. 13, the only changes in portfolios as compared with the previous Cabinet being as follows:

Mme. Ludmila Jankovcova ..	Vice-Premier.
Dr. Vaclav Skoda	Vice-Premier.
Dr. Jan Bartuska . ..	Justice.
M. Jindrich Uher..	Food.
M. Marek Smida	Agriculture.
M. Krosnar	Timber Industries.
Mme. Ozena Machacova.. ..	State Purchasing.
Professor Ladislav Stoll .. .	Culture.
Dr. Frantisek Kahuda	Education.

The portfolios of the Interior, Defence, State Control, Finance, Labour, Engineering, Transport, Fuel and Energy, Local Industries, and Building remained in the same hands as before (see 13156 A), whilst M. Nejedly remained a Minister without portfolio.

The only new Ministers were Mme. Machacova (a member of the Central Committee of the Communist Party), Dr. Bartuska (formerly Deputy Minister of Justice), and Dr. Kahuda (formerly Deputy Minister of Education). Of the other Ministers affected by the changes, Mme. Jankovcova was formerly Minister of Food; Dr. Skoda was Minister of Justice; M. Uher was Minister of Agriculture and a Vice-Premier; M. Smida was Minister for Timber Industries; M. Krosnar was Minister for State Purchasing, and Professor Stoll was Minister of Education. M. Kopecky, the former Minister of Culture, remained a Vice-Premier, the number of Vice-Premiers thus being increased from four to five: M. Jaromir Dolansky, General Cepicka (Minister of Defence), M. Kopecky, Mme. Jankovcova, and Dr. Skoda.

It was noted in the Western Press that three of the Ministries involved in the changes (those of Agriculture, Food, and State Purchasing) were concerned with food supplies, a sector of the national economy which had recently been the subject of criticism by Government leaders.

The Czechoslovak Government announced on Nov. 24 that, in order to encourage agricultural production, it would cancel all arrears in compulsory deliveries for 1953 from private and collective farmers who delivered to the State their full 1954 quotas of grain, potatoes, and sugar-beet, or other products as substitutes. The arrears of those who failed to deliver their quotas for the current year, however, would be added to their obligations for 1955. (Times - Le Monde - Neue Zurcher Zeitung)

(Prev. rep. 1948 Elections, 9445 A; Cabinet, 13156 A.)

A. PAKISTAN. — New Cabinet Appointments. - Mr. Suhrawardy appointed Law Minister. - West Pakistan Unification Proposals approved by Provincial Legislative Assemblies. - Details of Unified Administration. - Setting-up of Council for Administration of West Pakistan. - New Governors in Punjab and East Bengal. - Mr. Ikramullah appointed High Commissioner in London.

Additional appointments to Mr. Mohammed Ali's reconstituted Cabinet were announced in Karachi during November, December, and January as follows: Major-General Mirza as Minister for Kashmir Affairs in addition to his present post as Minister of the Interior (Nov. 6), Colonel Syed Abid Husain Shah, to whom no specific portfolio was allotted (Dec. 18); Mr. H. S. Suhrawardy as Minister for Law (Dec. 20); Mr. H. L. Rahimtoola as Minister for Commerce (Dec. 20); Mr. Mumtaz Ali Khan, to whom no specific portfolio was allotted (Dec. 22); and Mr. Abu Hosain Sarkar, to whom also no portfolio was allotted (Jan. 4, 1955).

Mr. H. S. Suhrawardy (61), who took over the Law portfolio from Mr. Pathan, is leader of the All-Pakistan Awami Moslem League. He was formerly Chief Minister in undivided Bengal, and was one of the leaders of the United Front which defeated the Moslem League in last year's elections in East Bengal. At a press conference on Dec 20 he stated that his portfolio included responsibility for constitutional affairs and elections, and gave an assurance that there would be no undue delay in holding elections, though pointing out that they would have to be based on an effective Constitution which must be worked out first He added that he had entered the Government in an individual capacity and not as a representative of the United Front, and on the understanding that it was a non-party administration. Mr. Suhrawardy's inclusion in the Cabinet was regarded as of major importance, since it was seen as ensuring the support both of East Bengal and of an important section of the Opposition for the Government's constitutional proposals.

Mr. Rahimtoola had been Governor of the West Punjab; **Mr. Mumtaz Ali Khan** is a member of the Punjab Legislative Assembly; and **Mr. Sarkar** comes from East Pakistan. **Mr. Isphani,** whose Commerce portfolio was transferred to Mr. Rahimtoola, remained Minister for Industry. [The portfolios of Commerce and Industry had been given to Mr. Ispahani—then High Commissioner in London—in the earlier Cabinet reorganization. Mr Ispahani was subsequently succeeded in London by Mr. Ikramullah—see below.]

The Government's proposals for the integration of West Pakistan into a single administrative unit, as announced by Mr. Mohammed Ali on Nov. 22, were subsequently endorsed by the various Provincial Assemblies and were generally welcomed throughout West Pakistan, although some opposition was expressed in Sind and Karachi, where student demonstrations took place. Resolutions approving the scheme were adopted by the Legislative Assembly of the North-West Frontier Province unanimously on Nov. 25; by the Punjab Legislative Assembly by a large majority on Nov. 30; by the Sind Legislative Assembly on Dec. 11; and by the *Shahi Jirga* of Baluchistan on Nov. 29. The Khan of Kalat expressed his support on Nov. 23, and it was announced on Jan. 3, 1955, that an agreement had been signed by the Khan and the other Rulers of the States forming the Baluchistan States Union for the merger of all these States (Kalat, Makran, Las Bela, and Kharan) in a unified West Pakistan.

It was also announced on Dec. 1 that the Punjab had agreed to accept for 10 years a limitation of its representation in the future West Pakistan Legislature to only 40 per cent of the Legislature's total membership, although on a population basis it was entitled to 56 per cent of the seats.

Mr. Mohammed Ali gave further details of the Government's plan in a broadcast on Dec. 1. He paid a high tribute to the Punjab's "magnanimous" gesture, which, he stated, was intended to remove all fears that any one area of West Pakistan would seek to dominate the rest.

An expert committee, he announced, was preparing recommendations on the administrative structure of the proposed Province of West Pakistan, and its report would be considered by a conference of Provincial Governors and Chief Ministers. There was no intention of making the city of Karachi (hitherto a Federal area) into a separate unit, and only the area comprising the Central Secretariat, Government Offices, the Federal Court, the Central Parliament, and Government official residences would be outside the jurisdiction of West Pakistan and remain Federal territory. The decision to constitute West Pakistan into a single Province would, however, not alter his previous assurance that if Kashmir elected to accede to Pakistan, its constitutional status would be determined in accordance with its people's wishes. In conclusion, the Prime Minister compared the Government's proposals with the union of England and Scotland in 1707, observed that Scotland's surrender of her independent nationality "sprang from a desire to strengthen Great Britain and thereby strengthen Scotland itself," and declared that "here in Pakistan today we feel the need for the same unity and solidarity throughout the country."

A conference of Ministers of the Central Government, Provincial Governors and Chief Ministers, and Rulers of States, presided over by Mr. Mohammed Ali, decided unanimously on Dec. 14 in favour of the unification of West Pakistan, and on Dec. 17 approved the following administrative proposals:

(1) The administrative structure of the new Province of West Pakistan would follow the normal Provincial pattern, i.e., there would be a single Governor, Cabinet, Legislature, and Secretariat Heads of departments would be located at Provincial headquarters or at other suitable places in accordance with the requirements of the administration and convenience of the public.

(2) West Pakistan would be divided into 50 Districts and Agencies, grouped into ten Commissioners' Divisions There would be maximum delegation of power to Commissioners and District Officers so that matters affecting the daily life of the people would so far as possible, be decided within the district or division in which they lived.

(3) All areas in West Pakistan at present administered directly by the Centre, including the Tribal Areas and Karachi (but excluding the Federal Area), would be administered by the new Provincial Government The administration of Karachi would be in charge of an officer with the rank of Commissioner No change was contemplated in the present system of administration in the Tribal Areas, but the new Provincial Government would appoint a Resident Minister for Tribal Affairs, with special responsibility for the welfare and progress of the people of those areas.

(4) In order to develop West Pakistan as a single economic unit, major development projects would be entrusted to a single body known as the West Pakistan Power and Projects Authority. It would operate as a semi-autonomous body under the Provincial Government and would execute schemes for the development of hydro-electric and other power, and major projects for irrigation, flood control, inland navigation, and land reclamation.

(5) A Council for the Administration of West Pakistan would be immediately set up, under Section 135 of the Government of India Act of 1935, to effect the above-mentioned arrangements and to deal with the formation and organization of the new Provincial Government. It would be part of the Council's function to make recommendations to the Central Government in regard to the formation of a common Secretariat for the new Government of West Pakistan; the organization of the various departments; the integration of existing Provincial and State cadres, and all other matters incidental to bringing the new Province into being The Council (which was expected to complete its work in about three months) was authorized to set up committees of officials drawn from the Central, Provincial and States Governments concerned to assist it in formulating its recommendations.

The Council would consist of the Governors and Chief Ministers of Sind, the Punjab, and the Frontier Province and the Governor-General's Agent in Baluchistan, whilst the Chief Minister of Khairpur, the Adviser of Bahawalpur State and the *Wazir-i-Azam* of Kalat would be associated with it in regard to matters affecting those States.

(6) The Federal Court would be consulted in the administration of justice at High Court level under the new arrangements.

(7) No change was contemplated in the present recruitment policy which ensured due representation in the Central services to the various areas of Pakistan. Recruitment to posts in the Provincial services, which had hitherto been made on a district, divisional or other zonal basis, would continue to be made in this manner. Where, however, recruitment was to be made on an all-Province basis (e.g. in regard to the higher Provincial services) arrangements would be made for a 10-year period to ensure representation to the inhabitants of the Frontier Province, Baluchistan and the Baluchistan States Union, Sind, Khairpur, and Bahawalpur, including the Tribal Areas of the Frontier Province and Baluchistan, in proportion to their population. These arrangements might be continued beyond the 10 year period for the representation of the Tribal Areas in the Services.

(8) Officers and staff employed by the existing Provincial and State Governments were given an assurance that their conditions of service would be fully safeguarded and their prospects of promotion maintained as far as possible.

The Council for the Administration of West Pakistan was set up by an Order of the Governor-General on the same day, and began its work on Dec. 18.

Mr. M. A. Gurmani, formerly Minister for the Interior, States, and Frontier Regions, was appointed Governor of the Punjab on Nov. 25 *vice* Mr. Rahimtoola, whilst Mr. Justice Shahabuddin, a judge of the Federal Court, was appointed Acting Governor of East Bengal on the same date *vice* Sir Thomas Ellis (an Englishman). Major-General Mirza had resigned the Governorship of East Bengal on his appointment to the Central Government.

Mr. Mohammed Ikramullah (51), Pakistani Ambassador in Paris since October 1953, and formerly High Commissioner in Ottawa, was appointed High Commissioner in London on Dec. 28 in succession to Mr. Ispahani. A graduate of Trinity College, Cambridge, he held important positions in the Indian Civil Service before 1947, and after the establishment of Pakistan held senior posts in the Ministries of Foreign Affairs and Parliamentary Affairs.—(Pakistan High Commissioner's Office, London) **(Prev. rep. Cabinet Changes, West Pakistan Unification, 13893 A; Punjab Governor, 13786 E; East Bengal, 13746 A.)**

A. GREECE. — M. Markezinis leaves Greek Rally. - Dispute with Field-Marshal Papagos on German Contracts. - New Greco-German Economic Agreement. - Cabinet Reorganization.

M. Spyros Markezinis, who resigned in April last as Minister for Economic Co-ordination, announced on Nov. 11 that he had left the Greek Rally (the Government party) and would sit as an Independent deputy. This development followed the publication of a statement by Field-Marshal Papagos (the Prime Minister) accusing M. Markezinis of having assumed economic obligations towards Western Germany without informing the Government.

Field-Marshal Papagos said that M. Markezinis had exchanged letters with the West German Minister of National Economy (Dr Erhard), who was due to arrive in Athens within a few days, undertaking that the German firms of Siemens and Telefunken would be granted the right to operate and supervise the Greek telephone and broadcasting systems. He accused M Markezinis of having entered into these obligations without informing either him (the Prime Minister) or the Government, but said that the undertakings to the German firms would nevertheless be respected, and that the Greek Government desired close economic relations with the German Federal Republic M. Markezinis, in reply, claimed that he had kept the Prime Minister fully informed of all the negotiations which he had conducted during his visit to Bonn in 1953 (see 13487 A), and denied that he had committed the Government in his discussions with the Siemens and Telefunken firms.

The German Ambassador in Athens (Dr. Kordt) handed to Field-Marshal Papagos on Nov. 11 the text of two letters which had been written to Dr. Erhard by M Markezinis during the latter's visit to Germany in 1953. It was stated that M. Markezinis had agreed that the Telefunken company should build a radio station and operate a radio network in Greece, and that Siemens should have technical control of the Greek telephone network.

Dr. Erhard paid a three-day visit to Athens from Nov. 17-19, during which he had discussions with Field-Marshal Papagos and other Ministers. A new Greco-German economic agreement was signed under which it was agreed (*a*) that a mixed commission would be set up to promote German investment in Greece; (*b*) that Germany would make credits available for Greek industrial reconstruction; (*c*) that German property seized in Greece after the war would be returned to the Federal Republic; (*d*) that credits granted by Krupps for the exploitation of lignite deposits would be extended to March 1955 (these credits were due to have expired in December); and (*e*) that the Greek Government would be relieved of its obligations to the Siemens and Telefunken companies in respect of the proposed radio and telephone contracts.

Following M. Markezinis' decision to leave the Greek Rally, the Ministers of Finance (M. Kapsalis) and Economic Co-ordination (M. Papayanis), both friends of M. Markezinis, tendered their resignations to Field-Marshal Papagos. On Dec. 14, at the Prime Minister's request, all the Ministers resigned to enable him to carry out a Cabinet reorganization, the result of which was announced on Dec. 15 as follows:

Field-Marshal Alexander Papagos	Prime Minister.
M. Stefanopoulos	Deputy Premier and External Affairs.
M. Kanellopoulos	Deputy Premier and National Defence.
M. Eftaxias	Finance.
M. Nikolitsas	Interior.
M. Theofanopoulos	Justice.
M. Papaligouras	Economic Co-ordination.
M. Karamanlis	Public Works and Communications.
M. Levandis	Agriculture.
M. Yerokostopoulos	Education.
M. Voyatzis	Merchant Marine.
M. Protopapadakis	Industry.
M. Stratos	Labour.
M. Leon Makkas	Commerce.
M. Polizogopoulos	Social Welfare.
General Kosmas	Minister for Northern Greece.
M. Rallis	Minister attached to the Prime Minister's Office.
M. Tsouderos, M. Exindaris	Ministers without portfolio.

The only new Ministers to enter the Cabinet were M. Makkas (a member of the Greek delegation at the Council of Europe), who took over the Commerce portfolio from M. Papaligouras; M Polizogopoulos, who took over the portfolio of Social Welfare from M. Solomonidis; General Giorgios Kosmas (a former Chief of General Staff), who became Minister for Northern Greece; M. Stratos, who became Minister of Labour *vice* M. Gonis; and M. Eftaxias, who succeeded M. Kapsalis as Minister of Finance M. Papaligouras, the former Commerce Minister, succeeded M. Papayanis as Minister for Economic Co-ordination. All other Ministers held the same portfolios as in the previous Cabinet.

Prior to the Cabinet reorganization, the Greek Parliament had passed a Bill on Dec. 13 providing for the appointment of two Deputy Premiers—posts to which the Ministers of Foreign Affairs (M. Stefanopoulos) and Defence (M. Kanellopoulos) were appointed, whilst retaining their former portfolios.—(Times - Le Monde, Paris) **(Prev. rep. Cabinet, M. Markezinis, 13529 C; Greco-German Economic Agreement, 13487 A.)**

B. UNITED KINGDOM. — December Gold and Dollar Deficit. - Gold and Dollar Reserves at end of 1954.

The sterling area had a gold and dollar deficit in December of $163,000,000 after taking account of (1) the payment of (*a*) $181,000,000 as service of the U.S. and Canadian lines of credit, the U.S. Lend-Lease loan, and the Marshall Aid loans, (*b*) the quarterly instalment of $8,000,000 on the Canadian interest-free loan of 1942, and (*c*) $2,000,000 to creditors of the E.P.U. in bilateral settlements; (2) receipts of (*a*) $8,000,000 in U.S. defence aid, and (*b*) $3,000,000 from the E.P.U. in respect of transactions in November. As a result of the December deficit, the sterling area's gold and dollar reserves fell to $2,762,000,000 on Dec 31, compared with $2,518,000,000 on Dec. 31, 1953.

The monthly gold and dollar movements in 1954 are shown in the following table:

	Gold Payments to (−) or Receipts from (+)				Change in Reserves	Reserves at end of Month
	E.P.U.*	Other Countries	Total	U.S. Aid		
			($ million)			
January	− 4	+ 14	+ 10	+ 15	+ 25	2,543
February	+ 7	+ 2	+ 9	+ 31	+ 40	2,583
March	+ 2	+ 86	+ 88	+ 14	+102	2,685
April	+ 7	+119	+126	+ 9	+135	2,820
May	+39	+120	+159	+ 6	+165	2,985
June	+15	+ 14	+ 29	+ 3	+ 32	3,017
July	+ 4	− 23†	− 19	+ 15	− 4	3,013
August	+11	−117‡§	−106	+ 11	− 95	2,918
September	−12	− 14§	− 26	+ 9	− 17	2,901
October	+ 8	+ 10§	+ 18	+ 17	+ 35	2,936
November	+ 7	− 32§	− 25	+ 14	− 11	2,925
December	+ 3	−174§‖	−171	+ 8	−163	2,762
Year 1954	+87	+ 5	+ 92	+152	+244	—

* Gold payments to or receipts from the E P.U. in each month as a result of operations in the preceding month † This net figure includes the payment by the U.K. of $99,000,000 in bilateral settlements of part of the U.K. deficit with the E P.U. (see 13716 B). ‡ Including the repayment of $112,000,000 to the I.M F. (see 13772 D) § Including $2,000,000 paid to creditors of the E.P.U. under bilateral agreements ‖ Including $189,000,000 in special payments (see above and 13957 A).

Provisional figures for the E.P.U. December settlement showed that the U.K. had a deficit of $19,600,000 (£7,000,000), which would be settled in January half in gold and dollars and half by an increase in the U.K. deficit with the Union.
(Treasury Press Office, London) **(Prev. rep. 13928 C; 13344 C.)**

C. SOVIET UNION. — Return of U.S. Naval Vessels.

The U.S. State Department announced on Dec. 23 that the Soviet Union had agreed to return a further 27 small U.S. naval craft which she had borrowed during the war, and that discussions were continuing for the return of an additional 121 warships still in Soviet hands. It was stated that the 27 vessels—consisting of four submarine-chasers, eight motor torpedo-boats and 15 infantry landing craft—would be turned over to the U.S.A. at the Japanese port of Maizuru in June and July. Their immediate return was impossible because of the prevailing ice conditions in Vladivostok and northern waters where the ships were based.—(New York Times) **(13598 D.)**

D. JAPAN. — U.S. Compensation Payment for Injuries caused by Bikini Hydrogen Bomb Test.

It was announced in Tokio on Jan. 4 that the Japanese Government had accepted an American offer to pay $2,000,000 (£714,000) compensation for the injuries and losses suffered by Japanese fishermen and the Japanese fishing industry as a result of the hydrogen bomb test carried out at Bikini on March 1, 1954.—(New York Herald Tribune)
(Prev. rep. 13932 C; 13485 A.)

E. SOUTH AFRICA. — Cabinet. - Mr. Eric Louw appointed Minister for External Affairs.

The South African Prime Minister, Mr. Strydom, announced on Jan. 4 that Mr. Eric Louw, the Minister of Finance, had been appointed Minister for External Affairs, and would at the same time retain the Finance portfolio.—(Cape Times) **(13941 A.)**

A. INDIA. — Formation of Industrial Credit and Investment Corporation. - Participation of British and U.S. Capital. - International Bank Loan of $10,000,000. - Mr. Beale appointed General Manager.

It was announced in New Delhi on Nov. 15, 1954, that a company to be called the Industrial Credit and Investment Corporation of India had been set up, with the support of the Indian Government and the participation of private British and American capital, to encourage and finance private industrial development in India by granting loans either to new industries or to existing firms for the expansion and rehabilitation of their businesses. It might also take shares in some firms or underwrite equity issues, and, in addition, would assist technical progress in Indian industry by helping to recruit experts from abroad.

The formation of the Corporation followed a visit by an International Bank mission to India in February, 1954, and the setting-up of a steering committee of five prominent Indian businessmen under Sir Ramaswami Mudaliar to formulate definite plans for its organization.

It was announced that the Corporation would have an authorized share capital of Rs.250,000,000 (about £18,750,000, or $52,500,000), in addition to which the Indian Government would make a 30-year interest-free advance of Rs.75,000,000 (about £5,625,000, or $15,750,000), repayable in 15 equal annual instalments beginning in 1971. The authorized capital would be divided into 500,000 Ordinary shares (common stock) and 2,000,000 unclassified shares, all with a par value of 100 rupees each. Only Rs.50,000,000 of Ordinary shares would be issued initially, of which Rs.35,000,000 would be offered at par in India (Rs.20,000,000 by public subscription and Rs.15,000,000 by private placement), Rs.10,000,000 in the United Kingdom, and Rs.5,000,000 in the United States.

The British group subscribing to the Corporation's capital consisted of a number of eastern exchange banks (including the Chartered Bank of India, Australia & China, the Hongkong & Shanghai Banking Corporation, the Mercantile Bank of India, and Grindlays Bank); a large number of British insurance companies (including nearly all the principal ones); the Commonwealth Development Finance Company; and certain industrial and commercial companies (Associated Electrical Industries Ltd., the English Electric Co. Ltd., the General Electric Co. Ltd., Guest, Keen & Nettlefolds Ltd., and Gray Dawes & Co.) It was reported in the U.K Press that the equity subscription of the British group was divided as follows: eastern exchange banks, £330,000; insurance companies, £227,500; Commonwealth Development Finance Co., £180,000; industrial and commercial companies, £12,500.

The U.S. investors were the Bank of America, Rockefeller Bros., the Olin Mathieson Chemical Corporation, and the Westinghouse Electric International Corporation.

The International Bank announced on Dec. 23 that it had approved a loan of $10,000,000 to the Industrial Credit and Investment Corporation, which would be used to buy imported materials, equipment and services needed to carry out private industrial projects financed by the Corporation. The loan, which would be guaranteed by the Indian Government, would bear interest at 3⅝ per cent, plus 1 per cent per annum commission, and would be repayable within 15 years, starting on Jan. 1, 1960. This was the bank's seventh loan to India.

The Bank of England announced on Dec. 5 that, Mr. P. S. Beale, its chief cashier (whose signature appears on all banknotes), was resigning in January to become the first general manager of the Industrial Credit and Investment Corporation. The International Bank, in its announcement of Dec. 23, said that the Corporation's Board of Directors was expected to include Sir Ramaswami Mudaliar, Sir Biren Mookerjee (Martin Burn, Ltd., of Calcutta), Mr. Kasturbhai Lalbhai (a prominent Bombay textile industrialist), Mr. A. D. Shroff (Tata & Sons Ltd., of Bombay), Mr. G. D. Birla (Birla Bros. Ltd., of Calcutta), Mr. W. R. Cockburn (Chartered Bank of India, Australia & China), Mr. J. G. Beevor (Commonwealth Development Finance Co. Ltd., and Legal and General Assurance Society, Ltd.) and Mr. Russell Smith (Bank of America).—(The Statesman, Calcutta - Indian High Commissioner's Office, London - International Bank, Washington - Financial Times) **(Prev. rep. Industrial Development Corporation, 13856 B.)**

B. UNITED KINGDOM. — Parliamentary Approval for Geneva Agreements and S.E. Asia Defence Treaty.

A Government motion "that this House approves the policy of H.M. Government in South-East Asia as expressed in the agreements reached at Geneva and in the Manila Treaty" (i.e., the S.E. Asia Collective Defence Treaty, or SEATO) was approved without a division by the House of Commons on Nov. 8, 1954. The Parliamentary Labour Party had previously decided by a large majority not to oppose the motion. (Times) **(Prev. rep. 13891 C; 13806 B; 13761 A.)**

C. UNITED KINGDOM. — Captain Peter Baker expelled from the House of Commons.

Captain Peter Baker (33), Conservative M.P. for South-West Norfolk, was sentenced at the Central Criminal Court on Nov. 30 to seven years' imprisonment on each of six charges of uttering forged documents to which he had pleaded "guilty," the sentences being ordered to run concurrently. His plea of "not guilty" to a seventh charge was accepted by the prosecution.

Mr. Christmas Humphreys, for the prosecution, said that the frauds were all concerned with guarantees given by the defendant to finance houses or banks in respect of money or overdrafts he required in connexion with the various companies with which he was concerned. The offences all took place within five months and by means of these forged guarantees Captain Baker had obtained over £103,000 for his companies. Of the 17 companies with which the defendant was associated, eight were now in liquidation and there was a deficiency of at least £652,000. Among the companies concerned were the Falcon Press and the Peregrine Press.

Formal notification of the sentence imposed on Captain Baker, and of the charges on which he had been found guilty, was conveyed to the Speaker of the House of Commons on the same day by Mr. Justice Lynskey. On Dec. 16 Captain Baker was expelled from the House of Commons after a motion to that effect had been moved by Mr. Crookshank, Leader of the House.

Before the motion was put, the Speaker read a letter which had been written to him by Capt. Baker from Wormwood Scrubs prison. In this letter Capt. Baker asked the House to accept his sincere apologies, and his regret, remorse and repentance, for any discredit he had brought upon it. He pointed out that he had hastened the proceedings against himself in every possible way, and had refused to appeal, "so that you [the Speaker] can dispossess me of my seat without delay."

Mr. Crookshank, in moving "that Mr. Peter Arthur David Baker be expelled this House," said that it was "a most melancholy task" and added: "Cases of this sort are fortunately very rare . . . I hope the House will not desire to go further in this matter." The motion was agreed to without debate.

The case was the first of its kind for 32 years, the last such occasion having been in 1922, when Horatio Bottomley was expelled from the House of Commons after he had been sentenced to seven years' penal servitude for fraudulent conversion. (Times - Daily Telegraph)

D. ITALY. — Ratification of Paris Agreements.

A single-article Bill authorizing the President of the Italian Republic to ratify the Paris agreements on the admission of Italy and the German Federal Republic to the expanded Brussels Treaty Organization (the Western European Union), and the admission of Western Germany to NATO, was passed by the Chamber of Deputies on Dec. 23 by 335 votes to 215—a Government majority of 120—after a debate which had begun on Dec. 13. The Bill was supported not only by the four parties of the Government coalition (the Christian Democrats, Democratic Socialists, Liberals, and Republicans) but also by the two Monarchist parties and the neo-Fascist M.S.I. It was opposed by the Communists and Left-wing (Nenni) Socialists, as well as by a small number of Government supporters.

By a show of hands, the Government accepted a "recommendation" that Italy, after depositing her instruments of ratification, should take the initiative in convening a conference of Western and Eastern European countries for the purpose of extending, along the lines envisaged in the Paris agreements, a system of arms controls "with the aim of achieving effective disarmament for peace and co-existence between nations." The motion to this effect was moved by Signor Gonella (Christian Democrat)

By 316 votes to 239 the Chamber rejected a motion by Signor Melloni (Christian Democrat), supported by the Communists and Nenni Socialists, seeking to delay the ratification of the Paris agreements for a three-month period. Signor Melloni explained that while he supported the agreements, he believed that their ratification should be delayed for a time so as to give the Russians a chance to make a "sincere gesture" for peace before the agreements were finally ratified. A Communist motion seeking to suspend all further consideration of the Bill was defeated on a show of hands.

The Foreign Minister (Dr. Martino), replying to the debate, emphasized that ratification of the Paris agreements in no way excluded future conversations with the Soviet Union for a final settlement of outstanding European problems.

As regards German rearmament, he said that to keep Germany still longer under a crushing weight of "moral condemnation" would only mean a repetition of past mistakes, in which connexion he said that the lack of support given by the Western Allies to the Weimar Republic had "helped to play Hitler's game." It was therefore essential that Germany should become an active member of the association of free nations which were engaged in progressively extending the area of organized peace.

Signori Melloni and Bartesaghi, who had announced that they would vote against the ratification Bill, were expelled from the Christian Democratic Parliamentary Party on Dec. 24. (Giornale d'Italia, Rome - Corriere della Sera, Milan)

(Prev. rep. French Ratification, 13965 A.)

A. IRISH REPUBLIC - NORTHERN IRELAND. — I.R.A. Raids on Military Establishments in Northern Ireland. - Prison Sentences on I.R.A. Members. - Statements by Northern Irish and Eire Ministers. - Use of Force denounced by Cardinal d'Alton, Mr. Costello and Mr. de Valera.

Eight members of the Irish Republican Army (I.R.A.) organization were sentenced to long terms of imprisonment—one to 12 years and the other seven to ten years each—at the Ulster Assizes in Belfast on Dec. 15 after having been found guilty on three counts of treason-felony—a charge described by the N.I. Attorney-General (Mr. Warnock, Q.C.) as meaning that the accused had prepared for, and intended to wage, war to force political or constitutional changes on Northern Ireland. The men concerned, all of whom were nationals of the Irish Republic, refused to recognize the court's jurisdiction, but on the instructions of the judge (Lord MacDermott, the Lord Chief Justice) pleas of "not guilty" were entered.

The men concerned were Eamonn Boyce (27), labourer, of Dublin, who received 12 years' imprisonment, and Liam Mulcahy (22), baker, of Cork; Phillip Clarke (21), civil servant, of Dublin; Sean O'Callaghan (21), auditor's clerk, of Cork; Sean O'Hegarty (20), post office engineer, of Cork; Thomas J Mitchell (23), bricklayer, of Dublin; John McCabe (33), builder's labourer, of Dublin, and Patrick J. Kearney (28), bus conductor, of Dublin—all of whom received 10 years' imprisonment

Statements were made by the accused men declaring, *inter alia*, that they were waging war not against Irishmen but against "a foreign Queen" who was maintaining "British forces of occupation on our soil." They also declared that they were not "common criminals or desperadoes" but "prisoners of war"

The charges arose out of a raid carried out on Oct. 17 by two groups of armed men who entered the military depot of the Royal Inniskilling Fusiliers at Omagh (County Tyrone) with the apparent intention of raiding the armoury. Shots were exchanged and five soldiers were injured during the attack, but the raiders were eventually repulsed. The above-mentioned eight men were subsequently arrested by the police, who conducted a search throughout the whole of Northern Ireland. On Oct. 18 the I.R.A. issued a statement admitting responsibility for the raid.

The attack on Omagh barracks was the second raid to be made on a military establishment by the I.R.A. during the year. On June 12, 1954, a group of 15 men, some wearing British Army uniforms, had broken into the Royal Irish Fusiliers' depot at Gough Barracks, Armagh, held up the sentry and two other men on duty, and removed about 300 rifles and automatic weapons from the armoury. On this occasion no shots were fired, and the raiders escaped in spite of an extensive police search.

Following this incident, the Northern Ireland Government decided on June 17 to restore to the police the special security powers which had been introduced in 1922, but which had nearly all been revoked in 1949. The revived regulations gave the police powers, *inter alia*, to enter forcibly any premises "being used for any purpose prejudicial to the preservation of the peace"; they also provided that a person might be imprisoned for failing to answer questions put by the police.

It was confirmed on Oct 17 that in the early hours of Oct. 11 a time-bomb had exploded in the grounds of the residence of the G.O.C., Northern Ireland (Lieut.-General Sir John Woodall), without causing any casualties Information that the I R A. might attempt to seize arms led to precautionary measures being taken in all ships and service establishments in the Liverpool area during the week-end Nov. 13-14—measures which were intensified on Dec 9 after the theft of a small quantity of arms and ammunition from a Home Guard armoury in Liverpool. In Northern Ireland, police raided a hall at Annaghmore (County Armagh) on Nov. 18 and arrested 14 young men who were subsequently charged with having a rifle and ammunition in their possession under suspicious circumstances, and who were remanded in custody. On the night of Dec 6 a Northern Irish Customs officer was shot and wounded after a van driving towards the south had been stopped just north of the border near Aughnecloy, County Tyrone; four men escaped by running across the border, and a small quantity of arms and ammunition was found in the van

The recurrence of incidents involving the I.R.A. gave rise to statements by Lord Brookeborough (Prime Minister of Northern Ireland) at Stormont and by Mr. Costello (Prime Minister of the Irish Republic) and Mr. de Valera (Leader of the Opposition) in Dublin.

Lord Brookeborough referred in the N.I Parliament on Oct. 15 to reports of speeches by Mr Costello and Mr. de Valera in which they had said that nothing could be achieved by the use of force. He added: "I want to tell them . . that nothing will accomplish the unity of Ireland. We are part of the United Kingdom and the Commonwealth and, no matter what action anybody can take, we shall remain part of Great Britain and of the Commonwealth and will continue to fly the Union Jack . I do not think there is a man who would not like to see friendly relations—really friendly relations—established between all the people of this country If the separate constitutions and separate viewpoints of Northern Ireland and the Republic of Ireland and their different Governments based on different ideals, are accepted, we could then work for the good of the people, both North and South But it is necessary as a preliminary that these raids and these continued demands that Northern Ireland should subjugate herself to the South should stop"

Mr. Costello, speaking in the Dail on Oct. 28, denounced the use of force by minority groups to end partition as "immoral, un-Christian, and likely to endanger the vital interests of the nation." Referring to Lord Brookeborough's assertion that nothing would accomplish the unity of Ireland, Mr Costello said that "there never was a political prophet more deceived." He asserted that the unity of Ireland would be restored because history and tradition, and the facts of race, geography, and economics, showed that Ireland was in fact one nation In the Irish Republic there was, however, only one authority on the question of peace or war—the Dail Unless those who advocated the use of force had first convinced a majority of the electorate and a majority of members of the Dail that the employment of force was the correct policy, it would be an "intolerable usurpation" on the part of such persons to arrogate to themselves "the power of war and peace and life and death." "Even if it lay in our power to achieve the unity of our country by force of arms and by beating into sullen submission the recalcitrant minority in the north-east," declared Mr Costello, "it would in my judgment still be the course of wisdom to pursue a policy of peace and reconciliation Let us have a united nation, but let it be a union of free men and not a united nation in which a fifth of the population have been cowed by force or fear and feel themselves enslaved."

Mr. de Valera said that he was in entire agreement with the *Taoiseach*, and that *Fianna Fail* supported the Government in its attitude "The nature of the position is such that I believe that the unity of this country is inevitable," he declared. "That being so, would it not be better to save all the misery that is going to take place in the intervening period and deal with it now?" Mr. de Valera suggested that the first step towards a peaceful solution of the problem was obviously some form of conference between the Governments of the Irish Republic and Northern Ireland.

Cardinal d'Alton (Archbishop of Armagh and Primate of All Ireland), speaking in St Patrick's Cathedral, Armagh, on Dec. 25, appealed to young Irishmen not to have recourse to violence, nor to join any "unauthorized force", in their eagerness to end partition. Whilst declaring that the partition of Ireland was "so glaring that it could not continue," the Cardinal said that there was "surely sufficient good will on both sides to bring about a settlement that will be satisfactory to all, that will respect honestly-held convictions, and help to remove old prejudices and allay fears, however ill-founded they may seem."

In a pamphlet published on Dec. 2, the "Army Council of the I.R.A." denied allegations that "recent military operations" had been carried out for propaganda purposes, and said that the sole reason for raids on the North had been the capture of arms. It also declared that it had no intention of resorting to aggressive military action in "the Twenty-six Counties" (i.e. the Irish Republic), but condemned politicians of all parties in the Irish Republic for "unanimity on that greatest of all national evils—the continued occupation of part of our country by the British Army."—(Irish Times, Dublin - Belfast Telegraph - Manchester Guardian) **(Prev. rep. I.R.A. 10914 D.)**

B. UNITED KINGDOM. — Financial and Monetary Policy. - Conversion Operations.

The Treasury announced on Sept. 15 that holders of 3 per cent Defence Bonds purchased between Jan. 1 and May 5, 1945, and maturing between Jan. 1 and May 5, 1955 would be invited to continue their Bonds until July 1, 1955. Those accepting would then be paid a full six months' interest at 3 per cent and the maturity premium of £1 per cent, and their bonds would be exchanged into the same amount of 3½ per cent Defence Bonds (Conversion Issue). The terms of the latter would be the same as those of the 3½ per cent Defence Bonds currently on sale, except that interest would be payable on Jan. 1 and July 1.

On Nov. 26 the Treasury further announced that holders of 2½ per cent Exchequer Stock, 1955, of which £734,000,000 was outstanding, would be offered conversion at par on Feb. 15, 1955, into either (*a*) a new 2 per cent Exchequer Stock, 1960, or (*b*) a further tranche of 3 per cent Funding Stock, 1966-68. Holders accepting conversion into the Funding Stock would receive a full six months' interest on Aug. 1, 1955.

It was announced on Dec. 7 that about £650,000,000, or over 88 per cent, of the Exchequer Stock outstanding had been tendered for exchange (about £448,000,000 into the 2 per cent Exchequer Stock and £202,000,000 into the 3 per cent Funding Stock), leaving only about £84,000,000 to be paid off on Feb. 15, 1955.—(Treasury Press Office - Financial Times) **(13710 C.)**

A UNITED KINGDOM. — The New Year Honours.

The New Year Honours List was published on Jan. 1, the principal awards being set out below.

Barons. Dr. Edgar Douglas Adrian, O M , President of the Royal Society, President of the British Association, and Master of Trinity College, Cambridge : Sir William Fraser, chairman, Anglo-Iranian Oil Co Ltd ; Sir Arnold Gridley, M.P. (Conservative, Stockport South), for political and public services

Privy Councillor. Mr. Nigel Birch, M P , Minister of Works.

Companions of Honour. Captain Harry Crookshank, M.P., Lord Privy Seal and Leader of the House of Commons ; the Rev Hugh Martin, for services to the National Free Church Federal Council and the British Council of Churches

[M. René Massigli, the retiring French Ambassador to the Court of St. James's (see 13876 B), was invested with the Order of the Companions of Honour on Dec. 21 by H.M the Queen.]

Knights Bachelor. Mr. W. G Bennett, M P. (Conservative, Woodside division of Glasgow), for political and public services , Mr. D. A Scott Cairns, Q.C , chairman, Monopolies and Restrictive Practices Commission ; Professor W E Le Gros Clark, Dr Lee's Professor of Anatomy, Oxford University , Mr W R M. Cockburn, chief general manager, Chartered Bank of India, Australia and China ; Mr. Arthur Colegate, M.P. (Conservative, Burton), for political and public services ; Mr. Ivor Cox, for services as managing director, Metropolitan-Vickers Electrical Co. Ltd. , Mr W. C Crocker, lately President of the Law Society ; Professor L. S. P. Davidson, Professor of Medicine, Edinburgh University, and President of the Royal College of Physicians of Edinburgh , Colonel C. V Fitton, for political and public services in the North Riding of Yorkshire ; Mr A A. Gemmell, President of the Royal College of Obstetricians and Gynaecologists ; Mr. G. F. Hamer, Lord-Lieutenant of Montgomeryshire, for public services in Wales ; Mr Basil Henriques, for services to youth welfare , Alderman Archer Hoare, for political and public services in Middlesex ; Mr. Oscar Hobson, City Editor of the *News Chronicle*, for services to journalism ; Mr. Ian Horobin, M P (Conservative, Oldham East), for political and public services ; Alderman H. W. Seymour Howard, Lord Mayor of London , Mr. Ronald Howe, Deputy Commissioner, Metropolitan Police Force , Colonel Francis Jackson, for political and public services in Manchester and Cheshire , Mr N. V Kenyon (leader of the Conservative Party on the London County Council), for political and public services in Paddington , Mr C S. McFarlane, for political services in Scotland , Professor R. R. Macintosh, Nuffield Professor of Anaesthetics, Oxford University ; Mr R. A. Maclean, for services to industry in Scotland ; Mr. John Mann, Convener of Lanarkshire County Council : Brigadier Frank Medlicott, M.P. (National Liberal and Conservative, Central Norfolk), for political and public services , Mr. Philip Millbourn, hon adviser on shipping in port to the Minister of Transport , Mr Keith Murray, chairman, University Grants Committee , Professor John Ernest Neale, Astor Professor of English History, London University ; Mr W. J. Neden, Chief Industrial Commissioner, Ministry of Labour and National Service , Mr. A. C Richmond, chairman of the Land Settlement Association and of the Federation of Agricultural Co-operatives in Great Britain and Ireland ; Mr. Alfred Roberts, general secretary, National Association of Card, Blowing and Ringroom Operatives ; Mr Sydney Gordon Russell, the designer and artist, Director of the Council of Industrial Design ; Mr. R. D. Scott, M.P. (Conservative, Penrith and Border), for political and public services ; Mr. Leonard Sinclair, chairman and managing director, Esso Petroleum Co Ltd. , Rear-Admiral Matthew Slattery (retd), chairman and managiug director, Short Brothers and Harland Ltd , Belfast ; Mr. Henry Spurrier, managing director, Leyland Motors Ltd ; Professor Graham Sutton Director of the Meteorological Office , Mr. W. W Tong, for political and public services in Bolton , Colonel G A Wade, for political and public services in Staffordshire · Mr. R B Waterer, Solicitor to the Board of Inland Revenue , Mr. T. A. Wedderspoon, for political and public services in Angus

[Mr. George Titman received a knighthood on Dec. 21 on his retirement from the post of secretary to the Lord Chamberlain's Office, a position he had held since 1939.]

Other recipients of knighthoods, apart from those enumerated above, included the following :

Prime Minister's List (K C.B., K.C.M G and K.B.E.) Colonel R. S Clarke, M P. (Conservative, East Grinstead), for political and public services ; Mr. E A Fellowes, Clerk of the House of Commons ; Mr G. C Gibbs, chairman, Advisory Council, Export Credits Guarantee Dept ; Mr L. N. Helsby, First Commissioner, Civil Service Commission ; Mr. E A. Seal, Deputy Secretary, Ministry of Works ; Mr. O. H. Wansbrough-Jones, Chief Scientist, Ministry of Supply.

Foreign Office List. Mr. John Carmichael, Under-Secretary, Ministry of Finance, Sudan Government ; Mr Robert Hankey, H M. Ambassador in Stockholm ; Mr. G W. Harrison, Assistant Under-Secretary of State, Foreign Office ; Mr. R. K. Jopson, H M. Ambassador in Bogotá , Mr. C. N Stirling, H.M. Ambassador-designate in Lisbon ; Mr. C. H. Summerhayes, H.M. Ambassador in Khatmandu

Commonwealth of Australia List. Mr. G. T. Chippindall, Director-General of Posts and Telegraphs, Commonwealth of Australia ; Dr. A. J Collins, President of the British Medical Association of Australia ; Mr. A. A. Fitzgerald, chairman, Commonwealth Grants Commission ; Judge W. K. Fullagar Justice of the High Court of Australia ; Judge F. W. Kitto, Justice of the High Court of Australia ; Air Marshal J. P. J. McCauley, Royal Australian Air Force ; Mr. Roland Wilson, secretary to the Commonwealth Treasury.

New Zealand List. Major-General W. H. Cunningham, Crown Prosecutor in Wellington, for services to law ; Judge G. P. Finlay, Senior Puisne Judge of the Supreme Court , Mr. Leslie Knox Munro, N Z Ambassador in Washington.

Commonwealth Relations Office List. Recipients of knighthoods included Mr T S Chegwidden chairman of the Interim Public Service Commission, Federation of Rhodesia and Nyasaland ; Mr. J S Shearer, Indian Civil Service (retd), formerly a Puisne Judge of the High Court of Judicature at Patna , and the Sultan of Lahej (H.H Ali bin-Abdul al-Karim), Aden Protectorate.

Colonial Office List. Recipients of knighthoods included Mr. Edward Beetham, Governor of the Windward Islands ; Mr. J. T. Gilbert, Q C , Chief Justice of Bermuda ; Mr Eric Hallinan, Chief Justice of Cyprus ; Mr E F. Hitchcock, for public services in Tanganyika (Mr Hitchcock who controls large sisal interests in East Africa was Warden of Toynbee Hall, London, as a young man) ; Mr Kobina Arku Korsah, Puisne Judge, Gold Coast ; and Mr. Patrick Rennison, Governor of British Honduras

Royal Navy List, Army List, and Royal Air Force List. Recipients of knighthoods in the armed forces included Vice-Admiral (E.) F. T. Mason, Vice-Admiral J F. Stevens, Instructor Rear-Admiral W. A. Bishop, Lieut.-General Edwin Herbert, Major-General R. K. Scoones, and Acting Air Marshal L. G. Harvey.

D B.E. Awards. The D B E. was conferred on Miss Elizabeth Cockayne Chief Nursing Officer, Ministry of Health ; the Countess of Rosebery, for public services in Scotland : Air Commandant Nancy Marion Salmon, Women's Royal Air Force ; and Air Commandant Roberta Mary Whyte, Princess Mary's Royal Air Force Nursing Service.

Among other awards (C.M.G., C.B.E., O.B.E. and M.B.E.) were the following :

Recipients of the **C.M.G.** included Mr. Robert McCall, assistant director of B.B.C. television, whilst recipients of the **C.B.E.** included Mr. C. H O'D. Alexander, the British chess master, who is a Foreign Office official ; Mr. Eric Shipton, the explorer and mountaineer, whose reconnaissance of Everest paved the way for the successful ascent by the British Expedition ; Mr. W. G. Grimes, Director of the London Museum, who was in charge of the excavations which led to the discovery of a Temple of Mithras in the City of London dating from the Roman occupation , and Mr. A V. Bridgland, chairman of the company which owned the site on which the discovery was made, and through whose agency the remains of the Mithraic temple are to be preserved Recipients of the **O.B.E.** included the Rev. F H House, head of religious broadcasting at the B.B.C , and Miss Freda Lingstrom, head of children's television programmes, B.B.C. Recipients of the **M.B.E.** included Mr. John Landy, holder of the world record for the mile (the award was announced in the Commonwealth of Australia List).

The conferment of a peerage on Sir Arnold Gridley will cause a by-election at Stockport South.—(Times - Daily Telegraph)

(Prev. rep. Birthday Honours, 13611 A.)

B. UNITED STATES.—Launch of U.S.S. "Forrestal."

The aircraft carrier *Forrestal* (59,650 displacement tons), the largest warship in the world and the biggest ship ever built in the United States, was launched at Newport News on Dec. 11 by flooding the drydock in which she had been constructed. Named after the late Mr. James Forrestal (the former Secretary of Defence) she has a length of 1,036 feet and a breadth of 252 feet, and when completed will have cost about $198,000,000. She will carry about 90 aircraft, including atom-bombers and fighters having a range of about 1,000 miles. Her design incorporates two British inventions added after her keel was laid down in July 1952—the angled flight deck and the steam catapult. Two sister ships—the *Saratoga* and *Ranger*—are under construction, with a fourth "supercarrier" authorized.—(New York Times - New York Herald Tribune)

(Prev. rep. 12349 D.)

C. EGYPT. — Sterling Balances released by Britain.

It was announced in London on Dec. 30 that Britain would release a further £15,000,000 of Egypt's blocked sterling balances on Jan. 1, 1955. Of this amount, £10,000,000 represented the unconditional annual release under the 1951 agreement, whilst the other £5,000,000 was released under the article of the same agreement which provided for the release of a further £5,000,000 a year whenever Egypt's current sterling resources fell below £45,000,000.—(Treasury Press Office, London)

(Prev. rep. 13712 D.)

D. EHTIOPIA. — Tribal Areas on Somaliland Border restored to Ethiopian Sovereignty.

The British Foreign Office announced on Jan. 4 that an Anglo-Ethiopian agreement had been signed in London on Nov. 29, 1954, providing for the return to Ethiopian administration of certain tribal areas bordering on British Somaliland which had been under temporary British administration since 1944. The agreement preserved the right of tribes in British Somaliland (recognized under the Anglo-Ethiopian treaty of 1897) to graze their flocks in the areas concerned. (Times)

JANUARY 8—15, 1955

A. COLOMBO POWERS. — Bogor Conference of Prime Ministers of Colombo Powers. - Proposals for Conference of Asian and African Governments. - Dr. Sastroamidjojo's Visit to India and Burma.

The Prime Ministers of the five countries which had taken part in the Colombo Conference of April-May, 1954 (India, Pakistan, Ceylon, Burma, and Indonesia) held a further meeting on Dec. 28-29 at Bogor, near Jakarta, at which it was agreed that 25 Asian and African countries should be invited to take part in a conference to be held in Indonesia at the end of April, 1955. The Indonesian Prime Minister, Dr. Sastroamidjojo, who had originally suggested the holding of such a conference, had visited New Delhi from Sept. 22-26 to discuss the idea with Mr. Nehru. A joint communiqué issued on Sept. 25 stated that the two Prime Ministers had had informal talks on matters of common concern, including the proposed Asian-African conference and developments in S E. Asia since the Colombo Conference ; that they had agreed that such a conference was desirable and would be helpful in promoting the cause of peace and a common approach to the problems facing the area ; and that they considered it advisable that a further meeting of the Colombo Powers should take place before the conference met.

In a speech to both Houses of the Indian Parliament on Sept. 23, Dr. Sastroamidjojo referred to the *Pantja Sila*, or five basic principles of the Indonesian State, which he defined as " belief in God and in religious freedom for everyone : humanitarianism or internationalism —a respect for humanity throughout the world ; nationalism—belief in the national unity of all Indonesians ; democracy—the principle of representative government, social justice—belief in social, economic, and political equality for everyone in our nation."

Turning to international affairs, he continued : " The area of conflict between the two great Power blocs has in recent months moved from Europe to Asia. The ' cold war ' is upon us, and in some parts of Asia it has become a war in fact and not only in name The nations of Asia have done their utmost to prevent the outbreak of fighting and to build a durable peace, for only when there is such a peace can we tackle and solve the enormous problems which confront us.

" To our way of thinking, keeping in mind the principles of *Pantja Sila*, peace in our part of the world cannot be assured by military pacts such as that recently concluded in Manila. There is a better way—that of co-operation and co-existence. In this respect the Colombo Conference opened a new road. It had a direct and immediate effect on the Geneva Conference, in which Asian nations intervened with success. This showed the world that Asian problems cannot be solved without the co-operation of Asian nations.

" . . . The Asian nations have already become an important factor, not only in Asian affairs, but in world affairs as well. The advantage we have gained must be followed up The Colombo principles must be followed up and expanded. We nations of Asia have friends amongst nations of the African Continent. To a large extent their position is the same as ours ; to a large extent they face the same problems. Close African-Asian co-operation can be realized and, I believe, will immeasurably strengthen the forces making for peace . . ."

After leaving New Delhi, Dr. Sastroamidjojo paid a three-day visit to Rangoon, where he had informal talks with the Burmese Prime Minister, U Nu. A joint statement issued on Sept. 28 said that they had discussed common problems, including concerted steps for easing world tension, particularly in South-East Asia ; that they had also discussed Japanese war reparations ; and that they had agreed on the desirability of holding the Asian-African conference at an early date, of closer economic, political, and cultural co-operation among the countries of S.E. Asia, and of the maintenance of close contacts between Burma and Indonesia.

Dr. Sastroamidjojo, Mr. Nehru, U Nu, Mr. Mohammed Ali (the Prime Minister of Pakistan), and Sir John Kotelawala (the Prime Minister of Ceylon) met for discussions at Bogor on Dec. 28-29, and at the conclusion of their talks issued the following communiqué :

Asian-African Conference. " The Prime Ministers agreed that an Afro-Asian conference will be held under their sponsorship, and have reached agreement on all consequent matters. The purposes of the Afro-Asian conference will be :

(*a*) To promote good will and co-operation among the nations of Asia and Africa ; to explore and advance their mutual as well as common interests ; and to establish and further friendliness and neighbourly relations.

(*b*) To consider the social, economic, and cultural problems and relations of the countries represented.

(c) To consider problems of special interest to the Asian and African peoples—e.g., problems affecting national sovereignty, and of racialism and colonialism.

(*d*) To view the position of Asia and Africa and their peoples in the world of today, and the contribution they can make in the promotion of world peace and co-operation.

The conference will meet in Indonesia in the last week of April, 1955, the Government of Indonesia having agreed to make the necessary arrangements A conference secretariat representing the sponsoring countries will be set up in Indonesia

The Prime Ministers agreed that the conference will have a broad and geographical basis. All countries in Asia which have independent Governments will be invited With minor variations and modifications of this basic principle, they have decided to invite the following 25 countries : Afghanistan, Cambodia, the Central African Federation, the People's Republic of China, Egypt, Ethiopia the Gold Coast, Persia, Iraq, Japan, Jordan, Laos, Lebanon, Liberia, Libya, Nepal, the Philippines, Saudi Arabia, the Sudan, Syria, Siam, Turkey, North and South Vietnam, and the Yemen.

Representation at the conference will be at Ministerial level, and it is hoped that each country invited will be represented by her Prime Minister and/or Foreign Minister, together with such other representatives as each Government might wish to include in its delegation The conference will determine its own procedure and agenda, the general scope of which is set out in the purpose of the conference

The Prime Ministers wish to point out that acceptance of the invitation by any one country would in no way involve or even imply any change in its view of the status of any other country. It implies only that the country invited is in general agreement with the purpose of the conference They have also borne in mind the principle that the form of government and way of life of any one country should in no way be subject to interference by any other Any view expressed at the conference by one or more participating countries will not be binding on, or be regarded as accepted by, any other unless the latter so desires

The basic purpose of the conference is that the countries concerned should become better acquainted with one another's point of view. The Prime Ministers hope that this clarification will enable all the invited countries to accept the invitation The Prime Ministers wish to state that in seeking to convene an Afro-Asian conference they were not actuated by any desire for exclusiveness in respect of the membership of the conference They did not decide, either, that the participating countries should build themselves into a regional bloc "

Geneva Agreements. " The Prime Ministers expressed gratification at the result of the Geneva Conference on Indo-China and the cessation of hostilities. They expressed the hope that the Geneva Agreements would be fully respected and implemented by all concerned, and that there would be no outside interference which would hinder their successful implementation."

Dutch New Guinea. " The Prime Ministers, in the context of their well-known attitude towards colonialism, took note of the case of West Irian (Dutch New Guinea) The Prime Ministers of Burma, Ceylon, India, and Pakistan supported the position of Indonesia in this matter They expressed the earnest hope that the Netherlands Government would reopen negotiations to implement her obligations under the solemn agreement concluded by her with Indonesia."

Tunisia and Morocco. " The Prime Ministers expressed their continued support for the demands of the peoples of Tunisia and Morocco for their national independence and their legitimate right to self-determination."

Nuclear Explosions. " The Prime Ministers reiterated their great concern in respect of the destructive potential of nuclear and thermo-nuclear explosions for experimental purposes, which threaten not only their countries but the world, and their far-reaching and yet unascertained effect, which may do permanent damage to human life and civilization. They earnestly request all concerned to bring about a cessation of such experiments. They also request the Disarmament Commission to take this matter into immediate consideration."

Economic Co-operation between Asian Countries. " The economic development of Asian countries, which is urgently necessary for the happiness and well-being of their peoples, requires a planned approach with a view to the utilization in the most effective manner of the available resources. An essential pre-requisite of such an approach is full knowledge of the resources. Surveys of physical resources, particularly of the mineral and subsoil wealth of each country, should therefore be conducted, and co-operation in the supply of technical personnel and in other ways should be made available. The Prime Ministers considered that co-operation in the economic sphere for the supply of technical personnel and in all other ways should engage the attention of their Governments. They considered that a committee of experts should be set up to consider economic questions of common interest to their countries."

Conclusion. " The Prime Ministers, meeting on the eve of the New Year, expressed their earnest hope that the year would witness a further growth in the friendly co-operation of the countries represented at the conference, and further the course of world peace."

According to press reports from Bogor, some differences of opinion arose as to which countries should be invited to the proposed larger conference, and especially on the question of inviting Israel. Despite opposition from U Nu, Israel was eventually omitted on the suggestion of Mr. Mohammed Ali, who pointed out that if she were invited the Arab countries might refuse to take part. Mr. Nehru, at a press conference on Dec. 30, answered questions on the reasons for the non-invitation of certain countries.

Israel, he said, though fulfilling the qualifications laid down, had been excluded because the Arab countries were hostile to her and " we wanted to proceed by unanimity " Asked why the Chinese

Nationalist Government in Formosa had not been invited, Mr. Nehru said that Formosa was "an island but not a State" The question of South Africa had not been discussed, but it had been mentioned that she could not be invited "because of her very aggressive racial policy." As regards Korea and Indo-China, both were "in a fluid state," but in a sense the Colombo Powers had a special responsibility in regard to Indo-China because their earlier proposals had been largely accepted by the Geneva conference; in addition, India was chairman of the international commissions in Indo-China That direct responsibility, however, did not arise in Korea, and for this reason "Korea had been left out" Asked why Turkey had been invited, Mr. Nehru said the fact remained that Turkey was in Asia, whilst Soviet Asia had not been invited because it was politically part of a European unit, namely, the Soviet Union.

Sir John Kotelawala stated at the same press conference that the reason for the omission of South Africa was obvious, as it was a country which "blacklisted" Asians.

While on their way to Jakarta, Mr. Nehru and U Nu visited Bangkok on Dec. 26 as the guests of the Siamese Government, being the first foreign Prime Ministers ever to visit Siam.—(Indian and Pakistani High Commissioners' Offices, London - The Hindu, Madras - Indonesian Embassy, London - Ceylon Government Information Dept., Colombo - Burmese Government Information Dept., Rangoon)

(Prev. rep. Colombo Conference, 13576 A.)

A. UNITED KINGDOM. — Coal Production in 1954.

Provisional figures published by the Ministry of Fuel and Power on Jan. 5, 1955, gave the total output of saleable coal in 1954 as 223,795,100 tons (213,551,200 tons deep-mined and 10,243,900 tons opencast), compared with 223,519,000 tons (211,820,900 tons deep-mined and 11,698,100 tons opencast) in 1953. The output of saleable mined coal in 1953 and 1954 was as follows:

	52 weeks ended	
	Jan. 1, 1955	Jan 2, 1954
Division	Tons	Tons
Scottish	22,576,100	22,822,600
Northern*	13,480,700	13,390,900
Durham	25,912,600	25,898,800
North-Eastern	45,612,800	44,906,400
North-Western	15,642,100	15,566,600
East Midlands	45,568,600	44,453,100
West Midlands	18,037,100	18,108,600
South-Western	25.059,800	24,962,600
South-Eastern	1,661,400	1,711,300
	213,551,200	211,820,900

* Northumberland and Cumberland.

The increase of only 1,730,000 tons, or about 0.82 per cent, in deep-mined coal fell considerably short of the increase of 5,000,000 tons, or nearly 2.4 per cent, which had been agreed upon between the National Coal Board and the National Union of Mineworkers as reasonable in view of the existing manpower when the last wage increases were granted in January 1954. (Ministry of Fuel and Power - Manchester Guardian) **(Prev. rep. Production in 1953, 13613 A; Quarterly Figures, 13848 A; Wage Increases, 13419 B.)**

B. MALTA. — Post-war Emigration.

It was stated in the *New Commonwealth* (issue of Nov. 25, 1954) that 38,311 Maltese had emigrated in the eight post-war years 1946 to 1953, of whom 20,465 were adult males—a figure amounting to almost one-third of the gainfully-occupied male population of Malta and Gozo, and equivalent to the entire labour force at present serving in H.M. naval, military and air establishments in the island. Post-war emigration had raised the estimated number of Maltese settled in other countries to 102,000, of whom 38,000 had emigrated to Australia, 23,000 to the United States, 16,000 to the United Kingdom, 10,000 to Canada, and 15,000 to other countries, including New Zealand, South Africa, France, and Latin American nations. Malta, which is only 110 square miles in area, had a population of 320,613 at the end of 1953—one of the highest population densities in the world.—(New Commonwealth) **(13664 C).**

C. GUATEMALA. — Restoration of Expropriated Estates to United Fruit Company.

An agreement concluded on Dec. 29 between the new Guatemalan Government of Colonel Castillo Armas and the U.S.-owned United Fruit Company restored to the company all the estates which had been expropriated under the land reform legislation promulgated by the Arbenz Government in June 1952. In return the company undertook to pay income and profits taxes in conformity with Guatemalan legislation, with an upper limit of 30 per cent of any profits made, and also agreed to withdraw its official complaint against Guatemala arising out of the land expropriation, and its demand for $15,000,000 compensation.—(New York Times) **(13465 A.)**

D. SOVIET UNION. — Trial and Execution of Viktor Abakumov and Associates.

It was officially announced in Moscow on Dec. 23 that four former "accomplices" of the late Lavrenti Beria had been sentenced to death in Leningrad by a military tribunal of the Soviet Supreme Court on charges of treason and political sabotage, and that the sentences had been carried out by shooting. Those executed were Viktor S. Abakumov (former Minister of State Security, and at one time private secretary to M. Malenkov), A. G. Leonov (former chief of the investigating department in the Ministry of State Security), V. I. Komarov, and M. T. Likhachev, the last two having been M. Leonov's deputies. The announcement also said that two former employees of the Ministry of State Security (Y. M. Broverman and I. A. Chernov) had been sentenced to 25 and 15 years' imprisonment respectively for bringing false accusations against Soviet citizens who had been imprisoned as a result of those accusations.

The announcement said that Abakumov, who had been placed in his post by Beria, had been "a direct participant of the criminal subversive group which carried out Beria's orders directed against the Central Committee of the Communist Party and the Soviet Government." It added that Abakumov had fabricated the so-called "Leningrad case" of several years earlier in which a number of Communist Party officials in that city had been arrested and imprisoned on the false accusation of organizing opposition against the party's Central Committee and the party as a whole [This trial had taken place under the Stalin regime when Beria was Minister of the Interior.] It was also stated that the military tribunal which had tried Abakumov and the other defendants had established "many other falsifications of criminal cases and unpardonable violations of Soviet laws by Abakumov and his associates"; that all the defendants had committed "numerous political adventures and provocations" and had extracted false confessions from many party members and Government officials; and that they had, moreover, prevented the falsely-arrested persons from appealing to the party's Central Committee and to the Soviet Government.

The announcement added that the persons who had been wrongly imprisoned by Abakumov and his associates had been "fully rehabilitated as Soviet citizens." (Izvestia, Moscow)

(Prev. rep. Riumin, 13718 A; Beria, 13363 A.)

E. METEOROLOGY. — International Codes for Weather Information.

New universal codes adopted by the World Meteorological Organization (a U.N. agency) came into force throughout the world on Jan. 1, 1955. They will be used by about 7,800 stations of the international meteorological network, 3,000 transport and reconnaissance aircraft, and 2,400 ships transmitting daily some 100,000 weather observations relating to the surface of the earth, and a further 10,000 observations relating to weather conditions in the upper atmosphere. These observations, made at least four times a day, are collected by a network of national, regional and continental centres, which incorporate them in composite messages and transmit them by all modern forms of telecommunication so that meteorological services throughout the world can begin preparing weather charts half an hour after the observations have been made. These charts, in turn, serve as bases for studies and analysis culminating in forecasts for agriculture, aviation, shipping, etc. (U.N. Information Centre, London) **(Prev. rep Meteorology, 13290 E; W.M.O., 11564 C.)**

F. UNITED KINGDOM. — Army Appointments. - Major-General Lathbury appointed C.-in-C., East Africa.

The War Office announced on Jan. 10 that Major-General G. W. Lathbury, Vice Adjutant-General at the War Office, would succeed General Sir George Erskine as C.-in-C., East Africa (with temporary rank of lieutenant-general) with effect from May, and that Sir George Erskine would return to Britain to become G.O.C.-in-C., Southern Command, with effect from November.

Major-General Lathbury (48), who will direct operations against the Mau Mau terrorists, commanded airborne troops in Sicily and North Africa during the war, and led the 1st Airborne Division at Arnhem. He became Commandant of the Staff College, Camberley, in 1951.

The following appointments were announced at the same time: Lieut.-General Sir Maurice Chilton, G.O.C.-in-C., Anti-Aircraft Command, as Quartermaster-General to the Forces *vice* General Sir Ouvry Roberts; and Major-General E. M. Bastyan, G.O.C. 53rd (Welsh) Division, T.A., as Vice Adjutant-General at the War Office *vice* Major-General Lathbury.—(Times)

(Prev. rep. 13960 A; General Erskine, 13065 A.)

G. INDIA. — New Chief Justice.

Mr. Bijan Kumar Mukherjee, the senior judge of the Supreme Court, was sworn-in on Dec. 23 as Chief Justice of India in succession to Mr. Mahajan, who had retired from that office. (The Statesman, Calcutta - The Hindu, Madras) **(13373 E.)**

A. UNITED STATES. — President Eisenhower's State of the Union Message. - Appointment of Chairmen of Congressional Committees.

President Eisenhower delivered his annual State of the Union message to a joint session of the 84th Congress on Jan. 6. His principal proposals and recommendations were as follows

(1) The reduction of U.S tariff restrictions and other trade barriers, and continued aid to under-developed countries.

(2) Extension of the Selective Service Act, together with proposals designed to prevent the wastage of trained men and to build up the civilian reserves.

(3) The extension for a further two years of the Defence Production Act and part of the first War Powers Act of 1941 for expansion of industry in case of emergency.

(4) Removal of "injustices" in the McCarran - Walter Immigration Act.

(5) Revision of the Taft-Hartley Labour Act, as recommended in 1954.

(6) The raising of the minimum wage from 75 cents to 90 cents an hour, together with an expansion of its coverage.

(7) Adoption of a constitutional amendment to lower the voting age from 21 to 18, as recommended in 1954.

(8) Enactment of a Federal health reinsurance programme, as well as of a programme to improve medical care for those receiving public assistance.

(9) A new programme of Federal aid to education to help overcome the "unprecedented classroom shortage."

(10) Extension of the Small Business Act, due to expire in June 1955.

(11) A "substantial" increase in the salaries of members of Congress and of the judiciary, and pay increases for Federal employees.

(12) The granting of Statehood to Hawaii, with similar action later for Alaska, and the extension of voting rights to citizens of the District of Columbia.

(13) Creation of a Federal Arts Commission.

A summary of the President's speech is given below.

Introduction. "At the outset I believe it would be well to remind ourselves of this great fundamental in our national life: our common belief that every human being is divinely endowed with dignity and worth and inalienable rights. This faith, with its corollary—that to grow and flourish, people must be free—shapes the interests and aspirations of every American From this deep faith have evolved three main purposes of our Federal Government (1) to maintain justice and freedom among ourselves, and to champion them for others so that we may work effectively for enduring peace, (2) to help keep our economy vigorous and expanding, thus sustaining our international strength and assuring better jobs, better living, better opportunities for every citizen, and (3) to concern ourselves with the human problems of our people, so that every American may have the opportunity to lead a healthy, productive, and rewarding life. . Foremost among these broad purposes of government is our support of freedom, justice, and peace

It is of the utmost importance that each of us understands the true nature of the struggle now taking place in the world. It is not a struggle merely of economic theories, or of forms of government, or of military power At issue is the true nature of man Either man is the creature whom the Psalmist described as 'a little lower than the angels' . or man is a soulless, animated machine to be enslaved, used, and consumed by the State for its own glorification. It is, therefore, a struggle which goes to the roots of the human spirit, and its shadow falls across the long sweep of man's destiny This prize, so precious, so fraught with ultimate meaning, is the true object of the contending forces in the world."

International Affairs. "In the past year there has been progress justifying hope, both for continuing peace and for the ultimate rule of freedom and justice in the world Free nations are collectively stronger than at any time in recent years. Just as nations of this hemisphere, in the historic Caracas and Rio conferences, have closed their ranks against imperialistic Communism and strengthened their economic ties, so free nations elsewhere have forged new bonds of unity. Recent agreements between Turkey and Pakistan have laid a foundation for increased strength in the Middle East With our understanding support, Egypt and Britain, Yugoslavia and Italy, Britain and Persia, have resolved dangerous differences. The security of the Mediterranean has been enhanced by an alliance between Greece, Turkey, and Yugoslavia. Agreements in Western Europe have paved the way for unity to replace past divisions which have undermined Europe's economic and military vitality. The defence of the West appears likely at last to include a free, democratic Germany participating as an equal in the councils of NATO. In Asia and the Pacific, the Manila Pact supplements our treaties with Australia, New Zealand, the Philippines, Korea, and Japan, and our prospective treaty with the Republic of China. These pacts stand as solemn warnings that future military aggression and subversion against the free nations of Asia will meet a united response. The Pacific Charter, also adopted at Manila, is a milestone in the development of human freedom and self-government in the Pacific area. Under the auspices of the U.N. there is promise of progress in our country's plan for the peaceful use of atomic energy.

Today the world is at peace. It is, to be sure, an insecure peace. Yet all humanity finds hope in the simple fact that for an appreciable time there has been no active major battlefield on earth. This same fact inspires us to work all the more effectively with other nations for the well-being, the freedom, the dignity, of every human on earth These developments are heartening indeed, and we are hopeful of continuing progress But sobering problems remain

The massive military machines and ambitions of the Soviet Communist bloc still create uneasiness in the world All of us are aware of the continuing reliance of the Soviet Communists on military force, of the power of their weapons, of their present resistance to realistic armament limitation, and of their continuing effort to dominate or intimidate free nations on their periphery Their steadily growing power includes an increasing strength in nuclear weapons This power, combined with the proclaimed intentions of the Communist leaders to communize the world, is the threat confronting us today.

To protect our peoples from the catastrophe of a nuclear holocaust, free nations must maintain countervailing military power to persuade the Communists of the futility of seeking their ends through aggression If the Communist rulers understand that America's response to aggression will be swift and decisive—that never shall we buy peace at the expense of honour or faith—they will be powerfully deterred from launching a military venture engulfing their own peoples and many others in disaster This, of course, is merely world stalemate. But in this stalemate each of us may and must exercise his high duty to strive in every honourable way for an enduring peace

The military threat is but one menace to our freedom and security. We must not only deter aggression, we must also frustrate the efforts of the Communists to gain their goals by subversion. To this end free nations must maintain and reinforce their cohesion, their internal security, their political and economic vitality, and their faith in freedom. In such a world America's course is clear. We must tirelessly labour to make the peace more just and durable We must strengthen collective defence under the U N Charter, and gird ourselves with sufficient military strength and productive capacity to discourage resort to war and protect our nation's vital interests. We must continue to support and strengthen the United Nations At this very moment, by vote of the U N General Assembly, its Secretary-General is in Communist China on a mission of deepest concern to all Americans, seeking the release of our never-to-be-forgotten American aviators and all other U.N prisoners wrongfully detained by the Communist regime.

We must also encourage the efforts being made in the U N to limit armaments and to harness the atom to peaceful use We must expand international trade and investment, and assist friendly nations whose own best efforts are still insufficient to provide the strength essential to the security of the free world. We must be willing to use the processes of negotiation whenever they will advance the cause of just and secure peace to which the U S A and other free nations are dedicated."

Foreign Trade and Assistance. After referring to the necessity for a vigorous prosecution of information and educational exchange programmes, the President continued: "The recent economic progress in many free nations has been most heartening It promises us allies who are strong and self-reliant; it promises a growing market for the products of our mines, factories, and farms. But only through steady effort can we hope to continue this progress. Barriers still impede trade and the flow of capital needed to develop each nation's human and material resources. Wise reduction of these barriers is a long-term objective of our foreign economic policy—a policy of an evolutionary and selective nature, assuring broad benefits to our own and other peoples.

We must gradually reduce certain tariff obstacles to trade These actions should, of course, be accomplished by a similar lowering of trade barriers by other nations, so that we may move steadily toward greater economic advantage for all. We must further simplify Customs administration and procedures. We must facilitate the flow of capital and continue technical assistance, both directly and through the U.N., to less developed countries to strengthen their independence and raise their living standards. . "

Defence. The President pointed out that major U.S. national security programmes accounted for two-thirds of the entire Federal Budget and that 4,000,000 Americans—servicemen and civilians—were on the rolls of the defence establishment, but said that "many thousands of millions of dollars" of defence expenditure had been saved during the past two years by reorganization and economies. He then went on to enumerate the following "fundamentals" underlying the U.S. defence programme

"(1) A realistic limitation of armaments and an enduring, just peace remain our national goals. We maintain powerful military forces because there is no present alternative—forces designed for deterrent and defensive purposes alone, but able instantly to strike back with destructive power in response to an attack.

(2) We must stay alert to the fact that undue reliance on one weapon or preparation for only one kind of warfare simply invites an enemy to resort to another. We must, therefore, keep in our armed forces balance and flexibility adequate for our purposes and objectives.

(3) To keep our armed forces abreast of the advances of science, our military planning must be flexible enough to utilize the new weapons and techniques which flow ever more speedily from our research and development programmes. The forthcoming military budget therefore emphasizes modern air power in the Air Force, Navy, and Marine Corps and increases the emphasis on new weapons, especially those of rapid and destructive striking power. It assures

the maintenance of effective, retaliatory force as the principal deterrent to overt aggression It accelerates the continental defence programme and the build-up of ready military reserve forces It continues a vigorous programme of stockpiling strategic and critical materials and strengthening our mobilization base. The budget also contemplates the strategic concentration of our strength through re-deployment of certain forces. It provides for reduction of forces in certain categories and their expansion in others, to fit them to the military realities of our time. These emphases in our defence planning have been made at my personal direction after long and thoughtful study. In my judgment, they will give our nation a defence accurately adjusted to the national need

(4) Pending a world agreement on armament limitation, we must continue to improve and expand our supplies of nuclear weapons for our land, naval, and air forces, while at the same time continuing our encouraging progress in the peaceful use of atomic power.

(5) In the administration of these costly programmes, we must demand the utmost in efficiency and ingenuity. We must assure our people not only of adequate protection but also of a defence that can be carried forward from year to year until the threat of aggression has disappeared."

To help maintain this kind of armed strength and improve its efficiency, I must urge the enactment of several important measures in this session

The first concerns the Selective Service Act, which expires next June 30. For the foreseeable future, our standing forces must remain much larger than voluntary methods can sustain. We must therefore extend the statutory authority to induct men for two years of military service.

The second . . . concerns the rapid turnover of our most experienced servicemen. This process seriously weakens the combat readiness of our armed forces and is exorbitantly expensive. To encourage more trained servicemen to remain in uniform, I shall propose a number of measures to increase the attractions of a military career. These measures will include more adequate medical care for dependants, survivors' benefits, more and better housing, and selective adjustments in military pay and other allowances.

Thirdly, I shall present a programme to rebuild and strengthen the civilian components of our armed forces . . . designed to make better use of our manpower of military age. Because it will go far in assuring fair and equitable participation in military training and service, it is of particular importance to our combat veterans. In keeping with the historic military policy of our Republic, this programme is designed to build and maintain powerful civilian reserves immediately capable of effective military service in an emergency, in lieu of maintaining active duty forces in excess of the nation's immediate need "

Internal Security. " Maintenance of an effective defence requires continuance of our aggressive attack on subversion at home. In this effort we have, in the past two years, made excellent progress. F.B.I. investigations have been powerfully reinforced by a new internal security division in the Department of Justice; the security activities of the Immigration and Naturalization Service have been revitalized; an improved and strengthened security system is in effect throughout the Government; the Department of Justice and the F.B.I. have been armed with effective new legal weapons forged by the 83rd Congress.

We shall continue to ferret out and to destroy Communist subversion. We shall, in the process, carefully preserve our traditions and the basic rights of our citizens "

Civil Defence and Defence Production. " Our civil defence programme is also a key element in the protection of our country. We are developing co-operative methods with State Governors, mayors, and voluntary citizen groups, as well as among Federal agencies, in building the civil defence organization Its significance in time of war is obvious: its swift assistance in disaster areas last year proved its importance in time of peace.

An industry capable of rapid expansion, and essential materials and facilities swiftly available in time of emergency, are indispensable to our defence. I urge therefore a two-year extension of the Defence Production Act and of Title II of the first War Powers Act of 1941. These are cornerstones of our programme for the development and maintenance of an adequate mobilization base."

Bipartisan Policy. " . . . Our quest for peace and freedom necessarily presumes that we who hold positions of public trust must rise above self and section—that we must subordinate to the general good our personal pride and prejudice. Tirelessly, with united purpose, we must fortify the material and spiritual foundations of this land of freedom and of free nations throughout the world. As never before, there is need for unhesitating co-operation among the branches of our government

At this time the Executive and Legislative branches are under the management of different political parties. This fact places both parties on trial before the American people. In less perilous days of the past, division of government responsibility among our great parties has produced at times a paralysing indecision. We must not let this happen in our time. We must avoid a paralysis of the will for peace and international security.

In the traditionally bipartisan areas—military security and foreign relations—I can report that I have already had, from the leaders of this Congress, assurances of unreserved co-operation. Yet the strength of our country requires more than maintenance of mere military strength and success in foreign affairs; these vital matters are in turn dependent upon concerted and vigorous action in a number of supporting programmes.

I say therefore to the 84th Congress · In all areas basic to the strength of America, there will be—to the extent I can ensure them —co-operative, constructive relations between the Executive and Legislative branches of this government Let the general good be our yardstick on every great issue of our time."

The Economic Position. " Our efforts to defend our freedom and to secure a just peace are of course, inseparable from the second great purpose of our government: to help maintain a strong, growing economy—an economy vigorous and free, in which there are ever-increasing opportunities, just rewards for effort, and a stable prosperity that is widely shared

In the past two years, many important governmental actions helped our economy to adjust to conditions of peace; these and other actions created a climate for renewed economic growth. Controls were removed from wages, prices and materials Tax revisions encouraged increased private spending and employment Federal expenditures were sharply reduced, making possible a record tax cut.

These actions, together with flexible monetary and debt management policies, helped to halt inflation and stabilize the value of the dollar. A programme of co-operation and partnership in resource development was begun. Social security and unemployment insurance laws were broadened and strengthened. New laws started the long process of balancing farm production with farm markets. Shipbuilding and stockpiling programmes strengthened key sectors of the economy, while improving our mobilization base. A comprehensive new housing law brought impressive progress in an area fundamental to our economic strength, and closed loopholes in the old laws that permitted dishonest manipulations. Many of these programmes are just beginning to exert their main stimulating effect upon the economy generally and upon specific communities and industries throughout the country.

The past year—1954—was one of the most prosperous years in our history. Business activity now surges with new strength Production is rising Employment is high Towards the end of last year average weekly wages in manufacturing were higher than ever before Personal income after taxes is at a record level So is consumer spending. Construction activity is reaching new peaks Export demand for our goods is strong State and local government expenditures on public works are rising. Savings are high, and credit is readily available. So, today, the transition to a peace-time economy is largely behind us.

The economic outlook is good The many promising factors . . do not guarantee sustained economic expansion; however, they do give us a strong position from which to carry forward our economic growth If we, as a people, act wisely, within ten years our annual national output can rise from its present level of about $360,000,000,000 to $500,000,000,000, measured in dollars of stable buying power . . ."

Discussing some general economic problems, President Eisenhower went on: " Government efficiency and economy remain essential to progress towards a balanced budget More than $10,000,000,000 were cut from the spending programme first proposed in the Budget of Jan. 9, 1953. Expenditures of that year were $6,500,000,000 below those of the previous year. In the current fiscal year, Government spending will be nearly $4,500,000,000 less than in the fiscal year which ended last June. New spending authority has been held below expenditures, reducing Government obligations accumulated over the years. Last year we had a large tax cut and, for the first time in 75 years, a basic revision of Federal tax laws. It is now clear that defence and other essential Government costs must remain at a level precluding further tax reductions this year Although excise and corporation income taxes must, therefore, be continued at their present rates, further tax cuts will be possible when justified by lower expenditure and by revenue increases arising from the nation's economic growth. I am hopeful that such reductions can be made next year."

Development of Natural Resources. With regard to natural resources, the President said . " I believe that the nation must adhere to three fundamental policies: (1) to develop, wisely use and conserve basic resources from generation to generation; (2) to follow the historic pattern of developing these resources primarily by private citizens under fair provisions of law, including restraints for proper conservation; (3) to treat resource development as a partnership undertaking—a partnership in which the participation of private citizens and State and local governments is as necessary as Federal participation." This policy of partnership and co-operation was producing good results because it had encouraged local public bodies and private citizens to plan their own power sources, and the Federal Government and local and private organizations to co-ordinate their developments. Moreover, the Federal Government must shoulder its own partnership obligations by undertaking projects of such complexity and size that their success required Federal development. The 1956 Budget would recommend appropriations to start six new reclamation and more than 30 new Corps of Engineers projects of varying size.

" Although this partnership approach is producing encouraging results," the President declared, " its full success requires a nation-wide comprehensive water resources policy firmly based in law. Such a policy is under preparation and, when completed, will be submitted to Congress "

Transport and Public Works. " A modern highway system is essential to meet the needs of our growing population, expanding economy, and national security. We are accelerating our highway improvement programme as rapidly as possible under existing State and Federal laws and authorizations. However, this effort will not in itself assure our people an adequate highway system. On my recommendation this problem has been carefully considered by the

conference of State Governors and by a special advisory committee, composed of leading private citizens I have received the recommendations of the Governors' conference and will shortly receive the views of the special advisory committee Aided by their findings, I plan to submit . . . detailed recommendations which will meet our most pressing national highway needs.

In further recognition of the importance of transportation to our economic strength and security, the Administration, through a Cabinet Committee, is thoroughly examining existing Federal transportation policies to determine their effect on the adequacy of transportation services . Legislation will be recommended to correct policy deficiencies which we may find.

The nation's public works activities are tremendous in scope It is estimated that more than $12,000,000,000 will be expended in 1955 for the development of land, water and other resources; control of floods, and navigation and harbour improvements; construction of roads, schools, and municipal water supplies; and disposal of domestic and industrial wastes . . . Efficient planning and execution of the nation's public works require both the co-ordination of Federal activities and effective co-operation with State and local governments. The Council of Economic Advisers, through its public works planning section, has made important advances during the past year in effecting this co-ordination and co-operation In view of the success of these initial efforts, and to give more emphasis and continuity to this essential co-ordination, I shall request Congress to appropriate funds for the support of an Office of Co-ordinator of Public Works, in the Executive office of the President "

Agriculture. ". . . Through vigorous administration and new authority provided by the 83rd Congress, surplus farm products are now moving into consumption. From February 1953 to November 1954, the rate of increase of Government-held surpluses has been reduced by our moving into use more than $2,300,000,000 worth of Government-owned farm commodities; this amount is equal to more than 7 per cent of a year's production of all our farms and ranches. Domestic consumption remains high, and farm exports will be higher than last year As a result of the flexibility provided by the Agricultural Act of 1954 (see 13991 A) we can move towards less restrictive acreage controls.

Thus, farm production is gradually adjusting to markets, markets are being expanded, and stocks are moving into use. We can now look forward to an easing of the influences depressing farm prices, to reduced Government expenditures for purchase of surplus products, and to less Federal intrusion into the lives and plans of our farm people Agricultural programmes have been re-directed towards better balance, greater stability and sustained prosperity. We are headed in the right direction I urgently recommend to Congress that we continue resolutely on this road

Greater attention must be directed to the needs of low-income farm families. Twenty-eight per cent of our farm operator families have net cash incomes of less than $1,000 per year. Last year, at my request, careful studies were made of the problems of these farm people. I shall later submit recommendations designed to assure the steady alleviation of their most pressing concerns.

Because drought also remains a serious agricultural problem, I shall recommend legislation to strengthen Federal disaster assistance programmes . . ."

Small Business. " The prosperity of our small business enterprises is an indispensable element in the maintenance of our economic strength . . . I recommend that Congress extend the Small Business Act of 1953, which is due to expire next June."

Housing. " As part of our efforts to provide decent, safe and sanitary housing for low-income families, we must carry forward the housing programme authorized during the 83rd Congress We must also authorize contracts for a programme of 35,000 additional public housing units in each of the next two fiscal years This will meet the most pressing obligations of the Federal Government into the 1958 fiscal year, by which time the private building industry, aided by the Housing Act of 1954, will have had the opportunity to assume its full role in providing adequate housing for our low-income families."

Health. " . . . Constant advances in medical care are not available to enough of our citizens . . . Two fundamental problems confront us . (1) high and ever-rising costs of health services; (ii) serious gaps and shortages in these services.

By special message . . . I shall propose a co-ordinated programme to strengthen and improve existing health services. This programme will continue to reject socialized medicine It will emphasize individual and local responsibility. Under it the Federal Government will neither dominate nor direct, but serve as a helpful partner. Within this framework, the programme can be broad in scope. My recommendations will include a Federal health reinsurance service to encourage the development of more and better voluntary health insurance coverage by private organizations I shall also recommend measures to improve the medical care of that group of our citizens who, because of need, receive Federal-State public assistance. These two proposals will help more of our people to meet the costs of health services.

To reduce the gaps in these services, I shall propose: (*a*) new measures to facilitate construction of needed health facilities and help reduce shortages of trained health personnel; (*b*) vigorous steps to combat the misery and national loss involved in mental illness; (*c*) improved services for crippled children and for maternal and child health; (*d*) better consumer protection under our existing pure food and drug laws; (*e*) strengthened programmes to combat the increasingly serious pollution of our rivers and streams, and the growing problem of air pollution . . ."

Education. " . . Today we face grave educational problems. Effective and up-to-date analyses of these problems and their solutions are being carried forward through the individual State conferences and the White House conference to be completed this year However, such factors as population growth, additional responsibilities of schools, and increased and longer school attendance have produced an unprecedented classroom shortage. This is of immediate concern to all our people Positive, affirmative action must be taken now. Without impairing in any way the responsibilities of our States, localities, communities, or families, the Federal Government can and should serve as an effective catalyst in dealing with this problem. I shall forward a special message to Congress . . presenting a programme dealing with this shortage."

Juvenile Delinquency and Narcotic Addiction. "To help the States do a better and more timely job, we must strengthen their resources for preventing and dealing with juvenile delinquency. I shall propose Federal legislation to assist the States to promote concerted action in dealing with this nation-wide problem. I shall also carry forward the vigorous efforts of the Administration to improve the international control of the traffic in narcotics and in co-operation with State and local agencies, to combat narcotic addiction in our country."

Wages and Working Conditions. ". . During the past years, certain industrial changes and the readjustment of the economy to conditions of peace brought unemployment and other difficulties to various localities and industries These problems are engaging our most earnest attention But for the overwhelming majority of our working people, the past year has meant good jobs. Moreover, the earnings and savings of our wage-earners are no longer depreciating in value. Because of co-operative relations between labour and management, fewer working days were lost through strikes in 1954 than in any year in the past decade.

The outlook for our wage-earners can be made still more promising by several legislative actions:

(1) In the past five years we have had economic growth which will support an increase in the Federal minimum wage. In the light of present economic conditions, I recommend its increase to 90 cents an hour I also recommend that many others, at present excluded, be given the protection of a minimum wage.

(2) I renew my recommendation of last year for amendment of the Labour-Management Relations Act of 1947 [Taft-Hartley Act] . . I especially call to the attention of Congress amendments dealing with the right of strikers to vote in representation elections, and the need for equalizing the obligation under the Act to file disclaimers of Communist affiliation.

(3) The Administration will propose other important measures, including occupational safety workmen's compensation for longshoremen and harbour workers, and the 'eight-hour laws' applicable to Federal contractors Legislation will also be proposed respecting non-occupational disability insurance and unemployment compensation in the District of Columbia."

Federal Government Employees. The President stated that he would propose (1) a pay adjustment plan for Federal civilian employees outside the postal field service to correct inequities and increase individual pay rates; (2) voluntary health insurance on a contributory basis for Federal employees and their dependants; (3) a modern pay plan, including pay increases for postal field employees. As part of this programme, and to help eliminate the large annual postal deficit, he would renew his request for an increase in postal rates, and for the delegation of the fixing of rates to an impartial, independent body.

More adequate training programmes to equip career employees of the Government to render improved public service would also be recommended, together with improvements in the laws affecting employees serving on foreign assignments.

Increased Salaries for Congressmen and the Judiciary. "I also urge Congress to approve a long overdue increase in the salaries of members of Congress and of the Federal judiciary to a level commensurate with their heavy responsibilities."

Revision of Immigration Laws. " Two years ago I advised the Congress of injustices under existing immigration laws Through humane administration, the Department of Justice is doing what it legally can to alleviate hardships . . Certain provisions of law, however, have the effect of compelling action in respect of aliens which are inequitable in some instances and discriminatory in others. These provisions should be corrected in this session of Congress."

Statehood for Hawaii. " As the complex problems of Alaska are resolved, that territory should be expected to achieve statehood. In the meantime, there is no justification for deferring the admission to statehood of Hawaii. I again urge approval of this measure."

Extension of Suffrage. " We have three splendid opportunities to demonstrate the strength of our belief in the right of suffrage. (1) I again urge that a constitutional amendment be submitted to the States to reduce the voting age for Federal elections [i e. from 21 years to 18]. (2) I renew my request that the principle of self-government be extended and the right of suffrage granted to the citizens of the District of Columbia. (3) I again recommend that we work with the States to preserve the voting rights of citizens in the nation's services overseas."

Veterans' Benefits. " . . . We now have under study the system of benefits for veterans and for surviving dependants of deceased veterans and servicemen. Studies will be undertaken to determine the need for measures to ease the readjustment to civilian life of men required to enter the armed forces for two years of service."

Federal Encouragement of the Arts. "In the advancement of the various activities which will make our civilization endure and flourish, the Federal Government should do more to give official recognition to the importance of the arts and other cultural activities. I shall recommend the establishment of a Federal advisory commission on the arts within the Department of Health, Education and Welfare, to advise the Federal Government on ways to encourage artistic and cultural endeavour and appreciation. I shall also propose that awards of merit be established whereby we can honour our fellow citizens who make great contribution to the advancement of our civilization and of this country."

Improvement of Government Organization. ". . . I strongly recommend extension of the Reorganization Act and the law establishing the Commission on Inter-governmental Relations, both of which expire this spring. Thus Congress will assure continuation of the excellent progress recently made in improving Government organization and administration . . ."

When the new Congress assembled on Jan. 5, Senator Lyndon B. Johnson (Texas) was elected Democratic leader in the Senate and Senator William F Knowland (California) Republican leader. In the House of Representatives, Mr. Sam Rayburn (Democrat, Texas) was elected Speaker, Mr. John W. McCormack (Massachusetts) was elected Democratic leader, and Mr. Joseph W. Martin jr. (Massachusetts), the former Speaker, was elected Republican leader. The chairmen of the more important Congressional committees were subsequently named by the Democratic Party as follows:

Senate.

Foreign Relations, Senator Walter F. George (Georgia)
Finance, Senator Harry F. Byrd (Virginia).
Armed Services, Senator Richard B. Russell (Georgia).
Banking and Currency, Senator J. William Fulbright (Arkansas).
Appropriations, Senator Carl Hayden (Arizona)
Judiciary, Senator Harley M. Kilgore (West Virginia)
Rules and Administration, Senator Theodore F. Green (Rhode Island).
Agriculture, Senator Allen J. Ellender (Louisiana).
Government Operations, Senator John L. McClellan (Arkansas).

House of Representatives.

Foreign Affairs, Representative James P. Richards (South Carolina).
Armed Services, Representative Carl Vinson (Georgia).
Appropriations, Representative Clarence Cannon (Missouri)
Banking and Currency, Representative Brent Spence (Kentucky).
Rules, Representative Howard W. Smith (Virginia).
Judiciary, Representative Emanuel Celler (New York).
Agriculture, Representative Harold D. Cooley (North Carolina)
Government Operations, Representative William L. Dawson (Illinois).
Un-American Activities, Representative Francis E. Walter (Pennsylvania).
Ways and Means, Representative Jere Cooper (Tennessee)

Senator Wayne Morse (Independent), on whose vote the Democrats will rely for control of the new Senate, was nominated by the Democrats to the Foreign Relations and Banking Committees. Senator Alben Barkley, the former Democratic Vice-President, was nominated to the Foreign Relations and Finance Committees in virtue of his senior position in the Democratic Party; his recent election as the junior Senator for Kentucky would not normally have entitled him to a Committee appointment, as these appointments are customarily awarded on the basis of seniority as a Senator.—(New York Times - New York Herald Tribune) **(Prev. rep. 1954 Message, 13352 A; Committee Chairmen, 12701 A.)**

A. UNITED KINGDOM. — National Debt.

A White Paper issued on Nov. 1, 1954, gave the total National Debt of the U.K. as at March 31, 1954, as £26,583,032,762, representing an increase of £531,819,510 over the total of £26,051,213,252 as at March 31, 1953.

Of the total National Debt at March 31, 1954, £3,846,949,001 constituted Funded Debt, £11,500,000 was the estimated capital liability of Terminable Annuities, £4,819,365,000 represented the Floating Debt, £15,790,670,646 represented other internal Unfunded Debt, and £2,114,548,115 represented debt payable in external currencies (excluding debt arising out of the First World War). Total debt conversions effected in the year ended March 31, 1954, amounted to £1,340,892,992.

More than half of the net increase in the National Debt over the year was caused (*a*) by the issue of £243,593,078 of 3½ per cent Treasury Stock, 1979-81, when the Treasury assumed all liabilities in respect of British Iron and Steel 3½ per cent Guaranteed Stock under the Iron and Steel Act, 1953, and (*b*) by the issue of a further £47,405,713 Stock as compensation under the Coal Industry Nationalization Act, 1946.
(Treasury Press Office, London - Cmd. 9297)
(Prev. rep. National Debt, 13484 A.)

B. CHILE.—Governmental Crisis. - Congress revokes State of Siege imposed by President Carlos Ibañez. - Reorganization of Chilean Cabinet.

A governmental crisis arose in Chile towards the end of December when both Houses of the Chilean Congress repealed a decree, issued by President Ibañez on Sept. 20, imposing a state of siege after a series of strikes in the copper-mining industry.

From the middle of August onwards the copper-mining industry had been virtually paralysed by strikes arising out of the workers' demands for higher wages to meet the increased cost of living The Government, however, alleged that the strikes were fomented largely by Communist agitation, and on Sept. 20 imposed a state of siege—which meant, in effect, martial law—over all parts of the country with the exception of some of the southern provinces. The decree was issued by President Ibañez under a Constitutional provision empowering the President to take such action for the maintenance of law and order, if required, whenever the Chilean Congress was not in session The same Constitutional provision, however, laid down that any such action would need the subsequent approval of Congress Although the copper strikes were settled under an agreement of Oct. 2, which gave a 26 per cent wage increase to copper miners and certain other categories of workers, the state of siege nevertheless remained in force

The Chilean Congress, which had been reconvened in extraordinary session, voted on Dec 22 to repeal the state of siege on the ground that it was illegal The Chamber of Deputies also voted to impeach the Minister of the Interior (Señor Olavarria, who had succeeded General Parra in that post in November) for having declared in a broadcast that the state of siege would remain in force, irrespective of Congressional action, until the Supreme Court had given a ruling on whether or not the President's decree was valid. The Senate, by 23 votes to nine, repealed the stage of siege on the ground that the Government's powers under the "law for the internal security of the State" (see 13499 A) were sufficient to maintain public order.

The Congressional vote of Dec. 22 was followed by a deadlock for nearly a week, during which period the Government refused to revoke the state of siege. Señor Olavarria, accusing Congress of wishing to deprive the Government of its powers to maintain order, insisted that the Congressional decision was unconstitutional, and notified provincial governors that the state of siege would remain in force despite the Congress's action. The deadlock was resolved on Dec. 29, however, when the Government agreed to revoke the state of siege and the Chilean Congress agreed to withdraw its demand for the impeachment of Señor Olavarria.

The Cabinet thereupon tendered its resignation to President Ibañez on Dec. 30, and was re-formed on Jan. 6, 1955, with the following membership:

Sr. Sergio Recabarren, Interior; Sr. Osvaldo Koch, Foreign Affairs, Sr Francisco Cuebas, Finance; Sr. Rafael Tarud, Economy; Sr. Tobias Barros. Defence; Colonel Benjamin Vidala, Public Works, General Eduardo Yanez, Labour, Sr Arturo Zuñiga, Justice, Sr. Roberto Infante, Agriculture, Sr. Oscar Herrera, Education, Sr. Enrique Casas, Lands and Colonization

The new Cabinet, drawn mainly from the Agrarian Labour party, included several new Ministers, whilst some of the former Ministers took new portfolios—e.g., Sr. Osvaldo Koch, formerly Minister of Justice, succeeded Sr. Roberto Aldunate as Minister for Foreign Affairs. Señor Olavarria was not reappointed to the Cabinet.—(New York Times - New York Herald Tribune - Le Monde, Paris - Times)
(Prev. rep. Chile, 13697 D; 13499 A.)

C. SCOTLAND.—Appointment of New Lord Justice-General, Lord Advocate, and Solicitor-General.

It was announced on Dec. 24 that Lord Cooper, Lord Justice-General and President of the Court of Session of Scotland, had resigned because of ill-health, and that the Queen had approved the appointment of Mr. J. L. Clyde, Q.C., M.P., as his successor. Mr. Clyde, Conservative M.P. for Edinburgh North since 1950, had been Lord Advocate since 1951.

On Dec. 30 it was announced that Mr. W. R Milligan, Q.C., the Solicitor-General for Scotland, had been appointed Lord Advocate in succession to Mr. Clyde, and had also been appointed a Privy Councillor, whilst on Jan. 11 it was announced that Mr. William Grant, Q.C., had been appointed to succeed Mr. Milligan as Solicitor-General for Scotland. Mr. Milligan (56), who is not a member of Parliament, was adopted on Dec. 30 as Conservative candidate in the North Edinburgh by-election caused by Mr. Clyde's elevation to the Bench.
(The Scotsman, Edinburgh) **(Prev. rep. 11831 A.)**

D. PAKISTAN. — Cabinet Change.

It was announced in Karachi on Jan. 12 that Sardar Mumtaz Ali Khan, who joined the Pakistan Cabinet in December, had taken over the portfolio of Information and Broadcasting from Mir Ghulam Ali Talpur, who would retain the Education portfolio.—(Pakistan High Commissioner's Office, London)
(Prev. rep. 13972 A.)

A. ARGENTINA. — President Perón's Allegations against Roman Catholic Ecclesiastics. - Arrest of Priests. - Abolition of Church Control of Religious Education. - Legalization of Divorce and Prostitution.

In a broadcast on Nov. 10, 1954, President Perón accused a number of Roman Catholic priests and the Catholic Action organization (*Acción Católica Argentina*) of infiltrating into the trade unions, the universities, and other sections of the national life, and alleged that the Bishops of Córdoba, La Rioja, and Santa Fé were engaging in "intrigues" against the State. Whilst refraining from criticizing the Church as a whole, the President mentioned the names of 20 or 30 priests who, he alleged, had openly attacked the Government, and gave a warning that anyone who engaged in such activities would be imprisoned, irrespective of his position. The broadcast, made after discussions between President Perón and leaders of the *Peronista* party and the General Confederation of Labour, followed a campaign in the *Peronista* Press accusing a number of Roman Catholic ecclesiastics of attempted "infiltration" into State organizations.

About ten Roman Catholic priests were arrested in different parts of the country—mainly in Córdoba Province—during the following six weeks; most of them were subsequently released. On Nov. 14 a parish priest was arrested at Villa Maria (Córdoba Province) on a charge of "spreading false rumours," whilst on Nov 18 two of the priests mentioned in President Perón's broadcast were arrested on charges of having fomented public disturbances [The two priests—Fr. Bordagaray, spiritual adviser to the Catholic University Athenaeum at Córdoba, and Fr. Olmos, a parish priest in the same city, were subsequently sentenced to five days' detention.] On the same day (Nov. 18) the police raided students' clubs at the Universities of Córdoba and Santa Fe, seized a large quantity of literature and pamphlets, and arrested seven students.

Another priest (Fr Carboni) was arrested on Nov. 21 and sentenced to 30 days' imprisonment for preaching a sermon in the Church of San Rosa de Lima (Buenos Aires) in which he compared President Perón's treatment of the Church in Argentina with Hitler's persecution of the Catholics in Germany Forty-five professors, including five priests, were dismissed on Dec. 28 from Córdoba University on the orders of a special representative of President Perón

A pastoral letter signed by Cardinal Copello (Archbishop of Buenos Aires and Primate of Argentina) and a majority of the Argentine bishops was conveyed to the Foreign Minister (Dr. Remorino) on Nov. 23, and was read in all Roman Catholic Churches on the following Sunday. It expressed "astonishment" at the President's denunciation of the Bishops of Córdoba, La Rioja and Santa Fé, and also at the denunciation of a small number of priests, and asked for official information of the charges against these priests so that the ecclesiastical authorities could take any necessary action.

The pastoral letter said *inter alia*: "No priest can take part in the struggles of political parties without compromising the Church. Against atheistic and materialistic Communism, against divorce, and on the subject of lay schools and other vital questions, a priest cannot remain indifferent but must firmly and calmly defend eternal values Catholic Action, similarly, should remain outside and above the political parties . ."

A mass demonstration, organized by the *Peronista* party and the General Confederation of Labour, was held in Buenos Aires on Nov. 25 to protest against "clerical infiltration," and was addressed by President Perón, who declared that "no force in the world can control our government and place it in opposition to the people." Large crowds of *Peronista* supporters marched to the demonstration carrying banners bearing such slogans as '*Perón yes, priests no!*', '*No more religious teaching*,' and '*We want divorce*,' and police guards were stationed outside the residence of Cardinal Copello.

In defiance of a Government law banning demonstrations without official permission, a big counter-demonstration was held in the capital on Nov. 28 in which several thousand Catholics assembled outside the Cathedral and Cardinal Copello's residence to protest against the Government's anti-clerical policy. The demonstrators, who were not interfered with, chanted such slogans as '*Argentina is Catholic*' and '*Long Live the Pope*.'

Three measures directed, in effect, against the Roman Catholic Church were authorized by the Argentine Government during December: (1) a decree abolishing Church control of religious education in schools; (2) a Bill legalizing divorce; (3) a decree legalizing prostitution, which had been banned in Argentina for the past 18 years.

(1) A decree was issued by President Perón on Dec. 2 abolishing the Department of Religious Instruction in the Ministry of Education, and abrogating a law of 1947 under which the appointment of teachers had been made subject to prior approval by the Church. A preamble to the decree said that the 1947 law had become "inadequate, inefficient and onerous," and that it conflicted with the Government's "exclusive powers" under the Constitution to make educational appointments The funds hitherto made available to the Department of Religious Instruction were reassigned for school health purposes.

(2) A Bill legalizing divorce in Argentina (for the first time in the country's history) was passed through all its stages by both Houses of Congress on Dec 14, and was signed by President Perón on Dec. 22. Although both Houses passed the Bill on second reading without a division, the vote in the Chamber of Deputies was taken only after a stormy debate in which the Radical (Opposition) members walked out after having voted against the Bill's first reading. The legislation, which was sponsored by the *Peronista* party, amended the existing marriage law by declaring that either spouse, after obtaining an order of judicial separation, could request the judge to dissolve the marriage in order to enable both parties to remarry. Hitherto divorce had not been possible in Argentina, and divorces obtained abroad by persons married in the Argentine had not been recognized

(3) Prostitution, which had been banned in Argentina since 1936, was legalized under a decree of Dec. 30, signed by President Perón and all Cabinet Ministers, which authorized Provincial Governments, local authorities, and the municipality of Buenos Aires to open brothels and to report to the Ministry of the Interior on "the establishments concerned" The Ministry retained the right to refuse permits for the opening of such premises if it thought fit The decree, which involved the amendment of the "social prophylaxis" law of 1936 (under which prostitution and *maisons de tolerance* had been abolished), said that the re-opening of brothels was "an imperative necessity" because the 1936 law had led to a great increase in sexual crime and venereal disease.

The Vatican newspaper *Osservatore Romano*, in its issue of Dec. 23, said that the policy of the regime in Argentina had become "not repressive of slight abuses but oppressive of Catholicism, of the religious and moral freedom of the faithful, and of the rights of the Church." In a further article on Dec. 29, the *Osservatore* said that recent actions by the *Peronista* Government appeared to be "incompatible with the doctrine and rights of the Church," and that an apparent attempt was being made to "consecrate not only the principle of absolute separation between religion and politics" but also "the pre-eminence of 'reasons of State' over those of duty and religious conscience." In particular, the *Osservatore* protested against the legalization of divorce and the denial of the Church's right to participate in the education of the young.

(New York Times - New York Herald Tribune - Times - The Universe - Le Monde, Paris)

B. UNITED KINGDOM. — Book Production in 1954.

During 1954 a total of 19,188 titles, of which 5,846 were reprints or new editions, were issued by British publishers, both figures being the highest ever recorded in Britain. The 1954 figure was 931 greater than that of 1953 and 447 greater than that of 1952, the previous record year. Annual figures of British book-publishing since 1937 are as follows:

Year	Total	Reprints and New Editions
1937	17,137	5,810
1938	16,219	5,307
1939	14,904	4,493
1940	11,053	3,530
1941	7,581	2,326
1942	7,241	1,499
1943	6,705	1,201
1944	6,781	889
1945	6,747	921
1946	11,411	1,503
1947	13,046	2,441
1948	14,686	3,924
1949	17,034	5,110
1950	17,072	5,334
1951	18,066	4,938
1952	18,741	5,428
1953	18,257	5,523
1954	19,188	5,846

The biggest increases in 1954 were in children's books (1,966, against 1,590 in 1953) and educational books (1,680, against 1,365). In fiction, the biggest category, there was a decline from 4,301 titles in 1953 to 4,204 in 1954, compared with 5,097 in 1937. Books on art and architecture were more than double the pre-war figure, whilst books on politics were below, and those on sociology above, pre-war. (The Bookseller)

C. SPAIN. — Cultural Agreement with Germany.

It was announced in Bonn and Madrid on Dec. 15 that the Spanish and Federal German Governments had concluded a cultural agreement providing for the exchange of teachers and students, the establishment of University chairs for the study of the other country's language, history and institutions, and the holding of exhibitions, concerts, theatrical and cinematographic performances, etc. (Frankfurter Allgemeine Zeitung)

A. INTERNATIONAL BANK. — New Loans and Issues. - Ninth Annual Report. - Discussions on Convertibility and Overseas Investment Problems. - Governmental Support for International Finance Corporation.

In addition to the loan of $10,000,000 to the Industrial Credit and Investment Corporation of India (see 13974 A), the International Bank for Reconstruction and Development made the following loans in recent months (dates of announcement in parentheses) :

Austria. The equivalent of $12,000,000 in Italian lire and Swiss francs to the *Draukraftwerke* (Drava River Power Company) and the *Verbundgesellschaft* (Austrian Electric Power Company) to help finance the Reisseck-Kreuzeck hydro-electric power scheme which, when completed, will increase Austria's generating capacity by 112,000 kilowatts and enable more power to be supplied to northern Italy. The loan—the first to be made to Austria by the International Bank—was guaranteed by the Austrian Government. Terms : 3¾ per cent p.a. interest, plus 1 per cent p.a. commission, repayable within 25 years starting on July 15, 1959 (July 19, 1954).

Belgium. It was announced on Dec. 15 that, in a combined operation which would be the first of its kind the Belgian Government would borrow $50,000,000, of which $30,000,000 would be issued in international markets and $20,000,000 would be lent by the International Bank. The loan would help to finance the modernization of Belgium's inland waterways and the port of Antwerp. Terms of the Bank loan : 3⅝ per cent p.a. interest, plus 1 per cent p.a. commission, repayable within 15 years starting on Feb. 15, 1965.

The public issue would be offered by an underwriting group of 71 U.S. investment firms and banks headed by Morgan Stanley and Co. and Smith, Barney and Co.; apart from that sold to U.S. investors, a substantial portion of the issue would be sold to foreign dealers in Belgium, the Netherlands, Switzerland, Britain, etc. It would be divided by maturities as follows : $5,000,000 of 3-year 3⅜ per cent, $5,000,000 of 4-year 3½ per cent, and $5,000,000 of 5-year 3⅝ per cent bonds, all offered at par, and $15,000,000 of 10-year 4 per cent sinking fund bonds, offered at 99½ per cent.

Ceylon. The equivalent of $19,110,000 in various currencies to the Ceylon Government to enable it to start the second stage of the Aberdeen-Laksapana hydro-electric scheme for power supply to south-western Ceylon. Terms : 3¾ per cent p.a. interest plus 1 per cent p.a. commission, repayable within 25 years beginning on Jan. 15, 1959. (June 18, 1954).

Colombia. $5,000,000 to the *Caja de Credito Agrario, Industrial y Minero*, an autonomous credit institution, which will place orders for agricultural machinery on behalf of established distributors who will subsequently sell the machinery at reasonable prices to farmers, co-operatives, etc. The Bank of the Manhattan Company and the First National Bank of Boston participated in the loan, without the International Bank's guarantee, to the extent of $2,000,000 and $1,000,000 respectively. Terms of the loan, which was guaranteed by the Colombian Government : 3½ per cent p.a. interest, plus 1 per cent p.a. commission, repayable within 7 years beginning on May 15, 1957. (Dec. 30, 1954).

El Salvador. $11,100,000 to the Government of El Salvador to cover the foreign exchange costs of completing the "all-weather" road extending along the Pacific Coast from the Guatemalan border to the port of La Union, on the Gulf of Fonseca. Terms : 3½ per cent p.a. interest, plus 1 per cent p.a. commission, repayable within 12 years starting on April 15, 1959. (Oct. 12, 1954).

France. $7,500,000, guaranteed by the French Government, to the *Office central des chemins de fer de la France d'outre-mer* for the purchase of 69 diesel locomotives and the improvement of other facilities on the French West African railways. J. P. Morgan and Co., the U.S. bankers, participated in the loan, without the International Bank's guarantee, to the extent of $609,000. Terms : 3½ per cent p.a. interest, plus 1 per cent p.a. commission, repayable within 12 years starting on Dec. 1, 1956. (June 10, 1954).

India. $16,200,000 to help finance the foreign exchange costs of a thermal electric power plant designed to relieve the power shortage in Bombay and surrounding industrial areas. The loan, which was guaranteed by the Indian Government, was made to the Tata Hydro-electric Power Supply Co., the Andhra Valley Power Supply Co., and the Tata Power Co., and $1,364,000 of the total was supplied by the National City Bank of New York without the International Bank's guarantee. Terms : 3¾ per cent p.a. interest, plus 1 per cent p.a. commission, repayable within 20 years starting on Oct. 15, 1958. (Nov. 20, 1954).

Mexico. $61,000,000, guaranteed by the Mexican Government, to the Pacific Railroad of Mexico for its modernization programme, estimated to cost $80,000,000. The Bank of the Manhattan Company and the Chemical Bank and Trust Company participated in the loan, without the International Bank's guarantee, to the extent of $2,420,000. Terms : 3⅝ per cent p.a. interest, plus 1 per cent p.a. commission, repayable within 15 years starting on June 1, 1959. (Aug. 24, 1954).

Pakistan. £5,000,000 to the Sui Gas Transmission Company (see 13442 A). Six British banks—the Chartered Bank of India, Australia and China, the Eastern Bank, Grindlay's Bank, Lloyds Bank, the the Mercantile Bank of India, and the National Bank of India—agreed to participate in the loan, without the International Bank's guarantee, to the extent of $1,806,000. The loan was guaranteed by the Pakistani Government. Terms : 3¾ per cent p.a. interest, plus 1 per cent p.a. commission, repayable within 20 years beginning on Aug. 1, 1956. (June 3, 1954).

Peru. $5,000,000 to the *Banco de Fomento Agropecuario del Peru* (a government institution for providing agricultural credits and other help to agriculture) to increase its lending facilities and to finance imports needed to stimulate Peruvian agricultural production. The New York Trust Company participated in the loan, without the International Bank's guarantee, to the extent of $748,000. Terms : 3½ per cent p.a. interest, plus 1 per cent p.a. commission, repayable within 8 years starting on Aug. 1, 1957 (Nov. 13, 1954).

Mr. Eugene Black, the president of the International Bank, stated on Aug. 12 that money was flowing back into the Bank so freely that it had been decided not to proceed with a further bond issue on the U.S. capital market as had originally been intended for the autumn of 1954. Mr. Black explained that money was being recovered in three main ways : (1) by amortization payments on loans ; (2) by pre-payments such as that by the Netherlands (see below) ; and (3) by selling to private investment institutions parts of the International Bank's loan portfolio. In this last connexion, he said that $41,487,965 worth of loans (most of them maturing in 1-5 years) had been sold to private investors, $8,286,198 bearing the guarantee of the Bank and the rest without guarantee.

It had been announced on Aug. 12 that the Netherlands Government had redeemed $52,215,000 and 12,498,000 Belgian francs of the balance of $190,362,000 still outstanding on the $195,000,000 loan received from the International Bank in 1947 (see p. 11596). Since these pre-payments covered the longest maturities of the loan, the Netherlands Government thereby saved interest of over 8,000,000 guilders a year.

On Sept. 16 it was announced that K.L.M. (Royal Dutch Airlines) would repay the balance of $5,600,000 of the $7,000,000 loan received in 1952 (see 12129 B) by means of a new four-year loan concluded with two New York banks (the Chase National Bank and the National City Bank), each of which was re-financing $2,800,000.

The ninth annual report of the International Bank (covering its activities for the year ended June 30, 1954), which was published on Sept. 25, gave total lendings of the bank since its inception as $1,914,000,000. The distribution of this total (less $40,000,000 cancelled or refunded), according to geographical area and purpose, was as follows :

(In million dollars)

Purpose	Asia and Middle East	Africa	Australasia	Europe	Western Hemisphere	Total
Reconstruction	—	—	—	497	—	497
Electric power	63	88	33	35	290	509
Transport	86	71	74	63	103	397
Communications	2	—	—	—	24	26
Agriculture and forestry	47	—	71	29	20	167
Manufacture and mining	32	—	26	90	20	168
General development	2	40	—	68	—	110
Total	232	199	204	782	457	1,874

The following issues and sales of bonds were recently made by the International Bank :

(1) Can.$25,000,000 3½ per cent 15-year bonds were offered for public subscription on the Canadian market at 99¼ per cent on June 15 by an underwriting syndicate of 27 Canadian banks and investment firms, headed by A. E. Ames and Co. Ltd., Wood, Gundy and Co. Ltd., and the Dominion Securities Corporation Ltd.

(2) 40,000,000 guilders 3½ per cent bonds, repayable in 10 equal annual instalments as from 1960, were offered at par for public subscription in the Netherlands on July 12 by an underwriting syndicate of 14 Dutch banks headed by the *Nederlandse Handels Maatschappij*.

(3) £5,000,000 3½ per cent 1969-74 bonds were offered for public subscription in Britain at 98 per cent on July 21 by a group of merchant banks headed by Baring Brothers and Co.

(4) The International Bank announced on Sept. 20 that it had sold $50,000,000 2½ per cent Five-year Bonds to private investors in 23 countries outside the U.S.A. This was the first time that an issue of International Bank dollar bonds had been sold exclusively outside the United States.

The ninth annual joint meeting of the International Monetary Fund and the International Bank was held in Washington from Sept. 24-29, being attended by delegates from the 57 member-nations. The chief topic of discussion was the possibility of restoring convertibility.

Whereas **Dr. Erhard** (the West German Minister for Economic Affairs) claimed that conditions for restoring convertibility had never been so favourable as at present, **M. Faure** (the French Finance Minister) contended that the basic requirements had not yet been attained, whilst the South African delegate described convertibility as "a will-o'-the-wisp until the price of gold is brought into line with the general price level."

Mr. R. A. Butler (the British Chancellor of the Exchequer), speaking "as what is known as the banker for the sterling area and as one who realizes that sterling finances about half of the world's trade" emphasized that a mood of the utmost responsibility was essential in deciding upon such a great concept as convertibility, and pointed

out that there were certain factors—such as U S aid, U S military expenditure overseas (including offshore purchases), and continued European discrimination against dollar imports—which could not be regarded as durable and lasting. Although the official gold and dollar reserves of countries outside the U.S.A. had risen by $3,500,000,000 between December 1951 and March 1954, these reserves amounted in many instances to only a small proportion of the total annual imports, and were in general still inadequate to support by themselves a decisive move forward to convertibility. In his view, some more stable factors, such as increased production in certain countries, increased opportunities for trading and more willingness to invest overseas—were required. The British Government believed that the I.M.F. would have many opportunities to play a constructive role in the movement towards convertibility, and Mr. Butler suggested that the executive directors should be asked to study the I.M.F.'s role in the more permanent arrangements which would lie ahead.

Mr. George Humphrey (U.S. Secretary of the Treasury) gave an assurance that his Government was determined to implement its liberal trade programme, but pointed out that it would have to be based on "the most efficient use of capital and resources consistent with our national security and interests," and on the maintenance of a high level of domestic economic activity. "We shall continue," he added, "to do our part in trade, in financial support, and in other ways, in the movement towards healthier and freer trade and payments under the programme set forth by the President in his March 30 message to our Congress" (see 13590 A).

In a discussion of investment problems, both **Mr. Butler** and **Mr. Humphrey** reiterated that, apart from an attractive return on capital, private investors sought an assurance that the host country would be willing to allow the remittance of profits and the repatriation of capital.

Before leaving Washington, Mr. Butler spoke again of international investment and the prospects of convertibility in an address to the National Press Club.

Calling for more American investment in under-developed territories and a more liberal U.S. trade policy, Mr. Butler said: "We in Britain are placing about 1½ per cent of our national income in fresh investment overseas. If you were to do this much, then the sum would be no less than $5,000,000,000 (£1,785,700,000) a year. One-and-a-half per cent of your national income for overseas investment and one per cent of your market for manufactured goods—these are not figures which would make your giant economy shiver." There were, he thought, five sectors in which "hard work had to be done" before convertibility could be achieved: (1) Europe—where convertible and inconvertible currencies had to be reconciled; (2) the sterling area—where progress in perfecting internal policies had to be consolidated; (3) the United States—where President Eisenhower's trade liberalization policies had to be carried forward, (4) the I.M.F.—which should develop more elastic credit policies, (5) GATT—where the task of reviewing and confirming a code of international trade rules had to be accomplished.

Although the International Bank stated in its report that the proposal to set up an International Finance Corporation for helping under-developed areas had made no progress during the year, Mr. George Humphrey announced only a few weeks later (on Nov. 11, 1954) that the U.S. Government would seek Congressional approval for U.S. participation in the Corporation. Mr. Butler likewise stated in the House of Commons on Dec. 2 that, subject to certain conditions, the British Government would be ready to seek Parliamentary approval for U.K. participation. (International Bank, Washington - New York Times - Financial Times) **(Prev. rep. 13544 D.)**

A. UNITED KINGDOM. — Agricultural Industry. - Wage Increases for Farm Workers.

The Agricultural Wages Board, on Jan. 5, 1955, confirmed the proposals made on Dec. 1, 1954, to increase the minimum wages of adult male farm workers by 7s. weekly to £6. 7s. for a 47-hour week, and to increase the wages of women farm-workers by 5s. to £4. 16s. (except in four areas where women's wages were related to a 40-hour week and the minimum would be £4. 10s. weekly). Proportionate increases were granted in overtime, juvenile, and casual workers' rates. The increases, which will come into force on Jan. 24, 1955, and will affect about 618,000 farm workers, were expected to add about £12,000,000 yearly to the agricultural industry's wages bill.

On June 14, 1954, the Board had rejected a claim by the National Union of Agricultural Workers for "substantial" wage increases, and on Dec. 1 had rejected a further claim for an increase of £1 weekly to bring the weekly minimum for adult males up to £7. The workers' side (which claimed that farm workers' pay was dropping behind that of industrial workers, with the result that there was "a serious drift from the land") thereupon put forward the proposal for a 7s. increase, which was carried against the opposition of the employers' side and with the support of the independent members of the Board.

Weekly increases of 8s. (men) and 5s. (women) for Scottish farm workers, effective from Feb. 14, 1955, were approved by the Scottish Agricultural Wages Board on Dec. 13, 1954. (Times - Daily Telegraph - The Scotsman, Edinburgh) **(Prev. rep. Farm Wages, 13128 A.)**

B. FRANCE.— M. Schneiter succeeds M. Le Troquer as President of National Assembly. - Re-election of MM. Monnerville, Sarraut, and Roche to Presidencies of Council of the Republic, Assembly of the French Union, and Economic Council.

The French National Assembly met on Jan. 11 to elect its President for 1955, five candidates being nominated. M. André Le Troquer (Socialist), the outgoing President, M. Pierre Schneiter (M.R.P.), M. Robert Bruyneel (Independent *Paysan*), M. Gaston Palewski (Social Republican), and M. Marcel Cachin (Communist). M. Schneiter was elected on the third ballot, the voting being as follows:

	First ballot	Second ballot	Third ballot
M. Schneiter	103	226	232
M. Le Troquer	150	192	158
M. Cachin	87	88	86
M. Bruyneel	101	—	—
M. Palewski	70	—	—
Others	14	8	—

Under the rules governing the election of a President of the Assembly, an absolute majority of those voting is required for the first two ballots only, a simple majority being sufficient on the third. After the first ballot, which was indecisive (the necessary votes required being 263), MM. Bruyneel and Palewski announced that they would withdraw their candidatures, whilst M. Cachin announced that the Communists would refuse to give their votes to M. Le Troquer (as they had done in 1954) because of the Socialist Party's support for M. Mendès-France's policy in the recent debate on the ratification of the Paris agreements. On the second ballot M. Schneiter, though moving into first place, still failed to obtain the absolute majority required (258 votes), but on the third ballot he was successful owing to the Communists' continued support of M. Cachin's candidature.

M. Schneiter (49) served in the French Air Force in 1939-40 and, after the fall of France, organized one of the resistance movements together with his brother André, who was later killed by the Gestapo. Appointed Under-Prefect of Reims (his birthplace) after the liberation, he has been a member of the two Constituent Assemblies, and of the National Assembly since 1945. He was an Under-Secretary for Foreign Affairs in the Gouin and Bidault Governments of 1946, and State Secretary for German and Austrian Affairs in the first Schuman Cabinet of 1947-48, before becoming Minister of Public Health and Population—a post which he held uninterruptedly from July 1948 to August 1951 in the André Marie, Schuman, Queuille, Bidault, and Pleven Cabinets. In December 1953 M. Schneiter was appointed by the Committee of Ministers of the Council of Europe to investigate, and seek practical solutions for, the problems of refugees and over-population in Western European countries (see 13404 A). A member of the Assembly's Foreign Affairs Commission, he abstained in the recent ratification debate on the Paris agreements.

M. Gaston Palewski (Social Republican) was re-elected senior vice-president of the Assembly, the other vice-presidents being M. Robert Lacoste (Socialist), M. André Mercier (Communist), M. Jules-Julien (Radical), M. Godin (A.R.S.-Dissident Gaullist), and M. Robert Bruyneel (Independent *Paysan*). All had been vice-presidents in 1954 except M. Lacoste, who succeeded M. Raymond-Laurent (M.R.P.).

M. Gaston Monnerville (Radical) was re-elected President of the Council of the Republic on the same date, whilst M. Albert Sarraut (Radical Socialist) was re-elected President of the Assembly of the French Union and M. Emil Roche (Radical Socialist) President of the Economic Council. Both M. Monnerville and M. Sarraut were opposed by Communist candidates.—(Le Monde, Paris - Le Figaro, Paris) **(Prev. rep. 13359 A.)**

C. PAKISTAN.—Ending of Rice Rationing. - Abolition of Rationing in East Bengal.

The Pakistani Food Minister (Mr. Pathan) announced on Nov. 22, 1954, that, in view of the improvement in the country's food position, all controls on the price, purchase, and sale of rice would be lifted, as well as all restrictions on the movement of rice inside Pakistan, excluding the border areas. Exports of rice from West Pakistan would be free, subject to checks to be exercised by the Pakistan State Bank, although exports of each variety would be allowed only up to an exportable surplus assessed by the Ministry of Food, and solely against cash. Rice exports from East Pakistan would remain controlled. The East Bengal Commissioner of Civil Supplies (Mr. Bakar) announced in Dacca on Nov. 27 that rationing would be completely abolished in the Province from Dec. 13, and that the Civil Supplies Department would be wound up by March 31, 1955.—(Pakistan High Commissioner's Office, London) **(Prev. rep. Food Position, 12887 A; East Bengal, 13746 A.)**

A. NATIONALIST CHINA. — Mutual Security Treaty with the United States. - Further Coastal Clashes with Communist Forces. - Loss of Nationalist Destroyer. - Seizure of Soviet and Polish Vessels.

The signing of a mutual security treaty between the United States and the Chinese Nationalist Government in Formosa was announced in Washington on Dec. 1, the following statement being issued :

" The treaty will follow the general pattern of other security pacts which the United States has concluded in the Western Pacific. The treaty will recognize the common interest of the parties in the security of Taiwan (Formosa) and the Pescadores, and of the Western Pacific islands under the jurisdiction of the United States. It will provide for inclusion by agreement of other territories under the jurisdiction of the parties It is directed against threats to the security of the treaty area from armed attack. and provides for continuing consultation regarding any such threat or attack

" This treaty will forge another link in the system of collective security established by the various collective defence treaties already concluded between the U.S A. and other countries in the Pacific area. Together these arrangements provide the essential framework for the defence by the free peoples of the Western Pacific against Communist aggression. Like the other treaties, this treaty between the United States and the Republic of China will be defensive in character. It will reaffirm the dedication of the parties to the purposes and principles of the U.N. Charter "

Mr. Dulles, the U.S. Secretary of State, answered questions about the implications of the treaty at a press conference on the same day.

Asked if an attack on Formosa by the Chinese Communists would be followed by a state of war with the U.S.A , Mr. Dulles replied that " that would be the probable result." As regards a possible Communist invasion of Quemoy and other offshore islands, Mr. Dulles drew attention to President Eisenhower's statement (see 13785 A) that the position would have to be considered in the first instance by the U.S military authorities, after which the President would make the final decision. Asked how the treaty changed the *status quo* in the Formosa area, Mr Dulles replied that as far as treaty relationships were concerned, Formosa and the Pescadores would now be placed in the same category as South Korea, the Philippines, Australia, and New Zealand. Replying to other questions, Mr. Dulles said that the U.S.A. would not automatically include in the treaty's protective area any part of mainland China which might be invaded and held by the Chinese Nationalists

President Eisenhower sent a special message to the U.S. Senate on Jan. 6 asking it to give " early and favourable consideration " to the mutual defence treaty, which was designed to " deter any attempt by the Chinese Communist regime to bring its aggressive military ambitions to bear against the treaty area."

The following statement on the treaty was made to the British House of Commons on Dec 8 by the Foreign Secretary, Sir Anthony Eden ·

" H.M. Government have been kept generally informed in recent weeks of the U.S. Government's intentions in this matter H.M. Government are satisfied that the treaty is in fact purely defensive, and that its object is to place relations between the U.S. Government and the Nationalist Chinese on such a basis as will result in a closer degree of consultation. No special representations have been made to the U.S. Government. Our views were made clear in the course of our consultations with them about the situation in the Far East." In reply to questions, Sir Anthony made it clear that Britain was in no sense a party to the treaty.

A denunciation of the treaty, coupled with a warning that the U.S. Government would be responsible for " all the grave consequences " if it did not withdraw its armed forces from Formosa and other Nationalist-held islands, was issued on Dec. 8 by Mr. Chou En-lai, Prime Minister of the Chinese People's Republic.

After condemning the treaty as " a warlike provocation against the People's Republic of China," Mr. Chou declared · " By this treaty the U.S. Government attempts to legalize its armed seizure of Taiwan (Formosa) and, with Taiwan as a base, to extend its aggression against China and prepare a new war. The liberation of Taiwan and the liquidation of the traitorous Chiang Kai-shek clique is a matter which falls entirely within the scope of China's sovereignty, and no interference by any foreign country will be tolerated . . . The Chiang Kai-shek clique has no authority whatsoever to conclude any treaty with any country. The ' mutual security treaty ' between the U.S A. and Chiang Kai-shek has no legal basis whatever, and is null and void . . ."

The Soviet Government issued a statement on Dec. 15 condemning the treaty as " an interference in the internal affairs of China " ; supporting " the demands of the Chinese People's Republic for the withdrawal of American troops from Formosa and the Pescadores " ; and expressing its " understanding " of " the determination of the Chinese people to liberate Formosa and the Pescadores, which are an integral part of Chinese territory."

The Nationalist-held Tachen Islands (off the Chekiang coast, about 200 miles north of Formosa) were heavily raided by Communist aircraft from Nov. 1-4, 1954, and on Jan. 10, 1955. The attack on the latter date was carried out by over 60 bombers and fighter-bombers (two of which were claimed by the Nationalists to have been shot down), causing considerable damage and a number of civilian casualties. During the last three months of 1954 the Nationalist Air Force carried out attacks from time to time on Communist batteries, supply dumps, etc., on the Chekiang and Fukien coasts, whilst intermittent artillery duels continued between Nationalist batteries on Quemoy Island and Communist batteries on the Chinese mainland. On Nov. 14 the Chinese Nationalist destroyer-escort *Tai Ping* (1,400 tons) was sunk by four Communist torpedo-boats near the Tachen Islands, about 40 of her crew of 200 being lost. The *Tai Ping*, the largest Nationalist warship so far sunk by the Communists, was one of six destroyer-escorts handed over to China by the United States after the Second World War.

A strong protest at the seizure of a Soviet tanker by the Chinese Nationalists was made by the Soviet Government on June 24, 1954, to the U.S. Government, whilst similar protests were made by Poland in October and November regarding the seizure of two Polish merchant ships by the Nationalist authorities.

The Soviet Note said that the Soviet tanker *Tuapse*, with a cargo of paraffin oil, had been stopped on the high seas south of Formosa on June 23 by " a naval vessel of destroyer type " and had been compelled to change course under threat of armed action, the subsequent fate of the vessel and its crew being unknown. After declaring that it was " obvious that the seizure of a Soviet tanker in waters controlled by the U.S. Navy could only be carried out by naval forces of the United States," the Note demanded the immediate return of the *Tuapse* and her crew, the punishment of " the American officials involved," and measures to prevent " a repetition of such actions, which flagrantly violate the freedom of shipping on the high seas." The U S. Government s reply, presented on June 26, rejected " as completely without foundation the allegation that U S. naval forces seized or otherwise interfered with the Soviet tanker in question."

The Chinese Nationalist Government announced on June 26 that the *Tuapse* had been stopped by a Nationalist warship while bound for the " Communist bandit " port of Shanghai, and had been brought into a Formosan harbour The seizure of the vessel was justified on the ground that she was attempting to ship oil to Communist China in defiance of the Nationalist blockade.

The Nationalist Government further announced on Oct 15 that it had confiscated the 8,000-ton Polish tanker *Praca* and would probably confiscate the 5,000-ton Polish freighter *Prezydent Gottwald*. [The former vessel had been seized earlier in October, and the latter in May, while carrying cargo to or from Communist China] It was stated in Washington on Oct. 17 that the U S State Department had requested the Department of Justice to allow 23 Polish seamen from the *Praca* and the *Prezydent Gottwald* to enter the U S A. as political refugees at their own request.

The Polish Government presented Notes to the U S A. on Oct. 12, Oct. 26 and Nov. 20 protesting at the " forcible detention " of the *Praca* and *Prezydent Gottwald* by the Chinese Nationalists, and declaring that these vessels had been the victims of " piratical assaults committed by units of the Chiang Kai-shek clique subordinated to the United States." After declaring that the crew of the *Prezydent Gottwald* had for the last six months " been imprisoned and denied the right to return to their homeland and families," the Note of Nov. 20 protested at " the recruitment, by the help of moral pressure and terror, of a group of Polish sailors and their transportation to the U.S.A. for the purpose of using them as obedient tools in anti-Polish propaganda." The Note demanded the return of both vessels, with their crews and cargoes, and the punishment of those responsible for their detention.

The U S. Government, in its reply (Dec 8). dissociated itself completely from the seizure of the two Polish ships, and from the decision of the 23 sailors to seek asylum in the United States. It suggested that the Polish Government should enter into direct diplomatic negotiations with the Chinese Nationalist Government on this matter, through diplomatic channels.

The Soviet Government, on Aug. 4, 1954, drew the U.S. Government's attention to the fact that American planes had on several occasions flown over Soviet ships in the Formosan area at a " provocatively " low level, and asked that such " impermissible " practices should cease. The U.S. reply, delivered on Nov. 29, said that the incidents mentioned apparently referred to " the identification by U.S. naval aircraft of commercial vessels operating on the high seas around the island of Formosa." It denied that such identification procedure was in any way illegal or a violation of international law, and said that it was made in order to detect the presence of ships which might be hostile to the U.S. Seventh Fleet.—(New York Times - New York Herald Tribune - Times)

A. SOVIET UNION. — M. Malenkov on International Problems. - Replies to U.S. Correspondent.

The Soviet News Agency (Tass) gave the text on Jan. 1 of replies made by M. Malenkov, Prime Minister of the U.S.S.R., to a series of questions put to him by Mr. Charles E. Schott, manager of the Washington Bureau of Telenews Production Inc (an American television newsreel agency).

Q. "What is the best way of maintaining peace between our two countries?"

A. "The maintenance of peace between the U S S R and the U S A. requires, in the first place, that both sides should sincerely desire peace and strive for it, and that in their relations they should start from the possibility and need of peaceful co-existence with each other, on the basis of their legitimate mutual interests. The Soviet Union, guided by these principles, is ready to do everything in its power to ensure firm and lasting peaceful relations between the U.S.S.R and the U S A and is ready to settle existing differences on the assumption that similar readiness will also be displayed by the United States."

Q. 'What, in your opinion, is the chief cause of the tension between the Soviet Union and the United States?"

A. "The chief cause of tension is the policy of certain American circles aimed at re-establishing a revenge-seeking West German army, at an arms drive, and the creation of a network of American military bases around the Soviet Union and other peace-loving States—a policy which can be regarded in no other light than as preparation for a new war. At present the threat to peace and the war danger are growing through the fault of the Western Powers, which have concluded the London and Paris agreements. In order to remove tension in the relations between the U.S S R and the U.S.A., and to establish a firm foundation for peaceful co-operation between our countries, it is essential that an end should be made to the policy of re-establishing German militarism—a militarism which has brought incalculable calamities upon mankind—and that the arms drive should be ended and a stop put to the policy of encircling the peace-loving States with military bases"

Q. "Would you welcome diplomatic talks on the settlement of existing differences in the Far East?"

A. Yes, talks between the States concerned in the settlement of Far Eastern questions should be welcomed The experience of the Geneva Conference, in which the People's Republic of China took part together with other Powers, shows that such talks yield good results."

Q. "What are your views on the question of international control over atomic weapons, and do you think it possible to work out a successful plan acceptable to all the parties concerned?"

A. "The U S S.R. stands for the unconditional prohibition of atomic weapons, for their complete removal from the armaments of States, and for the establishment of strict international control over the fulfilment of the agreement"

Q. "Would you welcome diplomatic talks that would lead to a conference between the heads of the Governments of France, Great Britain, the Soviet Union, and the United States?"

A. "On this question it should first of all be said that the U.S A., Britain and France have recently been doing everything to prevent a satisfactory solution of the question of a conference of the heads of Governments of the four Powers. It is well known that the three Western Powers are trying to reach a separate settlement of very important international questions—those relating to Germany in the first instance. Is it not clear that it is impossible to follow such a policy and at the same time to spread illusions among the peoples regarding a four-Power conference? The gist of the matter is that a conference of the heads of Governments of France, Great Britain, the U.S.S.R and the U.S A. must not be faced with the *facts accomplis* of separate decisions on questions which are to be examined at the four-Power conference."

In conclusion, M. Malenkov sent his "heartfelt greetings and best wishes for the New Year" to the American people.
(Soviet Weekly) **(Prev. rep. M. Malenkov, 13614 A.)**

B. UNITED KINGDOM. — Quarterly Trade Figures. - Provisional Figures for Year 1954.

Trade figures for the last quarter of 1954, and provisional figures for the year 1954 as a whole, are shown in the following table:

	Imports	Exports	Re-exports	Adverse Balance
		(£ million)		
October	228 2	214 9	9.2	4 1
November ..	333 8	196.5	5.5	131.8
December* ..	314.5	255.7	8.4	50 4
Year 1954* .	3,382.5	2,674.0	100 5	608 0

* Provisional.

Exports in 1954 were the highest on record, and the adverse balance for the year was about £47,000,000 lower than in 1953. The trade figures for the last quarter of 1954 were seriously affected by the dock strikes (see 13970 A); imports in October and exports in November were lower than customary, whilst imports in November and exports in November and December were higher.—(Board of Trade Journal) **(Prev. rep. 13902 C; 1953 Figures, 13495 A.)**

C. WESTERN GERMANY. — Recall of Chargé d'Affaires in London. - Federal Government's Statement on alleged Remarks of Frau Schlitter.

The German Federal Government issued a statement on Jan. 3 describing as "extremely regrettable" the "inexcusable" remarks which were alleged to have been made on Dec. 20 by Frau Daisy Schlitter, the wife of the acting Chargé d'Affaires in London (Herr Oskar Schlitter), at a Christmas party given to members of the German diplomatic mission in London.

According to press reports, Frau Schlitter was alleged to have said: "My husband and I find again and again what treacherous ground London can be, and we realize again and again that we live among enemies We . must stick together in hostile foreign territory, for after two world wars we are still living in a hostile environment. Even those of the British who approach us with friendliness are in fact inimically disposed towards us"

The statement issued by the Federal Government was worded as follows:

"On Dec. 20 a Christmas party was held for the members of the German diplomatic mission in London The invitations were issued by Herr Schlitter and his wife because Dr Schlange-Schoningen, the Charge d'Affaires, is on sick leave. Shortly after the party began Herr Schlitter had to leave because, on official orders, he had to attend a reception at the British Foreign Office His wife took over the task of welcoming the members of the mission and addressing a few words to the guests. Frau Schlitter, who was faced with this task unprepared, after the usual Christmas and New Year wishes described the position of Germans abroad She wanted to remind her listeners that every German, especially every member of a German mission abroad, should always bear in mind that he was in a foreign country, and that the memories of the terrible events of the last war had by no means been effaced Frau Schlitter chose in this connexion the inexcusable expression 'hostile foreign territory' (*feindliches Ausland*), which gave offence to her guests and which found its way into the British Press. Frau Schlitter most deeply regrets this lapse, which was due to her nervousness and inexperience.

Investigation showed that the accounts of the affair had undoubtedly been exaggerated, and that some statements attributed to Frau Schlitter had not been used by her in the form reported in the Press Evidence from many observers of Herr Schlitter's activities in London, and from competent judges of his behaviour during the Nazi regime, shows that his political convictions, and those of his wife, are above all suspicion. Any political conclusions which might have been drawn from this regrettable affair are therefore without foundation."

It was pointed out in Bonn that Frau Schlitter, a former actress and beauty queen, had had no sympathies whatsoever with the Nazi regime; that she had belonged to one of the resistance groups connected with the anti-Hitler bomb plot of July 20, 1944, and that she had lost four members of her family in the purges which followed the attempt on Hitler's life.

Following the alleged remarks of Frau Schlitter, an investigation was carried out at the German diplomatic mission in London by the head of the Personnel Department of the German Foreign Office, on the personal instructions of Dr. Adenauer. It was announced in Bonn on Jan. 3 that Herr Schlitter had been recalled from London, had voluntarily offered to resign from the German Diplomatic Service, and had been placed on leave of absence. [Herr Schlitter had served in the consular department of the German Embassy in London before the war.]

Frau Schlitter, who returned to Germany with her husband, was reported on Jan. 5 to have entered a hospital at Bad Godesberg for the treatment of an illness which had not yet been diagnosed. (Times - Daily Telegraph)

D. INDIA.—Cabinet. - New Ministers of Defence and Home Affairs. - Abolition of Ministry of State Affairs.

It was announced in New Delhi on Jan. 10 that Mr. Nehru, the Indian Prime Minister, had relinquished the post of Defence Minister, although he would remain chairman of the Cabinet Defence Committee; that Dr. Katju, the Minister for Home Affairs, had taken over the Defence portfolio; and that Pandit Pant, the former Chief Minister of Uttar Pradesh, had been appointed Minister for Home Affairs.

Earlier, on Jan. 4, it had been announced that President Prasad had issued an Order merging the Ministry of State Affairs with the Ministry of Home Affairs as from Jan. 10.
(The Hindu, Madras - The Statesman, Calcutta - Indian High Commissioner's Office, London) **(Prev. rep. 13934 C.)**

E. UNITED KINGDOM. — B.B.C. - Mr. Thomas Johnston appointed National Governor for Scotland.

Mr. Thomas Johnston (72), chairman of the Scottish Tourist Board, joined the Board of Governors of the B.B.C. on Jan. 1 as national governor for Scotland and chairman of the Broadcasting Council for Scotland. He succeeded Lord Clydesmuir, who died on Oct. 31. Mr. Johnston, Labour M.P. for West Stirlingshire from 1922-45, was Secretary of State for Scotland in the wartime Coalition Government. Lord Rosebery succeeded Mr. Johnston as chairman of the Scottish Tourist Board.
(Times - The Scotsman, Edinburgh) **(13622 F; 12305 A.)**

A. NORTH ATLANTIC TREATY ORGANIZATION. — Paris Meeting of North Atlantic Council. - Civilian Responsibility for Use of Atomic Weapons. - Infrastructive Programme for 1955. - NATO Air Defence Technical Centre to be established in Holland.

The North Atlantic Council met in Paris on Dec. 17-18 under the chairmanship of the Greek Foreign Minister, M. Stephanopoulos, the following communiqué being issued at the end of the meeting (cross-headings inserted):

(1) **Introduction.** "The North Atlantic Council, meeting in Paris under the chairmanship of Mr Stephanopoulos . . . was attended by Ministers of Foreign Affairs, Defence, Finance, Economic Affairs, and Defence Production.

(2) **Secretary-General's Progress Report.** The Council noted the progress report by the Secretary-General covering activities and developments in the organization during the past twelve months. Ministers welcomed the extension of political consultation within the Council. They noted with interest the steady progress in the infrastructure programmes and in emergency planning in the civil field, and recommended the continuance of these studies and of this work, in particular in civil defence. The report referred to the dissemination of information about NATO and to the forthcoming publication of the Secretary-General's five-year report. It also emphasized the value of the visits of parliamentarians, of the development of voluntary organizations interested in NATO, and of tours of journalists to member-countries.

(3) **Disarmament.** The Council exchanged views on matters of common concern in the international situation. It welcomed the efforts being made under the aegis of the United Nations for a world-wide agreement for a general limitation and control of armaments.

(4) **Soviet Policy.** The Council agreed that Soviet policy, backed as it is by ever-increasing military power, continues, in spite of some outward signs of flexibility, to be directed towards weakening and dividing the Western nations. Soviet policy contributes no constructive solution for ensuring world security and for maintaining the freedom of peoples. It provides no ground for believing that the threat to the free world has diminished.

The Council reaffirmed its will to build for peace on solid foundations of unity and strength. It noted with satisfaction the progress which has been made toward bringing into effect the Paris agreements, which it regards as an essential contribution to the unity of Europe, to the security of the free world, and thereby to the cause of peace.

(5) **Air Defence Technical Centre.** The Council took note of a progress report submitted by the Military Committee. It noted with satisfaction that a request by the Supreme Allied Commander, Europe, had led to negotiations between the Netherlands and the United States, the recent completion of which will permit the establishment of a SHAPE Air Defence Technical Centre in The Hague at which scientists of all member-nations will be able to contribute to the development of air defence The Council also noted that the NATO Defence College . . . has made a valuable contribution of qualified personnel to staffs and agencies of NATO and of member-Governments.

(6) **Civilian Control over Use of Atomic Weapons.** The Council considered a report by the Military Committee on the most effective pattern of NATO military defensive strength over the next few years, taking into account modern developments in weapons and techniques It approved this report as a basis for defence planning and preparations by the NATO military authorities, noting that this approval did not involve the delegation of the responsibility of Governments to make decisions for putting plans into action in the event of hostilities

(7) **Future Programmes, Infrastructure, Forces' Strength, etc.** The Council considered the report on the annual review for 1954. which sets forth the co-ordinated NATO defence programmes for the next three years. The review was based on the Council directive, adopted in December 1953, that it would be necessary for member-countries to support over a long period forces which, by their balance, quality, and efficiency would be a major factor in deterring aggression.

The Ministers considered and accepted as military guidance a report by the Military Committee giving its comments on the 1954 annual review. This report stressed that the level of forces for the defence of the NATO area should be maintained as planned.

The Council noted that there had been an increase in the strength of NATO forces and further steady improvement in their efficiency over the past year. This improvement in quality resulted primarily from the large-scale combined exercises held by NATO land, sea and air forces, from the increases in operational and support units, and from the supply of large quantities of new equipment.

The Council expressed its satisfaction at the expansion of European production of defence equipment, as well as the continued provision of North American equipment, and urged continued co-operation in research and development.

Following the recommendations made in the annual review report, the Council adopted firm force goals for 1955, provisional goals for 1956, and planning goals for 1957 The force goals agreed upon for 1955 are of about the same numerical strength as those for 1954, but further improvements in training, equipment, and effectiveness are provided for. The German defence contribution under the Paris agreement remains, in the opinion of the Council, an indispensable addition to the defence of the West.

(8) **Economic Progress.** The Council noted with satisfaction the encouraging economic developments in many member-countries over the past year, and particularly the expansion of production in several European countries. The additional resources thus made available have enabled further improvements to be made in general welfare and social progress, while at the same time permitting a continued contribution toward increases in the strength and effectiveness of NATO forces The Council recognized that further steady growth in the economic strength of the alliance as a whole is essential in order to preserve and increase the well-being and security of all member-countries, and that to this end it is necessary to strengthen economic co-operation between member-countries."

One of the most controversial matters before the North Atlantic Council was the question of the use of atomic weapons in the event of an attack on the member-countries, and of the responsibility for their employment in such an eventuality. As stated in (6) above, it was decided that SHAPE should be given authority to plan its defensive strategy "taking into account modern developments in weapons and techniques," but that the decision on the use of these weapons should be left in civilian hands. Another important decision, as mentioned in (5) above, was the creation of a NATO Air Defence Technical Centre at The Hague.

Discussions on the current international situation were held in Paris on Dec. 18 between Sir Anthony Eden, Mr. Dulles and M. Mendès-France, all of whom were attending the meeting of the North Atlantic Council. No official statement was issued, but it was understood that Britain and the U.S.A. had decided to guarantee the Franco-German agreement on the future status of the Saar.

Other recent NATO developments are summarized below under cross-headings:

Infrastructure Programme for 1955. The NATO Information Division announced on Dec 13 that an £81,000,000 infrastructure programme had been approved for the year 1955 as part of the overall £700,000,000 infrastructure programme, of which £650,000,000 had so far been authorized for specific NATO projects during the past 5½ years Approximately 40 per cent of the 1955 programme would be used for the construction of additional airfields and for improvements to existing airfields; 20 per cent would be used to expand the oil pipeline system (which, it was pointed out, already represented a £76,000,000 NATO investment); 10 per cent would be spent on telecommunications; and the remaining five per cent would go to finance the construction of radar warning installations, radio navigational aids, and headquarters.

The following details were released of NATO infrastructure progress during 1954: (1) 132 airfields would be available for NATO purposes by the end of the year, including 12 which had been completed during 1954. (2) Eight countries had started work during the year on a 6,000-kilometre pipeline system, complete with pumping stations, storage facilities, etc, which had "progressed from the stage of planning and engineering to that of execution", the system called for a Central European network of pipelines with ports on both the Channel and Mediterranean coasts in order that it could be supplied by the tanker fleets of the NATO nations. (3) Far-reaching progress had been made in the NATO telecommunications system, and experts had stated that European national plans for the improvement of communications "have been advanced by 10 to 15 years through the NATO programme."

U.S. Air Bases. It was disclosed on Jan. 7, 1955, from U.S Air Headquarters at Wiesbaden (Germany) that the U S. Air Force was maintaining 53 operational bases in Europe and North Africa for Western defence against aggression; that 40 of these bases were tactical and 13 administrative; and that the U.S. Air Force in Europe numbered 83,400 airmen.

Military Appointments. The following NATO appointments were announced on Jan 6 and Jan. 10 respectively: Air Vice-Marshal E. M F. Grundy, of the British Joint Services Mission in Washington, as chairman of the NATO Military Agency for Standardization; and Major-General R H Bower, Commanding Officer of the East Anglian District (U.K.), as Chief of Staff at Allied Forces H.Q., Northern Europe.

The NATO Secretary-General (Lord Ismay) announced on Dec. 13 that Signor Giuseppe Cosmelli (Italy) had been appointed Assistant Secretary-General for Political Affairs in succession to Signor Sergio Femoaltea, recently appointed Italian Ambassador in Ottawa. Signor Cosmelli has held many important posts in the Italian Diplomatic Service, including those of Minister to South Africa and Ambassador to Austria. (NATO Information Division, Paris - Le Monde, Paris - Times - Manchester Guardian - New York Times - New York Herald Tribune) **(Prev. rep. North Atlantic Council 13850 A; Infrastructure, etc., 13640 A; 13426 A.)**

B. AUSTRALIA. — Adoption of Belgian Rifle.

The Army Minister (Mr. Francis) announced on Jan. 13 that the Australian Army would discard the Lee-Enfield .303 rifle in favour of the Belgian FN.30 automatic rifle, which had been adopted by NATO.—(Australian News Bureau) **(13357 A.)**

A. GERMANY. — Release of Baron von Neurath, Field-Marshal Milch, and other War Criminals.

Baron von Neurath, the former German Foreign Minister under the Nazi regime, was released on Nov. 6 from Spandau prison, where he was serving the sentence of 15 years' imprisonment imposed on him by the International Military Tribunal at Nuremburg in 1946 for war crimes committed during his tenure of the post of Reich Protector of Bohemia-Moravia. The immediate release of von Neurath (81), on account of his age and ill-health, had been proposed on Nov. 2 by M. Pushkin, the Soviet High Commissioner in Germany, and had been agreed to by the three Western High Commissioners.

M. Pushkin's letters to the Western High Commissioners stated that the Czechoslovak Government had agreed to his proposal for von Neurath's release. The Western High Commissioners, in their replies, expressed agreement with the Soviet proposal and recalled that they themselves had previously made representations to the Soviet authorities on several occasions expressing concern about von Neurath's health. It was stated in the Press that von Neurath was suffering from heart trouble and from an eye cataract, whilst a Government spokesman in Bonn stated on Nov. 7 that von Neurath's release fulfilled a wish which the Chancellor had repeatedly supported on purely humanitarian grounds. Von Neurath had served eight years of his 15-year sentence at the time of his release.

On March 25, 1954, it had been announced by the Allied High Commissioners in Bonn that they had proposed to the Soviet High Commissioner (then M. Semeonov) certain relaxations in the regulations applied to the seven major war criminals imprisoned at Spandau. These proposals, which were made in response to an appeal from Dr. Adenauer, provided that normal prison regulations should be introduced; that the prisoners should accordingly be allowed to receive more mail, parcels, and visitors; that sentences might be reduced for good behaviour; that, instead of the previous arrangements under which deceased prisoners would have been cremated and their ashes buried in the prison garden, relatives should be allowed to claim the body of any prisoner who died in prison; and that seriously ill prisoners should be eligible for medical parole. An Allied spokesman said that if the Russians accepted all the Western proposals, at least two of the seven major Nazi war criminals—von Neurath and ex-Admiral Rader—would be eligible for medical parole.

Mr. Eden, replying to a question by Mr. Arthur Lewis (Lab.) in the House of Commons on March 29, 1954, stated that he had raised with M. Molotov during the Berlin Conference, in agreement with the French and U.S. Foreign Ministers, the question of providing hospital treatment for sick prisoners and arranging for the disposal of the bodies of dead prisoners, and had suggested that these matters should be examined by the four High Commissioners. He had now received a message from M. Molotov saying that the Soviet High Commissioner was ready to take part in such discussions. Mr. Eden denied that he had ever suggested to the Soviet authorities that any of the Spandau prisoners should be released.

After M. Semeonov had agreed to the Western proposals, representatives of the four High Commissioners met in Berlin on April 6 to discuss the proposed alleviations. After two further meetings on April 26-27 it was announced that agreement had been reached with regard to relaxations in the living conditions of prisoners, increased visits by relatives, and the removal of prisoners who were seriously ill to an outside hospital, if warranted by their condition. No agreement was reached on the question of medical parole.

On Sept. 14 it was announced that Walther Funk, the former Nazi Minister of Economics, had been taken from Spandau prison to the British Military Hospital in Berlin for an operation under the terms of the four-Power agreement. Funk was subsequently returned to Spandau. Ex-Admiral Karl Doenitz, who was serving a ten-year sentence in Spandau, was also taken to the British Military Hospital on Jan. 5, 1955, for an operation, which was successfully performed on the following day.

Amongst the war criminals released by the Allied authorities during the second half of 1954 were the following:

Erhard Milch, the former Field-Marshal and Inspector-General of the *Luftwaffe*, who had been sentenced by the U.S. War Crimes Tribunal at Nuremberg in 1947 to life imprisonment for employing slave labour in Nazi aircraft factories. This sentence had been reduced by the then U.S. High Commissioner (Mr. McCloy) in 1951 to 15 years. Milch was released by the U.S. authorities from Landsberg prison on July 1, 1954, on the ground of good conduct.

Kurt Meyer, a former S.S. major-general and commander of the Hitler Youth Division, who had been sentenced by a Canadian military court in 1945 for inciting his troops to refuse quarter to Allied soldiers, and for responsibility for the shooting of 18 Canadian P.O.W.s. The death sentence had first been commuted to life imprisonment, whilst in January 1954 the Canadian Government (acting on the recommendation of the Mixed Consultative Clemency Board in the British Zone) had reduced the sentence to 14 years. Meyer's release by the British authorities from Werl prison on Sept. 7, 1954, was on the grounds of good conduct and the time he had spent in custody before sentence.

Hermann Reinecke, a former S.S. general and a member of the tribunal which sentenced the leaders of the anti-Hitler plot of July 1944. He had been sentenced to life imprisonment in 1948. His release by the U.S. authorities from Landsberg on Oct. 1 was on the ground of good conduct.

The U.S. High Commissioner's Office in Bonn announced on July 3 that Dr. Siegfried Handloser, the former head of the German Army's medical service, had died in a Munich hospital to which he had been admitted on medical parole. Handloser had been sentenced by the U.S. War Crimes Tribunal to life imprisonment (later reduced to 20 years) for ordering medical experiments on concentration camp inmates.

The U.S. High Commission announced on March 25, 1954, that it would no longer announce the names of German war criminals on their release from Landsberg prison. The British High Commission announced on May 19 relaxations in the detention of German war criminals at Werl prison, it was stated that all those still detained had been moved to a separate part of the prison where they would no longer be "in continuous close proximity" to other prisoners, that they would have better accommodation than before, and that there would also be some modifications in the day-to-day regulations, including permission to meet more often in recreation rooms and to have meals in groups. It was also recommended that, in co-operation with the German Federal Government, an inspection would be made once a year by the chairman of the Prison Commission for England and Wales and a senior German official. In addition, a panel of three independent persons would be appointed by the High Commissioner, and would be permitted to visit Werl at any time to see conditions, hear complaints, and make suggestions to the High Commissioner.

Further releases on the recommendation of the Mixed Clemency Board, or on the ground of good conduct or for medical reasons, were announced from time to time during the year by the British, U.S., and French authorities in Germany. On Dec. 7 Professor Oberlander, the Federal Minister for Refugees, stated that only 371 Germans were still detained by the Western allies for war crimes (177 in Germany and 194 abroad), whilst 266 war criminals had been released during the year. He also announced that during 1954 a total of 1,609 German prisoners-of-war and civilian internees had been released by the Communist countries: 1,186 by the Soviet Union, 234 by Czechoslovakia, 148 by Poland, 33 by Hungary, five by Rumania, and three by Albania.—(Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times - New York Herald Tribune - Frankfurter Allgemeine Zeitung) **(Prev. rep. War Criminals, 13355 A; von Neurath, 8227 A; Milch, Handloser, 9477 A.)**

B. UNITED KINGDOM. — Capital Issues in 1954.

New capital issues in the U.K. in 1954 amounted to £471,130,000, as compared with £396,031,000 in 1953. Of the 1954 total, £410,040,000 (87 per cent) was for the home market, £54,470,000 (11.6 per cent) for Commonwealth and Empire countries, and £6,620,000 (1.4 per cent) for foreign countries.

Issues in respect of the home market were divided into the following categories: Public Bodies, £224,543,000; Production, £138,418,000; Trade, £10,265,000; Transport, £205,000; and Finance, £36,610,000. Classified by industrial and other groups, the total of all capital issues (home and overseas) was divided as follows: Governments, £35,123,000; Local Authorities, £18,243,000; Public Boards, £211,200,000; Railways, £90,000; Gas and Water, £4,225,000; Electric Light and Power, £3,518,000; Telegraph and Telephone, £2,405,000; Road Transport, nil; Shipping, Canals and Docks, £205,000; Banking, Insurance, Investment and Finance £42,329,000; Property, £2,280,000; Coal, Iron, Steel and Engineering, £19,566,000; Motors and Aircraft, £21,321,000; Mining, £7,249,000; Oil, nil; Tea, Coffee, and Rubber, £546,000; Breweries and Distilleries, £5,630,000; Miscellaneous, £97,200,000.

The above figures exclude all borrowings by the British Government; shares issued to vendors; allotments arising from the capitalization of reserve funds and undivided profits; sales of already issued securities which add nothing to the capital resources of the company whose securities have been offered; issues in replacement of securities previously held in the United Kingdom; and private placings for which no market quotations are obtained. C. INDIA - PERSIA. — Treaty of Commerce and Navigation. - Signature and Provisions.

A treaty of commerce and navigation between India and Persia was signed in Teheran on Dec. 15 by the Persian Foreign Minister (Mr. Entezam) and the Indian Ambassador (Mr. Tara Chand). The treaty regulated on a reciprocal basis the rights and obligations of nationals of either country in the territory of the other in such matters as the carrying on of lawful occupations and of engaging in commerce, industry, and trade; acquisition and disposal of movable and immovable property; lawful protection of property and just compensation in case of confiscation or seizure; taxation; commercial enterprises; access to courts of law; exemption from compulsory military service; and facilities for shipping. (The Statesman, Calcutta)

A. VATICAN. — The Pope's Christmas Message.

The text of the Christmas message which is customarily broadcast by the Pope was released by the Vatican Press Office on Jan. 3. Discussing the present division of the world between two great Power blocs, Pope Pius XII described the existing state of affairs as a "cold peace"; contrasted the present "co-existence in error" with the real "co-existence in truth" that was needed between the nations; and criticized statesmen on both sides of the "Iron Curtain" for placing "blind faith" in the "imaginary mystic force" of economics as a solution for the world's problems, instead of seeking to build world unity and peace on spiritual foundations.

"We had hoped," said the Pope, "and many others had hoped with us, that once the rage of hatred and revenge [after the war] had finally ceased, there would have dawned a period of secure peace Instead, there continued that agonizing state of uneasiness and danger which public opinion described as the 'cold war,' because in reality it had little or nothing in common with true peace and had much of the character of a truce that trembled at the slightest touch. . . The 'cold war' has been slowly replaced by a period of decreased tension between the opposing parties, as if they were giving each other a longer breathing-space Not without irony, this decreased tension has been given the name of the 'cold peace' . . . 'Cold peace' is only an uncertain calm which depends on fluctuations in fear and the calculation of strength

"Each of the groups into which the human family is divided tolerates the existence of the other because it does not wish itself to perish. By thus avoiding the fatal risk, the two groups do not live together. They co-exist It is not a state of war, but neither is it peace. Each of the two groups smarts under the fear of the other's military and economic power. In both of them there is grave fear of the catastrophic effects of the newest weapons The absurdity of the situation resulting from such a wretched state of affairs is this present policy, while dreading war as the greatest of catastrophes, at the same time puts all its trust in war as if it were the only expedient for existence and the only means of regulating international relations This, in a certain sense, is putting trust in what is loathed above everything else

"There remains the alternative way which, based on the fear of God and helped by Him, leads to true peace . . . Not only fervent believers but millions of other people in both camps in whom the imprint of Christ is preserved, should be called on to work for human unity It is true that in one of the two camps the voice of those who stand resolutely for truth, for love, and for the spirit is forcibly suffocated by the public authorities, while in the other, people suffer from excessive timidity in proclaiming aloud their worthy desires It is, however, the duty of any policy of unification to encourage the former and make heard the sentiments of the latter. Particularly in that camp where it is not a crime to oppose error, statesmen should have greater confidence in themselves . . . They should show more active wisdom in preserving and increasing the ranks of men of good will, especially of believers in God, who everywhere adhere in great numbers to the cause of peace.

"There is an increase in the number of those who rebel against the idea of having to be satisfied with mere co-existence; of having to renounce relationship of a more vital nature with other groups, of being forced to live their lives in an atmosphere of enervating fear They have come to consider the problem of peace and war as a fact involving a higher and Christian responsibility before God and the moral law Once the problem is elevated to this higher plane, which alone is worthy of rational creatures, there clearly appears the absurdity of that doctrine that has held sway in the political schools of the last few decades—that war is one of the many admissible forms of political action and, as it were, the natural result of irreconcilable disputes between two countries, that war, therefore, has no relation to moral responsibility It is equally absurd and inadmissable that a ruler who declares war should be guilty only of having made a political mistake if the war be lost . .

"With all its uneasiness, the 'cold peace' shows signs of taking the first step towards a true moral order . . This goal will be attained if on all sides men will sincerely—almost religiously—come to consider war as a violation of the moral order, constituting guilt that shall not go unpunished. In practice, the goal will be attained if statesmen will recognize that they are personally subject to the eternal moral law and will treat the problem of war as a question of conscience before God. In the present situation there is no other way to free the world of this agonizing incubus except by a return to the fear of God.

"The existing 'co-existence in fear' has therefore only two possible prospects:

Either it will elevate itself to a co-existence in the fear of God, and thence to truly peaceful life together, inspired and protected by the divine moral order;

Or it will shrivel more and more into a frozen paralysis of international life, the grave dangers of which are even now foreseeable."

Speaking of 'co-existence in error,' his Holiness continued "A mistake made on both sides of the Iron Curtain is the belief that economic developments can lead to a breaking down of the 'cold war' barriers Economics, with apparently unlimited ability to produce goods without number, exercises over many of our contemporaries a fascination greater than its possibilities, and extends to fields outside economics The error of placing such trust in modern economics is shared by the two camps into which the world is today divided. On the one side it is taught that, since man has given such proof of being able to create technical and economic marvels, he will also be able to organize the liberation of man from all the privations and evils he suffers, and in this way effect a kind of self-redemption The conception gains ground in the opposing camp that the solution of the problem of peace must be sought in economics, particularly in a specific form thereof—free exchange. History has shown the baselessness of such teachings Nor will the result be otherise if there persists that blind faith which confers on economics an imaginary mystic force

'A still more serious error concerns the very principles which animate the respective unities of the two great world camps One of the camps bases its internal cohesion on a false idea—an idea violating primary human and divine rights, yet at the same time efficacious The other, forgetful that it already possesses an idea that is true and has been successfully tested in the past, seems instead to be tending towards political principles which are evidently destructive of unity During this last decade since the war, a great yearning for spiritual renovation has urged souls to unite Europe with the purpose of putting an end to the traditional rivalries [between peoples] and assuring a united protection for their independence and their peaceful development It was believed that Europe would have easily found within herself the animating idea for her unity. But the ensuing events and recent agreements which, as is believed, have opened the way to a 'cold peace,' no longer have for a basis the idea of a more extensive European unification Many, in fact, believe that the governing policy is for a return to a kind of nationalistic State closed within itself, centralizing its forces, unsettled in the choice of its alliances, and therefore no less perilous than that which had its time of highest development during the last century. Too soon have been forgotten the enormous number of lives sacrificed by this kind of State, and the crushing economic and spiritual burdens imposed by it

"But the real error consists in confusing national life in the proper sense with nationalistic policies The first, the right and prized possession of a people, should be promoted The second, as a germ infinitely harmful, can never be too strongly repelled If the European community is to move forward on this road [towards nationalism], its cohesion will become, as a result, much weakened in comparison with that of the opposing camp Its weakness would certainly be revealed on that day of a future peace destined to regulate, with foresight and justice, the questions still in abeyance. Nor should it be said that, in new circumstances, the dynamism of the nationalistic State no longer represents a danger for other peoples . . .

"Europe still awaits the reawakening of her consciousness Meanwhile, in what she stands for—wisdom, the art of living in association, the influence of culture—she seems to be losing ground in not a few regions of the earth. Especially among some peoples hitherto considered colonial, the process of organic development towards autonomy, which Europe should have guided with perception and care, has rapidly turned into nationalistic outbreaks It must be confessed that these eruptions, damaging to the prestige and the interests of Europe, are, at least in part, the fruit of her own bad example."

After outlining the meaning of "co-existence in truth," his Holiness continued. "Although it is a sad thing to note that the present rupture of the human race took place in the beginning, between men who knew and adored the same Saviour, still there appears to be a well-founded hope that, in His name, a bridge of peace may yet be built between the opposing shores . . . Since, however, this bridge must be of a spiritual nature, those sceptics and cynics are certainly not qualified for the task who, in accordance with the doctrines of a more or less disguised materialism, reduce the loftiest truths and the highest spiritual values to the level of physical reactions, or consider them mere ideologies

"Nor are those fit for the task who do not recognize absolute truth, nor admit moral obligations in the sphere of social life. These latter have already in the past—often unknowingly, by their abuse of freedom and by their destructive and unreasoning criticism—prepared an atmosphere favourable to dictatorship and aggression. Now they rush forward again to obstruct the work of social and political pacification initiated under Christian inspiration In some places it happens not rarely that they raise their voices against those who, conscientiously, as Christians, take a rightful active interest in political problems and in public life in general Sometimes they disparage the firmness and strength that Christians draw from the possession of absolute truth, and spread abroad the conviction that it is to modern man's honour, and redounds to the credit of his education, that he should not be bound to any spiritual world. They forget that it was precisely from these principles that the present confusion and disorder originated; nor will they remember that it was those very Christian forces they now oppose that succeeded in restoring, in many countries, the freedom which they themselves have dissipated It is not upon such men that the common spiritual foundation can be laid and the bridge of truth built . "

The Pope was unable to broadcast his Christmas message owing to the fact that he had been in ill-health for several months.—(The Universe) **(Prev. rep. Pope Pius, 13551 D; 1954 Christmas Message, 13336 A.)**

B. LIBYA. — Embassies in France and Italy.

It was announced in Benghazi on Jan. 3 that the Libyan Government would set up Embassies in Paris and Rome, that M. Mansour Kadara (formerly Minister in London) would become the first Ambassador in Paris, and M. Fethi Kekhia (Libyan Ambassador in Washington) would be transferred to the Rome Embassy.—(Le Monde, Paris) **(Prev. rep. 11917 A.)**

A. UNITED STATES. — Agriculture. - The Agricultural Adjustment Act of 1954. - Flexible Price Support System for Basic Crops. - Acreage Reductions and Support Prices in 1955. - Farmers' Approval in Referendum. - Enactment of Agricultural Surplus Disposal Bill. - U.S. Stocks of Surplus Agricultural Commodities. - President's Report on Surplus Disposals. - New Zealand and Australian Protests against U.S. Sales of Surplus Dairy Products on World Market.

The Agricultural Adjustment Act of 1954, providing for the introduction of a flexible system of price supports for five of the " basic " crops, and embodying most of the Administration's other major recommendations with regard to agriculture, was signed by President Eisenhower on Aug. 28, 1954. Its main provisions were as follows:

(1) Flexible price supports, ranging from 82 5 to 90 per cent of " parity " (see 13162 B), would be introduced from Jan. 1, 1955, for cotton, wheat, maize (corn), peanuts and rice (previously supported at 90 per cent).

(2) The flexible system of price supports for dairy products (butter, cheese and dried milk), ranging from 75 to 90 per cent of " parity " would be retained.

(3) Surplus agricultural produce to the value of $2,500,000,000 would be set aside as a stockpile to be drawn upon in times of national emergency or for domestic or foreign relief. This stockpile would not be included in the stocks taken into account for the purpose of calculating the level of price support, and the products affected would consequently tend to receive a higher support price

(4) A new system of direct payments to wool-growers would be introduced in 1955 under which they would receive a direct Treasury payment representing the difference between a support price—not to exceed 110 per cent of " parity "—and that which they received in the open market The programme was designed to increase domestic wool production from about 229,000,000 lb. to 300,000,000 lb. annually as a security measure. Previously wool was supported at 90 per cent of " parity " through loans

(5) A modernized " parity " formula (which would generally reduce the level of support prices) would become effective in 1956 for the five basic crops mentioned under (1) To avoid too sudden a decline, however, the Bill provided that any reductions in support prices which might result should be limited to five points a year until the formula became fully effective.

The Administration's proposals for the introduction of a flexible system of price support for the basic crops was vigorously opposed in Congress by the powerful " farm bloc," which wanted a continuation of price support at 90 per cent of " parity." A flexible system of price support ranging from 75 to 90 per cent (as the Administration proposed) had been due to come into effect automatically at the end of 1954 under the terms of an earlier Agriculture Act, but had been made inoperative by subsequent extensions of rigid price supports at 90 per cent of " parity." The House Agriculture Committee, in passing the Bill on June 28 (by 21 votes to eight), voted for a continuation of supports at 90 per cent of " parity," as did the Senate Agriculture Committee when it passed the measure (by 13 votes to two) on July 9. In the Senate Committee, however, the voting on this particular clause had been only eight in favour of rigid supports and seven against, and majority and minority reports were subsequently issued which outlined the main arguments on the question.

The majority report argued that the advocates of a flexible system of price supports envisaged " ruthless price competition among farmers " to bring about lower agricultural output and less Federal control, and declared that this was " neither fair nor justified without a fair trial of control programmes .. administered largely by farmers themselves " The report claimed that agricultural history was " rampant " with instances of farmers offsetting lower prices by increasing their output in order to obtain sufficient revenue, and therefore expressed the belief that, even if flexible price supports had been in effect since 1952, there was no good reason to believe that the present agricultural surpluses would have been any less.

The minority report—the signatories of which included Senator Aiken (Rep.), chairman of the committee—pointed out that the fixing of " parity " had been designed by the Government as an incentive to production during wartime, and asserted that it had been " distorted into a peace-time programme for temporarily guaranteeing profits for a minority of farmers." " As unmanageable surpluses pile up and the right to produce is restricted " it declared, " the demand for the continuance of these rigid supports shifts from one of guaranteeing profit to one of providing relief."

When the Bill was debated by the full House, Republican leaders suggested as a compromise on July 1 that the proposed flexible system should operate only between 82½ and 90 per cent of " parity," and this was approved when the House passed the Bill by 228 votes to 170 on the following day. The Senate, which passed the Bill by 49 votes to 44 on Aug. 9, also approved a flexible system within this range.

Another strongly contested clause was that relating to the level of support for dairy products. The action of the Secretary of Agriculture in reducing the support price to 75 per cent of " parity " on April 1 had been vigorously criticized by representatives from the most important dairying States, the Bill passed by the House included a clause providing for an increase in the support price from 75 to 80 per cent of " parity," whilst the Senate Agriculture Committee raised it still further to 85 per cent The full Senate, however decided on Aug 9 by 49 votes to 43 to retain the existing flexible system, after President Eisenhower had expressed the opinion that it would be a " grave error " to raise the level of dairy price supports because the only people who would benefit would be middlemen or processors

The Bill in its final form was approved by the House (by 208 votes to 47) on Aug. 17 and by the Senate (by 44 votes to 28) in the early hours of Aug. 18. Mr. Benson, the Secretary of Agriculture, announced on Sept. 15 that his department planned an initial " set-aside " under the Act of 400,000,000 bushels of wheat and 1,000,000,000 bales of cotton, worth together about $1,174,000,000.

American wheat farmers, in a national referendum on July 23, voted for the second year running in favour of continued marketing quotas and Government price support for their wheat crops; nearly complete returns showed that 195,801 had voted in favour and 71,303 against—a majority of 73.3 per cent in favour, or more than the two-thirds majority required. Mr. Benson, announcing the referendum on June 21, stated that the acreage to be sown to wheat for the 1955 crop would be reduced by about 11 per cent to 55,000,000 acres, the minimum permitted by law.

Mr. Benson also announced on that date details of a new and far more restrictive scheme for major agricultural crops, under which farmers would have to comply in 1955 with (*a*) Federal acreage allotments for all crops in order to be eligible for subsidies on any one crop, and (*b*) a " total acreage allotment " on their land. Mr. Benson said that he greatly regretted this action, but that there was no other immediate choice in view of the surplus of grain and the Government's high price-support programme. The " total acreage allotment," which was designed to prevent the land affected by reductions in major crops from being sown to other crops that might produce fresh surpluses, was, however, strongly criticized in the major agricultural areas, and on Sept. 15 Mr. Benson announced that it would be abolished.

Denying that any pressure had been brought upon him to alter his original decision in view of the November Congressional elections, Mr. Benson said that he had never liked the " total acreage allotment " plan because it was " uneconomical, unfair and ineffective." He added that he had now abolished it in order that cases of hardship in the areas seriously affected by drought could be alleviated by increasing the production of feeding-stuffs.

The following acreage restrictions and support prices for the major crops were announced in the second half of 1954.

Cotton. Cotton growers, in a national referendum on Dec 14, voted overwhelmingly in favour of strict acreage controls and continued price support for the 1955 crop; nearly complete returns showed that 313,561 growers, or 92.2 per cent, had voted in favour and only 27,020 against. The Dept of Agriculture had announced on Oct 14 that the acreage allotment for the 1955 crop would be 18,113,208 acres (a 15 per cent reduction on 1954) and the marketing quota 10,000,000 bales, both of which were the lowest permitted by law.

Maize. It was announced on Oct 1 that the 1954 maize crop would be supported at 90 per cent of " parity," or $1.62 a bushel, in officially-designated maize-producing areas, and at $1.22 outside those areas; the support rate for the 1953 crop was $1.62 for the whole country. In order to become eligible for price support, growers would have to comply with Federal maize acreage allotments.

Rice. On Dec. 30 Mr. Benson fixed the rice acreage allotment for the 1955 crop at 1,859,099 acres, 24 7 per cent less than the estimated 1954 plantings, and ordered a referendum among rice producers on Jan. 28 to determine whether or not they wanted a continuation of marketing quotas and Federal price support.

Wheat. Mr Benson stated in his announcement of Sept. 15 that the 1955 wheat crop would be supported in the commercial wheat areas at 82½ per cent of " parity," or at a national average of $2.06 a bushel, the minimum permitted under the new Act This figure compared with 90 per cent, or $2 24 a bushel, for the 1954 crop.

Wool. It was announced on Oct. 12 that the new " incentive price " which would be paid to wool-growers in the form of cash subsidies would be at the rate of 106 per cent of the current " fair earning power " parity level, or about 62 cents a lb. This compared with 90 per cent of parity, or 53.2 cents a lb., for the 1954 wool clip under the previous loan and purchase agreement programme.

Another Bill designed to deal with the mounting U.S. surpluses of agricultural products was signed by the President on July 11 after Congressional approval. It authorized:

(*a*) The negotiation of agreements with friendly countries for the sale of $700,000,000 worth of agricultural commodities for foreign currencies in the next three years.

(*b*) The allocation of $300,000,000 worth of such commodities in the same period to friendly countries to meet famine or other emergency requirements.

(*c*) The allocation of surplus commodities by the Commodity Credit Corporation to areas in the U.S A. declared by the President to be distress areas.

On May 6, 1954, the Dept. of Agriculture had announced that it would sell its surplus stocks of butter abroad at world prices and not, as previously, at the U.S. domestic price. (The Department was estimated to be holding some 360,000,000 lb. of butter which it had been offering for sale at over 60 cents a lb., compared with a world market price of 42-46 cents a lb.). The New Zealand Government, in a Note on May 11, drew the attention of the U.S. Government to the serious effects which the disposal of the surplus butter, as well as of other surplus dairy products whose disposal had been announced earlier, would have on the world market for these products, and especially on the New Zealand economy, which was so largely dependent on the sale of dairy products.

The New Zealand Note pointed out that the U.S.A. had recently offered to sell abroad 380,000,000 lb. of cheddar cheese, 590,000,000 lb. of non-fat dry milk solids, and the 360,000,000 lb. of butter, and said that these quantities were equivalent to more than 40 per cent of the world's annual trade in butter, over 50 per cent of world trade in cheese, and more than 250 per cent of world trade in non-fat dry milk solids. The amounts offered were so large in relation to world trade that they constituted "a clear danger to the stability of commercial markets." As New Zealand was among the largest exporters of all three products, her interests might well be "seriously prejudiced" by the U.S. offers.

New Zealand's trade in dairy products accounted for more than one-third of her total earnings (the Note continued), and the nature of the N.Z. economy was such that it was not feasible for the country to offset losses in dairying by recourse to other industrial activities. The existence of U.S. surpluses of dairy products had already contributed to reduced output in some New Zealand dairy factories, and the standard of living of the New Zealand people would "clearly be endangered" by any serious disruption of the world market. After suggesting that "a substantial proportion" of the surpluses might be taken up by increased U.S. consumption if the U.S. domestic price were lowered, the Note drew attention to the fact that "export sales at prices below the cost of production constitute dumping in the terms in which dumping is defined in the General Agreement on Tariffs and Trade," and as such were open to "serious objection in principle." The N.Z. Government also considered that unilateral action by the U.S.A. of the kind now being taken might prejudice the value of the common efforts being made under the aegis of the U.N. Food and Agriculture Organization to evolve a satisfactory solution to the surplus problem.

The N.Z. Minister of Agriculture (Mr. Holyoake) stated on Sept. 9 that further representations had been made to the U.S.A. about the disposal of agricultural surpluses, as a result of which the U.S. authorities had given assurances that every effort would be made to ensure that New Zealand's markets for dairy produce would not be damaged by their actions. On the same day, however, a policy statement was issued in Washington with the President's approval which said that whilst the liquidation of surpluses would be "orderly and gradual," the U.S.A. could not accept a limitation of its sales in world markets in order to enable other countries to dispose of their production. "The adjustment of world supply to demand," it added, "will require adjustments in other countries as well as the United States." An Executive Order issued by the President on that date provided that the local currency proceeds of the overseas sales of surplus agricultural products should be released for the following purposes:

(1) The development of new markets for U.S. agricultural commodities; (2) the acquisition of strategic and critical materials; (3) the procurement of military equipment, materials and facilities; (4) the purchase of goods or services for other friendly countries; (5) the promotion of balanced economic development and trade among nations; (6) the payment of U.S. obligations abroad; (7) the promotion of multilateral trade and economic development; (8) international educational exchange activities.

Further protests were made by New Zealand and Australia in January following an announcement that the U.S. Government intended to dispose of 10,000,000 lb. of surplus butter on the world market.

The New Zealand protest, announced on Jan. 13, declared that the effect of the disposal would be to "export domestic difficulty at the risk of grave injury to the economics of smaller and weaker countries such as New Zealand," and reiterated that the current U.S. butter surpluses could be substantially reduced, or entirely disposed of, by the adjustment of U.S. domestic prices. The Australian Minister for Commerce (Mr. McEwen), announcing in Canberra on Jan. 14 that a protest would be made in Washington, stated that whilst Australia did not wish to prevent any orderly disposal of U.S. surpluses, these should not be marketed at prices or in quantities that would dislocate normal market values. If American sales were made to Britain, he said, a "fundamental issue" would be at stake because, if Britain bought American butter at heavily subsidized and virtually "distress" prices, she would damage the market for important Australian export products; this must raise the question of whether Britain could have this advantage and at the same time expect to enjoy heavy protection for her own exports on the Australian market.

The Department of Agriculture, in a report published on Sept. 16, stated that at the end of the fiscal year on June 30, 1954, investment by the Federal Government in surplus agricultural products totalled $6,005,511,000, compared with $3,476,330,000 at the end of the previous fiscal year. The report stated that the Government had lost $419,477,074 on its farm price operations during the year, and estimated its potential losses on stocks held at June 30 as $1,037,010,000.

Of the total Government investment in surplus stocks at June 30, 1954, $3,668,222,000 represented the cost value of commodities owned outright by the Government and $2,337,289,000 covered loans outstanding on agricultural products. Some of the principal stocks held by the Government and their values, were: 766,099,000 bushels of wheat ($1,953,552,000); 447,000,000 lb. of butter ($298,926,000), 428,382,000 lb. of cheese ($172,466,000), and 233,511,000 lb. of dried milk ($38,506,000). The bulk of the outstanding loans were for cotton, maize, tobacco and wheat.

President Eisenhower sent a report to Congress on Jan. 10, 1955, on the first six months' operations of the Agricultural Surplus Disposal Act. It stated that sales of surplus agricultural products totalling $453,000,000 (including shipping costs) had been completed or were being negotiated, and that grants totalling $125,000,000 had been arranged or were being worked out to help friendly Governments in meeting famine or other urgent relief needs. Of the total sales, $205,500,000 was for Western Europe, $44,000,000 for South America, $30,300,000 for the Middle East (solely Turkey so far), and $173,000,000 for South-East Asia.—(New York Times - New York Herald Tribune) **(Prev. rep. 13374 A; Disposal of Surpluses, 13636 B; 13317 A; 13089 A; Wheat Crop Controls, 13162 B; Wheat Export Price, 13654 A.)**

A. UNITED KINGDOM. — South Norfolk By-election.

The South Norfolk by-election, caused by the expulsion of Capt. Peter Baker (Conservative) from the House of Commons (see 13974 C), was held on Jan. 13 with the following result:

Hill, J. E. B. (Conservative)	15,119
Stewart, J. M. (Labour)	14,254
No change. Conservative majority ..	865

At the general election the figures were: P. Baker (C.) 19,610, L. Scutts (Lab.) 16,371—Conservative majority, 3,239. The Conservative proportion of the poll in the by-election was 51.47 per cent and the Labour proportion 48.53 per cent, compared with 54.50 and 45.50 per cent respectively at the general election, the Labour poll thus increased by just over 3 per cent. 66.61 per cent of the electorate of 44,092 voted in the by-election, compared with 82.40 per cent at the general election, when the electorate numbered 43,668.

The new member, Mr. John Hill (42), is a Suffolk farmer.

The by-election was the 43rd of the present Parliament, the Conservatives (including Ulster Unionists) having retained 25 seats and Labour 17 seats, with one Conservative gain from Labour at Sunderland South.—(Times - Daily Telegraph) **(Prev. rep. By-elections, 13955 A.)**

B. BELGIUM. — Communist Party Reorganization.

The Belgian Communist paper *Le Drapeau Rouge* announced on Dec. 14 that a party congress held on Dec. 11 had decided to abolish the post of General Secretary of the party and to replace it by a three-man National Secretariat. The paper also disclosed that neither M. Edgar Lalmand (the party's General Secretary since July 1943) nor M. Jean Terfve (its Press chief and second-in-command) would be a member of the National Secretariat; that a third member of the former executive, M. Jean Borremans, had also been relieved of his post; and that all three had been excluded from the party's Political Committee, though remaining members of its Central Committee. The new National Secretariat would consist of MM. René Beelen, Ernest Burnelle and Gerard Van Moerkerke, none of whom had hitherto played a prominent part in the party's activities.—(La Nation Belge) **(Prev. rep. 10911 D.)**

C. SOVIET UNION. — Protest to Iraq at Suspension of Diplomatic Relations. - Closing of Baghdad Legation.

Following the Iraqi Government's decision to suspend diplomatic relations with the U.S.S.R., a Soviet Note was presented in Baghdad on Jan. 3 declaring that this action "testified to the unfriendly nature of the policy of the Iraqi Government towards the Soviet Union" and "contributed to an increase in international tension." The Note added that "such actions of the Nuri es-Said Government are directly connected with its foreign policy, which is aimed at drawing Iraq and other Arab countries into the aggressive blocs that America and Britain are building in the Near and Middle East." The Soviet Legation in Baghdad was closed on Jan. 12.
(Soviet Weekly) **(Prev. rep. 13971 A.)**

JANUARY 15—22, 1955

A. UNITED NATIONS. — Ninth Session of General Assembly. - Proceedings and Decisions.

The ninth session of the U.N. General Assembly was held in New York from Sept. 21 to Dec. 17, 1954. Some 70 items were included in the Assembly's agenda, the principal subjects discussed and decisions taken being summarized below under cross-headings.

Election of Assembly President.

Dr. E. N. van Kleffens, permanent Netherlands delegate to the U.N., and concurrently Netherlands Minister to Portugal, was elected President of the General Assembly in succession to Mrs. Vijayalakshmi Pandit (India). The ballot, held at the opening session, resulted in 45 votes for Dr. van Kleffens and three for Prince Wan Waithayakon (the Foreign Minister of Siam), with 12 abstentions. Prince Wan, however, had formally withdrawn his candidature—which had been supported by the United States—before the session opened.

Dr Eelco Nicolaas van Kleffens (60) was born at Heerenveen (Friesland) graduated in law at the University of Leiden, and served in the Legal Department of the League of Nations from 1919-21 He entered the Netherlands Foreign Ministry in 1922 and became Foreign Minister of the Netherlands in 1939, holding that post at the time of the German invasion in 1940 He escaped to Britain and throughout the war was Foreign Minister in the Netherlands Government-in-exile in London. After the war he was appointed permanent Netherlands delegate to the U.N., and concurrently Ambassador in Washington. For reasons of health he subsequently assumed the lighter duties of Minister in Lisbon, while remaining head of his country's delegation at the United Nations.

Chairmen of Assembly Committees.

Elections for the chairmen of the various committees of the Assembly resulted as follows:

Political and Security Committee	Dr Francisco Urrutia (Colombia)
Special (*Ad Hoc*) Political Committee	Hr. Thor Thors (Iceland)
Economic and Financial Committee	Sir Douglas Copland (Australia)
Social, Humanitarian and Cultural Committee	M. Jiri Nosek (Czechoslovakia)
Trusteeship Committee	M Rafik Asha (Syria)
Budgetary Committee	M. Pote Sarasin (Siam)
Legal Committee	Dr. Francisco Garcia Amador (Cuba)

Elections to Security Council, etc.

Elections to the Security Council and the Economic and Social Council were held on Oct. 6 and resulted as follows:

Security Council. Belgium, Persia and Peru were elected for two-year terms (beginning in January 1955) in succession to Denmark, the Lebanon and Colombia. The other three non-permanent members of the Council are Brazil, New Zealand and Turkey, whose terms expire at the end of 1955. Persia and Peru received 56 votes each and Belgium 52, whilst Burma, Haiti, India and Panama received one vote each.

Economic and Social Council. Argentina, France, Egypt, and Nationalist China were re-elected for three-year terms, whilst the Netherlands and the Dominican Republic were elected for three-year terms in place of Belgium and Cuba. The other members of the Economic and Social Council are: Australia (until 1956), Czechoslovakia (until 1957), Ecuador (until 1957), India (until 1956), Norway (until 1957), Pakistan (until 1957), Turkey (until 1956), the U.S.S.R. (until 1957), the United Kingdom (until 1957), the United States (until 1956), Venezuela (until 1956) and Yugoslavia (until 1956).

International Court of Justice. Elections were also held to fill six vacancies on the International Court of Justice—see 13897 B.

Disarmament Resolution.

The General Assembly unanimously approved a resolution, sponsored jointly by Great Britain, the United States, the Soviet Union, France, and Canada, calling for the resumption of discussions by the "London sub-committee" of the U.N. Disarmament Commission with the aim of reaching agreement on an international disarmament convention which would include the prohibition of nuclear weapons. (The sub-committee consists of the same five countries which sponsored the resolution.) The resolution was the first to be sponsored jointly by the Soviet Union and the Western Powers since January 1946, when the resolution setting up the U.N. Atomic Energy Commission was adopted by the Assembly.

M. Vyshinsky (U.S.S.R.), speaking in the plenary session on Oct. 1, presented a new Soviet resolution on disarmament which, he claimed, was based to a considerable extent on the Anglo-French proposals presented to the "London sub-committee" in June 1954 (see 13681 C). Moreover, the new Soviet proposals involved the abandonment of the Soviet Union's former opposition to the international inspection of atomic resources The resolution, which was unanimously placed on the General Assembly's agenda, contained the following provisions:

(1) The U.N. Disarmament Commission should prepare and submit for the approval of the Security Council a draft international convention "aimed at the strengthening of peace and security and providing for the prohibition of atomic hydrogen, and other weapons of mass destruction, for a substantial reduction of armaments, and for the establishment of international control to enforce these decisions adopting as a basis the proposals of France and Britain of June 11, 1954"

(2) Under this convention, all the States concerned would, within a period of six months or one year, simultaneously reduce their armaments armed forces, and military expenditure by 50 per cent. In the case of armaments and armed forces, the reduction would be made from the levels obtaining at Dec. 31, 1953 whilst the 50 per cent cut in military expenditure would be made from the level of such expenditures during the calendar year 1953

(3) To control the fulfilment by States of the above-mentioned undertakings, the convention would provide for the setting-up of an International Control Commission, under the Security Council, which would have the right to request from the States concerned all necessary information on the measures taken to reduce their armaments and armed forces Such information would be periodically submitted to the Commission on specific dates

(4) As soon as the States concerned had reduced their armaments and armed forces by 50 per cent, there would be a complete prohibition on the manufacture of atomic and hydrogen bombs and all other weapons of mass destruction All such weapons would be removed from the armaments of States, and all existing atomic materials used solely for peaceful purposes The fulfilment of these undertakings would be completed "not later than the fulfilment of the measures for the reduction of armaments and armed forces."

(5) A permanent international body would be set up under the convention to ensure that all States were fulfilling their obligations under (4) above This body would have "the right to exercise control, and also inspection on a permanent basis, to the degree that may be necessary to ensure the fulfilment of this convention by all States."

(6) The Anglo-French proposals of June 11, 1954, to "prohibit the use of nuclear weapons, with the exception of their use for defence against aggression," should be remitted to the Disarmament Commission for "concrete study" and recommendations

Mr. Selwyn Lloyd (then British Minister of State), speaking in the subsequent debate in the Political Committee said that M Vyshinsky's resolution "holds out the possibility of progress in this important field," and noted that the Soviet Government appeared to have moved towards the Anglo-French proposals which had been submitted to the sub-committee during the London discussions. Although the Soviet resolution would require careful examination, and although many important problems still remained to be "ironed out," he thought they were "nearer common ground" "We should be able quickly to list what we want to prohibit and what we want to reduce," Mr. Lloyd continued. "It will be a more complicated matter to decide on the level to which the reductions will have to be made in types of weapons, manpower, and resources However, I sincerely hope that there will not be years of protracted negotiations on these matters Let us aim at speed and simplicity." The Western Powers, he pointed out, believed that before anyone could be expected to carry out substantial prohibitions or reductions, an international control organ must be in existence and its officials stationed in all the countries concerned, ready and able to supervise the prohibitions and reductions agreed upon If, however, the U.S.S.R. had really abandoned its demand for an unsupervised ban on nuclear weapons, this was a step forward Mr Lloyd added: "The Soviet Government proposes a control commission under the Security Council to supervise the first stage of the disarmament programme. We have to be very sure that that would provide the necessary certainty that the agreed reductions were in fact taking place . . . Would the commission be given over-riding authority? Are its decisions subject to a veto in the Security Council? These are all questions that will have to be answered"

M. Guérin de Beaumont (France) expressed "great satisfaction" at the Soviet proposals and welcomed the fact that the Soviet Government had for the first time, taken a "forward step" towards disarmament. **Mr. James Wadsworth** (U.S.A.) also described the new Soviet proposals as "the first ray of hope that we have received in many years," but added that they would require "much elaboration" on many points before they became "really meaningful."

M. Vyshinsky, replying on Oct. 11 to some of the questions raised during the debate, said that his Government's position with regard to the use of the veto was as follows. no veto would ever apply to the work of the control organ itself, but if the Security Council were to deal with a matter pertaining to the control organ, the provisions of the U.N Charter would apply. On the question of percentage reduction of armaments, he maintained that the new Soviet plan met all earlier objections "Start with conventional armaments, where we are supposed to be strongest," he said, "and at the appropriate stage have the prohibition of the atomic bomb and the institution of a control organ within a specific time-limit of, say, six months or a year or something like that."

After prolonged discussions in the Political Committee, it was announced on Oct. 22 that the Soviet Union had agreed to sponsor, jointly with Britain, the U.S.A., France, and Canada a revised disarmament resolution which, while incorporating many of the original Soviet proposals, also included several changes proposed by the Western Powers. The provisions of the new resolutions were as follows.

(1) A further effort should be made to reach agreement on comprehensive and co-ordinated proposals to be embodied in a draft international disarmament convention This convention should provide for ·

(*a*) The regulation, limitation and major reduction of all armed forces and all conventional armaments

(*b*) The total prohibition of the use and manufacture of nuclear weapons and weapons of mass destruction of every type, together with the conversion of existing stocks of nuclear weapons for peaceful purposes.

(*c*) The establishment of effective international control, through a control organ ' with rights, powers and functions adequate to guarantee the effective observance of the agreed reductions of all armaments and armed forces and the prohibition of nuclear and other weapons of mass destruction, and to ensure the use of atomic energy for peaceful purposes only "

The whole programme should be such that no State would have cause to fear that its security was endangered.

(2) The Disarmament Commission should seek " an acceptable solution of the disarmament problem," taking into account the five-Power resolution, the Soviet resolution introduced by M. Vyshinsky, and the Anglo-French proposals of June 11, 1954.

(3) The Disarmament Commission should reconvene the [London] sub-committee and report to the Security Council and the General Assembly " as soon as sufficient progress has been made."

The five-Power resolution was unanimously approved on Oct. 27 by the Political Committee, which also approved (*a*) a second resolution by the same five Powers referring to the Disarmament Commission an Indian resolution urging that the Commission should study, *inter alia*, the possible establishment of an " arms truce " pending the conclusion of an international disarmament convention , (*b*) an Australian-Philippine resolution requesting the U N. Secretariat to prepare an information paper setting out the present positions of the great Powers on the question of disarmament. The voting on (*a*) was 58 in favour (including India) and one against (Nationalist China), with no abstentions, whilst (*b*) was adopted without opposition

The full Assembly, meeting on Nov. 4, approved the five-Power resolution by unanimous vote, the Indian proposal by 57 to one (Nationalist China), and the Australian-Philippine resolution by 56 to nil, with two abstentions. The unanimity of the vote was warmly welcomed by **Dr. van Kleffens,** who said " Until now, our Organization has progressed very slowly with the question of disarmament, but today we have taken an important step forward Naturally, no-one can foresee the results of the discussions which are mentioned in the resolution, but, apart from this uncertainty, there is one important point—that there is now a possibility of making progress in the field of disarmament. This is the basic meaning of the resolution which has been adopted by the General Assembly " **Sir Pierson Dixon** (U.K.) said there was " cause to be soberly satisfied with the progress that has been made " , **Mr. Wadsworth** (U.S.A.) welcomed not only the unanimity with which the resolution had been approved, but also the unanimity with which the delegates had " openly recognized that we have a long and rocky road to travel " ; whilst **M. Vyshinsky** also noted that there were still " a host of difficulties ahead of us," but added · " The difficulties are there to be overcome .. The Soviet Union approaches the task on the basis of seeking positions which will be acceptable to all parties and all States."

It was subsequently announced that the sub-committee of the U.N Disarmament Commission would resume its discussions in London in February 1955.

Peaceful Uses of Atomic Energy.

In addition to adopting unanimously the five-Power resolution on disarmament, the 60 member-nations unanimously endorsed President Eisenhower's " atoms for peace " plan, calling for the immediate establishment of an international atomic energy agency under the aegis of the United Nations (see 13793 A, 13285 A). It was also unanimously agreed that an international scientific conference on the peaceful uses of atomic energy should meet in the summer of 1955, probably in Geneva. During the debate the U.S. and British delegates announced that their Governments would contribute nuclear materials for projects approved by the proposed international agency.

Mr. Dulles (U.S. Secretary of State), addressing the plenary session on Sept. 23, asked the Assembly to put on its agenda a four-point American plan which was directed primarily to the following ends : (1) the creation of an International Atomic Energy Agency whose work, it was hoped, would start " as early as next year " and whose membership would include " nations from all regions of the world " ; (2) the convening of an international scientific conference in 1955, under U N. auspices, " to consider this whole vast subject " , (3) the opening in the U S.A early in 1955 of a Reactor Training School where students from foreign countries could learn the working principles of atomic energy " with specific regard to its peacetime uses " ; (4) invitations to " a substantial number of medical and surgical experts from abroad " to participate in the work of U.S. cancer hospitals where atomic energy techniques were used—techniques which were " among the hopeful approaches to controlling this menace to mankind "

In announcing this plan, Mr Dulles said that the U S Government were determined that President Eisenhower's proposal for the establishment of an atomic energy " pool " for peaceful uses, made at the eighth session of the Assembly (see 13285 A), " shall not languish until it dies " He expressed regret that the discussions between the U S A and the U.S S R on this matter (see 13793 A) had been unsuccessful, and declared that the Soviet Union had, in effect, said—" we will not co-operate to develop peacetime uses of atomic energy unless it is first of all agreed to renounce all those uses of atomic energy which provide the free nations with their strongest defence again aggression " Mr Dulles added, however, that the Soviet Government, " breaking a five-months' silence," had delivered a Note on the previous day (i e Sept 22) " affirming its readiness to talk further," though giving no indication that the U S S R had ' receded from its negative position " He emphasized, in conclusion, that he wished to make it " perfectly clear that our planning excludes no nation from participation in this great venture," and that " all nations interested in participating . will be welcome to join with us in the planning and execution of this programme."

The resolution, which was warmly supported by a large number of delegates, was unanimously placed on the agenda at the proposal of **M Vyshinsky,** who emphasized his Government's willingness to continue negotiations with the U S A. on President Eisenhower's " atoms for peace " plan.

The U N. Secretary-General, **Dr. Hammarskjold,** informed the Assembly on Oct 1 that he had appointed an inter-departmental committee, composed of five members of the U N Secretariat, which would undertake " a preparatory study of the responsibilities that may accrue to the United Nations as a consequence of the establishment of an international agency for the development of the peaceful uses of atomic energy " Specifically, this committee would consider two questions : (1) " appropriate methods, procedures, and organizational arrangements for the convening and conduct " of the international scientific conference which it was proposed to hold in 1955 ; and (2) the " possible organizational relationship " between the U.N. and the proposed new agency. The committee, which would submit its report to the Secretary-General at the earliest possible moment, would be under the chairmanship of Dr. Ralph Bunche (Under-Secretary without portfolio in the U.N Secretariat), its other members being Mr Roy Blough (Principal Director of the Dept of Economic Affairs), Mr. Martin Hill (Director of Co-ordination for Specialized Agencies and Economic and Social Matters), Dr Dragoslav Protich (Under-Secretary of the Dept of Legal Affairs), and M. Constantin Stavropoulos (Principal Director of the Legal Department)

Mr. Cabot Lodge (U S.A.), supported by **Sir Pierson Dixon** (U K.) and **Mr. Paul Martin** (Canada), formally presented the U S. proposals in the Political Committee on Nov 3, all three delegates expressing the hope that the Soviet Union would participate in the project. Discussing the functions of the proposed Agency, **Mr. Lodge** said that it should (1) encourage world-wide research and development of the peaceful uses of atomic energy ; (2) arrange for nuclear materials " to meet the needs of research, development, and practical application to all manner of peaceful activities, including the eventual production of power " , (3) foster the interchange of information on peaceful uses of atomic energy ; (4) " conduct its activities in such a way as to prepare for the time when the use of atomic energy for peace becomes the predominant and perhaps exclusive use of this great force " The U.S Government, he said, believed that the Agency should be created by a treaty ; that all States which ratified the treaty should become members of the Agency, " with provision for accepting additional members " ; and that all members should " accept an obligation to supply materials and information for the work of the Agency, financial support, and facilities for open discussion and contacts among scientists engaged in peaceful research activities " The U.S A., he added, had originally visualized the possibility that the Agency itself should hold fissionable materials, " but after the Soviet rejection of the U S proposals, all the negotiating States concluded that it might be preferable that the Agency should act as a clearing-house for requests made to it by the various beneficiaries " Under this plan, he explained, donor States would " earmark fissionable materials for the Agency's operations " and would transfer them directly to projects approved by the Agency.

Turning to the proposed international conference, Mr Lodge said that his Government had " long believed that such a conference .. would materially contribute to the knowledge of the participants, and correspondingly benefit their countries." The primary purpose of the conference would be " to discover the fields in which progress would be technically feasible and to develop procedures whereby the nations of the world can make known their wants." He expressed his belief that the conference should discuss such matters as probable world power requirements, the possible contribution of atomic energy to meeting deficits in conventional fuels, the economics of nuclear power, and the health and safety aspects of atomic energy

Both **Sir Pierson Dixon** and **Mr. Lodge** proposed that the conference should be held in Geneva, that an Advisory Committee should be set up to assist Dr Hammarskjold in the necessary preparations, and that this committee should be " a widely representative and technically qualified body." **M. Vyshinsky,** speaking on Nov. 8, objected to Mr Lodge's attempt to depict the Soviet attitude on this matter as " basically negative," and said that such an interpretation was " in complete contradiction with the facts." The Soviet Government had made known its views and had stressed, in particular, the advisability of working out an agreement whereby the participating countries would undertake not to resort to weapons of mass destruction. However, it had never made acceptance of this proposal a prior condition for negotiations, and in its last Note to the U S.A. had stressed the importance of reconciling the Soviet and U.S. positions on this question

Mr. Lodge informed the Political Committee on Nov. 15, with the authorization of President Eisenhower, that the U S Atomic Energy Commission had allocated 100 kilograms (over 230 lb.) of

fissile material to serve as fuel in experimental atomic reactors in other countries—a quantity sufficient to activate a considerable number of reactors throughout the world At the same time he challenged the Soviet Union to make public the design of the atomic electrical power plant which she claimed to have put into operation (see 13685 E) **Mr. Nutting** (U.K.) announced on the following day that H M. Government were prepared to make available 20 kilograms of fissionable material for the same purpose. **Mr. Krishna Menon** (India) subsequently informed the Committee that his Government were prepared to make substantial quantities of uranium available to the proposed Agency provided an assurance was given that it would not be used for the manufacture of atomic weapons

After discussions between the various delegations, **Mr. Lodge** announced on Nov 18 that agreement had been reached on the text of a seven-Power resolution for the establishment of an International Atomic Energy Agency and the convening of a technical and scientific conference in 1955. After explaining that the resolution embodied several changes resulting from consultations between the sponsoring Powers and other countries, notably the U.S S R. and India, he expressed the hope that the new proposals would "start a new chain reaction for the benefit of humanity"

The seven-Power resolution (sponsored jointly by the U.S.A., Great Britain, France, Canada, Australia, South Africa, and Belgium) was unanimously adopted by the Political Committee on Nov. 23, the vote being hailed by Mr. Lodge as "an historic moment." Its provisions were as follows:

After recalling President Eisenhower's initiative, set forth in his speech at the eighth session of the Assembly, noting that negotiations were in progress "for the establishment as quickly as possible of an International Atomic Energy Agency to facilitate the use by the entire world of atomic energy for peaceful purposes, and to encourage international co-operation in the further development and practical application of atomic energy for the benefit of mankind"; expressing the hope that the Agency would be established without delay, and suggesting that the Agency, when established, should negotiate "an appropriate form of agreement" with the United Nations, the resolution:—

(1) Proposed that an international technical conference of Governments should be held under the auspices of the U N "to explore means of developing peaceful uses of atomic energy through international co-operation, and, in particular, to study the development of atomic power and to consider other technical areas, such as biology, medicine, radiation protection, and fundamental science, in which international co-operation might most effectively be accomplished."

(2) Invited all States who were members of the U.N or its specialized agencies to participate in the conference and to include among their representatives "experts competent in the atomic energy field."

(3) Suggested that the conference should be held not later than August, 1955, at a place to be determined by the Secretary-General and the Advisory Committee (see below)

(4) Requested the Secretary-General, acting upon the advice of an Advisory Committee composed of representatives of Brazil, Canada, France, India, the U.S S.R., the U K., and the U.S A., to issue invitations to this conference and to prepare a detailed agenda

(5) Suggested that the Secretary-General and the Advisory Committee, in making plans for the conference, should consult the U N. specialized agencies, in particular the Food and Agriculture Organization, the World Health Organization, and the Educational, Scientific and Cultural Organization.

(6) Invited these specialized agencies to send representatives to the conference.

(7) Requested the Secretary-General to circulate a report on the conference to all members of the U.N and to "other Governments and specialized agencies participating in the conference"

Two Soviet amendments were rejected before the final vote in the Committee: (*a*) an amendment proposing that the Agency should be responsible to the Assembly and, in the cases laid down by the Charter, to the Security Council (negatived by 53 votes to 5 (the Soviet group), with 12 abstentions; and (*b*) another which would have extended the invitation to the conference not only to all States who were members of the U.N. and its specialized agencies, but also to all countries which expressed a desire to take part (rejected by 36 votes to 6). After these amendments had been rejected, the U S S.R. voted for the seven-Power resolution, which was subsequently adopted by the full Assembly—also by unanimous vote—on Dec. 4.

Dr. Hammarskjöld informed the Assembly on Dec. 7 (i) that he had appointed Dr. Gunnar Randers, Research Director in the Norwegian Department of Defence, and Director of the Joint Netherlands-Norwegian Atomic Research Project, to assist him in carrying out his responsibilities under the resolution; (ii) that invitations had been sent to the U.S.A, the U.K., the U.S S.R., France, Canada, India, and Brazil to appoint representatives to the Advisory Committee mentioned in the resolution, and (iii) that the five-member Secretariat committee under Dr. Bunche had presented its report, and had accordingly been dissolved.

The seven-member Advisory Committee held its first meeting at U.N. Headquarters on Jan. 15, 1955. Its members (all distinguished atomic scientists) were: Sir John Cockroft (U.K.), head of the British Atomic Energy Research Establishment at Harwell, Dr Isidor Rabi (U S.A), Professor of Physics at Columbia University, and chairman of the General Advisory Committee of the U.S Atomic Energy Commission; M. Dmitri Skobeltzin (U.S.S.R), of the Soviet Academy of Sciences, and a member of the former U.N. Atomic Energy Commission; M. Bertrand Goldschmidt (France), who had also served on the U N. Commission, Dr. Homi Bhabha (India), chairman of the Indian Atomic Energy Commission and secretary of the Indian Department of Atomic Energy; Dr W. B Lewis (Canada); and Dr Jayme de Barros Gomes (Brazil). Dr. Hammarskjöld, who presided, was unanimously elected chairman of the Advisory Committee

Soviet Complaint against U.S. "Aggression" in China. - Allegations of "Piracy" against Chinese Nationalists.

The Assembly agreed to place on its agenda two Soviet resolutions (*a*) one alleging that the U S.A. was responsible for "acts of aggression" against the Chinese People's Republic; (*b*) a second alleging that the Chinese Nationalist Government in Formosa had violated the freedom of the seas by "piratical attacks" against the shipping of other countries. The first resolution was defeated by 44 votes to 5 (the Soviet group), with eight abstentions, whilst the second was withdrawn by the Soviet delegation after it had been debated by the *Ad Hoc* Committee.

M. Sobolev (U.S S.R.), introducing the first resolution in the *Ad Hoc* Committee, denounced the mutual assistance treaty between the U S A. and Nationalist China (see 13986 A) as "a new act of aggression" against the Chinese People's Republic, declared that it constituted a threat to peace and security in the Far East, and asked the Assembly (*a*) to "note with concern that military forces controlled by the U S A in the area of Formosa and the China Sea have engaged in aggressive acts which lead to attacks against the towns and villages of China"; and (*b*) to call on the U.S Government to take the "necessary steps" to end such acts

Mr. C. D. Jackson (U.S.A) said that the resolution was designed solely "to serve as a platform for hostile propaganda against my country" After declaring that the U S A had neither seized nor occupied Formosa, and pointing out that the U S military mission in that island, numbering 800-900 men, had been sent there at the request of the Nationalist Government, he accused the Communists of deliberately distorting the defensive actions of Nationalist China in meeting attacks launched by the Chinese Communists He referred in this connexion to the Communist artillery and air attacks against Quemoy Island and the Tachen Islands (see 13986 A; 13785 A), and said that, had it not been for the presence of the U S. Seventh Fleet, the Chinese Communists might already have launched "the hideous spectacle of a fresh armed assault against a freedom-loving people"

The resolution was rejected by the above-mentioned vote both by the *Ad Hoc* Committee and, on Dec 17, by the full Assembly.

M. Vyshinsky, presenting the second resolution on Sept. 30, referred to the seizure by the Chinese Nationalists of the Soviet tanker *Tuapse* and the Polish vessels *Praca* and *Prezydent Gottwald* (see 13986 A), and also to Nationalist attacks on the merchant shipping of Britain, Denmark, and other countries He called upon the Assembly to condemn "this gross violation of the freedom of the seas," the responsibility for which "lies not only with the Chiang Kai-shek forces but with those who encourage them" **Dr. Tsiang** (Nationalist China) declared that his Government was engaged in a "struggle for existence" and was "resorting to the world-recognized right of self-defence", he justified the seizure of the Soviet and Polish vessels on the ground that they were carrying cargoes of oil to Communist China in defiance of the Nationalist blockade, and pointed out that the sale of oil and other strategic materials to the Communists had been banned by the United Nations After debate, the Soviet delegation agreed to withdraw its resolution, and on Dec. 15 the *Ad Hoc* Committee adopted a three-Power resolution (presented by the U S.A., Cuba, and the Philippines) inviting member-States to submit to the International Law Commission their views on navigation on the high seas. The voting was 35 to 5 (the Soviet group), with 15 abstentions, including India, Burma, Yugoslavia, Indonesia, Bolivia, Israel and the Yemen The resolution was subsequently adopted by the full Assembly by a similar majority.

Imprisoned U.S. Airmen in China.

By 45 votes to 5 (the Soviet group), with six abstentions (Afghanistan, Burma, India, Indonesia, Yemen and Yugoslavia) and four delegations absent (Costa Rica, El Salvador, Saudi Arabia and Syria), the plenary session of the Assembly adopted a resolution on Dec. 10 which (*a*) called upon the U.N. to act "promptly and decisively" to bring about the release of the 11 U.S. airmen imprisoned in Communist China (see 13927 A), and also of all other captured personnel of the U.N. Command still detained in that country; (*b*) requested the Secretary-General (Dr. Hammarskjold) to take immediate action to this end and to report progress by Dec. 31. The resolution, sponsored by the 16 nations contributing forces to the U.N. Command in Korea, had been presented to the Assembly as a matter of urgency by Mr. Cabot Lodge (U.S.A.) and had been placed on the agenda against Soviet opposition.

Dr. Hammarskjold told the Assembly that he accepted his responsibilities under the resolution "with a sense of the importance of the issue," but that he did not interpret the date mentioned (Dec. 31) as a "deadline." He disclosed on Dec. 11 that he had already sent a cable to Mr. Chou En-lai, the Chinese Prime Minister, requesting a meeting with him in Peking in the immediate future to discuss the release of the American airmen and other U.N. personnel detained in China.

The Cyprus Question.

Against strong British opposition, the Greek delegation presented a resolution calling upon the Assembly to consider the situation in Cyprus, with special reference to the demand for *Enosis* (union with Greece) put forward by the Greek-speaking population of the island. The Political Committee, however, adopted a New Zealand resolution—subsequently approved by the full Assembly—declaring that "for the time being it does not appear appropriate to adopt a resolution on Cyprus."

M. Alexis Kyrou (Greece) asked the Assembly's Steering Committee on Sept 23 to place on the agenda his country's request for consideration of her claim for the union of Cyprus with Greece After referring to the Greco-British dispute on this matter as "a quarrel between friends," he said that his Government had "exhausted all remedies and applied all diplomatic methods" in an effort to achieve a solution of the problem; that the continuance of the "present unsatisfactory state of affairs" had created a situation which made it appropriate for the U.N. to discuss the question; and that the root of the present "unhappy situation" lay in the "unwillingness of the London Government to implement the self-determination of Cypriots." He argued that the case came within the scope of Article 14 of the U N. Charter, which said that the General Assembly could "recommend measures for the peaceful adjustment of any situation, regardless of origin, which it deems likely to impair the general welfare or friendly relations among nations . . ."

Mr. Selwyn Lloyd (U K), after referring to the "deep and long-standing friendship" between Britain and Greece, spoke as follows: "It causes us great pain to have this disagreement with Greece . . I must say frankly that we deeply regret the action of the Greek Government, which can only divide friends and allies and so weaken the structure of peace. If the Greek item is inscribed on the agenda it would establish the principle that a member-State may raise in the U.N. the future of a territory, sovereignty over which has been settled in a treaty to which that State was a party. The effect of setting such a precedent would be far-reaching . . . I do not think I shall be guilty of misrepresentation if I say that it is the aim of the Greek Government not only to terminate British sovereignty but, through *Enosis*, to acquire for themselves sovereignty over Cyprus. Greece is, in effect, asking the U N. to interfere in the domestic affairs of a foreign Power so as to effect a territorial change favourable to herself . . . If it [the Greek resolution] is inscribed on the agenda, the flood-gates would be opened to claim and counter-claim, friction and bad feeling, and subversive activities among ethnic groups everywhere A deplorable precedent would be set . . A discussion on British administration in Cyprus, based on the avowed object of transferring sovereignty, is so flagrant a violation of Article 2, paragraph 7, of the Charter that H.M. Government feel impelled to take a firm stand. The inscription of this item will be bound to have very serious consequences on our relations with the United Nations . . ."

Mr. Lloyd pointed out, *inter alia*, that the Turkish population of Cyprus, numbering 100,000 out of the island's total population of 500,000, was strongly opposed to *Enosis*; that Cyprus had never been under Greek rule except for a short time during the fourth century; that Britain had acquired rights in Cyprus through a treaty with the Sultan of Turkey in 1878, that Cyprus had come directly under the British Crown at the outbreak of the First World War; and that British sovereignty had been recognized by Turkey in the Lausanne Treaty of 1923, to which Greece was a party.

Despite the British protest, the Steering Committee decided to place the Cyprus question on the Assembly's agenda. The decision was taken by 10 votes (the U.S S.R., Czechoslovakia, Burma, Chile, Nationalist China, Cuba, Ecuador, Iceland, Siam and Syria) to three (Britain, France and Australia), with three abstentions (the U.S.A., Colombia, and Dr. van Kleffens, in his capacity as chairman of the committee).

When the matter came before the Political Committee on Dec. 14, **Mr. Leslie Munro** (New Zealand) introduced a resolution asking that the Assembly should not give further consideration to the Greek request. "Cyprus," he declared, "is an essential part of any Middle Eastern and Mediterranean defence system. The security of this area is of concern to countries of the Middle East, to the members of the Balkan Treaty, to the members of NATO, and to members of the British Commonwealth, including New Zealand. Any territorial dispute among the countries directly concerned with this area carries the danger of a deterioration not only in their own relations but in the stability and security of the area itself. Any public airing of such a dispute can only provide opportunities for mischief-making on the part of those—and we know who they are—to whom the weakening of the stability and security of the area is a desirable objective. Is it not significant that among the strongest supporters of *Enosis* is the Communist Party of Cyprus? Is it contended by anyone that the Communists in Cyprus are animated by a desire to be governed by the present Government of Greece? Surely it is not."

Mr. Nutting (U K) said that H M. Government were not prepared to enter into a "purposeless and useless" discussion on Cyprus. Nevertheless, as the matter had been placed on the agenda, Britain was prepared to accept the New Zealand resolution.

The New Zealand resolution, as presented by Mr Munro, said that it was "not appropriate" for the Assembly to discuss the Cyprus question. The Colombian and Salvadorean delegates, however, moved that the words "for the time being" should be inserted, and this amendment was accepted by 44 votes (including those of Britain and Greece) to nil, with 16 abstentions. The amended resolution as a whole was thereupon adopted by 49 votes (including those of Britain, Greece, the U S A . and Turkey) to nil, with 11 abstentions (including the Soviet group), its wording being as follows "The General Assembly, considering that for the time being it does not appear appropriate to adopt a resolution on Cyprus, decides not to consider further the [Greek] item entitled . 'Application . of the principle of equal rights and self-determination of peoples in the case of the population of Cyprus'" The resolution was adopted by the full Assembly on Dec 17 by 50 votes to nil, with eight abstentions.

Both the British and Greek delegates expressed satisfaction with the resolution, though for different reasons Whereas **Mr. Nutting** declared that the result was "gratifying," inasmuch as the Colombian-Salvadorean amendment had in no way prejudiced the British position, **M. Kyrou**—who expressed "delight" at the amendment—said that "this is not a closed issue, as my British colleague seems to think, but an international issue." **Dr. Urquia** (El Salvador) declared, however, that the amendment had been moved with the object of "postponing the question *sine die*"

Dutch New Guinea.

An Indonesian resolution (subsequently re-worded in a compromise form by eight other Powers) was presented calling for a resumption of negotiations between the Netherlands and Indonesia on the question of Dutch New Guinea. Though adopted by the Political Committee, it failed to obtain the necessary two-thirds majority in the full Assembly and was therefore not passed.

The original Indonesian resolution called upon the Dutch and Indonesian Governments to resume negotiations on the status of Dutch New Guinea (West Irian) "without delay" with a view to reaching early agreement, and invited the U N Secretary-General to assist the parties and, if he and they considered it necessary, to "appoint a person to render his good offices" in the negotiations. The Indonesian request for this resolution to be placed on the agenda was supported in the Steering Committee by the Soviet Union, Czechoslovakia, Burma, Siam, Syria, Cuba and Ecuador, and was opposed by Britain, France, and Australia The Netherlands (as an interested party), the U S.A , Nationalist China, Colombia and Iceland abstained from voting.

Dr. Sunarjo (Indonesian Foreign Minister) said that West Irian—which he claimed was "an integral part of Indonesian territory"—still remained in dispute between Indonesia and the Netherlands, despite "agreements reached with Holland in 1949 on the holding of further negotiations" and despite "repeated efforts by Indonesia to reopen discussions" Although the situation had become more serious as a result of the "continuous Dutch refusal to resume the talks broken off in 1952," and of "the reinforcement of Dutch occupation forces in West Irian," the Indonesian Government would continue to exert all its efforts towards a peaceful settlement It felt, nevertheless, that it was necessary to bring the matter before the U N because it constituted "an instance of colonialism, a territorial dispute between two countries, and a question of vital concern threatening peace and security in South-East Asia"

After expressing his surprise at Australia's support for Holland on the "West Irian" question (see 13759 A), and declaring that "Indonesia has no quarrel with the Australian Government or people on this issue," Dr. Sunarjo said . "Our disagreement is with Holland and not with Australia Naturally, Indonesia recognizes that Australia, as the administering authority in East Irian [i e. Australian New Guinea], has an understandable interest in developments in West Irian, but the forcefulness of Australia's reaction seems disproportionately emphasized. The Indonesian Government has never made any claim, and has no claim, to East Irian It is concerned solely with the former Netherlands East Indies territories, the boundaries of which are the national boundaries of Indonesia. In raising this matter in the U.N , we are attempting to complete the independence of our countrymen from colonial rule . . ."

Mr. van Balluseck (Netherlands), speaking in the Political Committee on Nov. 23, stated that—as had been formally announced earlier in the year—his Government could not "entertain any further proposals for a resumption of negotiations concerning Netherlands New Guinea," and that "it would really be asking too much to expect that we should lend ourselves once again to participation in negotiations which, as experience has unfortunately shown, cannot lead to any practical results." "We have more than fulfilled our obligations to negotiate," he declared. "We have not been negative. We have proposed a number of solutions, all of which were rejected. We have now reached the end of our willingness and our ability to proceed along a road which can only lead to renewed failure."

After asserting that Indonesia had requested U N. intervention "with the ultimate aim of promoting the annexation of Netherlands New Guinea by the Republic of Indonesia," Mr. van Balluseck emphasized that his Government had, of its own accord, "repeatedly declared that it will, at the appropriate time, give the inhabitants of Netherlands New Guinea the opportunity to determine their own future These declarations were made long before the issue of West New Guinea came before the Assembly. If we repeat them here and now, it is because they represent the considered policy of the Netherlands Government, by which it will abide." In conclusion, he maintained that "a threat to peace could only occur if Indonesia were to resort to aggressive action," and that there was no movement whatever among the indigenous population of West New Guinea for independence or for affiliation with Indonesia.

Sir Percy Spender (Australia) declared that there was "no logic or validity" in the Indonesian claim, that the U.N. was not competent to deal with the question, that the transfer of the territory of a sovereign State to another would be a gross violation of U.N. principles; and that there was no proof whatsoever that the people of Netherlands New Guinea desired to pass under Indonesian sovereignty. After recalling that Indonesia had refused to submit her dispute with Holland to the International Court, and emphasizing that the lessons of the Second World War had shown that New Guinea would always be a "potential springboard" for the invasion of Australia by an enemy, Sir Percy declared: "There is not one dissentient voice in Australian political or individual, which would deny that the security of Australia and the security of New Guinea are indivisible. We have a continuing interest that the whole of this area should remain stable and secure, both under present arrangements and when its peoples are ready to work out their own destiny. . . . New Guinea has been shown to be the very key to Australia's defence. . . . The destiny of Australia is closely bound up with this island. We cannot view with anything but the utmost gravity the plea that the U.N. should endorse the claim that sovereignty of the Western part should be transferred. . . . The Allied stand in New Guinea marked the turning-point in the South-West Pacific phase of the war."

Mr. Nutting (U.K.) similarly declared that there was "no case whatever" for Indonesia's claim to Dutch New Guinea. He said that Britain would vote against the resolution, "believing that in doing so we are not only upholding the Charter but the interest and well-being of the people of West New Guinea." **M. Van Langenhove** (Belgium) also maintained that the Assembly was not competent to intervene in the matter and, under the Charter, was in fact prohibited from doing so since the question of sovereignty was involved. He pointed out that the inhabitants of Western New Guinea were among the most primitive people in the world, that they could play only a passive role in any transfer of sovereignty, and that, if such a change ever took place, they would not even be aware of the alteration in their political status.

Mr. Baruah (India) maintained that the Dutch claim to jurisdiction over Western New Guinea was untenable, and that the continued deadlock over this question was adversely affecting the political climate of South-East Asia. After declaring that the Netherlands, for a century or more," had failed to do anything to uplift the people of Western New Guinea, he asked why that country "should now be entrusted with the responsibility for the rapid advancement of these people." He added that "the colonial Power [Holland] can have neither the moral strength nor the spiritual incentives necessary to be able to respond to the challenge of poverty, ignorance and disease in these areas." Speeches in support of the Indonesian resolution were also made by the Polish, Czechoslovak, Burmese, Liberian and Afghan delegates.

After further debate, a compromise resolution was submitted on Nov. 30 jointly by Argentina, Costa Rica, Ecuador, El Salvador, India, Syria and Yugoslavia which "expressed the hope" that Indonesia and the Netherlands would "try to find a solution in conformity with the principles of the United Nations," and which omitted the invitation (contained in the original Indonesian resolution) to the U.N. Secretary-General to "assist" the parties. The resolution was adopted in the Political Committee by 34 votes to 14, with 10 abstentions. The countries voting in favour were Afghanistan, Argentina, Bolivia, Burma, Byelorussia, Costa Rica, Cuba, Czechoslovakia, Ecuador, Egypt, El Salvador, Ethiopia, Greece, Guatemala, Honduras, India, Iraq, Lebanon, Liberia, Mexico, Pakistan, Paraguay, Peru, Persia, Poland, Saudi Arabia, Syria, Siam, the Soviet Union, the Ukraine, Uruguay, Venezuela, Yemen, and Yugoslavia, whilst the opposing votes were cast by Australia, Belgium, Colombia, Denmark, France, Great Britain, Iceland, Luxemburg, Netherlands, New Zealand, Norway, Sweden, South Africa and Turkey. Ten countries abstained from voting (Brazil, Canada, Chile, Nationalist China, Dominican Republic, Indonesia, Israel, Nicaragua, Philippines, and the U.S.A.), whilst Panama and Haiti were absent.

When the resolution came before the full Assembly on Nov. 30, however, it failed to obtain the two-thirds majority required for adoption, the voting being 34 in favour and 23 against, with three abstentions. Seven countries which had abstained in the Political Committee voted against the resolution in the full Assembly (Brazil, Canada, Chile, Nationalist China, the Dominican Republic, Israel and Nicaragua); Peru, which had supported the resolution in the Political Committee voted against it in the full Assembly; and Guatemala, which had also voted for the resolution in the Political Committee, abstained in the plenary session.

A statement was issued in The Hague on Nov. 30 by the Netherlands Foreign Minister (Mr. Luns) welcoming the failure of the resolution in the General Assembly, but regretting the fact that the U.S.A. had not supported the Netherlands but had abstained from voting. In Jakarta, the Indonesian Government issued a communiqué on Dec. 12 declaring that it would not give up "the struggle for the restoration of West Irian to Indonesia," and that it would continue its efforts to secure recognition of "the Indonesian national claim."

South African Racial Policy.

By 40 votes to 10, with 10 abstentions, the Assembly adopted a resolution by its *Ad Hoc* Committee on the question of South Africa's racial (*apartheid*) policy. It commended the efforts made by the three-member U.N. Commission which had been set up in 1952 to study this matter; invited the South African Government "to conform to its obligations under the U.N. Charter," bearing in mind the obligations imposed on all States to respect human rights and fundamental freedoms; asked it to take into consideration the Commission's suggestions for the peaceful settlement of the racial problem in South Africa; and called upon the Commission to continue its efforts and to report to the tenth session of the Assembly.

The report of the three-member Commission set up in 1952—with Dr. Hernan Santa Cruz (Chile) as chairman and M. Laugier (France) and M. Bellegarde (Haiti) as its other members—was presented to the General Assembly on Oct. 20. It said that South Africa's *apartheid* legislation was incompatible with the obligations assumed by that country under the U.N. Charter relating to human rights; gave a warning that *apartheid* constituted a grave threat to South Africa's internal situation and foreign relations, and stressed that "any measures to reduce racial conflicts must be the result of efforts initiated within the Union itself." Although the South African Government had refused to co-operate with the Commission, and had allowed it no facilities for on-the-spot investigations, the Commission nevertheless formulated a number of proposals, notably (i) the abolition of the system of migrant labour, (ii) removal of the statutory restrictions on the settlement of non-Whites in urban areas; (iii) recognition of the Bantu people's right to become permanent city dwellers; (iv) genuine acceptance by the European population of the right of non-Whites to settle in the cities and to own urban property; (v) a programme of fundamental adult education; (vi) elimination of the "colour bar" and recognition of the principle of equal pay for equal work, (vii) reorganization of the apprenticeship system, (viii) abolition of the "pass laws", (ix) enactment of new legislation to enable Bantus, Coloureds, and non-Europeans in general to participate with full rights and equality in all negotiations for the peaceful settlement of labour disputes.

Emphasizing the serious psychological effects of *apartheid*, the Commission said that the resentment felt by the non-European population created "a permanent current of conflict and revolt," whilst the White population, on the other hand acquired a feeling of insecurity. The result was a gradual disappearance of mutual trust and of the human contacts that were essential to normal existence and development in a civilized society. After drawing attention to a speech by the Union Minister of Native Affairs (Dr. Verwoerd), in which he had remarked that Africans were being increasingly employed in South African industry but that "increased employment of Natives should not be regarded as integration," the report went on: "In another speech, delivered at Vereeniging last May, the same Minister declared that if economic integration existed because Natives were employed in industry and on the farm, then asses, oxen and tractors used by the farmers are also integrated into the country because they, too, are indispensable. Such words, which reduce human labour to the level of beasts of burden, are utterly revolting. Statements of this kind undoubtedly create trouble and tension."

Asserting that a responsible South African Government spokesman had "admitted that the Government's policy has not succeeded in arresting the inter-penetration of ethnic groups in the economic field," the report stated, as a broad conclusion: "Europeans, Bantus and Coloureds must necessarily wend their way together. We might almost go so far as to say that they are doomed to live together and to build an organic community. The road of gradual integration is the only one that seems . . . likely to lead to a peaceful future acceptable to all parties. To travel that road successfully, one side will have to jettison theories of racial superiority which give a semblance of legality to political supremacy . . . The other [side] will have to realize that the ideas of fraternal equality and collaboration enshrined in the U.N. Charter . . . cannot become reality at a stroke of a magic wand . . ."

The Commission recommended to the General Assembly (*a*) that it should continue its study of the South African racial question with the aim of suggesting measures "to help alleviate the situation and promote a peaceful settlement", (*b*) that an offer be made to the South African Government to set up a committee of experts to list all the ways in which the U.N. and its specialized agencies could help South Africa to settle her racial problems peacefully; and (*c*) that the proposed committee should consist of technical experts specializing in plans for economic and social development.

Appended to the report was a survey of the effect of *apartheid* policies on the South African economy, carried out by Mr. Paul Guenault, of the University of Wales. After stating that *apartheid* involved "very considerable burdens" on South Africa's economy, hampered the industrialist in the efficient use of labour, and weakened the incentive of both European and native workers, Mr. Guenault said *inter alia*: "Though economic activity has greatly increased since the Union was formed, the overall picture is still one of poverty for the bulk of the population. The mass of the population thus constitutes a poor and restricted market for goods, and the development of secondary industry has been impeded."

The Commission also transmitted to the Assembly two letters from Sir Pierson Dixon (permanent British representative at the U.N.) in which it was stated that the British Government regarded the Commission as an "illegal body, and its establishment as "an obvious intervention in the domestic affairs of a member-State."

In the *Ad Hoc* Committee's debate on Dec. 9, the South African Government's *apartheid* policy was criticized by the Indian, Burmese, Iraqi, Mexican, and other delegates. **Mr. Tricumdas** (India) accused the South African Government of "following a course of conduct unworthy of decent human behaviour—conduct which the whole civilized world condemned in the brutal Hitlerite Nazis, with their insane notions of racial superiority." After declaring that South Africa was every day passing legislation which reduced a majority

of the population to a "status of slavery or worse," he added: "The spirit of freedom and democracy is on the march. Asia largely gained her freedom as a result of this spirit. The African giant has awakened and will not long tolerate a status of slavery for the greater glory of the 'master race'. He is asking for his rights and no more. Either these rights will be conceded peacefully or the world may witness a period of race conflict and race war in which the ultimate result could only be the elimination of either the black or the white races from the continent of Africa."

Mr. du Plessis (South Africa) described the report of the U.N. Commission as "a study in intellectual arrogance," and reiterated his Government's contention—expressed at former sessions of the Assembly—that the Commission was "an illegal body set up under an unconstitutional resolution." **Lord Fairfax** (U.K.) likewise declared that the *apartheid* question was "essentially within the domestic jurisdiction" of South Africa, and described the U.N. Commission and all its activities as "illegal."

The above-mentioned resolution (presented jointly by 20 countries, including India, Pakistan, Burma, Indonesia, Egypt, Lebanon, Persia, Iraq, Yugoslavia and Chile) was adopted in the *Ad Hoc* Committee by 34 votes to nine. The opposing votes were cast by Australia, Belgium, Colombia, Canada, France, the Netherlands, New Zealand, South Africa, and the U.K., whilst 10 countries abstained (Argentina, Brazil, Nationalist China, Cuba, Denmark, Guatemala, Peru, Turkey, the U.S.A. and Venezuela). The voting in the full Assembly (on Dec. 16) was as given above, Luxemburg joining the nine countries which had opposed the resolution in the Political Committee.

Indian Community in South Africa.

By 47 votes to one (South Africa), with 10 abstentions, the *Ad Hoc* Committee adopted a resolution (presented by Brazil and seven other Latin American nations) suggesting that India, Pakistan, and South Africa should try to settle by "direct negotiations" the question of the treatment and status of the Indian community in South Africa—an issue which had been before the General Assembly since 1946. The resolution was subsequently adopted by the Assembly.

The three-man Good Offices Commission appointed by the Assembly at its seventh session (see 12749 A, pp. 12751-52) reported on Sept. 20 that it had been unable to arrange negotiations between the three countries concerned owing to the un-co-operative attitude of the South African Government, and was consequently unable to submit any proposals for a settlement of the dispute. "As a last effort," a formal invitation had been extended to the South African permanent representative at the U.N. to attend a meeting of the Commission "to explore the possibilities of implementing the Assembly's resolution on the subject." In reply, however, the Commission had been informed that the attitude of the South African Government remained unchanged, that it regarded the Assembly's resolution as unconstitutional, and that, in consequence, it could not recognize the Commission.

Mr. du Plessis (South Africa) informed the *Ad Hoc* Committee on Oct. 24 that his Government regarded the question of the Indian minority as essentially within its domestic jurisdiction, and that it was therefore unable to accept any resolution on the matter.

The eight-nation resolution proposed (1) that direct negotiations should be sought between India, Pakistan, and South Africa, (2) that the parties concerned should jointly appoint a mediator in the dispute (either a Government, an agency, or a person); (3) that a mediator should be appointed by the U.N. Secretary-General if no agreement had been reached within six months, (4) that the Secretary-General should report to the tenth session of the Assembly. India and Pakistan supported the resolution, whilst South Africa (as stated above) cast the only dissenting vote. The 10 countries abstaining were Australia, Belgium, Canada, Colombia, the Dominican Republic, France, the Netherlands, New Zealand, Turkey, and the United Kingdom.

Admission of New Member-States.

No progress was made on the admission of new member-States to the United Nations. After debate in the *Ad Hoc* Committee, lasting from Oct. 28 to Nov. 12, the Assembly unanimously adopted a resolution referring all pending applications (21 in number) to the Security Council "for further consideration and positive recommendation."

The 21 applicant countries were Albania, Austria, Bulgaria, Cambodia, Ceylon, Finland, Hungary, the Irish Republic, Italy, Japan, Jordan, North Korea, South Korea, Laos, Libya, Mongolia, Nepal, Portugal, Rumania, North Vietnam, and South Vietnam. Fourteen of these countries whose membership had been sponsored by the Western Powers had been kept out of the U.N. by the Soviet veto in the Security Council, whilst the seven applications supported by the Soviet Union had failed to obtain the required number of votes (i.e. seven out of 11) in the Council.

The three-man Good Offices Committee set up by the Assembly at its eighth session (see 13369 A, page 13372) reported on Sept. 13 that it had been unable to resolve the deadlock on the question of admitting new members to the U.N. It felt, nevertheless, that the possibilities of reaching an understanding had not been exhausted, and that further efforts should be made to seek agreement in the Security Council.

Four resolutions were presented in the *Ad Hoc* Committee: (1) a resolution, presented jointly by Australia, Pakistan and Siam, proposing the admission of Cambodia and Laos to the U.N.; (2) a resolution, sponsored by Argentina, Cuba and El Salvador, for the admission of Austria, Ceylon, Finland, the Irish Republic, Italy, Japan, Jordan, Libya, Nepal and Portugal, (3) a U.S. amendment to this resolution adding South Korea and South Vietnam to the list; (4) the Soviet "package" proposal (presented at earlier sessions of the Assembly) for the simultaneous admission of 14 countries (Albania, Austria, Bulgaria, Ceylon, Finland, Hungary, the Irish Republic, Italy, Jordan, Libya, Mongolia, Nepal, Portugal and Rumania).

After debating these resolutions, the *Ad Hoc* Committee adopted on Nov. 12 a four-Power resolution (sponsored by India, Argentina, Cuba and El Salvador) which (i) referred all pending membership applications to the Security Council "for further consideration and positive recommendations"; (ii) suggested that the Security Council should hold periodic high-level meetings (as provided for under the U.N. Charter) in an attempt to resolve this question; and (iii) asked the Good Offices Committee to continue its efforts and to report progress. The resolution was passed by 59 votes to nil (with no abstentions and Costa Rica absent), and was adopted unanimously by the full Assembly on Nov. 23.

At the opening plenary session on Sept. 21, M. Vyshinsky (U.S.S.R.) introduced a resolution for the admission of the Chinese People's Republic to the United Nations. Mr. Cabot Lodge (U.S.A.), however, moved an amendment deferring consideration of the matter for a further year, and this amendment, after having been given precedence on the agenda, was adopted by 48 votes to 11 (the Soviet group, Denmark, Norway, Sweden, Yugoslavia, India and Burma), with six abstentions (Afghanistan, Egypt, Indonesia, Saudi Arabia, Syria and the Yemen).

Shortly before the session opened, the U.S. delegation had circulated to all member-States a memorandum listing 39 "warlike" acts committed by the Chinese Communists against the shipping and aircraft of Western nations, covering the period from July 1950 to June 1954, in which 29 American and British nationals had lost their lives. They included seven incidents involving Britain (including the shooting-down of a British airliner off Hainan on July 22, 1954), five involving the U.S.A., two each involving Denmark and Panama, and one each involving France, Norway and Portugal.—(United Nations Review, New York - U.N. Information Centre, London - Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Le Monde, Paris - Soviet Weekly - Algemeen Handelsblad, Amsterdam - Netherlands News Agency - Indonesian Embassy, London - Cape Times - The Statesman, Calcutta) **(Prev. rep. General Assembly, Eighth Session, 13369 A; 13285 A; 13269 A.)**

A. INDIA. — Former French Settlements grouped into State of Pondicherry.

The Indian Government announced on Jan. 6 that the former French Settlements of Pondicherry, Karikal, Yanam, and Mahé would in future constitute a single State of the Indian Union under the name of the State of Pondicherry. Mr. Nehru had previously told the House of the People on Dec. 16, 1954, that it would be preferable to make Pondicherry a separate unit, rather than merge it with surrounding districts, so that India could fulfil her undertaking that Pondicherry would remain a centre of French culture. The membership of the Indo-French commission entrusted with the settlement of all questions pending at the time of the *de facto* transfer, consisting of three officials of either side, had been announced on Nov. 17.

The French India National Congress decided on Nov. 8 to delete the words "French India" from its name, and to make other amendments to its constitution to suit the changed conditions created by the merger with India. Mr. Subramaniam, leader of the Congress, emphasized that it had operated as a nationalist organization for the past seven years, and had no connexion with the former Socialist Party, which had recently re-named itself the National Congress Party.

Mr. Nehru paid an official visit to Pondicherry on Jan. 16, 1955, and received an enthusiastic welcome from the population. (Indian High Commissioner's Office, London - The Hindu, Madras - The Statesman, Calcutta) **(Prev. rep. 13857 A.)**

B. EGYPT - PHILIPPINES. — Treaty of Friendship.

A treaty of friendship between Egypt and the Philippines, stipulating that there should be "perpetual peace and everlasting amity between the two Republics and their peoples", was signed in Washington on January 18.

(New York Herald Tribune)

C. GERMANY. — New French Commandant in Berlin.

General Pierre Manceaux-Demiau, the French Commandant in West Berlin, relinquished that post on Jan. 1 to take up other duties, and was succeeded by Brigadier-General Gèze.

(Le Monde, Paris) **(Prev. rep. 12648 C.)**

A. YUGOSLAVIA. — Ratification of Trieste Agreement and Balkan Treaty.

The Yugoslav National Assembly (the two Houses of the Yugoslav Parliament meeting in joint session) unanimously ratified on Oct. 23 the Italo-Yugoslav agreement on Trieste and the treaty of alliance concluded between Greece, Turkey, and Yugoslavia. It also approved the principles of foreign policy previously set out by President Tito, and expressed its agreement with the recommendations of the Greek, Turkish and Yugoslav Foreign Ministers that a three-Power Consultative Assembly should be set up under the Balkan Pact.

President Tito, in his report to the National Assembly, said that German rearmament within the Brussels Treaty was "an improvement on the E.D C" because it had taken into account some of the factors disturbing France's relations with Western Germany. The simultaneous Franco-German agreement over the Saar also showed the possibility of removing such obstacles The integration of Europe, he said, would be facilitated if the new organization's primary task was the removal of such internal antagonisms, but it would miss its end if it permitted itself to acquire the character primarily of a military grouping with military aims Whilst the new Western European Union did not fully correspond with Yugoslav conceptions of the surest means of solving international problems, Yugoslavia could "not adopt a negative attitude towards it", on the contrary, she felt it necessary to try to find, 'together with our allies Greece and Turkey," corresponding forms of co-operation on a regional basis with the members of the new organization

As regards the Trieste agreement, President Tito promised the inhabitants of the former Zone B that they would be "the subject of our special care and attention," and gave an assurance that the Italian minority would be given equal possibilities and full rights so that the area could become a 'live link in the further development of our relations with neighbouring Italy" In spite of the sacrifices entailed, Yugoslavia was satisfied that the problem had been "finally removed from the agenda" and that there were prospects of a new and happier future in the relations of the two peoples

Speaking of Yugoslav relations with the Soviet bloc, President Tito said the process of restoring normal contacts had lately yielded "concrete results." Besides barter agreements signed with Russia and several other East European countries, preparations were now in hand for the conclusion of a similar agreement with Poland—the one East European country which had yet to follow the Russian example in seeking a resumption of normal diplomatic relations with Yugoslavia. These trade arrangements, as well as various other developments—the dissolution of anti-Titoist emigré organizations behind the Iron Curtain, the ending of Cominform propaganda, and the cessation of radio 'jamming" of Yugoslav broadcasts—encouraged the hope that the restoration of normal relations would be continued, although there were still many "complicated problems" which had not yet been touched upon

An Order was issued by President Tito on Oct. 23, 1954, abolishing military government in the former Zone B as from midnight of Oct. 24-25. In the early hours of Oct. 25 Yugoslav troops entered the small strip of the former Zone A which had been ceded to Yugoslavia under the agreement with Italy. An amnesty for political crimes committed in the former Zone B was proclaimed by the Governor (Colonel Stovanovich) on Oct. 24.—(Tanjug Agency, Belgrade) **(Prev. rep. Trieste, 13821 A; Balkan Alliance, 13725 A; President Tito on Soviet-Yugoslav Relations, 13001 A; on E.D.C. 13806 C.)**

B. UNITED KINGDOM. — Orpington By-election.

The by-election in the Orpington division of Kent, caused by the death of Sir Waldron Smithers (Conservative), was held on Jan. 20 with the following result

Sumner, W. D. M. (Conservative) . .	20,082
Williams, R. D. Vaughan (Labour) . .	10,426
No change. Conservative majority . .	9,656

The figures at the general election were : Sir Waldron Smithers (C.) 27,244, R. D. Vaughan Williams (Lab.) 16,241—Conservative majority, 11,003. The Conservative candidate received 65 83 per cent of the votes in the by-election and the Labour candidate 34.17 per cent, compared with general election percentages of 62.65 and 37.35 per cent respectively The Conservative proportion therefore increased, and the Labour proportion fell, by 3.18 per cent. 55.39 per cent of the electorate voted, compared with 82.01 per cent at the general election The electorate numbered 55,069, compared with 53,023 in 1951.

Mr. Sumner (42), a barrister, was chairman of the Orpington Conservative Association prior to his election.

The by-election was the 44th of the present Parliament. (Times - Daily Telegraph) **(Prev. rep. By-elections, 13992 A.)**

C. TURKEY. — Cabinet Change.

It was announced in Ankara at the beginning of December that M. Samet Agaoglu had been appointed Minister of Industrial Development in succession to M. Fethi Celikbas. M. Agaoglu had held various posts in Cabinets headed by M. Menderes, including those of Deputy Prime Minister and Minister of State.—(Turkish Embassy, London) **(13597 A.)**

D. CHINA. — Analysis of Population Census.

A detailed analysis of the first nation-wide census taken in China (see 13883 B), was brought by the *Eastern Economist* (New Delhi) in its issue of Dec. 10, 1954, from which the following information is taken :

Method of Computation. Of the total Chinese population of the world, given in the census as 601,938,035, it was stated that the figure of 574,205,940 was gained through direct census, whilst the remainder, 27,732,095, was arrived at by indirect census The latter figure included 7,590,298 in Formosa Taiwan), which had "yet to be liberated," 11,743,320 Chinese residing or studying abroad, and 8,397,477 in remote border regions where local elections had not taken place or where transport facilities were exceptionally bad (As explained in 13685 A, the census was carried out simultaneously with nation-wide urban and rural district elections.)

Distribution of Population. The distribution of the Chinese population among the three largest cities, the provinces (including Formosa), Tibet, Inner Mongolia, and Overseas Chinese was enumerated as follows

Peking (the capital)	2,768,149	Shensi Province	15,881,281
Shanghai	6,204,417	Kweichow ,,	15,037,310
Tientsin	2,693,831	Shansi ,,	14,314,485
		Fukien ,,	13,142,721
Szechwan Province	62,303,999	Kansu ,,	12,928,102
Shantung ,,	48,876,548	Heilungkiang ,,	11,897,309
Honan ,,	44,214,594	Kirin ,,	11,290,073
Kiangsu ,,	41,252,192	Jehol ,,	5,160,822
Hopei ,,	35,984,644	Sinkiang ,,	
Kwangtung ,,	34,770,059	(Chinese Turkestan)	4,873,608
Hunan ,,	33,226,954	Sikang Province	3,381,064
Anhwei ,,	30,343,637	Chinghai ,,	1,676.534
Hupeh ,,	27,789,693	Inner Mongolian	
Chekiang ,,	22 865,747	Autonomous	
Kwangsi ,,	19,560,822	Region	6,100,104
Liaoning ,,	18,545,147	Tibet	1,273,969
Yunnan ,,	17,472,737	Taiwan (Formosa)	7,591,298
Kiangsi ,,	16,772,865	Overseas Chinese	11,743,320

Population by Nationalities. The distribution of the population by nationalities was given as follows

Chinese (*Han*)	547,283,057	Mongolians	1,462,956
Tibetans	2,775,622	*Tribal peoples	20,824,421
Manchus	2,418,931	Other nationalities	6,718,025

* Including the many aboriginal or primitive tribes (Miao, Uighur, Chuang, Hui, etc) living in remote areas of western, south-western and north-western China.

Among other information, it was stated that 51.82 per cent of the Chinese population were males and 48.18 per cent females; that there were 3,384 centenarians; and that the Chinese birth-rate now averaged 37 and the death-rate 17 per thousand, giving a natural rate of increase of 20 per 1,000. Attention was also drawn to the rapid growth of the urban population, particularly in the industrial and mining cities of Manchuria.—(Eastern Economist, New Delhi)

(Prev. rep. 13883 B; 13685 A.)

E. SWITZERLAND. — Election of Federal President and New Members of Federal Government.

M. Max Petitpierre (55), head of the Political (Foreign Affairs) Department of the Swiss Federal Council, was elected President of the Swiss Confederation for 1955 at a meeting of the Federal Assembly (i.e., the two Houses of Parliament sitting together) on Dec. 16, 1954.

On the same date the Federal Assembly elected three new members of the Federal Council (Government) to replace M. Rodolphe Rubattel and Dr. Karl Kobelt, who had resigned, and Dr. Joseph Escher, who had died on Dec. 10. The new members were Dr. Thomas Holenstein, who took over the Department of Posts and Railways administered by the late Dr. Escher; M. Paul Chaudet, who succeeded M. Rubattel in the Department of Economics; and Signor Giuseppe Lepori, who succeeded Dr. Kobelt as head of the Military Department.

Dr. Holenstein (58), a Roman Catholic Conservative from St. Gallen, is president of the Federal Banking Commission. M. Chaudet (50) is a Radical from Canton Vaud, and Signor Lepori (52) a Roman Catholic Conservative from Canton Ticino.

The new Federal Government consists of three Radicals, three Roman Catholic Conservatives, and one member of the Farmers' Party, compared with four Radicals, two Roman Catholic Conservatives, and one member of the Farmers' Party in the previous Government

In the inter-party negotiations preceding the election of the new members of the Federal Council, the Social Democrats (who have not been represented in the Federal Council since 1953) had claimed two seats in the Government on the ground that they had received the largest number of votes at the last general election. This demand was refused by the other parties of the Government coalition, who wished to concede only one seat to the Social Democrats, whereupon the latter refused to participate in the Government.

(Neue Zurcher Zeitung) **(Prev. rep. 13354 G.)**

A. WESTERN EUROPEAN UNION. — French Proposals for European Armaments Production Agency. - M. Mendès-France's Visits to Rome and Baden-Baden. - Discussions with Italian Ministers on Franco-Italian Economic Co-operation. - Italian and German Attitude towards French Arms Pool Proposal. - Franco-German Agreement on Implementation of Saar Statute.

It was announced in Paris on Jan 7 that the French Government had sent to the other member-countries of the proposed Western European Union a memorandum on the creation of a European Agency for Armaments Production, as distinct from the Armaments Control Agency envisaged under the London and Paris agreements. It was stated that the memorandum was intended to serve as a " basis for discussion " at a meeting of the working group of member-countries of the Western European Union, including Western Germany and Italy, which would open in Paris on Jan. 17.

The memorandum (dated Jan. 3) defined the three objectives of creating an arms pool between the W E U. member-countries as :

(1) In the military sphere, the increased efficiency of their military forces and improvement in their logistical systems

(2) In the budgetary and industrial spheres, the better use of armaments credits and the reduction of retail prices

(3) In the economic sphere, the sharing of responsibilities and tasks to the common benefit of the participants.

It explained that the functions of the proposed Agency would cover the standardization of armaments, the laying-down of manufacturing programmes, the allocation of armaments orders to the member-countries of the Union, the execution of these programmes, the distribution of armaments between the forces of the member-countries, and the planning and co-ordination of investments for the development of productive capacity. Any extension of the productive capacity for armaments in any of the member-countries would require the authorization of the Agency, in which connexion areas would be zoned according to their vulnerability to enemy attack The Agency would also receive and distribute U S and Canadian military aid and " offshore " orders, and would conclude agreements to that effect with the United States and Canada

To overcome initial difficulties, the memorandum proposed that the new organization should come into being in two stages There would be a transitional period until Dec 31, 1956, during which member-countries would adapt themselves for the subsequent establishment of the supranational authority During this period decisions would be taken by member-countries through two committees—a military standardization committee and an armaments production committee, in both of which unanimity would be required. However, if no unanimity could be achieved in the military committee about certain measures of standardization, it would be open to some of the member-countries to adopt these decisions between themselves, with the possibility of other members adhering later. The armaments production committee would distribute production contracts for standardized *matériel* with the aim of extending joint production to the largest possible number of individual programmes, and its consent would be required for the execution of " offshore " orders.

As from Jan 1, 1957—the beginning of the second stage—the proposed Agency would assume full powers. It would work under a Director and a permanent committee consisting of the Defence Ministers of the member-countries, under the overall authority of the Council of the Union. Both the Council and the permanent committee would take their decisions by a two-thirds majority, and extensive executive powers would be vested in the Director of the Agency. The Council of the Union would approve the annual production programmes, investment plans, and decisions (which, contrary to the two-thirds majority rule, would require unanimity) on the standardization of equipment. As an alternative to this set-up, it was suggested that the central authority of the Agency might be akin to the High Authority of the European Coal and Steel Community, consisting of a fully supranational committee whose members would have no links with their Governments.

In addition to the suggestion of a transitional period, the new French proposals differed from those put forward by M. Mendès-France at the London conference in that they envisaged that the projected European Armaments Community should cover the whole territory of all member-countries of the Union, including Great Britain.

The French proposals formed one of the subjects which M. Mendès-France discussed with Italian and German Ministers during subsequent visits to Rome and Baden-Baden.

The Rome discussions with Signor Scelba (the Italian Prime Minister) and Professor Martino (the Foreign Minister) took place on Jan. 11-12 after M. Mendès-France had paid a brief visit to President Einaudi at Naples. During his stay in Rome M. Mendès-France also had talks with Signor Saragat (the Italian Deputy Premier) and saw Signori Gronchi and Merzagora (Presidents of the Chamber of Deputies and the Senate respectively) and the leaders of the principal Italian parties, including Signor Fanfani (Christian Democrat), Signor Nenni (Left-wing Socialist), and Signor Togliatti (Communist). On Jan. 13 M. Mendès-France was received in audience by the Pope. Concurrently with the Ministerial discussions, talks also took place in Rome between French and Italian industrialists on such questions as the commercial relations between the two countries in the light of French trade liberalization measures, Italian industrial collaboration in French Union territories, and other subjects of joint interest to the industries of the two countries.

On Jan. 12 the following communiqué was issued in Rome on M. Mendès-France's discussions with Signor Scelba and Professor Martino

" Conscious of the fundamental character of the solidarity created by the Western Powers through their common policy within the framework of the North Atlantic Treaty, the French and Italian Ministers considered that the Paris agreements constitute an important stage in the building of a united Europe. The provisions relating to the voluntary limitation and reciprocal control of armaments should inspire more far-reaching agreements which may result from the initiative taken by friendly countries in the United Nations [i e., the Anglo-French proposals on disarmament: see 13181 A] · Firmly attached to the maintenance of existing European organizations, and resolved to ensure for Western Europe a continued development in the economic, social, cultural, and political spheres, the Ministers took the opportunity of considering all the eventual measures concerning armaments production. They believe that still closer Franco-Italian co-operation will allow the two countries to make their full contribution to the consolidation of peace and to the continued improvement of the living standards of their peoples. They also confirmed their wish to maintain close personal contact, followed by the exchange of information and mutual consultations.

" Furthermore, they reviewed other questions of an international character which are of interest to their two Governments . . . and found their views in complete agreement. The progress already accomplished in the organization of Western Europe must, in their opinion, constitute the starting-point for action by the Allied countries aimed at an international *détente* and the peaceful co-operation of all peoples.

" Having found that the aims of their two Governments in various international organizations dealing with monetary and financial questions, such as the O E E C. and G A T.T., are in complete accord, the Ministers agreed that their representatives in these organizations should, within the framework of general co-operation, continue to proceed by joint action with a view to bringing about an expansion of international trade within a multilateral trade and payments system of as wide a character as possible. As regards trade exchanges between their two countries, they recognized that France's progressive return to trade liberalization will tend to facilitate the harmonious development of Franco-Italian economic relations The latest stage in the liberalization of French trade exchanges, in particular, was recognized as a positive element which would help to remove certain obstacles hitherto hindering Franco-Italian trade.

" The Ministers paid special attention to the various forms in which a more active and fruitful Franco-Italian economic co-operation can be brought about In this respect they will support private plans which may be submitted to them with the aim of achieving a better specialization in the production of the two countries, especially in the industrial sphere. The French Prime Minister stressed his particular interest in Franco-Italian economic and financial co-operation, not only in Europe but also overseas, where new resources can be developed through joint European action The Italian Ministers, for their part, expressed themselves in favour of the development of Franco-Italian industrial co-operation, and notably of the participation of joint Franco-Italian undertakings in the development of Southern Italy. They also discussed the prospects which the present Italian development plans could open to the French economy, and decided to set up a joint commission, consisting of specially qualified persons, which will promote and facilitate the various kinds of collaboration on a permanent basis.

" The conference was preceded by a meeting of experts who examined and settled various problems to be dealt with in a separate announcement."

A second communiqué was published during the night of Jan. 12-13 dealing with " special questions relating to the Franco-Italian discussions." It stated that the French and Italian Ministers had examined the following questions during their talks ·

Cultural Questions. The discussions had shown the importance attached by both Governments to the development of Franco-Italian cultural exchanges. The Ministers had taken note of the " steady and very satisfactory " progress made in this sphere, which had manifested itself not only in the direct cultural relations of their countries but also in the friendly co-operation of their representatives in international cultural organizations Wishing to go farther along this road, they had stressed the importance they attached to the mutual knowledge of their languages, and had agreed to strengthen contacts between the youth of both countries by means of an increase in study tours, research scholarships, and exchanges of professors and students. Particular attention had been paid to the question of the validity of school and university diplomas in either country, and this question would be considered by a cultural commission to be set up in the near future.

Emigration Questions. The Ministers had examined the various aspects of Italian emigration to France, had expressed satisfaction about the existing co-operation in this sphere, and had studied means of developing it still further. M. Mendès-France had surveyed French plans for the immigration of foreign labour in 1955, " which, as usual,

reserve first place to Italian labour," and had stressed his Government's policy of progressively increasing French economic activity whilst maintaining full employment. The Ministers thought that certain increases in French building activities would be possible, and examined specifically a plan for the immediate employment of Italian workmen in the French house-building programme.

Other Questions. M Mendès-France and the Italian Ministers had signed a consular convention, a convention on mutual judicial aid, and a provisional agreement on the working of the Gran Scala power station in the Mont Cenis area (which provides electric power for Turin and belonged to Italy before the Italian Peace Treaty). After discussing the construction of the projected Mont Blanc tunnel (see 13783 C) the Ministers had agreed on a number of measures aimed at facilitating transport and communications across their common frontier, including the widening of the road linking Menton and Ventimiglia. Agreement was also reached on free transit facilities for the inhabitants of Corsica, Sardinia, and Elba.

A further statement was made to the Press by Professor Martino on Jan. 14 in which he spoke of Italy's attitude towards M. Mendès-France's proposal for a European armaments pool.

Professor Martino stated that in principle the Italian Government viewed the French proposals favourably, although, before the conversations began, they had had reservations about some of its possible economic effects on Italy—particularly the possible repercussions on the Italian armaments industry if insufficient orders were placed with it, involving consequent danger of unemployment. Italian concern in this respect had, however, been appreciated by the French Premier and steps would be taken to safeguard Italian interests, in particular, it was envisaged that new armaments factories might be set up in the depressed areas of Southern Italy and in the Italian islands. Italy was also particularly concerned about the apparent French intention that all arms supplied by countries outside the "pool," such as the U.S.A. and Canada, should be supplied to and distributed by the "pool" itself, and not by the member-countries. M Mendès-France, however, had shown himself "adaptable," and Italy's attitude to this aspect of the proposals might be modified if satisfactory technical arrangements could be made.

Professor Martino also mentioned that the Italian Ministers had raised the question of the Franco-German agreement on the Saar, and had expressed concern lest the bilateral Franco-German economic agreements envisaged under that pact might be injurious to the Italian economy. M Mendès-France, however, had given a formal assurance that no Franco-German economic arrangements would be made which were not open to other member countries of the Western European Union. Similar assurances, he added, had been received from the Federal German Government.

M. Mendès-France went from Rome to Baden-Baden, where he had a 12-hour discussion with Dr. Adenauer on Jan. 14 on international and Franco-German problems. Professor Erhard (the Federal Minister of Economics) took part in the discussions on the French proposals for a European Armaments Production Agency.

In a statement issued in Bonn on Jan. 9, Professor Erhard had denied a Press report that the Federal Republic was prepared to "renounce" the production of tanks and heavy artillery and would be content to buy these weapons from other members of NATO. He pointed out that the limits on the future German armaments industry were clearly defined in the Paris treaties, which gave the Federal Republic the right to produce all armaments outside those expressly excepted. There was no question of giving up these rights, although this did not mean that the Federal Republic was interested in herself producing "all the armaments necessary for military use." On the contrary, the Federal Government were anxious to see "international co-operation and international division of labour" extended to the field of armaments production.

The following communiqué was issued at the end of the discussions between the French Prime Minister and the German Federal Chancellor:

"During the Baden-Baden talks M. Mendès-France and Dr. Adenauer examined the problems raised by the co-operation of their two Governments in the international sphere, as well as certain specific Franco-German questions.

East-West Relations. The Prime Minister and the Federal Chancellor began their exchange of views by an examination of the general political situation, and expressed the determination of their Governments to carry out fully their obligations for the maintenance and consolidation of peace, and to pursue, in agreement with the other free countries, their efforts aiming at a *détente* between the East and the West. They subsequently examined the following questions: (1) armaments production; (2) implementation of the Saar agreement; (3) cultural collaboration; (4) economic co-operation.

The Armaments Agency. Regarding the question of armaments, which will be studied by the working party of representatives of the member-countries of the future Western European Union, meeting on Jan. 17, Professor Erhard explained to the French Prime Minister various suggestions which will be communicated to the other participants in the forthcoming meeting. The Ministers were in agreement on the necessity of standardizing war materials in consultation with NATO, and of communicating to each other their armaments programmes with the aim of harmonizing them and thereby achieving the best possible utilization of their resources, as well as a reduction in expenditure, with proper regard to their national interests and to the elimination of cartels and other restrictive agreements. They rejected any idea of autarky as regards armaments production. They agreed on the necessity of ensuring that armaments production and exports would not endanger the economic and social position of their countries.

The Saar. The Ministers discussed the measures required to permit, after consultation with the Saar Government, the application of the Saar agreement of Oct. 23, 1954. They examined in particular those questions relating to the preparation of, and the holding of the referendum on, the future Statute. As the Statute will be based on the Western European Union, they agreed that it would be desirable to hold the referendum under the supervision of an international commission, on the constitution of which they will jointly approach the other member-Governments of the Union.

The question of the functions of the Saar Commissioner, who must be appointed by the Council of the Western European Union, was examined in detail. Agreement was reached for the settlement, within the framework of the Western European Union, of any disputes which might arise in connexion with the application of the Saar Statute. Both Ministers reviewed the measures which will be taken to give effect to the economic provisions of the agreement. Finally, they decided to approach jointly the U.S. and British Governments with the request that they should guarantee the Statute in conformity with Article 8 of the agreement.

The Saar Commissioner will be called upon to assume the functions of Minister of Foreign Affairs and of National Defence. He will also be entrusted with the application of Article 6 of the Saar Statute (see 13845 A). He will make his decisions in the spirit of the Human Rights Convention signed by the member-countries of the Council of Europe.

Economic and Cultural Questions. The Ministers studied in a positive spirit all the problems concerning navigable waterways in the frontier areas.

The Chancellor drew the attention of the Prime Minister to the cases of certain Germans sentenced and detained in France.

As regards bilateral economic relations, the Ministers found that commercial exchanges have continued to develop in a satisfactory manner and that future prospects are favourable. They put the final touches to the trade agreement for the current half-year, which they signed; it provides for a substantial increase in French agricultural exports to the Federal Republic, notably a doubling of wheat supplies.

The Chancellor and the Prime Minister approved the principles which will govern the long-term trade agreement envisaged in the La Celle-Saint-Cloud talks, and it was decided that this agreement should be valid for three years and should be renewable by tacit extension.

The formation of a joint Franco-German Chamber of Commerce, envisaged since last October, has since reached the stage of realization.

Finally, the Ministers discussed the implementation of the cultural agreement concluded on Oct. 23, 1954, and on the means of widening its application.

The satisfactory course of their discussions has reinforced the conviction of the Prime Minister and the Federal Chancellor that France and Germany will make a still more efficacious contribution to the well-being of their two peoples, to the unification of Europe, and to the peace of the world, by collaborating ever more closely in all spheres with the community of free nations."

After a short joint Press conference with the Federal Chancellor, M. Mendès-France took leave of Dr. Adenauer and returned to Paris. Press comment, both in France and Germany, stressed the personal warmth and friendliness which had characterized the discussions and which had found expression in the closing paragraph of the joint communiqué.

The conference on a European Armaments Agency opened in Paris on Jan. 17, the delegations from the seven member-countries of the W.E.U. being headed by their permanent delegates to the North Atlantic Council (except the German delegation, which was led by Professor Erhard). The chief British delegate was Sir Christopher Steel, and the French delegate M. Alexandre Parodi. American observers were also present.—(Le Monde, Paris - Le Figaro, Paris - Times - Daily Telegraph - Manchester Guardian - Corriere della Sera, Milan - Frankfurter Allgemeine Zeitung) **(Prev. rep. Paris Agreements, 13869 A; Saar Statute, 13845 A.)**

A. AUSTRALIA. — Weapons Research Establishment.

The Australian Minister for Supply (Mr. Beale) announced on Jan. 14 that the Woomera rocket range and its associated long-range weapons establishment, high-speed aerodynamics laboratory, and chemical and physical research laboratories would be amalgamated into a single new organization under the name of the Weapons Research Establishment.
(Australian News Bureau) **(Prev. rep. 13222 A; 13111 A.)**

B. GREECE. — Ratification of Balkan Pact and Paris Agreements on German Entry into NATO.

The Greek Parliament, meeting on Jan. 18, unanimously ratified the Balkan military alliance signed by Greece, Turkey and Yugoslavia in August 1954. The Paris agreements for the admission of the German Federal Republic to NATO were ratified at the same time.—(Times) **(13869 A; 13725 A.)**

A. SOVIET UNION. — Warnings to Western Powers against Ratification of Paris Agreements. - Threat to annul Anglo-Soviet and Franco-Soviet Treaties.

The Soviet Government sent Notes to Britain, France and the United States on Dec. 9 warning them against the consequences of ratifying the Paris agreements, and protesting in particular against the rearming of Western Germany. In addition, Notes were sent to France on Dec. 16 and to Britain on Dec. 20 declaring that the ratification of the Paris agreements would lead the Soviet Government to denounce the Anglo-Soviet and Franco-Soviet treaties of mutual assistance concluded during the war. Notes were also sent on Dec. 17 to those countries (other than Britain, France and the U.S.A.) which had not responded to the Soviet invitation to take part in a general European security conference in Moscow.

Notes to Britain, France and U.S.A. The Notes of Dec 9 declared that the " restoration of German militarism " envisaged under the Paris agreements, and the inclusion of Western Germany in " the aggressive North Atlantic bloc," would compel the Soviet Union " and other peace-loving countries " to take without delay " every necessary step to oppose the growing armed forces of the aggressive States." After declaring that the ' paper guarantees " in the Paris agreements " do not enjoy the confidence of the European peoples for obvious reasons." the Soviet Notes stated that the ratification of those agreements would " lead to the intensification of the armaments race," " create new obstacles to reaching agreement on the control of armaments." "lead to a considerable intensification of the danger of a new war in Europe," and " make four-Power talks on the unification of Germany void of substance." The Notes drew attention to the declaration adopted at the Moscow Conference on Dec. 2 (see 13936 A) and to China's support of that declaration

Note to France. The Note of Dec 16 declared that the Paris agreements " fundamentally contradicted " the obligations assumed by France under the Franco-Soviet treaty of alliance and mutual assistance concluded on Dec. 1, 1944 After recalling that both France and the U S S.R had agreed under that treaty to adopt " all necessary measures . . to eliminate any new threat from Germany and to bar the way to any kind of initiative directed at the possibility of a new German attempt at aggression," the Note continued " These [the Paris] agreements envisage the remilitarization of Western Germany and the formation of a West German army headed by the former Hitlerite generals who not long ago were pursuing a Fascist regime of bloody terror and oppression in the occupied territories of France, the Soviet Union, Poland, Czechoslovakia, Yugoslavia. Norway, Belgium, and other European countries. Not only is a large German Army being created with air forces, tanks, and heavy artillery, but the entire heavy industry of the Ruhr is again being re-geared for the production of armaments. In violation of existing international agreements, the [Paris] agreements place atomic, chemical and bacteriological weapons in the hands of the West German militarists . . with incalculable consequences."

After accusing the French Government of having entered into " aggressive military alignments with the United States," the Soviet Note declared that the ratification of the Paris agreements would cancel and annul the Franco-Soviet treaty of 1944, and that full responsibility would rest with the French Government

Note to Britain. The Note to Britain, which was in almost identical terms to the Note to France, gave a similar warning that the implementation of the Paris agreements would involve the annulment of the Anglo-Soviet treaty of alliance and mutual assistance of May 26, 1942, and said that " entire responsibility for the consequences will rest with Britain and the British Government." *Inter alia*, the Note accused the British Government of " exerting strong pressure " on other European countries with the aim of speeding-up the ratification of the Paris agreements.

Notes to Other Countries. Notes were sent on Dec 17 to Belgium, the Netherlands, Denmark, Norway, Italy, Finland, Luxemburg, Sweden, Yugoslavia, Iceland, Switzerland, Greece and Turkey expressing regret that these countries had not responded to the Soviet Government's invitation to participate in a general European conference on collective security, and recapitulating the Soviet Government's objections to the Paris agreements, particularly to the rearming of Western Germany. In its Note to Finland, however, the Soviet Government said that the " positive attitude " shown by that country on questions relating to collective security led it to hope that Finland would make " a contribution to the cause of establishing a collective security system in Europe "

The following statement was issued by the British Foreign Office on Dec. 21 :

" H.M Government would much regret it if the Anglo-Soviet Treaty of 1942, to which they have always attached importance, were to be cancelled or annulled by the Soviet Government. At the same time they deplore both the manner and the context in which that Government now threatens such annulment They cannot accept the argument used in the Soviet Note There is no justification for the Soviet contention that the Paris agreements are incompatible with the treaty. H.M. Government will continue to pursue their chosen policy of consolidating Western European unity."

No official statement was issued in Paris or Washington on the Soviet Notes.—(Soviet Weekly - Times - Le Monde, Paris - New York Times) **(Prev. rep. Moscow Declaration, 13936 A ; Paris Agreements, French Ratification, 13965 A.)**

B. MIGRATION AND REFUGEE PROBLEMS. — Plans for Migration from Europe in 1955.

The eighth session of the Provisional Inter-governmental Committee for European Migration (ICEM) met in Geneva on Nov. 30. As a result of the entry into force of the agreement setting up the ICEM as a permanent body (ratification by Argentina and Norway having brought the ratifying governments up to the required number of 16), the meeting automatically became the first session of the Council of the ICEM.

The Council, representing 24 nations, adopted on Dec. 4 a programme for the migration of 143,320 Europeans to overseas countries during 1955, at a total cost of $46,500,000. The programme called for the emigration of 58,300 persons from Italy, 31,100 from Germany, 15,820 from Greece, 15,500 from the Netherlands, 12,550 from Austria, and 10,050 from other areas, including refugees in Trieste and the Near and Far East. The principal recipient country would be the U.S.A. (46,500), followed by Australia (31,200), Argentina (22,270), Brazil (18,500), Venezuela (8,150), Canada (8,100), Chile (2,700), Uruguay (2,300) and Israel (1,650), whilst 1,950 migrants would be settled in other countries.

Speaking at the opening session on Nov. 30, the Director of the ICEM (Mr. Hugh Gibson) said that 40 per cent of all migration from Europe was now under international auspices ; that he was confident that overpopulation problems in Europe could be solved within ten years at the present rate of migration ; and that over 250,000 Europeans had been resettled overseas —mostly in the U.S.A., Argentina, Canada, and Australia— since the establishment of the ICEM in 1952. He added that 42 per cent of all those assisted had been refugees, and that the committee was ' well on the way to a solution of the refugee problem in Trieste." In addition, the Council heard a report from M. Pierre Schneiter, special representative of the Council of Europe for Refugee and Over-population Questions, and now President of the French National Assembly (see 13985 B).

Mr. Gibson (71) died suddenly on Dec. 12. He had been appointed to the post of Director of the Provisional Intergovernmental Committee for the Movement of Migrants from Europe in June, 1952.—(Council of Europe, Strasbourg - Times - Neue Zurcher Zeitung) **(Prev. rep. 13898 A ; I.C.E.M., 12074 A ; Mr. Gibson, 12275 A.)**

C. RUMANIA. — Abolition of Food and Clothes Rationing. - Price and Wage Increases.

It was announced in Bucharest on Dec. 26 that the Central Committee of the Rumanian Workers' (Communist) Party and the Rumanian Government had decided that the rationing of food and clothing should end with immediate effect. The decision was stated to have been taken because of the great increases in the production of agricultural produce and consumer goods during 1954.

At the same time it was announced (*a*) that prices of goods formerly rationed would be fixed at the level of the higher off-ration prices quoted in State and co-operative stores prior to derationing, and (*b*) that the new prices, whilst being higher than those previously fixed for rationed goods, would still be lower than the prices prevailing in the free peasants' markets. Moreover, price reductions varying between 10 and 42 per cent would be made for maize flour (the staple diet of the poorer sections of the people), ready-made clothes, footwear, metal and electrical goods, agricultural machinery, etc., although price increases would take place for meat, eggs, milk, and beans.

To compensate workers for the difference between the new fixed State prices and the old ones, it was announced that they would receive monthly cash allowances paid directly by the Government as a wage settlement, these allowances varying according to the type of ration-card held. A scale was published showing that the supplementary allowances would amount to about 10 per cent of wages.

The statement said that the 1954 cereal and grain harvest had amounted to over 9,000,000 tons and had exceeded that of 1953 , that cattle-breeding had been improved , that investments in the consumer goods industry in 1954 had been 27 per cent above those in 1953 ; that new goods had been put into mass production in the food, electrical, metal and chemical industries , and that " marked increases " in the supply of farm and other foodstuffs on the open markets by individual smallholders had led to a fall of prices on these markets and to a general improvement in the supply position.

Rationing had been in force chiefly for bread, flour, meat, clothing, linen, and footwear.—(Agerpres, Bucharest) **(13511 A.)**

D. YUGOSLAVIA. — Establishment of Diplomatic Relations with Chinese People's Republic.

It was announced in Belgrade on Jan. 10 that Yugoslavia and the Chinese People's Republic had decided to establish diplomatic relations at Embassy level. (Tanjug, Belgrade)

A. UNITED KINGDOM.—Steel Production in 1954. - Price Changes. - Denationalization of Dorman Long and Co., Ltd. and Colvilles Ltd. - Other Resale Transactions. - Import Duties suspended on Iron and Steel Products.

Figures published by the Iron and Steel Board on Jan. 11 showed that U.K. steel production in 1954 reached the record figure of 18,520,000 tons (compared with 17,609,000 tons in 1953), thus exceeding the year's objective of 18,500,000 tons. Production of pig-iron, at 11,883,000 tons, was also a record, comparing with 11,175,000 tons in 1953. The Board estimated that the industry would be capable of raising steel production to 19,500,000 tons in 1955.

Detailed monthly figures for the fourth quarter of 1954 are given below, with 1953 figures for comparison

	1954		1953	
	Weekly Average Tons	Annual Rate Tons	Weekly Average Tons	Annual Rate Tons
	Steel Ingots and Castings.			
October	375,000	19,472,000	355,000	18,460,000
November	377,000	19,606,000	363,000	18,878,000
December	355,000	18,442,000	339,000	17,624,000
Year		18,520,000		17,609,000
	Pig-Iron			
October	231,000	11,998,000	222,000	11,519,000
November	235,000	12,236,000	229,000	11,883,000
December	234,000	12,149,000	225,000	11,723,000
Year		11,883,000		11,175,000

Recent developments in the industry are summarized below:

New Steel Plants. The Steel Company of Wales announced on Oct. 29 that it had received permission from the Iron and Steel Board to proceed with an expansion scheme designed to increase the output of cold-reduced sheets at its Abbey Works (Port Talbot) mill by about 2,700 tons a week. The scheme will cost about £1,500,000.

The December issue of the British Iron and Steel Federation's Monthly Bulletin stated that Messrs. Steel, Peech & Tozer (a subsidiary of the United Steel Companies) planned to build a new medium-strip mill at their Rotherham (Yorks.) works at an estimated cost of about £3,000,000. The plant, expected to take nearly three years to complete, will be able to roll up to 6,000 tons of steel weekly.

Price Changes. The Iron and Steel Board announced on Dec. 3 price increases, averaging about one per cent, for a number of iron and steel products, including pig-iron, forging ingots, alloy and stainless steel, rails and fishplates, rolled steel products, and steel strip. Prices of high-grade steel scrap were also raised sharply.

Public Offers of Steel Shares. The Iron and Steel Holding and Realization Agency announced on Nov. 9 the offer for sale (on Nov. 18-19) of 15,000,000 £1 Ordinary shares in Dorman, Long & Co., Ltd. at 22s. 6d. each, with special consideration for applications from former shareholders. On Nov. 23 it was announced that about 52,400 applications had been received for a total of about 75,000,000 shares, including about 6,600 applications from former shareholders; these latter had been granted in full up to 400 shares, and to the extent of about 18 per cent above that amount, whilst other applications had been accepted in full up to 200 shares and to the extent of about 10 per cent above.

On Jan. 20 a further (the sixth) offer for sale by public subscription was made by the Agency—viz., 10,000,000 £1 Ordinary shares in Colvilles Ltd. at 26s. each, again with special consideration for applications from former shareholders. The Company had announced on Jan. 16 that loans would be available to employees over 21 years of age who wished to apply for blocks of 50, 100, 150, or 200 shares, repayment being made at the rate of 3d. a share for 104 weeks. On Jan. 21 it was announced (*a*) that about 150,000 applications had been received for 130,000,000 shares, including 5,000 from former stockholders and 1,200 from employees, (*b*) that these classes had been granted in full up to 200 shares, (*c*) that applications from the general public for from 50-100 shares had received 50 shares, and larger applications 100 shares, and (*d*) that the remaining shares would be allocated amongst former shareholders applying for more than 200 shares.

Resale and Grouping Transactions. It was announced early in December that the Iron and Steel Holding and Realization Agency had resold to Thomas W. Ward Ltd., Sheffield, the whole capital of the Wolverhampton Steel and Iron Co. (1946) Ltd., and its subsidiary, Birchley Rolling Mills Ltd. The price paid by Messrs. Ward was £782,500, the exact figure at which the two companies (then separate subsidiaries of Messrs. Ward) had been nationalized in 1951.

The Agency announced on Dec. 14 that it had resold its holding of the entire share capital of the Lilleshall Iron and Steel Co. Ltd. to the Lilleshall Co., Ltd., for £95,000. The compensation paid when the company was nationalized was £129,382.

It was announced on Jan. 5 that the Agency had transferred to its wholly-owned subsidiary, the Staveley Iron and Chemical Co. Ltd., its direct interest in the Sheepbridge Co. Ltd., which would thus become a wholly-owned subsidiary of Staveley Iron and Chemical Co.

The Board of Trade announced on Jan. 7 (*a*) that import duties on a wide range of iron and steel products considered by the Iron and Steel Board as likely to be in short supply in 1955 would be suspended until Sept. 18, 1955, and (*b*) that the suspension of import duties on cold rolled steel (announced in August 1954) would be extended until March 31, 1955.
(Times - Financial Times) **(Prev. rep. 13862 D; 13732 A.)**

B. SOUTH AFRICA. — Formation of National Conservative Party. - Mr. Bekker elected Party Leader.

A new South African political party—the National Conservative Party—was formed on Nov. 29 at a congress in Bloemfontein which had been convened by supporters of Mr. Bailey Bekker, M.P., and other members of the Independent United Party (see 13431 D). In addition to Mr. Bekker, who was elected party leader, the new party includes the other six M.P.s who left the United Party with Mr. Bekker in 1953 and subsequently formed an Independent U.P. group in the House of Assembly.

The intention of the Independent U.P. group to convert itself into a new national political party had been announced on Aug. 26, 1954, by Mr. Bekker, who gave a press conference on that date with Dr. A. H. Jonker, M.P., and Mr. B. Coetzee, M.P., two other members of the group. Mr. Bekker maintained that the National Party was, for all practical purposes, exclusively an Afrikaans party; that the United Party was becoming an exclusively English-speaking party; and that it was essential to set up a new party "as a political home for reasonable people of both sides." After declaring that the new party (the name of which had not then been chosen) desired "national unity between English- and Afrikaans-speaking South Africans as a first approach to our problems," Mr. Bekker outlined its policy as follows:

(1) Native Policy.—"We stand for traditional South African *apartheid*—the separate development of European and Bantu. We may differ on the method and application of this principle. For instance, we oppose completely territorial *apartheid* as being impractical and unwise. Other *apartheid* measures must be weighed on their merits and . . . on the well-being of the Natives. While we accept that the Bantu will always be with us in considerable numbers, the provision of a national home for him, with possibilities of full development, is the crux of positive *apartheid* . . . As to the Bantu workers, separate but adequate housing is the first priority, together with their general economic and spiritual upliftment."

(2) Commonwealth Relations.—"Within our borders we stand for South Africa first, and beyond our borders for the Commonwealth . . . Our association with the Commonwealth is of vital importance for South Africa. We are not republicans. We believe that a republic is not of vital importance, as there are far more pressing problems around us. But if the Prime Minister can persuade the people to ask for a republic by the broad will of the majority, we shall honour and respect their wishes."

(3) The Constitution.—"We shall countenance no change in the Constitution except in the manner prescribed in the Constitution. We demand that the status and prestige of our courts remain inviolate. We shall fight Communism and assist the Government in fighting it. While the democratic framework must be upheld, we are convinced that you cannot fight Communism by ordinary processes of law."

The party's economic policy was outlined on Nov. 30 by Dr. Vernon Shearer, and included the following points: protective tariffs to aid the expansion of industry; Government organization of research for the benefit of industry; the building of factories as near as possible to sources of raw materials and power; encouragement to small investors; and the sharing of the benefits of industrialization among the greatest number of people, including the non-European population.—(Cape Times - Cape Argus) **(Prev. rep. 13431 D.)**

C. BELGIUM. — Cabinet Change.

M. Adolphe Van Glabbeke, the Minister of Public Works, resigned on Jan. 13 after having been criticized by the Opposition for allegedly favouring his brother-in-law in the placing of a contract for the building of a school in Ostend. He was succeeded as Minister of Works on Jan. 15 by Senator Vanaudenhove (Liberal), a leading member of the Belgian Resistance movement during the war, in which he was deported to Germany and imprisoned in various concentration camps.
(La Nation Belge, Brussels) **(Prev. rep. 13574 A.)**

D. CHINA - SOVIET UNION. — Soviet Shares in Joint Companies transferred to China.

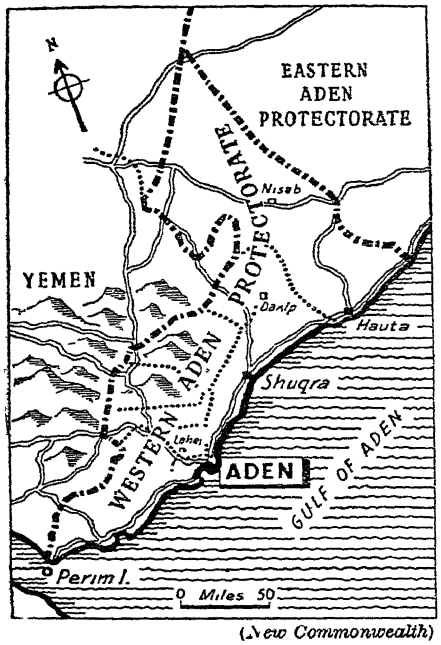
The Soviet shares in the former joint Sino-Soviet undertakings were transferred by the U.S.S.R. to the Chinese People's Government on Jan. 1, in implementation of the Sino-Soviet agreement of Oct. 11, 1954. The undertakings concerned were four non-ferrous mines and the petroleum industry in Sinkiang, shipbuilding yards at Dalny (Manchuria), and civil airlines flying services between Peking and Alma Ata, Irkutsk and Chita—(Le Monde, Paris) **(13855 A.)**

E. PAKISTAN. — Cabinet Portfolios.

It was announced in Karachi on Jan. 20 that Mr. Abu Hossain Sarkar, who recently joined the Pakistani Cabinet, had been assigned the Health portfolio, whilst Sardar Mumtaz Ali Khan, recently appointed Minister of Information and Broadcasting, had taken over in addition the portfolio of Kashmir Affairs.—(Pakistan High Commissioner's Office, London) **(Prev. rep. Cabinet, 13982 D.)**

A. ADEN PROTECTORATE - YEMEN. — Federation Proposals for Western Aden Protectorate. - Acceptance in Principle by Arab Rulers. - Opposition by Yemeni Government. - Frontier Incidents on Aden-Yemen Border. - Arab League Support for Yemen. - Egyptian Military Mission to train Yemeni Army.

At a conference held at Aden on Jan. 7, 1954, the Arab sultans and sheikhs of nine territories in the Western Aden Protectorate agreed in principle to form a federation of their States within the Protectorate. Proposals submitted to the conference by the Governor, Sir Tom Hickinbotham, envisaged the formation of two separate federations, one in the Western and one in the Eastern Protectorate, under a High Commissioner exercising the powers at present wielded by the Governor.



(New Commonwealth)

It was proposed that each federation should have a Council of Rulers, acting as an Upper Chamber, a Legislative Council consisting of officials and members nominated by the rulers, and an Executive Council composed of two officials, two rulers, and two members of the Legislative Council. Education, public health, communications, and posts and telegraphs would become federal subjects, and would be financed by transferring to the federation all Customs revenue and the grants made for these subjects by the U.K. Government. All other subjects would continue to be dealt with by the State rulers or by the Governor. The nine States concerned were those having both advisory and protectorate treaties with Britain. It was laid down that other territories within the Aden Protectorate should remain the responsibility of the British agent for the Protectorate, who would also be chief adviser to the proposed federation.

The acceptance of these proposals led to a serious deterioration in the relations between Britain and the Yemen, which claims the Western Aden Protectorate as part of its own territory. Under the Treaty of Sana'a, signed in 1934, the British and Yemeni Governments agreed to "maintain the situation existing in regard to the frontier on the date of the signature of this treaty" until 1974, and to "prevent by all means at their disposal any violation by their forces of the above-mentioned frontier, and any interference by their subjects, or from their side of the frontier, with the affairs of the people inhabiting the other side." In 1951 the two Governments agreed to set up a joint frontier demarcation commission and to "refrain from taking any action which may alter the *status quo* existing in the disputed areas." The frontier commission, however, was never brought into operation because the Yemen refused to participate unless Britain agreed to discuss the future of the whole Protectorate, and in particular the suspension of the federation proposals, which it regarded as a breach of the *status quo* agreement. The British Government, on the other hand, interpreted both the 1934 and 1951 agreements as referring only to a narrow strip of territory between the Yemen and the Protectorate, and considered the federation plan to be a purely internal affair concerning only the sultans and the Aden Government.

Throughout 1954 frequent incidents occurred on the frontier of the Western Aden Protectorate, leading to an exchange of protests between the British and Yemeni Governments.

The Yemeni Legation in London alleged on June 10 that tribal levies and "Aden levies of the so-called Protectorate" had raided Yemeni territory on May 20 and June 5. The British Foreign Office, however, described the first charge as without foundation, and maintained that the raid on June 5 had been made from the Yemeni side of the frontier. A British protest of June 24 against a Yemeni raid on June 18 was rejected by the Yemen, which alleged that the raid had been made by tribesmen from the Protectorate with the support of British military aircraft.

A subsequent British Note, presented in July, stated that between May 1 and May 24 some 28 raids into the Protectorate had taken place from the Yemeni side of the border, that the towns of Mukeiras and Martaa had been attacked on June 10 and June 18 respectively; and that some 80 regular troops and 400 tribal levies had taken part on the latter occasion. The Yemeni Government was also accused of fomenting rebellion in the Protectorate by giving encouragement, money, and arms to lawless elements. It was emphasized that whereas the British Government had done its best to observe the 1934 and 1951 agreements, the Yemeni Government's actions "give colour to the belief that they lay claim to the whole of the Aden Protectorate and have no intention of settling the problem of the frontier." Britain firmly rejected any such claim, and called on the Yemen to stop its attacks and the fomenting of unrest inside the Protectorate. The Yemeni Government (the Note pointed out) had recently agreed that the frontier authorities should consult together with a view to restoring tranquillity, and the Governor of Aden had been invited to make appropriate arrangements. If the attacks continued, however, H.M. Government reserved the right "to take such steps, including direct action in the frontier areas as may be necessary to protect the territory and inhabitants of the Aden Protectorate."

The Yemeni Government, in a Note of July 10, protested against alleged low-altitude flights by R.A.F. aircraft over the Yemeni town of Beida, which it described as "open acts of provocation," and expressed the hope that the British Government would "take the necessary steps to prevent that aggression, so as to maintain the atmosphere which the two Governments are working to achieve." The British reply denied that any R.A.F. planes had flown over Beida, and stated that although civil aircraft might have passed near it while circling to land at Mukeiras, they had done this for years past and had never practised low-flying in the area.

At the invitation of the Imam of Yemen, Sir Tom Hickinbotham visited Sana'a (the Yemeni capital) on Oct. 2 to discuss means of restoring tranquillity. [The occasion was the first on which the Imam had received a colonial governor since the establishment of diplomatic relations between Britain and the Yemen.] Although negotiations on the subject were subsequently opened at Taiz (Yemen), further border incidents continued to occur on various occasions during the months of October and November.

The Council of the Arab League adopted a resolution on April 4, 1954, appealing to rulers of territories in the Western Aden Protectorate to refuse to commit themselves to any plan which was "contradictory to the national spirit" and which might separate them from their Arab colleagues, especially in the Yemen, and offering to co-operate with the Yemen in assisting the rulers of these territories to strengthen their positions and preserve Arab integrity. Major Salem, the Egyptian Minister of National Guidance, visited the Yemen at the beginning of July at the Government's invitation. It was stated in the Egyptian Press on July 10 that an agreement had been concluded whereby an Egyptian military mission would "train the Yemeni Army in modern warfare by the introduction of artillery, planes, and tanks."—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 11329 A.)**

B. LIBYA. — Assassination of Minister for Palace Affairs. - Crisis in Libyan Royal Family.

Said Ibrahim Shalhi (60), the Minister for Palace Affairs and a close personal friend of King Idriss, was shot dead in Benghazi on Oct. 5 by Sharif Muhieddin el-Senussi (19), a nephew of the Queen of Libya and, on his father's side, also a nephew of the King. The assassin gave himself up to the police, was subsequently tried by a criminal court, and was sentenced to death on Dec. 11, an appeal being lodged against the sentence. The assassination of Said Ibrahim Shalhi was believed to have been prompted by personal motives.

Seven members of the Libyan Royal family were ordered on Oct. 18 to be deported to the Hun Oasis, 150 miles from Benghazi, no reasons for the deportations being given. On Oct. 22 a Royal decree was issued declaring that the Royal family was confined to King Idriss, the Queen, the King's children, and the Crown Prince Muhammad el-Senussi, brother of King Idriss. The decree stated that "the remaining members of the Senussi family are not considered members of the Royal house, and all their privileges, titles and immunities are cancelled." In addition, the decree reaffirmed the validity of a Royal order, issued in December 1953, whereby the King's brother had been designated Crown Prince until a male child was born to King Idriss.

The members of the Royal family deported to the Hun Oasis were two brothers of Sharif Muhieddin el-Senussi, one of whom was First Secretary to the Libyan Embassy in London; two sons of the claimant to the throne; two sons of the Libyan Ambassador in Cairo; and the son of the Crown Prince.
(Times - Le Monde, Paris)

JANUARY 22—29, 1955

A. JAPAN. — Resignation of Mr. Yoshida. - New Government formed by Mr. Hatoyama. - Split in Liberal Party. - Formation of Democratic Party. - Merger of Socialist Parties. - Mr. Yoshida's World Tour. - Agreement on U.S. Economic Aid to Japan.

The Japanese Prime Minister, Mr. Yoshida, who had returned on Nov. 17, 1954, from a 53-day tour of North America and Western Europe, resigned on Dec. 7 and was succeeded as Premier on Dec. 9 by Mr. Ichiro Hatoyama, leader of the newly-formed Japan Democratic Party. The fall of Mr. Yoshida's Government followed a prolonged political crisis lasting nearly a year, during which its position had been weakened by charges of corruption brought against certain of its members and by a split in the Liberal Party, a large section of which merged with the Progressives and Japan Liberals on Nov. 24 to form the Democratic Party. Details of the main stages of the crisis, and of Mr. Yoshida's foreign tour, are given below under cross-headings.

The Shipbuilding Corruption Scandal.

During the early months of 1954 a major political scandal was caused by allegations that members of the Cabinet (including Mr. Ishii, the Minister of Transport, and Mr. Ono, Minister of State) and senior Liberal Party officials had accepted bribes from shipbuilding companies seeking Government subsidies. The Minister of Justice, Mr. Inukai, resigned on April 21 after he had refused the Public Prosecutor permission to arrest the secretary-general of the Liberal Party, Mr Sato, and a former Finance Minister in Mr. Yoshida's Government, Mr. Ikeda, on charges of corruption. Mr. Inukai, who was reported to have rejected the Public Prosecutor's request on Mr. Yoshida's orders, stated that he had done so because the action proposed by the Public Prosecutor would have probably forced the Cabinet to resign at a time when vital legislation was pending, including Bills affecting rearmament. A motion of no-confidence, sponsored by the Right- and Left-wing Socialists and supported by the Progressives, was defeated in the House of Representatives on April 24 by 228 votes to 208.

Mr. Kato (Minister of State) was appointed Minister of Justice on April 22. He resigned on June 19, however, and was succeeded by Mr. Ohara, who had served as Minister of Justice and Home Minister in a number of pre-war Governments. The appointment of Mr. Ohara (an Independent) was regarded as a conciliatory gesture on the part of the Government, which had been strongly criticized by the Press for its attempts to prevent the prosecution of its supporters.

The Speaker of the House of Representatives, Mr. Tsutsumi, summoned Mr. Yoshida on Sept. 14 to appear before the House Audit Committee, which was investigating the shipbuilding scandal; the Prime Minister, however, refused to do so, pleading pressure of business. After he had refused to comply with a second summons, the Committee voted on Sept. 18 that charges of contempt of the Diet be brought against him (a charge involving liability to a year's imprisonment, a fine, or both) and that he should cancel his projected foreign tour. Both Mr. Yoshida's tour and his refusal to appear before the Committee aroused strong protests from the Opposition parties. The Diet's Foreign Affairs Committee advised Mr. Yoshida on Sept. 17 not to leave the country, whilst the Opposition parties, in a joint statement issued on the same day, declared that if he "dares to go abroad, thus ignoring the Diet and the people, the Opposition will not be responsible for whatever may be the outcome."

Mr. Yoshida's Foreign Tour.

Despite these protests, Mr. Yoshida left Tokio by air on Sept. 26 for Canada, and on the following day arrived in Ottawa, where he met the Canadian Prime Minister, Mr. St. Laurent. On Sept. 29 he sailed from New York for France. After eight days in Paris, where he had discussions with M. Mendès-France and members of his Government, he visited Bonn. A joint statement issued on Oct. 15 by Mr. Yoshida and Dr. Adenauer, the German Federal Chancellor, declared that they wished to "renew and deepen the relations of traditional friendship that bind the German and Japanese peoples," and expressed the hope that negotiations then in progress would lead to an expansion of trade between the two countries. [The trade negotiations referred to by Mr. Yoshida and Dr. Adenauer were concluded in Tokio on Oct. 22, when an agreement was signed for the exchange of goods and services to the value of $52,000,000 between the two countries during the next 12 months.]

On Oct. 15 Mr. Yoshida flew to Rome, where in the course of a six-day visit he saw Signor Scelba and other members of the Italian Government. Arriving in London on Oct. 21, he was received in audience by H.M the Queen on Oct. 26; had discussions on Oct. 27 with Sir Anthony Eden (the Foreign Secretary), Mr. Butler (Chancellor of the Exchequer), Mr. Thorneycroft (President of the Board of Trade), and Mr. Boyd-Carpenter (Minister of Transport), met Sir Winston Churchill, and left for New York on Oct. 28.

At a Press conference in London on Oct 26, Mr. Yoshida said that his visit had no particular aim and that he would not raise the question of Japan's admission to the General Agreement on Tariffs and Trade (GATT) Discussing trading problems, he said that there was no question of a revival of such practices as dumping, as Japan's competitive power had been reduced by the dissolution of the great trading and manufacturing trusts under the anti-cartel laws, and by the far-reaching labour legislation introduced since the war—which, he said was not "consonant with Japan's economic situation." If direct talks between British and Japanese commercial interests on the piracy of British designs by Japanese manufacturers did not result in a satisfactory arrangement, he was ready to take the matter up and to forbid such practices Mr Yoshida denied that his Government intended to recognize the Chinese Communist Government

Mr. Yoshida arrived on Nov. 7 in Washington, where he met Mr. Dulles (the Secretary of State), Mr. Stassen (Director of the Foreign Operations Administration), Mr. Wilson (Defence Secretary), and Admiral Radford (chairman of the Joint Chiefs of Staff). He had a meeting on Nov. 9 with President Eisenhower, the following joint statement being issued afterwards:

"The President and the Prime Minister . . . declared that their Governments would, in co-operation with the free nations of Asia, continue their united efforts to maintain and promote the peace and prosperity of Asia. The Prime Minister reaffirmed his Government's determination to make a full contribution to those efforts, and in particular stressed Japan's desire to co-operate wherever possible in the development of economic strength by the free nations of Asia. The President and the Prime Minister declared that the goals of their Governments are peaceful and that their peoples desire peace and liberty for themselves and their neighbours.

Representatives of both Governments discussed Japan's economic situation in detail. It was agreed that the economic well-being of the Japanese people is a matter of importance to the entire free world. The achievement of improved economic conditions in Japan depends partly upon the ability of the Japanese people themselves to pursue sound and constructive internal monetary and other policies, and partly upon Japan's ability to expand her trade with other countries. By various means since the end of the war the U.S A has been able to contribute substantially to the economic progress which Japan has achieved The U.S A is aware of the efforts which Japan is making to solve her difficult economic problems, and will continue to examine sympathetically means whereby it can assist the Japanese people to advance their well-being.

General agreement was reached that the U.S A. would co-operate with Japan in her efforts to expand her foreign trade and achieve a better balance in her foreign economic relations It was further agreed that the U S A. would sell to Japan agricultural commodities, and that a substantial portion of the proceeds of these sales will be used for Japan's domestic economic improvement and defence support, and for regional economic development. Other steps were discussed, such as the establishment of a productivity programme in Japan and the mutual benefits which might arise from Japan's participation with the other free nations of South and South-East Asia in the economic development of that area. Both sides agreed that these measures would be of marked benefit to Japan, by improving her economic position and facilitating her efforts to attain a higher standard of living.

U.S. representatives expressed regret over the incident on March 1 in which 23 Japanese fishermen were injured—one fatally—by the fall-out of radioactive materials following a nuclear test in the Pacific. They emphasized their belief that peaceful uses of atomic energy would be steadily developed, and would eventually become of great value to Japan and other friendly nations throughout the world.

There was also discussion of the disposition of Japanese assets vested by the United States, and U.S representatives stated that this matter is under consideration. Among other subjects reviewed were Communist efforts to weaken and discredit the operations of free government in Asia, the request of Japan for expedited consideration of the cases of war criminals, and the status of the Ryukyu and Bonin Islands in the light of the present international situation, as well as the desire of Japan for the return to the Bonin Islands of former inhabitants."

U.S. Government officials explained that under the economic agreement referred to, the United States would supply Japan with surplus cotton, wheat, barley, rice, tobacco, and dried milk to the value of $100,000,000; about $10,000,000 worth of this would be in the form of a gift, and the remainder would be paid for in yen, of which 70 per cent would be used as a loan and the balance earmarked for U.S. purchases in Japan.

After his meeting with President Eisenhower, Mr. Yoshida had discussions on Nov. 10 with Mr. Humphrey (Secretary of the Treasury) and Mr. Eugene Black (President of the International Bank for Reconstruction and Development). He returned to Tokio on Nov. 17.

Speaking at a National Press Club luncheon in Washington on Nov 8, Mr Yoshida said that the attempts of the new, underdeveloped nations of Asia to establish stable democratic conditions and to raise living standards were hampered by "the gravitational pull of Communist China," the strong appeal of Communism for the poverty-stricken, and lack of capital He suggested a drastic increase in the supply of capital, through Government or international banking institutions, in such fields as education, transport, irrigation, power production, industrialization, sanitation, and health, in order to supply a foundation on which private investment could be safely undertaken This should be undertaken through an organization similar to the O E.E.C., in which all the countries involved were represented Japan, as the most industrially advanced Asian nation, would do everything in her power to make such a plan succeed In reply to questions, he said that his Government did not intend to establish relations with the U S.S.R or Communist China until they recognized the San Francisco peace treaty, that Japanese trade with the Communist countries would remain at a low level until normal diplomatic relations were restored; and that Japanese rearmament was proceeding within the limitations imposed by popular feeling against it, the provisions of the Constitution, and financial difficulties.

Formation of Democratic Party. - Resignation of Mr. Yoshida.

During Mr. Yoshida's absence from Japan, a major split within the Liberal Party was precipitated by the expulsion on Nov. 8 of Mr. Ishibashi (a former Finance Minister) and Mr. Kishi (a former Minister of Commerce), who had been engaged in negotiations with the Progressives (the principal Opposition party) for the formation of a new conservative party under a leader other than Mr. Yoshida. Thirty-three members of the House of Representatives, including Mr. Ando (Minister of State), and two members of the House of Councillors resigned from the Liberal Party on Nov 22, and on Nov. 24 joined the members of the former Progressive and Japan Liberal parties—both of which had been dissolved on the previous day—to form the Japan Democratic Party, with Mr Hatoyama (the leader of the dissident Liberals) as president and Mr. Shigemitsu (the former Progressive leader) as vice-president.

A policy statement issued by the new party declared that Japan was facing a crisis because political morality had fallen and industry and living standards were declining. It defined the aims of the new party as the enforcement of political discipline, the "eradication of the class struggle," the establishment of a "self-defence organization," and the promotion of "people's diplomacy" On Nov. 24 Mr. Hatoyama denounced Mr. Yoshida's "secret diplomacy" and the "hushing-up" of the shipbuilding scandal, and stated that the new party's first objective was the overthrow of the Government and a "clean-up of the political world."

As a result of the formation of the new party, the distribution of seats in the House of Representatives underwent the following changes during November:

	Nov 1	Nov. 30
Liberals	225	185
Progressives	70	—
Japan Liberals	8	—
Democrats	—	120
Left-wing Socialists	72	72
Right-wing Socialists	61	61
Minor parties	10	8
Independents	10	9
Others	4	4
Vacancies	7	8

The distribution of seats in the House of Councillors on Nov. 30 was as follows: Liberals 91, Democrats 20, Left-wing Socialists 44, Right-wing Socialists 26, *Ryokufukai* 49, Independents and minor parties 18, vacancies 2.

Following the mass resignations from the Liberal Party, Mr. Yoshida asked the party executive on Nov. 22 to consider whether he should resign. The executive decided on Nov. 25 to nominate Mr. Ogata (the Deputy Premier) as president of the party, and Mr. Yoshida accordingly agreed on the following day to resign from this post, whilst temporarily retaining the Premiership. The Liberal executive suggested to the Democrats on Nov. 28 that both parties should simultaneously dissolve themselves and should then unite to form a new party, the leader of which would be elected by the party membership. The Democrats, however, rejected this proposal, and on Dec. 6, together with the Socialist parties, introduced a motion of no-confidence accusing the Government of "secret diplomacy and erroneous economic policies," and referring to the degradation of political morals revealed by the shipbuilding and other scandals.

The Audit Committee had previously subpoenaed Mr. Yoshida on Nov 18, for the third time, to give evidence on the shipbuilding scandal; Mr. Yoshida, however, had again refused to do so, on the ground that his doctor had ordered him to rest. The committee accordingly issued another summons, and decided on Dec. 7 in favour of Mr. Yoshida's prosecution if he failed to obey it.

Mr Yoshida resigned both the Premiership and the Liberal Party leadership on Dec. 7, thereby automatically cancelling the motion of no-confidence, which was to have been debated later in the day. This decision was taken after a four-hour Cabinet meeting at which Mr. Yoshida—who had previously announced his intention of dissolving the Diet if the no-confidence motion were carried—was overruled by opponents of this policy, headed by Mr. Ogata.

Mr. Shigeru Yoshida had been Prime Minister continuously since October, 1948 (see 9608 C), and had been responsible for many developments of major importance in both foreign and home policy. These included the signing of the San Francisco peace treaty (11721 A), the agreement for the stationing of U S forces in Japan (11724 A), the U S-Japanese mutual assistance agreement (13450 B), the building-up of the Japanese armed forces (13621 C), the reversal of the occupation authorities' policies with regard to the police (13621 C), trade unions, and cartels, and the introduction of a deflationary policy following the end of the Korean War "boom" The Government's position, however, had been undermined since 1952 by splits within the Liberal Party, by Liberal losses in the 1953 general elections, which left the party in a minority in the House of Representatives (see 12956 A), and by Mr. Yoshida's refusal to allow action to be taken against those of his supporters accused of complicity in the shipbuilding scandal, or to explain his conduct before the Audit Committee

New Government formed by Mr. Hatoyama.

Mr. Hatoyama was elected Prime Minister on Dec. 9, receiving 257 votes in the House of Representatives against 191 for Mr. Ogata, and 116 in the House of Councillors against 85 for Mr. Ogata. The Socialists had previously agreed to support him on condition that the Democrats agreed to the dissolution of the Diet at the end of January and the holding of general elections in March. The membership of the new Cabinet was announced on Dec. 10 as follows:

Mr. Ichiro Hatoyama	Prime Minister.
Mr. Mamoru Shigemitsu	Deputy Premier and Foreign Minister.
Mr. Hisato Ichimada	Finance.
Mr. Shiro Hanamura	Justice.
Mr. Masazumi Ando	Education.
Mr. Yusuke Tsurumi	Welfare.
Mr. Ichiro Kono	Agriculture and Forestry.
Mr. Tanzan Ishibashi	International Trade and Industry.
Mr. Yutaro Takeyama	Construction.
Mr. Takeo Miki	Transport.
Mr. Yuki Takechi	Posts.
Mr. Saburo Chiba	Labour.
Mr. Tatsunosuke Takasaki	Minister of State for Economics.
Mr. Seiichi Omura	Minister of State for Defence.
Mr. Tadao Oasa	Minister of State for Police.
Mr. Takao Nishida	Minister of State for Local Government.
Mr. Hideyuki Miyoshi	Director of the Hokkaido Development Board.

Mr. Hatoyama (71), a member of the House of Representatives since 1915, held office as Minister of Education before the war and formed the Liberal Party in 1946 When about to take office in that year, following the Liberal victory in the first post-war elections, he was forbidden to do so by the U.S occupation authorities on the grounds that he had helped to suppress public liberties and had published a book praising Hitler and Mussolini. He thereupon relinquished the party leadership to Mr. Yoshida. Returning to public life in 1951, he formed a group inside the Liberal Party, opposed to Mr. Yoshida, which broke away in March, 1953, but reunited with the main party in the following November

Mr. Shigemitsu (67) served as Ambassador to Britain, the Soviet Union, and China before the war, was Foreign Minister from 1943-45, and represented Japan at the signing of the instrument of surrender. Sentenced in 1948 by the International Military Tribunal for the Far East to seven years' imprisonment as a war criminal, he was released in 1950 and allowed to re-enter public life in 1952. **Mr. Ichimada** had been president of the Bank of Japan since 1946. Of the 17 members of the Government, 10 had been "purged" from public life by the U.S occupation authorities after the war.

Ministerial Statements on Relations with Communist Countries.

In a statement issued on Dec. 11, Mr. Shigemitsu said that it was the new Government's policy to promote friendly relations with all countries and to ensure the security and stability of Eastern Asia through "an abiding co-operation with the free nations, especially the United States." Japan was prepared to provide for her own defence to the extent commensurate with her economic resources, and also to give technical and other assistance to the economic rehabilitation of other Asian countries, as a guarantee against Communist penetration. The Government also wished, however, "to restore normal relations with Russia and China on mutually acceptable terms,

without prejudice to our basic collaboration with the free nations," and would also welcome opportunities of expanding the volume of trade with both countries.

The Soviet Foreign Minister, M Molotov, in an official comment on Mr. Shigemitsu's statement, said on Dec 16 that "the normalization of Soviet-Japanese relations is not only in the interests of both States, but also in the interests of other countries which are concerned to strengthen peace in the Far East and to ease international tension." Recalling the joint declaration issued by the Soviet and Chinese Governments on Oct 12 (see 13855 A), he emphasized that the Soviet Union was "prepared to discuss practical measures connected with the question of the normalization of relations between the U.S S.R. and Japan if the Japanese Government really intends to take steps in that direction."

In a broadcast on Dec. 15, Mr. Hatoyama described both the Chinese Communist and Nationalist Governments as "fine independent regimes," and maintained that it was quite reasonable for Japan to trade with both. Mr. Shigemitsu stated in the Diet Foreign Affairs Committee on Dec. 16 that although Japan had no intention of recognizing both Communist and Nationalist China as sovereign States on the same footing, it was impossible to refuse *de facto* recognition to Communist China. On the following day he welcomed M. Molotov's statement as "a step forward."

In a further statement on Dec. 28, Mr. Hatoyama reaffirmed his Government's wish for improved relations with the Soviet Union and China, whilst giving an assurance that there would be no important change in Japan's relations with the U.S.A., and demanding that Japan should be allowed to rearm.

Declaring that Japan had an "inherent right" to rearm, Mr. Hatoyama maintained that this could be done within the framework of the Constitution by "clarifying the working" of the clause which forbade Japan to acquire the potential for aggressive war Japan's isolation from the Soviet Union and China, he continued, was neither normal nor natural, and he therefore wished, "within the boundary of international obligations committed to the free world," to facilitate trade with both countries. This was not incompatible with friendly relations with the U.S.A., which he wished to continue, but would rather tend to reduce the present unfriendly feeling of the Japanese people towards the U.S.A., which had arisen from popular suspicion that Mr. Yoshida's Government was "tied blindly" to U.S. policy. He therefore intended to abolish the "despotic diplomacy of the past" and to give "greater consideration to the people's wishes," thereby strengthening relations with the U.S.A. and reducing anti-American feeling. In conclusion, he stated that Japan desired normal relations with the countries of South-East Asia, and a settlement of the reparations question with the Philippines and other States.

As regards home affairs, the new Government announced on Dec. 11 that it would intensify the anti-inflationary policy inaugurated by Mr. Yoshida; that the Prime Minister would give up one of his official residences, as an economy measure; that Ministers would no longer be provided with official residences and bodyguards; and that measures would be taken to "establish political integrity." It was reported on Dec. 29 that the Government had decided to suppress the Undemocratic Activities Counter-measures Council (see 13899 B), which had been widely attacked in the Japanese Press as a "witch-hunting organization."

The two Socialist parties agreed in principle on Dec. 15 to conduct a joint electoral campaign, and to unite after the elections. The two parties had previously issued a joint statement on the rearmament question—the main issue dividing them—which had approved the formation of a small "task force" for essential defence requirements.

Mr. Hatoyama dissolved the Japanese Diet on Jan. 24 and announced that general elections would be held within 40 days. (Japanese Embassy Information Bulletin, London - Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune) **(Prev. rep. Cabinet, 13363 B; Relations with U.S.A., 13932 C; Relations with Communist Countries, 13855 A.)**

A. MAURITIUS. — Court of Criminal Appeal.

A Court of Criminal Appeal, the first of its kind in Mauritius, was set up in the Colony on Jan. 1. Although Mauritius has been a British colony since its annexation from France during the Napoleonic Wars, it had retained the French system of penal law, and the only right of appeal from a conviction in the Supreme Court of Mauritius had been to the Judicial Committee of the Privy Council. The new court will hear appeals from adjudications of the Supreme Court in the exercise of its original criminal jurisdiction. (Times)

B. BURMA. — New Cabinet Minister.

Thakin Chit Maung, Parliamentary Secretary to the Minister of Defence, was sworn-in as Minister for Housing in the Burmese Cabinet on Dec. 5, 1954.—(Burma Government Information Department, Rangoon) **(Prev. rep. 13954 D.)**

C. NATIONALIST CHINA - UNITED STATES. — Text of Mutual Security Treaty. - Ratification by Nationalist Government. - Chinese Undertaking to refrain from Attacks on Mainland without U.S. Consent.

The text of the mutual security treaty between Nationalist China and the United States was released in Washington on Dec. 2 and is given below:

"**Art. 1.** The parties undertake, as set forth in the U.N. Charter, to settle any international dispute in which they may be involved by peaceful means in such a manner that international peace, security and justice are not endangered, and to refrain in their international relations from the threat or use of force in any manner inconsistent with the purposes of the United Nations

Art. 2. In order more effectively to achieve the objectives of this treaty, the parties separately and jointly by self-help and mutual aid, will maintain and develop their individual and collective capacity to resist armed attack and Communist subversive activities directed from without against their territorial integrity and political stability.

Art. 3. The parties undertake to strengthen their free institutions, to co-operate with each other in the development of economic progress and social well-being, and to further their individual and collective efforts toward these ends.

Art. 4. The parties, through their Foreign Ministers or their deputies, will consult together from time to time regarding the implementation of this treaty.

Art. 5. Each party recognizes that an armed attack in the West Pacific area directed against the territories of either of the parties would be dangerous to its own peace and safety, and declares that it would act to meet the common danger in accordance with its constitutional processes Any such armed attack, and all measures taken as a result thereof, shall be immediately reported to the U.N. Security Council Such measures shall be terminated when the Security Council has taken the measures necessary to restore and maintain international peace and security.

Art. 6. For the purposes of Articles 2 and 5, the terms 'territorial' and 'territories' shall mean, in respect of the Republic of China, Taiwan [Formosa] and the Pescadores, and in respect of the United States, the island territories in the West Pacific under its jurisdiction. The provisions of Articles 2 and 5 will be applicable to such other territories as may be determined by mutual agreement.

Art. 7. The Government of the Republic of China grants, and the Government of the United States accepts, the right to dispose such U.S. land, air and sea forces in and about Taiwan and the Pescadores as may be required for their defence, as determined by mutual agreement.

Art. 8. This treaty does not affect, and shall not be interpreted as affecting in any way, the rights and obligations of the parties under the U N Charter or the responsibility of the United Nations for the maintenance of international peace and security.

Art. 9. The treaty shall be ratified by the U.S A. and the Republic of China in accordance with their respective constitutional processes, and will come into force when instruments of ratification have been exchanged at Taipeh.

Art. 10. The treaty shall remain in force indefinitely. Either party may terminate it one year after notice has been given to the other party."

It was disclosed in Washington on Jan. 18 that the Chinese Nationalist Government had given a formal undertaking that its forces would not attack the Chinese mainland without prior consultation with the United States. This assurance, it was stated, had been given in an exchange of Notes signed by Mr. Dulles and Dr. Yeh (the Nationalist Foreign Minister) on Dec. 10. Whilst assuring to Nationalist China the "inherent right of self-defence" as far as Formosa and the Pescadores were concerned, the Notes declared: "In view of the obligation of the two parties under the [Sino-American] treaty, and of the fact that the use of force from either of these areas [i.e., Formosa or the Pescadores] by either of the parties affects the other, it is agreed that such use of force will be a matter of joint agreement subject to action of an emergency character which is clearly an exercise of the inherent right of self-defence." The *New York Times* commented that the effect of the commitment was "to restrain Generalissimo Chiang's forces to the defence of the islands they now hold."

The Sino-American mutual security treaty was unanimously ratified by the Chinese Nationalist Legislature on Jan. 14. (New York Times) **(Prev. rep. Sino-U.S. Treaty, 13986 A.)**

D. SPAIN. — Permanent Observer at United Nations.

It was announced from U.N. Headquarters on Jan. 25 that Spain had been given the status of a permanent observer at the U.N., and that an invitation to that effect had been sent by the U.N. Secretary-General (Dr. Hammarskjöld) to the Spanish Ambassador in Washington (Señor Manuel de Areilza). Other countries which have previously received a similar status pending admission as full members are Italy, Finland, Austria, the German Federal Republic, Japan, and South Korea.

(A.B.C., Madrid - New York Herald Tribune)

A. FRANCE. — Cabinet Reorganization. - M. Edgar Faure appointed Minister for Foreign Affairs. - New Minister for Oversea Territories expelled from M.R.P.

A Cabinet reorganization—the fourth since the formation of the Mendès-France Government in June 1954—was announced in Paris on Jan. 20. It involved (*a*) the relinquishment by M. Mendès-France of the Foreign Affairs portfolio, which he had hitherto combined with the Premiership; (*b*) the setting-up of a Ministry of the Armed Forces (additional to the Ministry of National Defence) which superseded the Secretariats of the Army, Navy, and Air Force; (*c*) the restoration of the Ministry of the Merchant Marine (previously attached to the Ministry of Public Works) as a separate Department, and (*d*) the creation of the post of Minister of State, to which M. Guérin de Beaumont, hitherto Minister of Justice, was appointed. The new Ministerial appointments were as follows:

M. Guérin de Beaumont (Ind. Republican)	Minister of State
M. Edgar Faure (Radical) .	Foreign Affairs.
M. Robert Buron (ex-M.R.P.) ..	Economic Affairs, Finance, and Reconstruction.
M. Emmanuel Temple (Ind Republican)	Justice.
M. Jacques Chevallier (Ind. Republican)	National Defence.
M. Bourgès-Maunoury (Radical) .. .	Armed Forces.
M. Jean-Jacques Juglas (M.R.P.) ..	*France d'outre-mer.*
M. Raymond Schmittlein (Social Republican - Gaullist)	Merchant Marine.

The following were appointed State Secretaries M Raymond Mondon (A R.S.—Dissident Gaullist), Interior (Local Administration), M. Henri Caillavet (Radical), Interior (Overseas Territories and Civil Defence); M Diomède Catroux (Social Republican), Armaments; M. Fouques-Duparc (Social Republican), Civil Aviation; M Joseph Conombo (Overseas Independent), Economic Affairs and French Union, M. Galy-Gasparrou (Radical), Information.

M. Faure had hitherto been Minister of Finance; M. Temple had held the National Defence portfolio; M. Guérin de Beaumont, as stated above, had been Minister of Justice; and M. Buron had held the portfolio of *France d'outre-mer*. M. Bourgès-Maunoury returned to the Government, from which he resigned in September last after the rejection of the E.D.C. treaty by the National Assembly M. Jacques Chevallier, the new Defence Minister, had previously been State Secretary of the Army, whilst M Diomède Catroux, who took over the State Secretariat for Armaments (which will come under the new Ministry of the Armed Forces), had previously been State Secretary for Air

M. Caillavet had hitherto been State Secretary for the Navy and M. Conombo State Secretary for the Interior. M. Galy-Gasparrou took over responsibility for the information functions formerly vested in M. Bettencourt (who remained State Secretary for the *Présidence du Conseil*), for broadcasting services (hitherto held by M. Ulver, the Minister for Industry and Commerce), and for legal questions affecting the Press (previously dealt with by M. Guérin de Beaumont as Minister of Justice). M. Caillavet, however, resigned his State Secretaryship on Jan. 21, declaring that he had only accepted it to prevent any delay in the Government reorganization.

The new members of the Government were MM Juglas, Schmittlein, Mondon, Fouques-Duparc, and Galy-Gasparrou. **M. Juglas,** a former school-teacher and a member of the wartime Resistance movement, has been a member of the Constituent Assemblies and the National Assembly since 1945, and is chairman of the Assembly's Commission for Overseas Territories **M. Schmittlein,** who before the war was Inspector-General of French teaching abroad and Director of the French Institute in Riga, fought at Narvik in 1940 during the German invasion of Norway, and later took part in the Syrian and Libyan campaigns of the Free French Forces. Appointed *Chargé d'Affaires* in Moscow by General de Gaulle, he negotiated the recognition of the Free French movement by the Soviet Union, and after the liberation of French North Africa co-ordinated the Resistance movements in the Overseas Territories He later returned to active service with the French Expeditionary Corps which took part in the landings in Italy. From 1945-51 he was Inspector-General of Education and Director-General of Cultural Affairs for the French High Commission in Germany, and in 1951 was elected to the National Assembly. He voted against the Paris agreements in the recent ratification debate

M. Mondon, Mayor of Metz, was twice arrested by the Gestapo during the last war for Resistance activities, but escaped on both occasions He has been a member of the National Assembly since 1946 and is a vice-president of the A.R S. (Dissident Gaullists). **M. Fouques-Duparc,** Mayor of Oran (Algeria), was elected to the Council of the Republic in 1948, and since 1951 has represented Oran in the National Assembly. **M. Galy-Gasparrou,** a judge, and a member of the wartime Resistance movement, has sat in the Constituent Assemblies and the National Assembly since 1945. He voted against the Paris agreements.

The reorganized Mendès-France Cabinet comprised 20 Ministers (instead of 16 as previously) and 17 State Secretaries (against 15) The new State Secretariats were those for Armaments, Economic Affairs, Information, Interior, and Civil Aviation, whilst, as stated above, those for the Army, Navy and Air were abolished.

M. Mendès-France, in his customary weekly broadcast on Jan. 22, recalled that he had hitherto had to devote most of his time to international affairs, but by relinquishing the Foreign Affairs portfolio, would now be able to give more time to economic questions. In this connexion he referred to the "second phase" of the Government's programme which was now opening, and which would be primarily concerned with internal matters and economic and social questions.

The executive of the M.R.P Parliamentary Party decided on Jan. 21 to expel M. Juglas for having joined M. Mendès-France's Government. A similar decision had previously been taken in the case of M. Robert Buron, now Minister of Finance. (Le Monde, Paris - Le Figaro, Paris) **(Prev. rep. 13891 B.)**

B. ORGANIZATION OF AMERICAN STATES. — Inter-American Economic Conference at Petropolis.

An Inter-American Conference of Ministers of Finance or Economy—the first of its kind—met at Petropolis (Brazil) from Nov. 22 to Dec. 2 under the chairmanship of Dr. Eugenio Gudin, the Brazilian Minister of Finance It was attended by representatives of all the 21 American republics, as well as by an observer from Canada and specially invited representatives from Britain, Western Germany, Belgium, France, the Netherlands, Italy, Portugal and Japan.

The conference, which was convened to discuss the economic problems not dealt with at Caracas (see 13669 A), and to prepare for a more comprehensive "Inter-American Economic Conference" in 1956, approved 49 resolutions covering such subjects as inter-American transport, regional trade development, economic integration, commodity marketing, encouragement of tourism, and Central Bank co-operation, both among member-countries and with the U.S Export-Import Bank and the I M F., to counteract the effects of temporary balance-of-payments difficulties. Several resolutions recommended measures of self-help in the field of economic development, one of which sought to increase foreign investments in Latin America by advocating the adoption of domestic policies designed to make the national economies more attractive to foreign investors, whilst another resolution recommended Governments to prepare economic development programmes and to inform capital-exporting countries of specific opportunities for profitable investment.

One of the principal resolutions was a Chilean proposal for the establishment of a stabilization fund with capital to be provided by the gold and dollar exchange reserves held abroad by the Latin American Governments This fund would provide money, when it could not be obtained from other sources, for (*a*) development projects, (*b*) the stabilization of commodity prices, and (*c*) the stabilization of the currency exchange market Although the U.S. delegates strongly opposed the creation of such a fund on the grounds that it would duplicate the functions of such bodies as the International Bank and the U S. Export-Import Bank, and that the U S A would be asked to provide the major share of the capital, a resolution proposing that the question should be studied by a small working group was adopted, with the U.S A. abstaining.

Mr Humphreys, the U S Secretary of the Treasury, informed the conference on Nov. 23 that the U.S A had revised its public lending policies and that the programme of loans to Latin American countries was to be extended, on the understanding that such further loans were intended to encourage private enterprise and not to displace it. He also announced that "under proper safeguards" the U S A. would be prepared to recommend a formula for relaxing double taxation on foreign investments

These U.S. concessions were strongly criticized by two U S Congressmen attending the conference as observers—Senator George A Smathers (Dem) and Representative James G. Fulton (Rep.)—who argued that the U S Government had not gone far enough in offering assistance to Latin America Mr Fulton declared that whilst the U S.A was "handing out billions" to Europe and Asia she was offering "a mere pittance" to Latin America, and said that he would submit to the House Foreign Affairs Committee (on whose behalf he was attending the conference) several recommendations which would include an immediate allocation of $1,000,000,000 to Latin American countries in long-term loans and outright grants-in-aid

It was decided at the closing session that the next Inter-American Economic Conference should be held in Buenos Aires in 1956.—(New York Times - Bank of London and South America) **(Prev. rep. Caracas Conference, 13669 A.)**

C. PORTUGAL. — Ratification of Paris Agreements.

The Portuguese National Assembly unanimously approved on Jan. 25 the admission of the German Federal Republic to NATO under the Paris agreements.
(New York Herald Tribune) **(Prev. rep. 13974 D.)**

A LONDON. — L.C.C. Approval for National Youth and Sports Centre at Crystal Palace.

A plan to develop part of the Crystal Palace site as a National Youth and Sports Centre, at a cost of £1,797,000, was unanimously approved by the London County Council on Nov. 16. The scheme was explained at a press conference on Nov. 11 by Sir Gerald Barry (Director-General of the Festival of Britain in 1951, and chief consultant to the L.C.C. on the development of the Crystal Palace site), Dr. Leslie Martin (architect to the L.C.C. and co-designer of the Royal Festival Hall), and Mr. I. J. Hayward (Leader of the L.C.C.). Its principal features are described below:

(1) The Centre—the most ambitious of its kind ever envisaged in Britain—would occupy about 40 of the 200 acres comprising the Crystal Palace and its adjacent park, the whole of which had been handed over to the L.C.C. two years earlier as a place "for education and recreation and for the promotion of industry, commerce and art."

(2) There would be a sports hall built on two levels, with a total floor area of about 63,000 square feet. It would contain large swimming and diving pools built to Olympic dimensions, with seating for 2,500 spectators, and a big gymnasium hall (divisible into three smaller halls) with seating for 1,500 - 1,800 people. On the lower level would be changing-rooms, practice rooms for fencing, boxing, etc., squash courts, and indoor cricket pitches. Most of the walls of this building would be of glass.

(3) The main entrance to the sports hall would be across a fly-over bridge, under which would be a covered running track. At the far end of the bridge would be a tall glass tower commanding a view of all outdoor tracks, pitches, etc., and housing television cameras and radio commentators.

(3) The playing-fields area on either side of the sports hall would provide for cricket, hockey, Rugby football, and netball, the netball pitches being convertible into an ice-hockey rink when flooded and frozen.

(4) In addition, there would be an amphitheatre for Association football and for track and field events, with stands seating some 12,000 spectators, apart from the standing accommodation. If further stands were built, the amphitheatre would be capable of accommodating 100,000 people.

(5) Finally, there would be a hostel and headquarters building, with accommodation for 136 people, which would be used as a residential centre for training athletes, sportsmen and coaches. Courses would be run by the Central Council of Physical Recreation in conjunction with such bodies as the M.C.C., the Rugby Union, the Amateur Athletic Association, etc., with the object of training British teams for Olympic, Empire, and European championships. The Centre as a whole would be used exclusively for the purposes of amateur sport, and one of its principal functions would be "the training of trainers." All training given, whether for coaches, athletes and other sportsmen, would be of Olympic standards.

It was announced that the King George VI Memorial Foundation had agreed in principle to contribute £100,000 for the erection of the headquarters and hostel building as a memorial to the late King. (Times - Daily Telegraph)

B. FRANCE. — Industrial Decentralization.

Under a decree published in the *Journal Officiel* on Jan. 8, aiming at a more even distribution of French industry, the erection of industrial buildings exceeding a certain size in the Paris area and other "over-populated zones" became subject to the consent of the Minister for Reconstruction, who would make decisions after consulting a special commission consisting of representatives of the Ministries of Industry, the Interior, Finance, Agriculture, and Labour. The buildings affected will be those with a floor area exceeding 500 sq. metres or employing more than 50 people, or any extension to such existing buildings exceeding 10 per cent of their present floor area or capacity; the only exceptions will be the construction of canteens, cloakrooms, rest rooms, etc. The restricted zones outside the Paris area—which are expected to include Lyons, Marseilles and Bordeaux—will be defined by Ministerial order. (Le Monde)

C. SPAIN. — Request to Soviet Union for Return of Gold shipped by Republican Government.

The Spanish Government announced on Jan. 12 that it had asked the Soviet Union for the return of $570,000,000 in gold coin and bullion shipped to the U.S.S.R. in 1936 by the Spanish Republican Government. A Foreign Ministry statement said that the Government had "well-founded intelligence" that part of the gold exported by the Soviet Union to make trade payments, "especially to Czechoslovakia, Finland, and Western European countries," was Spanish. It added that Notes had been delivered to Western Embassies in Madrid—including those of the United States, Britain and France—asking all Governments which traded with the Soviet Union to refuse payments made by Russia in gold until the Spanish request to Moscow had been met.

(A.B.C., Madrid - New York Times)

D. UNITED STATES. — New Travel Restrictions on Soviet Citizens in the U.S.A.

Details of new and more stringent travel restrictions for Soviet citizens in the United States were contained in a Note handed to the Soviet Ambassador in Washington (M. Zarubin) by Mr. Dulles on Jan. 3.

For the first time Soviet citizens were prohibited from entering specific areas, including many industrial areas, areas in which there were large military, naval and air installations, and areas of atomic research and development, covering in all about 2% per cent of the area of the United States. Specifically, the banned zones included (*a*) the whole of the States of Connecticut, Delaware, Massachusetts and Rhode Island, (*b*) a part of 35 other States, only Arkansas, Florida, Minnesota, Mississippi, North Carolina, Oregon, Utah, Vermont and Wyoming being entirely free from restrictions, (*c*) a strip 15 miles in depth along the whole of the border with Mexico (except Webb County, Texas), and along the shores of the Great Lakes bordering Canada.

The U.S. Note said that the new regulations were "comparable to those which the Soviet Union has imposed, presumably for reasons of security, on the movement of U.S. citizens in the Soviet Union." It added that should the Soviet Government decide to liberalize its regulations, the U.S. Government would in turn "be disposed to reconsider in the same spirit its own security requirements."

The new regulations also extended to all resident Soviet citizens the requirement to give 48 hours' notice of intention to travel more than 25 miles from Washington and New York, a restriction which had hitherto applied only to Soviet diplomats. Soviet citizens who were temporarily admitted to the U.S.A. for some specific purpose which did not involve temporary residence in Washington or New York would not, however, be subject to this requirement; at the discretion of the State Department they might also be granted admittance to a closed city or area if their presence there was germane to the purpose for which they had been admitted to the country. Soviet employees of the U.N. Secretariat, whose conduct was the responsibility of the U.N. Secretary-General, were also exempted.

A further U.S. regulation on Jan. 19 debarred Soviet citizens from sketching or photographing military objects, railway stations, radio installations, or other places or things in the U.S.A. which had possible strategic importance, and from purchasing aerial photographs, large-scale maps, navigational maps, or "detailed development plans of industrial cities." (New York Times - New York Herald Tribune)

E. IRAQ. — Decision to terminate Anglo-Iraqi Treaty of Alliance. - Statement by General Nuri es-Said.

General Nuri es-Said, the Prime Minister of Iraq, informed the Iraqi Parliament on Dec. 15, 1954, that it was his Government's intention to terminate the Anglo-Iraqi treaty of alliance before the date of its expiry in October, 1957. He said that the question of future Anglo-Iraqi relations had been taken up in 1953, during the Premiership of Jamil el-Madfai, by a special committee which included himself, Tewfik es-Suwaidi and Ali Jawdat al-Ayubi (both former Prime Ministers) and Ahmed Mukhtar Baban (the present Deputy Premier). The report of this committee to the Cabinet had recommended three different ways in which the treaty could be brought to an end, and he hoped to make a full statement to Parliament in due course.

The Iraqi Foreign Minister (Musa el-Shabander) said in Cairo on Dec. 13 that in any revised treaty Britain would be given the right to return to the Habbaniyah air base if Persia was attacked after the expiration of the Anglo-Iraqi treaty in 1957. Iraq would also reserve the right to call in British troops to help defend her frontiers against attack, and these forces would be granted all facilities, the Iraqi Army itself, however, would not fight outside its own territory. He suggested that new arrangements for British use of the Habbaniyah base should be arrived at on the lines of the Anglo-Egyptian agreement for the evacuation of the Suez Canal zone.

The Anglo-Iraqi Treaty, concluded in 1930, is valid for 25 years from the date of Iraq's admission to the League of Nations in 1932, and is thus due to expire in 1957. Under its terms either party may request a revision at any time after 20 years—i.e., after 1952.—(Times - Manchester Guardian)

(Prev. rep. 11763 D.)

F. SOUTH AFRICA. — Diamond Sales in 1954.

Sales of diamonds in 1954 effected through the Central Selling Organization on behalf of South African and other producers totalled £62,153,125, of which £45,610,010 was from the sale of gems and £16,543,115 from the sale of industrial diamonds. One of the largest diamonds discovered for many years—a blue-white stone weighing 426½ carats and valued at about £100,000—was found at the Premier Mine, Pretoria, on June 3, 1954.—(Cape Times) **(Prev. rep. 13511 B.)**

A. UNITED NATIONS. — Ninth Session of General Assembly. - Proceedings and Decisions.

In addition to the subjects mentioned in 13993 A, the U.N. General Assembly dealt with a number of other matters during its ninth session from Sept. 21 to Dec. 17, 1954. The most important of these are described below under cross-headings.

Chinese Nationalist Forces in Burma. The question of the presence of Chinese Nationalist forces on Burmese territory—a matter which had been before the U N since 1953—was again raised by the Burmese delegate (Mr James Barrington). He pointed out that although some 5,500 Nationalist troops and their dependants had been evacuated to Formosa under the supervision of the three-man military committee (U S A., Siam, and Nationalist China), in conformity with the Assembly's earlier resolution, there were still some 6,000 Nationalist guerrillas in Northern Burma who had shown no evidence of "any desire to evacuate" In raising the matter once more, Mr. Barrington expressed the hope that the U N would take measures to bring about either the voluntary evacuation of these forces or their internment. If this could not be done, the Burmese Government might have to resort to force to deal with the problem. He added that his Government considered the Chinese Nationalist Government responsible "so long as a single Kuomintang soldier is running loose on the soil of Burma."

Dr. Chih-mai Chen (Nationalist China) said that the guerrillas still in Burma were men who had "defied the wishes of the Chinese Government" and were "completely beyond its influence or control." His Government had done all in its power to bring about their evacuation, and would neither maintain any relations with them nor furnish them with support of any description. The problem of these men was now an internal problem of the Burmese Government, which could take whatever action it thought fit without any objection from the Chinese Nationalist Government

By 57 votes to nil, with Nationalist China abstaining, the *Ad Hoc* Committee adopted on Oct. 13 a ten-nation resolution (sponsored by Australia, Canada, Great Britain, India, Indonesia, New Zealand, Norway, Pakistan, Sweden and Uruguay) calling on the Nationalist troops still on Burmese soil to submit to disarmament and internment; assuring Burma of continued U N support in solving this problem; and urging all States to prevent any aid going to the guerrillas. The resolution was adopted by the full Assembly on Oct. 15 by a similar vote, with Ecuador, Ethiopia and Liberia absent

French Morocco and Tunisia. The Moroccan and Tunisian questions were again brought before the U.N. by the 14-nation Asian-Arab group (Afghanistan, Burma, Egypt, India, Indonesia, Iraq, Lebanon, Pakistan, Persia, Philippines, Siam, Saudi Arabia, Syria and Yemen). The French delegation, as at the eighth session, was absent when these subjects were discussed in the Political Committee and the full Assembly, maintaining that they were solely within the jurisdiction of the French Republic and outside the competence of the United Nations

M. Ahmed Shukairi (Syria), speaking in the Political Committee on Dec. 9, accused France of having turned Morocco into a "concentration camp," of denying sovereignty and human rights to the Moroccan people, and of having "illegally" dethroned and deported the Sultan Sidi-Mohammed ben-Youssef. After describing the present division of Morocco into French, Spanish, and International Zones as a "source of unrest," he suggested that an international conference should be held with a view to "upholding the integrity and sovereignty of Morocco" This conference, he proposed, should be attended by the signatories of the Algeciras Treaty of 1906, under which the Sultan's independence and the integrity of the Sherifian Empire had been guaranteed. [The signatories of the Algeciras Treaty were France, Spain, Great Britain, the U S.A., Germany, Austria-Hungary, Italy, Russia, Sweden, Portugal, Belgium, the Netherlands, and Morocco]

After several days' debate, the 14-nation group presented a resolution which noted that the French Government had begun direct negotiations for a settlement in Morocco, and which recommended that the U.N. should adjourn discussion of the Moroccan question "for the time being." It was adopted by the Political Committee on Dec. 13 by 39 votes to 15, with four abstentions, the dissenting countries including Great Britain, the U.S A., Belgium, the Netherlands and South Africa. Sir Pierson Dixon (U.K.) explained that he had voted against the resolution because the British Government believed that the Moroccan question was outside the competence of the U N., whilst Mr. Cabot Lodge (U.S.A.) opposed the resolution on the ground that it might "hinder the progress of negotiations between France and Morocco." When the resolution came before the full Assembly on Dec. 17, a Dominican amendment was accepted (by 57 to nil, with South Africa abstaining) expressing confidence that a "satisfactory solution" of the Moroccan question would be achieved. The resolution, as amended, was approved by 55 to nil, with four abstentions (Great Britain, Australia, South Africa and Belgium) and France absent.

The Asian-Arab group also introduced a resolution on the Tunisian situation, noting "with satisfaction" that France and Tunisia had entered into negotiations which were still in progress; expressing confidence that "the said negotiations will bring about a satisfactory solution"; and asking the Assembly to postpone consideration of this item "for the time being." M. Shukairi (Syria), in presenting the resolution, said that M Mendès-France's proclamation of the internal autonomy of the Tunisian State (made on July 21, 1954) was "an historical document which might be the beginning of a new era in the relations between France and Tunisia," and might prove to be "a turning-point in the whole attitude of the Arab world towards the policy of France in North Africa."

The resolution was adopted in the Political Committee on Dec. 16 by 54 votes to nil with three abstentions (Great Britain, Australia and South Africa), and by the full Assembly on Dec 17 by 56 votes to nil, with the same three abstentions and France absent The British, Australian and South African delegations maintained that the Tunisian question, like the Moroccan, was outside the competence of the U.N and solely within the jurisdiction of France

South-West Africa. After considering the report of the Committee on South-West Africa which had been set up by the Assembly at its eighth session, the Assembly adopted a resolution (by 34 votes to 8, with 9 abstentions) which (1) expressed appreciation of the Committee's work, and took note of its report and observations, (2) noted "with concern" that, in the opinion of the Committee, "the administration of S W. Africa is in several aspects not in conformity with the obligations of the South African Government under the [League of Nations] mandate system", (3) noted "with satisfaction" that South Africa had participated in the Trusteeship Committee's discussions on this matter, (4) invited the Union Government to co-operate with the Committee on S W. Africa, and to submit reports on its administration of S.W. Africa, (5) requested the Committee to examine the extent to which U.N. specialized agencies could contribute to the social, economic and educational advancement of the people of S.W Africa. In addition, the Assembly adopted a resolution (by 40 votes to 3, with 11 abstentions) reiterating its view that S W Africa should be placed under the U.N. trusteeship system —a view which had been consistently opposed by the South African Government

Before adopting this resolution, the Assembly had decided on Oct. 11 that its decisions on questions relating to S W. Africa should be taken by a two-thirds majority—the procedure reserved under the U N Charter for "important questions." However, because several countries had raised doubts as to the legality of this decision, and for this reason had declined to sit on the Committee on S.W. Africa, the Assembly subsequently decided (by 25 votes to 11, with 21 abstentions) to ask the International Court of Justice (*a*) whether the Assembly was legally justified in adopting a two-thirds majority procedure for questions relating to S.W. Africa, and (*b*) if not, what voting procedure should be adopted.

The report of the Committee on South-West Africa had been presented to the U N on June 25, 1954. It found that the inhabitants of S.W. Africa, after 35 years of administration under the mandate system of the former League of Nations, were still not participating in the political development of the territory; that their participation in economic development was restricted to that of labourers, and that social and educational services for their benefit were still "far from satisfactory." The Committee added its regret at the refusal of the South African Government to submit reports on the territory. The report was debated by the Trusteeship Committee before going to the full Assembly.

Korea. Three resolutions on Korea were presented in the Political Committee on Dec 3 (1) A resolution, sponsored by the 16 countries contributing forces to the U N. Command, which (*a*) approved the report on the Geneva Conference which had been made by those countries at the time (see 13641 A, page 13644); (*b*) took note of the report submitted by the U.N. Commission for the Unification and Rehabilitation of Korea (UNCURK)—see below; (*c*) expressed the hope that progress would be made towards the objectives of a unified, independent and democratic Korea with a representative form of government, and the restoration of peace and security in the area; and (*d*) asked that the Korean question should be brought before the Assembly's tenth session. (2) An Indian resolution which differed from the 16-nation resolution only in "noting" (instead of "approving") the 16-nation report on the Geneva Conference, and in making no reference to UNCURK's report (3) A Soviet resolution proposing the convening of a conference of "interested States" at an early date with the aim of reaching a settlement "on the basis of the creation of a unified, independent and democratic Korean State."

The Soviet and Indian representatives, however, did not insist on putting their resolutions to a vote, and the 16-nation resolution was adopted on Dec 8 by 50 votes to 5 (the Soviet group), with 4 abstentions (India, Burma, Syria and Saudi Arabia). At the same time the Political Committee rejected (by 50 votes to 5) a Soviet resolution for the termination and dissolution of UNCURK. The 16-nation resolution was adopted by the full Assembly on Dec. 11, the vote being identical with that in the Political Committee.

The Economic and Financial Committee adopted a resolution on Dec 11 (by 38 votes to 5) commending the work of the U.N. Korean Reconstruction Agency (UNKRA) and urging all governments to contribute the financial support "necessary for the continuation of the Agency's programme." It was adopted by the full Assembly on Dec. 14 by 41 votes to 5 (the Soviet group), with Syria and the Yemen abstaining.

The UNCURK report (referred to above), issued on Sept. 27, pointed out that the seven-nation Commission had been unable to do anything about Korean unification, and drew attention to President Rhee's belief that such unification could be brought about only by military action In an analysis of the South Korean elections of May 1954 (see 13829 A), the report said that while the voters had been "relatively" free, there had been some interference by the police with Opposition candidates and their electoral campaigns.

Palestine Refugees. After considering the report presented by Mr. Henry Labouisse, Director of the U.N. Relief and Works Agency for Palestine Refugees (UNRWA)—see 13840 C—the *Ad Hoc* Committee adopted a resolution on Nov. 30 which (*a*) extended the mandate of UNRWA for five years, until June 30, 1960; (*b*) provided the

Agency with a relief budget of $25,100,000 and a rehabilitation budget of $36,200,000 for the current fiscal year, as recommended by Mr Labouisse, (c) maintained the existing $200,000,000 rehabilitation fund; and (d) asked the Governments of the area to co-operate with UNRWA in "seeking and carrying out projects capable of supporting substantial numbers of refugees." The resolution presented jointly by France, Britain, the U.S.A. and Turkey, was adopted by 41 votes to nil with 8 abstentions (the Soviet group, Burma, Iraq, and Israel), and was passed by the full Assembly on Dec 4 by an identical vote.

Collective Security. By 50 votes to 5 (the Soviet group), with India and Indonesia abstaining, the Political Committee approved on Nov 2 a report by the Assembly's Collective Measures Committee laying down four general principles to be applied in the event of future collective action by the U.N. against aggression. The report was embodied in a resolution, presented jointly by the U.S.A., Great Britain, France, Belgium, Nationalist China, Cuba, Greece, Israel, Mexico, New Zealand, Turkey and Yugoslavia, which set forth these principles as follows:

(1) In the event of collective U.N. action against aggression, the greatest possible number of States should make prompt and effective military, political, economic and financial contributions to the collective effort, in accordance with their individual capacities and resources

(2) The maximum contribution of effective military forces should be a primary objective of member-States in such an eventuality States supporting U.N. collective action should seek to maximize effective military contributions not only by contributing forces themselves, but also by providing logistic support to States desiring to participate but unable to provide for the training, equipment or supply of their forces. States not supplying military forces for U.N. collective action should assist those who were by giving such ancillary support as was possible, including the right of passage over or across their territories

(3) The U.N. should support any measures of collective self-defence undertaken by regional organizations or agencies, as provided for in the U.N. Charter

(4) Collective economic and financial measures against aggression should include, where appropriate, all practicable assistance to the victim of aggression.

The resolution was adopted by the full Assembly on Nov. 4 the vote being identical with that in the Political Committee. During the earlier debate, Mr. James Wadsworth (U.S.A.) had emphasized that the question of collective security was "global" and that the above-mentioned principles were derived from the lessons learned in the Korean War. The Soviet, Polish, Czechoslovak, and Ukrainian delegates strongly opposed the resolution on the ground that it was incompatible with the general resolution on disarmament then before the Assembly (see 13993 A).

Greenland. Prior to the opening of the ninth session, the Assembly's Committee on Information from Non-self-governing Territories had decided on Sept. 13, by unanimous vote, that it was no longer necessary for Denmark to submit reports on Greenland as a dependent territory. The Committee noted that Greenland, by the free choice of its people, had been integrated into the Kingdom of Denmark on an equal footing with other parts of the realm (see 12921 A); that the Greenlanders, through their elected representatives, had freely exercised the right of self-determination; and that, in view of this constitutional change, Denmark no longer had the obligation under the U.N. Charter to provide information with regard to Greenland, since the latter was no longer a dependent territory.

A resolution embodying this decision (presented jointly by Brazil, Guatemala, India and Peru) was adopted by the Trusteeship Committee on Nov. 12 by 34 votes to 4, with 12 abstentions, and by the full Assembly on Nov. 23 by 45 votes to one (Belgium), with 11 abstentions. The delegates of Belgium and of the 11 abstaining countries opposed a section of the resolution which affirmed the Assembly's competence to decide when a dependent territory had become self-governing

Togoland. By 42 votes (including Britain, France and the U.S.A.) to one (Belgium), with 11 abstentions, the Trusteeship Committee adopted on Dec. 11 an Indian resolution, amended by Poland and the Philippines, on the question of the unification of Togoland and the future of that part of Togoland under British administration. It (*a*) requested the U.N. Trusteeship Council to send a special mission to the Togoland Trust Territories to study their political future; (*b*) asked this mission to study the problem of unifying the two Togolands, and also the possible integration of British Togoland with the neighbouring British Colony of the Gold Coast when the latter territory became fully independent "in the near future"; and (*c*) asked the mission also to ascertain the desires of the people of British Togoland as to their political future, without prejudice to the solution eventually adopted—whether independence, unification with an independent French Togoland, unification with an independent Gold Coast, or any other status of self-government or independence. The resolution was adopted by the full Assembly on Dec. 14 by 44 votes to nil, with 12 abstentions.

Before the opening of the ninth session, the British Government had presented a memorandum to the U.N. on June 21 asking that the future of the Trust Territory of British Togoland should be placed on the Assembly's agenda. After pointing out that the question had become urgent because the Gold Coast, after the recent elections (see 13649 A), was now in the last stage before assuming complete responsibility for its own affairs, the memorandum urged that the trusteeship agreement should be terminated and the territory merged with the Gold Coast. It invited the U.N. to ascertain the views of the inhabitants of the territory on their future status, as laid down in the U.N. Charter, suggested that the Trusteeship Council should be asked to consider methods of doing this, if necessary by the holding of a plebiscite, and set forth the reasons, political and economic, why, in the British Government's opinion, the Trust Territory should be merged with the Gold Coast

Economic Aid for Under-developed Countries. The full Assembly, meeting on Dec 11, approved five resolutions on economic aid to under-developed countries, all of which had been previously adopted by the Economic and Financial Committee. They covered:

(1) The establishment "as soon as practicable" of a Special U.N. Fund for Economic Development (SUNFED). Adopted unanimously.

(2) A request to the International Bank to prepare draft statutes for an International Finance Corporation. Adopted by 50 votes to nil, with five abstentions (the Soviet group).

(3) Measures to promote the international flow of capital to under-developed countries. Adopted by 48 votes to nil, with eight abstentions.

(4) Measures to alleviate international taxation problems. Adopted by 51 votes to nil, with five abstentions.

(5) Encouragement of land reform programmes. Adopted by 50 votes to nil, with five abstentions.

The various resolutions are described in greater detail below

The SUNFED Resolution.

Before the opening of the ninth session, the U.N. had received a report from the special *rapporteur* (M. Raymond Scheyven, Belgium) appointed by the eighth session to analyse governmental positions on the proposed creation of a Special U.N. Fund for Economic Development in under-developed countries. The purpose of this Fund—which had first been suggested by a committee of experts in 1952—would be to make grants-in-aid and long-term, low-interest loans to such countries, thus helping to speed their development by financing essential but non-profit-yielding projects. After recalling that the General Assembly had made the establishment of SUNFED contingent upon sufficient progress in disarmament, M. Scheyven said in his report: "I am compelled to state that the international situation has not developed as favourably as the General Assembly had hoped. Internationally supervised world-wide disarmament is unfortunately not yet an accomplished fact. Major industrial powers, such as the U.S.S.R., the U.K., and the U.S.A., appear disinclined, at least at the present juncture, to lend their financial support to the establishment of an international fund for grants-in-aid and for low-interest long-term loans . . ." He added that many other advanced industrial countries "contemplate taking part in the Special Fund only if it is supported by the leading industrial Powers, and more particularly by the United States." Despite these conclusions, M. Scheyven said that he nevertheless viewed the future with some optimism, since "the public in the industrialized countries have for some time become increasingly aware that the economic development of under-developed countries presents an urgent problem, the solution of which would contribute to a relaxation of international tension and the attainment of lasting peace"

During the debate in the Economic and Financial Committee, statements were made by the British and U.S. delegates (respectively Sir Alec Randall and Mr. Roger Straus) explaining why their Governments could not support the establishment of SUNFED at the present juncture. Sir Alec Randall pointed out that Britain had made available the equivalent of more than $350,000,000 for economic development in under-developed areas during 1953, although at the same time bearing "enormous" commitments for defence. Whilst everyone agreed that the SUNFED proposal was a good one, differences nevertheless existed about its timing; even if limited additional resources became available, he felt that they should be applied to existing programmes where they would have the greatest immediate effect, and that it would be a "useless exercise" to draft the statutes of the proposed Special Fund. Mr. Straus similarly emphasized that his Government, while "fully aware of the urgent need" for raising living standards in many areas, felt that the U.N. should not in present circumstances undertake to create "a new global fund for economic development," for the following reasons: (1) the U.S.A. was not at present prepared to contribute to such a fund; (2) it did not appear that "contributions anywhere near large enough for the task envisaged" were likely to be forthcoming from other countries; (3) it would be "unwise, even unfortunate, for the U.N. to create the framework of an international development fund without sufficient resources to enable it to do a real job"

After discussing several alternative resolutions, the Committee set up a seven-member Working Group which, after ten meetings in closed session, presented a resolution expressing the hope that SUNFED would be established "as soon as possible," and recommending (*a*) that M. Scheyven should continue to serve as special *rapporteur* for another year; (*b*) that, with the assistance of the U.N. Secretary-General and experts, he should prepare "a further report giving a full and precise picture of the form or forms, functions, and responsibilities" which such a Fund should have; (*c*) that M. Scheyven should make a "final report" to the tenth session of the Assembly. The resolution—based upon one originally presented by Belgium—was adopted unanimously by the Economic and Financial Committee and, as stated above, by the full Assembly.

International Finance Corporation.

By 44 votes to nil, with five abstentions (the Soviet group), the Economic and Financial Committee approved a nine-nation resolution (sponsored by Brazil, Canada, France, Greece, Mexico, Pakistan, Peru, Turkey and the U.S.A.) on the establishment of an Inter-

national Finance Corporation to promote and encourage private investment in under-developed countries The possible establishment of such a Corporation, as a companion project to SUNFED, had been before the U N and the International Bank since 1951, when it was recommended by a committee of experts The resolution requested the International Bank (*a*) to prepare a draft charter for the proposed Corporation "in the light of the views expressed in the U N. and of the functions of existing financial institutions"; (*b*) to submit the draft charter to the Governments of countries which were members of the International Bank for their consideration, and to invite those Governments "to indicate what support may be expected from them in constituting the capital required for the establishment of the Corporation", (*c*) "to take steps to ensure agreement between its members on the draft charter"; and (*d*) to report to the next session of the U N. Economic and Social Council. which, in turn, was asked to submit a report on the matter to the tenth session of the Assembly

During the debate Mr Roger Straus announced the U.S. Government's decision to support such a Corporation and to seek Congressional approval for U S. participation therein, whilst Sir Alec Randall similarly announced Britain's support for the Corporation [Mr. George Humphrey, U.S. Secretary of the Treasury, and Mr. R A. Butler, British Chancellor of the Exchequer, had announced their Governments' support for the projected International Finance Corporation after the ninth annual meeting of the International Bank and the International Monetary Fund—see 13984 A]

Flow of Private Capital.

By 48 votes to nil, with 8 abstentions, the Committee adopted a series of recommendations aimed at creating a favourable climate for the investment of private capital abroad. *Inter alia*, it was recommended that countries seeking to attract private capital investment should re-examine their domestic policies in order to improve the "investment climate"; that they should avoid unduly burdensome taxation and discrimination against foreign investments, and that they should provide potential investors with the fullest possible information about investment opportunities, conditions and prospects in the countries concerned

International Tax Problems.

A related resolution asked the Secretary-General to continue his studies on taxation imposed by capital-exporting and capital-importing countries on the income from investments abroad, particularly those made in under-developed countries. These studies would go to the Economic and Social Council, which would transmit the results of its deliberations to the General Assembly.

Land Reform.

It was recommended that member-States, where appropriate, should institute measures to encourage land ownership by the largest practicable number of persons living in rural areas, and pursue fiscal and investment policies to expand the areas under cultivation and improve agricultural production methods. It was also recommended that, when implementing land reform programmes in the process of developing their economies, member-States should 'observe the principle of equitable treatment in the economic, political and social fields, with a view to improving the conditions of the rural population."

Five-Year Plan for Resettlement of Refugees. By 40 votes to 5 (the Soviet group), with 10 abstentions (Nationalist China, Egypt, India, Iraq, Lebanon, Saudi Arabia, Siam, Syria, Yemen and Yugoslavia), the Social, Humanitarian and Cultural Committee adopted an eight-nation resolution designed to solve the refugee problem, based on the five-year plan presented to the Economic and Social Council by Dr. van Heuven Goedhart, the U N. High Commissioner for Refugees (see 13898 A). The resolution, sponsored by Australia, Belgium, Costa Rica, Ecuador, France, Netherlands, Turkey and U.S.A , proposed (1) that the U.N Negotiating Committee for Extra-Budgetary Funds should approach member- and non-member-States for voluntary contributions to a new Refugee Fund, the amount of which would be decided on the basis of proposals presented by the High Commissioner, (2) that the High Commissioner should undertake a programme designed to achieve a permanent solution for refugee problems within the period of his current mandate (i e. until Dec. 31, 1958); (3) that the High Commissioner himself should be authorized to appeal for funds; (4) that Governments co-operating with the High Commissioner should give assurances that they would assume full financial responsibility for any refugees still requiring aid when the programme ended.

The resolution was adopted by the full Assembly on Oct. 22 by 44 votes to 5 (the Soviet group), with 8 abstentions. The Soviet delegate charged the High Commissioner's Office with sending refugees and displaced persons to overseas countries so that they could be "exploited as cheap labour," instead of returning them to their homelands, whilst the Polish, Ukrainian and Byelorussian delegates said that direct repatriation of all refugees and D.P s was "the only fair solution to all refugee problems"

Dr. van Heuven Goedhart presented a report stating that, of the approximately 2,500,000 refugees under his mandate, some 350,000 had not been assimilated, including 88,000 refugees still living in camps in Europe—mainly in Austria, Germany, Greece and Italy. He believed that the problem could be solved within five years by setting up a $12,000,000 fund to help finance projects for land resettlement, vocational training, and small loans for the establishment of refugees in trade and commerce.

Definition of Aggression. By 43 votes to 3 (Australia, South Africa and the U.S.A.), with 11 abstentions, the Assembly approved on Dec. 4 a Lebanese-Syrian-Yemeni resolution proposing that a special 19-member committee should be set up to prepare a draft definition of aggression; that it should meet at U N Headquarters in 1956, and that its recommendations should be presented to the 11th session of the Assembly. The resolution had been adopted by the Legal Committee

Forced Labour. An 11-nation resolution was adopted on Dec 14 by the Social, Humanitarian and Cultural Committee (by 31 votes to 5, with 12 abstentions) condemning all forms of forced labour and calling for their abolition, endorsing the condemnation of forced labour systems already made by the Economic and Social Council, appealing to all Governments to abolish such systems; and requesting a further report on this subject by the U N. Secretary-General and the Director-General of the I L O It was adopted by the full Assembly on Dec. 17 by 41 votes to 5, with 12 abstentions.

Status of Women. The Social, Humanitarian and Cultural Committee adopted on Dec 16 a resolution aimed at speeding-up the abolition of antiquated customs or laws "affecting the human dignity of women" It urged all Governments to take appropriate measures "to abolish customs, ancient laws and practices relating to marriage and the family and affecting the human dignity of women" so as to ensure, *inter alia*, complete freedom in the choice of spouse, the proper recording of all marriages and divorces, and the abolition of such practices as child marriage and the "bride price." The resolution was adopted by 39 votes to nil, with Australia, Canada, Great Britain, India, Liberia, Pakistan, South Africa and the U.S A. abstaining The delegates of these countries explained that while their Governments agreed with the spirit of the resolution, they felt that such measures could not be taken rapidly without causing grave social disturbances. Certain countries with federal forms of government also pointed out that the matters covered by the resolution were in some cases not within Federal jurisdiction.

The resolution was adopted by the full Assembly on Dec 17 by 41 votes to 5, with 10 abstentions

U.N. Documents in Arabic. A proposal that certain official U.N. documents should be published in Arabic, in addition to the five official languages of the United Nations (English, French, Spanish, Russian, and Chinese), was endorsed by the Administrative and Budgetary Committee on Nov 19 by 42 votes to 2 (Norway and Sweden), with 8 abstentions, and by the full Assembly on Dec 4 by 47 votes to nil, with 10 abstentions Material to be published in Arabic under this resolution will include documents and reports of interest to the Near and Middle East.

Delegates advocating the adoption of this resolution referred to the increasing role of the Arab States in U N. affairs On the other hand, Hr Carl Hambro (Norway) believed that the U N should be content with fewer instead of more languages, that the resolution would lead to pressure for other languages to be adopted, and that such a development would mean a "fragmentation" of the U N 's work.

World Food Reserve. By 46 votes to nil, with several abstentions (including the U S A.), the Assembly adopted on Dec 14 a recommendation by its Economic and Financial Committee asking the U.N Food and Agriculture Organization (FAO) to report on what was being done to establish a World Food Reserve The resolution to this effect, originally introduced by Costa Rica was sponsored by that country and Bolivia, El Salvador, Indonesia, Saudi Arabia and Uruguay The U S delegate, whilst agreeing that the establishment of a World Food Reserve was ultimately desirable, believed that under present conditions it would duplicate the activities of the U N and its specialized agencies.

The Costa Rican delegate (Father Benjamin Nuñez) had proposed the establishment of a World Food Reserve "to assume responsibility for feeding the entire population of the world," and had drawn attention to the marked success in his own country of the establishment of a national food reserve Whereas there had formerly been considerable dislocation in Costa Rica between food supplies and their distribution, a national food reserve had now been in operation for six years and was working smoothly, with the whole-hearted support of the farmers and the population generally "Until we adopted this plan," Fr. Nuñez explained, "we had acute scarcities of some foodstuffs, followed the next year by surpluses Now we store rice, corn, *frijoles* (beans) and butter in our silos and refrigeration plants. Every producer knows that if he has a surplus of any of these crops, the Government will buy it from him at a fair price; therefore he does not curtail production If a scarcity develops in any one crop, the reserves are opened and these supplies are brought on to the market at a normal price."

U.N. Budget. By 47 votes to 5 (the Soviet group), with no abstentions, the Budgetary Committee approved on Nov. 18 a revised scale of assessments for the U N. Budget for 1955, involving an increase in the Soviet contribution from 14.15 to 15.08 per cent and a decrease in the British contribution from 9.80 to 8.85 per cent The U.S contribution remained unchanged at 33 3 per cent Slight increases (in each case under 0 50 per cent) were also recommended for Australia, Byelorussia, Canada, Ethiopia, France, Mexico, the Ukraine, and Venezuela, and slight decreases for Argentina, Bolivia, Brazil, Chile, Cuba, Czechoslovakia, Denmark, Egypt, India, Indonesia, Iraq, Pakistan, Persia, and Sweden The revised scale was approved by the full Assembly on Dec. 4 by 49 votes to 5, with 2 abstentions.

The U N Budget for 1955 was fixed at $46,821,300.

U.N. Employees. The General Assembly unanimously agreed on Dec. 17 that compensation, amounting to $179,420, should be paid to the 11 former U S. employees of the United Nations who had been dismissed after refusing to answer questions by Congressional

committees during loyalty investigations. The payment of such compensation had previously been approved by the U N Administrative Tribunal, the validity of the Tribunal's decision having been upheld by the International Court of Justice—see 13712 C, 13633 A.

During the discussions in the Budgetary Committee, the U S representative had strongly urged that decisions of the Administrative Tribunal should be subject to judicial review, and had introduced a resolution to this effect, co-sponsored by a number of other countries. Nevertheless, the Committee decided (by 28 votes to 24, with 4 abstentions) not to endorse the principle of judicial review but, instead, to ask the Assembly to set up a special committee to study the matter and to request member-States to forward their views on the subject. When the matter came before the full Assembly, however, this recommendation was reversed by 36 votes to 5, with 17 abstentions, and it was agreed in principle that future decisions of the Administrative Tribunal should be subject to judicial review. Senator J. William Fulbright (U S A.) announced that his Government though dissenting from the Administrative Tribunal's decision, would not oppose the compensation payments to the former U N employees.

Universal Children's Day. By 47 votes to nil, with four abstentions (Iraq, Netherlands, New Zealand and South Africa), the Social, Humanitarian and Cultural Committee adopted a resolution—submitted by India and Uruguay—on Nov. 30 recommending that all countries, beginning in 1956, should institute a Universal Children's Day, which would be observed as a day of 'world-wide understanding and fraternity between children' and which would lay stress on the United Nations' work for children. The resolution, which was subsequently adopted by the General Assembly, invited "cultural, professional, trade union, workers' and social welfare organizations" to co-operate actively in the celebration of Children's Day, requested UNICEF (the U.N. Children's Fund) and UNESCO to promote its observance, and asked Governments to observe Children's Day on a date that each Government considered appropriate. The Dutch and New Zealand delegates abstained from voting because they considered that the institution of such a day should be left to the discretion of the private voluntary organizations concerned.

The 60 member-countries unanimously agreed to hold a tenth anniversary meeting of the General Assembly from July 20-26 in San Francisco, where the U.N. Charter was signed ten years ago.—(United Nations Review, New York - U.N. Information Centre, London) **(Prev. rep. 13993 A.)**

A. UNITED KINGDOM. — Increase in Bank Rate.

The Bank of England announced on Jan. 27 that the Bank Rate would be raised from 3 to 3½ per cent, the level at which it had stood on May 13, 1954.

Authoritative press comment stated that the decision to increase the Bank Rate, taken with the concurrence of the Government, had been due to the following factors: (*a*) the increase in market rates for long-term commercial and Treasury bills during the last two months, and the persistent weakness of gilt-edged securities; (*b*) signs of inflationary tendencies which had been apparent since the autumn of 1954 and had persisted in recent months, combined with a boom on the Stock Exchange, (*c*) the persistent weakness of sterling in foreign exchange markets beyond the normal period of seasonal pressure. The relatively small increase in the Bank Rate was therefore interpreted as a means of "applying the brake" gently to the signs of incipient inflation; of putting a curb on speculative activity on the Stock Exchange, and, by making money rates in London dearer, of attracting funds from abroad, thus increasing the demand for sterling.

The use of the Bank Rate as an active instrument of monetary control had been restored during the dollar crisis late in 1951, when the rate was raised (on Nov. 8, 1951) from 2 to 2½ per cent. It was further raised to 4 per cent on March 11, 1952, reduced to 3½ per cent on Sept. 17, 1953, and reduced to 3 per cent on May 13, 1954.—(Financial Times) **(13557 A.)**

B. FRANCE. — Socialist Party. - Expulsion of Opponents of Paris Agreements.

The National Executive of the French Socialist Party decided on Jan. 20, after an all-night session, to expel 16 Socialist deputies from the party because of their votes against the ratification of the Paris agreements in the recent National Assembly debate, contrary to the official party policy. Two other Socialist deputies (MM. Lejeune and Lapie) who also voted against ratification had been expelled previously (see 13859 A; 13767 A). The 16 deputies, who included M. Naegelen (a former Governor-General of Algeria and a prominent party member), were given the right to appeal against the Executive's decision to a special party congress which was called for Feb. 5-6.

The Executive's decision reduced the strength of the Socialist Party—hitherto the largest in the National Assembly—from 104 to 88, and thus left the Communists, with 94 deputies, as the strongest single party group.—(Le Monde, Paris) **(Prev. rep. 13891 B; 13859 A; Assembly Debate, 13965 A.)**

C. CUBA. — Outlawing of Communism.

A Bill outlawing Communism in all its forms was passed by the Cuban Government on Jan. 18. (New York Times)

D. NORWAY.—Resignation of Mr. Oscar Torp. - New Labour Government formed by Mr. Gerhardsen.

Mr. Oscar Torp, the Prime Minister of Norway, tendered his resignation on Jan. 14 to King Haakon, who called upon Mr Einar Gerhardsen (Mr. Torp's predecessor in the Premiership, and since then leader of the Parliamentary Labour Party) to form a new Cabinet. At a press conference after his resignation, Mr. Torp pointed out that he and many other Ministers of the Labour Government had held uninterrupted office for the past 20 years, and that both he and they felt that changes in the Cabinet were desirable. At the same time he emphasized that there were no differences in the Government or the Labour Party on the main lines of Norway's defence or foreign policy.

Although no official statement was issued as to the reasons for Mr. Torp's resignation, the Government had for some time been criticized on the grounds that it had not succeeded in checking inflationary tendencies, in reducing Norway's adverse trade balance or in stabilizing wages and prices.

The membership of the new Labour Government was announced in Oslo on Jan. 21, as follows:

Mr. Einar Gerhardsen	Prime Minister.
Dr. Halvard Lange	Foreign Affairs.
*Mr. Jens Chr. Hauge	Justice.
*Mr. Mons Lid	Finance.
Mr. Nils Handal	Defence.
Mr. Ulrik Olsen	Municipal Affairs.
*Mr. Olav Meisdalshagen	Agriculture.
Fru Rakel Seweriin	Social Affairs.
Professor Birger Birgensen	Education and Church Affairs.
Mr. Gustav Sjaastad	Industry.
*Mr. Arne Skaug	Trade.
*Mr. Kolbjorn Varmann	Communications.
*Mr. Nils Lyso	Fisheries.

* New Ministers.

Six former Ministers left the Cabinet in addition to Mr Torp—Mr. Nordbo, who was succeeded as Minister of Agriculture by Mr Meisdalshagen (Finance Minister in the former Gerhardsen Cabinet), Mr. Kai Knudsen, the former Defence Minister, who was succeeded by Mr Handal (formerly Minister for Industry); Mr Langhelle, who was succeeded at the Ministry of Trade by Mr Skaug, Mr Bratelli, whose portfolio of Finance was taken over by Mr. Lid, Mr. Pettersen, whose portfolio of Communications was taken over by Mr. Varmann; and Mr. Holt, who was succeeded as Minister for Fisheries by Mr Lysō. Dr. Halvard Lange, Fru Seweriin (the only woman member of the Norwegian Cabinet) and Professor Birgensen retained their former portfolios, whilst Mr. Sjaastad, formerly Minister of Justice, became Minister for Industry. The new Minister of Justice, Mr. Hauge, had held the portfolio of Defence when the Torp Cabinet was formed in 1951, but subsequently left the Government.

Mr. Einar Gerhardsen had been Prime Minister from 1945 to November 1951, when he relinquished the Premiership to Mr. Oscar Torp for reasons of health. It was announced that Mr. Torp would become President of the Storting.
(Aftenposten, Oslo) **(Prev. rep. 13623 E; 13258 B; 11840 A.)**

E. AUSTRALIA. — Completion of First Stage of Snowy Mountains Hydro-electric Scheme.

The Guthega dam, tunnel and power-station on the Snowy River, the first major stage of the Snowy Mountains hydro-electric project to be completed, was handed over to the Snowy Mountains Hydro-electric Authority on Jan. 7 by the Norwegian contractors responsible for the work (Selmer Engineering Proprietary Ltd.). Started in 1951 and built at a cost of over £7,000,000, the work consisted of a gravitation dam with a capacity of 1,150 acre-feet, a 60,000-kilowatt power-station, and a three-mile tunnel linking them through which the water falls 800 ft. to the turbines. The new power-station was expected to start supplying electricity to New South Wales in about a month.—(Australian News Bureau) **(13568 B.)**

F. SOUTH AFRICA. — Gold and Sterling Reserves.

South Africa's gold holdings, which had remained fairly constant throughout 1953 at about £62,000,000, rose slowly during the first nine months of 1954 to about £70,000,000, at which level they remained during the final quarter. Sterling holdings, on the other hand, more than recovered the decline which they had experienced in 1953, after rising gradually in the early months of the year, they fluctuated between £39,000,000 and £47,000,000 from May to October before rising steeply to over £70,000,000 in the last two months. On Dec. 31 the reserves stood at £145,601,000, comprising gold reserves of £70,563,000, sterling holdings of £72,007,000, and assets outside the Union of £3,031,000.
(Cape Times - Financial Times) **(Prev. rep. 13492 B.)**

A. EUROPEAN PAYMENTS UNION. — Settlements in Second Half of 1954. - Austrian Currency Concessions. - Benelux Agreement on Capital Transfers. - Increased French, West German, and Swedish Trade Liberalization. - Freeing of West German Blocked Mark Accounts. - Relaxation of Dutch Foreign Exchange Controls. - Turkish Import Restrictions.

Details are given in the following table of the net surpluses or deficits (in millions of units of account) incurred by members of the E.P.U. during the second half of 1954, the gold repayment instalments made during the same months in accordance with the bilateral arrangements for reducing outstanding debts (see 13378 A); and the cumulative accounting position of each country at the end of December after taking into account (*a*) the surpluses or deficits incurred and (*b*) the adjustments made by doubling the amount of the gold repayment instalments in order to keep the cumulative accounting position equal to twice the amount of credit outstanding.

	Net monthly surplus (+) or deficit (−)						Credit repaid by (+) or to (−) the member reflecting bilateral amortization instalments						Cumulative accounting surplus (+) or deficit (−) from July 1, 1950, to Dec 31, 1954‡

§ Iceland made initial repayments totalling 1 400 000 units of account in the operations for December, 1954, to Belgium-Luxemburg, Germany, Netherlands and Switzerland, similar to those made and received in the operations for July 1954 by the other countries shown in the table. A further 4,000,000 units of account is covered by bilateral amortization agreements between Iceland and the four creditor countries.

† Including 21,000,000 units of account (£7,500,000) payable as an annual instalment to Germany but offset by the same amount due from Germany in settlement of post-war debts to the United Kingdom.

‡ Equal to double the amount of credit outstanding except as follows: (*a*) Greece . 54,800,000 units of account settled fully in gold or dollars under Art. 13(*a*) outside her debtor quota, which is frozen at zero, (*b*) Turkey: 60,000,000 units of debtor quota utilized, and 170,300,000 settled fully in gold or dollars under Art. 13(*a*) outside her debtor quota.

* Not including the 100 per cent gold payments by France for deficits beyond her quota up to June 30, 1954, which are outside the cumulative accounting position and which are recoverable by France if she has a net surplus for the period after June 30, 1954. Of the total of such payments (369,400,000 units), 18,100,000 units were repaid up to December 1954, leaving 351,300,000 units still recoverable.

General Note. In addition to taking into account current operations and adjustments made in connexion with the bilateral repayment instalments, the cumulative accounting position allows for (*a*) the net use of existing resources, initial balances, and special resources; (*b*) interest payments or receipts on credit received from or granted to the E.P.U.; (*c*) the special settlements of the Belgium-Luxemburg and Portuguese surpluses as at July 1, 1952; (*d*) the immediate gold repayments made at the time of the renewal of the E.P U. on July 1, 1954; (*e*) the initial repayments made by Iceland in the December 1954 operations (see footnote above); and (*f*) the first two repayments of the special credit granted by Belgium-Luxemburg.

Further details of the position of various countries, and of financial and economic measures taken by them during the period under review, are given below.

Austria. The continued improvement in the Austrian exchange position enabled the Austrian Government to announce several measures relaxing exchange controls. A decree of Aug. 16

(*a*) abolished the requirement that holdings of gold or E.P.U. currencies had to be declared and offered for sale to the Austrian National Bank, though trade in gold remained confined to authorized institutions, and E P.U. currencies had to be kept in foreign exchange accounts with the Austrian National Bank or with foreign exchange dealers;

(*b*) permitted the conversion of E P.U. currencies at the officially quoted rates into any other E P.U. currencies;

(*c*) authorized Austrian residents to use, without specific permits, their E.P U. currency accounts for payments abroad of any kind up to the equivalent of 500 schillings at a time, or to buy such currencies up to the same amount, the only restriction being that payments must not be used to build up currency holdings abroad;

(*d*) authorized the free use of E.P.U currencies beyond the 500-schilling limit to pay for any imports into Austria from E P.U. countries, provided that the imports had been bought on the importer's own account.

The restrictions were still further relaxed on Sept. 16, when the 500-schilling limit was abolished and the purchase or transfer of E.P.U. currencies was authorized for any payments which might be transacted through the E P.U. including amortization payments on loans but excluding all other kinds of capital transfers.

The Austrian Minister for Trade Reconstruction, Dr. Illig, announced on Oct. 19 that the liberalization percentage for imports from other O.E.E C. countries would be raised from 75 per cent to 82-83 per cent and would apply to all the three main groups (raw materials, agricultural products, and manufactured goods). The amended percentage came into operation on Dec 1, 1954.

Belgium-Luxemburg. A new agreement signed by the Benelux countries came into force on July 16 allowing the free transfer of capital between the monetary areas of Belgium-Luxemburg on the one hand and of the Netherlands on the other As a result of the agreement, Belgian capital in Holland—hitherto blocked under Dutch exchange control regulations—again became eligible for transfer to Belgium, and it became possible for one country to issue loans in the capital market of the other To prevent capital transactions from affecting the E P U. positions of the two monetary areas, it was agreed (*a*) that they would be carried out through specially-established free markets; (*b*) that payments for current foreign trade transactions would not be allowed to take place through these free markets; and (*c*) that the Netherlands Bank and the National Bank of Belgium might intervene in the free markets in order to avoid disorderly fluctuations between the free market exchange rates and those governed by established par values under the I M F. articles of agreement.

It was announced on Sept 17 that exporters in Belgium-Luxemburg receiving foreign exchange would in future be allowed to keep it in their own bank accounts and use it for permitted transactions calling for the same currency; by building up their own holdings of foreign currency they would thus be able to avoid the effects of fluctuations in the foreign exchange rates.

Denmark. The continued deterioration in the Danish foreign exchange reserves led to a number of remedial measures being taken by the Government, including the raising of the Bank Rate from 4½ to 5½ per cent on June 2. [A separate article on these developments will be given in a later issue.]

France. In accordance with the earlier undertakings of the French Government to extend the liberalization of French imports from other O E E.C. countries (see 13727 A), the liberalized trade percentage was raised from 52 per cent to 57 per cent on Sept. 30, to 62 7 per cent on Oct. 20, and to 65 per cent on Nov. 8. A further announcement of Dec. 1 stated that certain other import quotas would be abolished early in January 1955, bringing the extent of liberalization to 75 per cent, however, following a disagreement over whether or not certain farm products should be freed, this was eventually reduced to 73 per cent The list of goods affected was published on Jan. 11.

Goods affected by the first measure included iron and steel tubes, nickel and nickel alloys, leather, agricultural machinery, certain machine tools, synthetic fibres, a number of chemical products, and certain types of cotton yarn At the second stage, quantitative import restrictions were lifted on generators and electric motors, various textile and printing machines, cranes, paper and cardboard, shoes, certain types of clothing, paints and varnishes, quicksilver, etc. Certain leather goods and several kinds of timber were freed on Nov. 8, whilst the list published on Jan. 11 included some types of furniture, semi-finished aluminium products, books, hemp and hemp yarn, parts of motor-car chassis, and calculating machines.

All the freed goods were initially subjected to the special import duty of either 10 or 15 per cent (see 13727 A), but ladies' handbags, certain linen and cotton threads, and some special kinds of steel were subsequently exempted. A decree published in the *Journal Officiel* on Nov. 17 reduced the import duties on most of the remaining goods from 15 to 11 per cent and from 10 to 7 per cent. Most of the goods freed on Jan. 11, however, were subjected to a duty of 15 per cent.

Western Germany. With a view to reducing Germany's large and persistent surpluses in the E P U., it was announced on June 29 that, as from Sept. 1, tariff reductions ranging from 10 to 33 per cent would be made on 758 industrial items out of a total of 3,600, goods affected included motor cars, electric stoves, office equipment, toys, matches, and artificial resins On July 5 it was further announced that, from Aug 1, import licences would no longer be required for about 70 per cent of German imports—i.e. all liberalized goods and all those hitherto imported under the "open licence" system

Dr Schäffer, the Federal Minister of Finance, stated on July 28 that German export incentives in the form of income-tax deductions would be discontinued as from Dec. 31, 1955.

The *Bank Deutscher Länder* announced on Sept 14 that, as from Sept 16, all blocked DM accounts would, with immediate effect, become freely transferable, except into dollars, and would be renamed "liberalized capital accounts" Holders of such accounts would thus be able to use them in any of the following ways .

(*a*) transfer them directly abroad, except to dollar countries ;

(*b*) pay them into "restricted convertibility accounts" which would also be freely transferable, except to dollar areas ;

(*c*) transfer them into "liberalized capital accounts" of other foreigners (i e sell them),

(*d*) use them inside Germany for travel expenses, support of relatives and friends, etc ,

(*e*) use them for investment in Germany, which would now be easier inasmuch as loans maturing after a period of at least five years and yielding a rate of interest of not more than 4½ per cent would no longer require any individual authorization.

The statement added that henceforth no more distinction would be made in the treatment afforded to original holdings and acquired (i e purchased) holdings of blocked marks. It was stated in the Press that the amount of blocked marks involved was theoretically the total of foreign-owned assets (about DM 11,000,000,000) and restitution claims arising from the Nazi regime (about DM. 4,000 000,000 within 10 years) At the same time, however, it was pointed out that experience had shown that, of the number of D-marks previously entitled to be transferred, only a relatively small proportion had in fact been withdrawn

Greece. It was announced in Athens on Aug 8 that at the close of the fiscal year ended June 30, in which a large measure of trade liberalization had been introduced, the Greek balance-of-payments account showed a deficit of only $16 000,000 (£5,700,000)—an amount which was more than covered by U.S aid Exchange reserves over the year had increased by $29,000,000, a fact which was ascribed to the checking of inflationary pressure, an increase in the production of wheat, rice and cotton, the fall of international prices, and the fact that no exchange reserves had been used for buying gold.

Netherlands. In addition to the agreement with Belgium-Luxemburg which came into force on July 16 (see above), a number of other exchange control relaxations were announced by the Netherlands Bank. As from Aug. 9, Dutch foreign exchange banks were authorized to open free guilder accounts for non-residents from which all payments in guilders to residents, and in any currency to non-residents, might be made. On the same date the Canadian dollar and the Swiss franc were added to the currencies negotiable on the free exchange market

On Sept. 22 the Netherlands Bank announced that it was prepared to consider applications from Dutch residents wishing to buy foreign securities officially quoted in E.P U. countries, and also that Dutch residents would in future be allowed to dispose freely of balances of foreign currencies which they held abroad and which could not be transferred to Holland

Sweden. On Sept 24 the Swedish Ministry of Trade announced a list of commodities which could be freely imported from the dollar area after Oct. 1 The goods—which, valued at $698,400,000, accounted for 45 per cent of all Swedish imports in 1953—included nearly all chemical products, all paper other than newsprint, shoes, pottery and glassware, furs, leather goods, rubber and wood products, many kinds of dried fruit and canned goods, and practically all metal goods It was also announced that, for commodities still requiring an import licence, a more lenient policy would be applied.

Turkey. Because of the critical shortage of foreign exchange reserves, the Turkish Government announced a series of import restrictions on Sept. 22. All import licences awaiting the necessary foreign exchange were cancelled ; importers were required to obtain a certificate from Chambers of Commerce before applying to the Ministry of Commerce and Economy for a new licence ; and quantitative limits equivalent to a percentage of the goods imported by each importer in a selected post-war year (or, for new companies, based on their capital) were imposed. Restrictions on the transfer abroad of all capital amounting to more than £T500 were announced on Oct. 27.

United Kingdom. The U.K. surpluses (in sterling) of £9,442,500 in July and £5,602,857 in September, and the deficit of £8,338,214 in August, gave a net surplus during the third quarter of 1954 of £6,707,143. The surpluses of £4,937,857 in October and £1,842,500 in November, together with the deficit of £7,306,785 in December (taking into account an interest payment for credit outstanding since July 1, 1954), gave a net deficit of £526,428 during the fourth quarter. Each of the surpluses or deficits was settled half by the receipt or payment of gold from or to the E.P.U., and half by the reduction or increase of credit extended by the Union. As a result of these transactions and of the special repayments made each month in accordance with the bilateral arrangements agreed when the E.P.U. agreement was renewed, the total U.K. debt to the Union, which amounted to £138,082,143 on July 1, 1954 (i.e. half the cumulative accounting deficit), had been reduced to £122,653,214 by Dec. 31.

The British Board of Trade announced on Nov. 11 that import quotas would be abolished on a number of items from O.E.E C. countries, including manufactured drugs, films and plastic goods, musical instruments, and certain fruit juices. It was pointed out, however, that these concessions—some of which would come into force on Nov. 12, 1954, and the rest on Jan. 1, 1955—would not be sufficient to raise the British liberalization percentage above the existing level of 83 per cent. (O.E.E.C. Information Division, Paris - Times - Financial Times - Le Monde, Paris - Neue Zurcher Zeitung - Wiener Zeitung - Netherlands News Agency) **(Prev. rep. 13778 A.)**

A. UNITED KINGDOM. — Twickenham and North Edinburgh By-elections.

The Twickenham by-election, caused by the death of Sir Edward Keeling (Conservative), was held on Jan. 25 with the following result :

Cooke, R. Gresham (Conservative)	23,075
Pitman, Robert (Labour)	12,953
No change. Conservative majority ..	10,122

The figures at the general election were : Sir Edward (then Mr.) Keeling (C) 39,080, Miss Ethel Chipchase (Lab) 23,871—Conservative majority, 15,209. The Conservative candidate received 64.05 per cent of the votes in the by-election and the Labour candidate 35.95 per cent, compared with general election percentages of 62.08 and 37 92 per cent respectively ; the Conservative proportion thus rose by 1.97 per cent The percentage of the electorate voting in the by-election was 47 31, compared with 81 28 per cent at the general election The total electorate was 76,174, compared with 77,444 in 1951

Mr. Gresham Cooke (48) is director of the Society of Motor Manufacturers and Traders.

The North Edinburgh by-election, caused by the appointment of Mr. J. L. Clyde, Q.C. (Conservative)—now Lord Clyde—as Lord Justice-General and President of the Court of Session in Scotland (see 13982 C), was held on Jan. 27 with the following result :

Milligan, W. R. (Conservative)	11,413
Scott, Robert (Labour)	7,799
No change. Conservative majority ..	3,614

The figures at the general election were : J. L. Clyde (C.) 20,836, E. G. Willis (Lab) 14,604—Conservative majority, 6,232. The Conservative candidate received 59 40 per cent of the votes in the by-election and the Labour candidate 40.60 per cent, compared with general election percentages of 58 79 and 41.21 per cent respectively ; the Conservative proportion thus rose by 0.61 per cent. The percentage of the electorate voting in the by-election was 46.35, compared with 80 01 per cent at the general election. The total electorate was 41,446, compared with 44,294 in 1951.

Mr. Milligan, Q C. (56), formerly Solicitor-General for Scotland, had been appointed Lord Advocate on Dec. 30 in succession to Mr. J. L Clyde (see 13982 C).

The contests brought the number of by-elections during the present Parliament to 46.—(Times - The Scotsman, Edinburgh) **(Prev. rep. By-elections, 1 3999 B.)**

B. INDIA. — Opening of National Defence Academy.

The Indian National Defence Academy, built as a memorial to Indians who fell in the Second World War, was formally opened by the Chief Minister of Bombay (Mr. Morarji Desai) on Jan. 16 in the presence of the Commanders-in-Chief of the Armed Forces (General Rajendrasinhji, Admiral Sir Mark Pizey, and Air Marshal Mookerjee). Situated at Khadakvasla, 11 miles from Poona, the Academy will be an inter-Service institution and will provide a common three-year course for 1,500 cadets of the Indian Army, Navy, and Air Force. At the end of the three-year period cadets will receive specialized training with their respective Service establishments. Major-General Habibullah was appointed the first Commandant of the Academy, whose creation had been decided upon in 1945. (The Statesman, Calcutta - Times of India, Bombay - Indian High Commissioner's Office, London) **(Prev. rep. 7307 B.)**

C. CHINA. — New Ambassador in Moscow.

It was announced in Peking on Jan. 13 that Mr. Liu Hsiao had been appointed Chinese Ambassador to the Soviet Union in succession to Mr. Chang Wen-tien, who, it was stated, would return home to concentrate on his duties as Vice-Minister for Foreign Affairs. Mr. Hsiao, a prominent member of the Chinese Communist Party, was one of Mr. Chou En-lai's principal advisers at the Geneva Conference on Korea and Indo-China. (New York Times) **(Prev. rep. 13784 D.)**

A. YUGOSLAVIA. — Improvement in Relations with Soviet-bloc Countries. - Ending of Cominform Radio Campaign against Yugoslavia. - Trade Agreements with Soviet Union, Hungary, and Bulgaria.

The continued improvement in Yugoslav-Soviet relations in recent months was evidenced by the resumption of direct trade relations between the two countries, as well as by several steps taken by the Soviet Government *vis-à-vis* Yugoslavia.

A barter agreement ending the Soviet Union's six-year economic blockade of Yugoslavia was signed in Belgrade on Oct. 1, 1954, by a Soviet economic delegation and the Yugoslav Chamber of Foreign Trade.

An official Yugoslav spokesman stated that the agreement would be valid until the end of 1954 and that the Soviet Union would send Yugoslavia crude oil, cotton, manganese ore, anthracite, coal, and newsprint in return for meat, tobacco, ethyl alcohol, hemp, caustic soda, and calcium soda. He added that the Soviet Union had not been able to supply wheat, which Yugoslavia had asked for in view of her bad wheat harvest. It was subsequently announced in Belgrade that the total value of goods on either side would be $2,500,000.

The barter agreement with the Soviet Union had been preceded by similar barter arrangements with Hungary, Czechoslovakia, and Eastern Germany.

Following further negotiations in Moscow with a Yugoslav trade delegation, a Soviet-Yugoslav commercial and payments agreement for 1955 was signed on Jan. 5, 1955.

The agreement provided for Yugoslav exports of fresh and canned meat, tobacco, hemp, soda, and textile products, against Soviet exports of cotton, crude oil, petrol, newsprint, etc., the total exchanges of goods being valued at $20,000,000 on each side.

In the political sphere it was officially stated in Belgrade on Oct. 14, 1954, that Soviet jamming of Radio Belgrade's Russian-language broadcasts had ceased some days earlier. Moreover, the " Free Yugoslavia " radio station, whose broadcasts had been directed against President Tito's Government, had not been on the air since Sept. 29. [The " Free Yugoslavia " radio, which was staffed by *émigré* Yugoslav Communists who had remained in Moscow or who had subsequently escaped from Yugoslavia after that country's expulsion from the Cominform, relayed its broadcasts over a powerful transmitter which had been installed by the Russians at Temesvar, in western Rumania.]

On Oct. 15 it was announced in Belgrade that the Soviet Government had informed Yugoslavia that it was ready to agree to the return of a number of Yugoslav orphan cadets who had been sent for training to the Suvorov Military Academy in Moscow prior to Yugoslavia's break with the U.S.S.R. in 1948, and who had been detained in Russia ever since in spite of Yugoslav requests for their return. The actual number of young men involved was not known, but was stated to be at least 60, and probably higher.

A further indication of the improvement in mutual relations was given when M. Saburov (head of the Soviet Planning Department), speaking during the celebrations of the anniversary of the Bolshevik revolution on Nov. 6, appealed for " sincere friendship " between the Soviet Union and Yugoslavia and called for the " complete normalization " of their relations. This was followed on Nov. 28 by the presence of leading Soviet personalities at a reception at the Yugoslav Embassy in Moscow in honour of Yugoslavia's National Day, those present including M Malenkov, M. Molotov, Marshal Bulganin, and M. Khrushchev.

A barter agreement with Bulgaria, providing for exchanges worth about $500,000 on each side up to the end of 1954, was signed in Belgrade on Nov. 12, 1954, whilst a trade and payments agreement with Hungary, envisaging an exchange of goods worth $14,000,000 on each side during 1955, was signed on Jan. 14, 1955.

It was stated that Yugoslav exports to Hungary would comprise agricultural produce, tobacco, timber and timber products, chemicals, ores and metals, and machinery, whilst Hungary would export to Yugoslavia rolled steel products, various machinery, spare parts, chemicals, locomotives, and mining equipment. Discussions also took place about the use of Yugoslav railways and of sea and river ports for the transit of Hungarian goods

M. Nikolai Vujanovich, the first Yugoslav Ambassador accredited to Rumania since the resumption of diplomatic relations between the two countries, presented his credentials in Bucharest on Nov. 17.—(Tanjug Agency, Belgrade - Times - Manchester Guardian - Bulgarian News Bulletin, Sofia - Agerpres Agency, Bucharest) **(Prev. rep. Relations with Soviet Union, 13999 A; 13030 C; Bulgaria, Hungary, 13267 B; Rumania, 13764 B.)**

B. CEYLON. — New High Commissioner in India.

Sir Edwin Wijeyeratne, the new Ceylonese High Commissioner in India, presented credentials to President Prasad on Jan. 14.—(Ceylon Government Information Dept., Colombo) **(Prev. rep. 13396 E.)**

C. SCOTLAND. — Autonomous Electricity Authority for South of Scotland. - British Electricity Authority renamed Central Electricity Authority.

The Electricity Reorganization (Scotland) Bill, implementing the Government's policy of decentralizing the administration of the nationalized industries and of increasing Scottish control over Scottish affairs, was enacted on Nov. 25, 1954, after it had been given second readings in the House of Commons on Feb. 3, 1954 (by 285 votes to 255) and in the House of Lords on July 29, 1954. Its main provisions were :

(1) The functions previously exercised by the Minister of Fuel and Power in relation to the generation and distribution of electricity in Scotland would be vested in the Secretary of State for Scotland, with certain exceptions.

(2) A new autonomous body to be appointed by the Secretary of State for Scotland—the South of Scotland Electricity Board—would take over the functions of the British Electricity Authority in the South of Scotland from April 1, 1955, and would replace the existing S E Scotland and S.W. Scotland Electricity Boards. It would set up two executives, for the eastern and western parts of its area respectively, after Parliamentary approval had been obtained. General financial control and policy would remain with the Board, which was empowered to borrow up to £75,000,000 in addition to any temporary loans required for the settlement with the B E.A

(3) The North of Scotland Hydro-Electric Board would be released from its existing statutory obligations to obtain the approval of the British Electricity Authority before undertaking new constructional schemes

Mr. James Stuart (Secretary for Scotland), in moving the second reading, claimed that by substituting Scottish control of electricity supply for remote control from England, the Bill would ensure that responsibility was in the hands of those who knew the needs of Scottish consumers and were in constant touch with them. Opposition to the Bill was expressed by several Labour members, including **Mr. Woodburn,** who said that trade unionists feared that the creation of an autonomous authority for Southern Scotland would interfere with wage negotiations on a national basis; **Mr. J. Taylor,** who argued that Scottish Nationalists would regard it as " an unconditional surrender to their propaganda "; and **Mr. Hector McNeil,** who described the Bill as a " backdoor attack upon an efficient piece of nationalization."

In the House of Commons Committee stage (May 12) an amendment by Commander Charles Donaldson (Conservative) was agreed to, changing the name of the British Electricity Authority to " Central Electricity Authority " as from April 1, 1955. Commander Donaldson pointed out that the name " British Electricity Authority," which implied responsibility for electricity supplies throughout the United Kingdom, would no longer be appropriate after the Bill had come into force.

Mr. Stuart had announced on July 29, 1954, that when the Bill became law he intended to appoint Mr. J. S. Pickles and Sir Norman Duke, the chairmen of the South-West Scotland and South-East Scotland Electricity Boards, as chairman and deputy-chairman respectively of the new South of Scotland Electricity Board.—(Times - The Scotsman, Edinburgh - Glasgow Herald) **(Prev. rep. Electricity Bill, 8457 A; B.E.A. 1952-53 Report, 13181 A; Royal Commission on Scottish Affairs, Recommendations, 13904 A; North of Scotland Hydro-Electric Board, 1951 Report, 12552 A.)**

D. COLOMBO PLAN. — Canadian Financing of Assam Hydro-electric Project.

It was announced in New Delhi on Jan. 11 that letters had been exchanged between Mr. C. D. Deshmukh (Indian Finance Minister) and Mr. Escott Reid (Canadian High Commissioner in India) providing the basis of an agreement under which Canada would assist India in financing the Umtru hydro-electric project, which is part of the first Indian Five-Year Plan and is expected to cost Rs. 15,000,000 (£1,125,000).

The project, situated about 20 miles from Gauhati on the road to Shillong (the capital of Assam), is expected to be completed by 1956 and to benefit an area of approximately 1,000 square miles. The Canadian contribution—made under the Colombo Plan—will consist of engineering services and electrical equipment to the value of Can.$1,200,000 (Rs. 5,000,000), and the rupee equivalent of Can.$2,100,000 which will become available from the sale of Canadian raw materials supplied to India under the Colombo Plan.
(The Statesman, Calcutta - The Hindu, Madras)
(Prev. rep. 12851 A; Colombo Plan, 13956 A.)

E. AUSTRIA. — Cabinet Appointment.

It was announced in Vienna on Jan. 15 that Herr Hans Kapfer, a departmental head in the Ministry of Justice, had been appointed Minister of Justice in succession to Dr. Josef Gero, who had died on December 28. Herr Kapfer, like his predecessor, belongs to no political party. (Wiener Zeitung)
(Prev. rep. Cabinet, 13909 D.)

JANUARY 29—FEBRUARY 5, 1955

A CHINA - UNITED STATES. — Intensification of Communist Air Attacks on Tachen Islands. - Capture of Yikiangshan Island. - U.S. Support for Cease-fire Efforts by United Nations. - U.N. Intervention opposed by Mr. Chou En-lai. - President Eisenhower's Request for Congressional Authority to use American Forces for Defence of Formosa and the Pescadores. - Congressional Approval. - Sir Anthony Eden's Statement on Formosa Dispute. - New Zealand Initiative in U.N. for Cease-fire. - Communist China refuses Invitation to attend Security Council Discussions.

An international crisis broke out in the Formosa Straits in the middle of January, its stages being described below under cross-headings.

Capture of Yikiangshan Island. - Intensification of Communist Air Attacks on Tachen Islands.

The small Nationalist-held island of Yikiangshan, eight miles north of the Tachen Islands and some 200 miles north of Formosa, was captured on Jan. 18 by Chinese Communist forces who landed from an invasion fleet of about 70 vessels, including 20 warships, a number of motorized junks, and landing-craft. Although Peking radio claimed that the island had been captured within two hours, it was subsequently stated in Formosa that the small garrison, though greatly outnumbered by the invading force, had held out for several days before resistance ceased.

The invasion of Yikiangshan had been preceded by a Communist air attack—the heaviest so far launched against the offshore islands—in which 60 planes dropped over 200 bombs. Still heavier bombing raids were launched from the mainland on Jan. 19 against the Tachen Islands, which were attacked by some 200 Communist aircraft. The Nationalist Air Force carried out incessant retaliatory attacks on coastal military objectives, particularly in the Amoy and Swatow areas, on Communist shipping, and on coastal islands under Communist control, including Yikiangshan. In one of these attacks the British ship *Edendale* (1,700 gross tons) was sunk on Jan. 19 while unloading general cargo at Swatow; there were, however, no casualties among her crew of 51. It was announced in London that a strong protest would be lodged with the Nationalist Government, and that a claim for compensation would be presented if desired by the ship's owners (the Wing Li Steam Navigation Company, of Hong Kong).

President Eisenhower's Support for U.N. Intervention for Cease-fire.

In Washington, President Eisenhower stated at his press conference on Jan. 19 that he knew of no military authority which considered either Yikiangshan or the neighbouring Tachen Islands to be essential to the defence of Formosa and the Pescadores. He added, however, that the Tachens, which were manned by Nationalist regular troops, were more important defensively than Yikiangshan, which had been defended only by guerrillas, and that they had value as an outpost for Formosa. In reply to a question, the President said that he would like to see the United Nations try to arrange a cease-fire between the Nationalists and the Communists. The U.S. Secretary of State, Mr. Dulles, had also said on the previous day that the U.S. Government would be "not unsympathetic" to a U.N. attempt to bring about a cease-fire, and that such an objective would be in line with American policy.

Chinese Communist Opposition to U.N. Intervention. - Statement by Mr. Chou En-Lai.

In Peking, however, the Chinese Communist Premier and Foreign Minister (Mr. Chou En-lai) issued a statement on Jan. 24 declaring that his Government were determined to "liberate" Formosa, that it could not agree to a cease-fire, and that it could not recognize the right of the United Nations or of any foreign country "to intervene in the Chinese people's liberation" of Formosa. His statement, as broadcast by Peking radio, was as follows:

"The Government of the Chinese People's Republic has repeatedly declared to the world that the Chinese people are determined to liberate their own territory of Taiwan (Formosa). Since the successful liberation of Yikiangshan Island, the U.S. Government has . . . engineered a conspiracy for a so-called cease-fire through United Nations intervention in the Chinese people's liberation of Taiwan. Taiwan is an inalienable part of China's territory, and its liberation is a matter of China's sovereignty and internal affairs. No outside interference can be tolerated.

"Article 2, paragraph 7, of the U.N. Charter explicitly states. 'Nothing in the Charter shall authorize the U.N. to intervene in matters which are essentially within the domestic jurisdiction of any State, or shall require the members to submit such matters to settlement under the Charter.' Therefore, neither the U.N. nor any foreign country has the right to intervene in the liberation of Taiwan. The Government of the People's Republic of China absolutely cannot agree to a so-called cease-fire with the traitorous Chiang Kai-shek clique, which has been repudiated by the Chinese people.

"The exercise by the Chinese people of their sovereign rights in liberating China's mainland and many coastal islands has never caused tension in the Far East. The present tension in the Taiwan area can only be attributed to the fact that the U.S. Government has occupied Taiwan, shielded the Chiang Kai-shek clique, and incessantly directed subversive activities and war threats against the People's Republic of China. The so-called mutual security treaty concluded between the U.S. Government and the Chiang Kai-shek clique has further heightened this tension and is seriously threatening peace in the Far East. . . . The tension will be eliminated as a matter of course if the U.S. drops its intervention in China's internal affairs and withdraws its armed forces from Taiwan and the Taiwan Straits. . . ."

(*Economist*)

President Eisenhower's Message to Congress.

On Jan. 24 President Eisenhower sent a special message to Congress requesting authority—in his capacity of Commander-in-Chief of the U.S. forces—to take such military action as might be necessary to repel any Chinese Communist aggression in the area of the Formosa Straits, and specifically to assure the security of Formosa and the Pescadores. The President's message was worded as follows:

"The most important objective of our nation's foreign policy is to safeguard the security of the United States by establishing and preserving a just and honourable peace. In the Western Pacific, a situation is developing in the Formosa Straits that seriously imperils the peace and our security.

"Since the end of the Japanese hostilities in 1945, Formosa and the Pescadores have been in the friendly hands of our loyal ally, the Republic of China [i.e. the Chinese Nationalist Government]. We have recognized that it was important that these islands should remain in friendly hands. In unfriendly hands, Formosa and the Pescadores would seriously dislocate the existing, even if unstable, balance of moral, economic and military forces upon which the peace of the Pacific depends. It would create a breach in the island chain of the Western Pacific that constitutes, for the U.S.A. and other free nations, the geographical backbone of their security structure in that ocean. In addition, this breach would interrupt north-south communications between other important elements of that barrier, and damage the economic life of countries friendly to us.

"The United States and the friendly Government of the Republic of China, and indeed all the free nations, have a common interest that Formosa and the Pescadores should not fall into the control of aggressive Communist forces. Influenced by such conditions, our Government was prompt, when the Communists committed aggression in Korea in June 1950, to direct our Seventh Fleet to defend Formosa from possible invasion from the Communist mainland.

"These considerations are still valid. The Seventh Fleet continues under Presidential directive to carry out that defensive mission. We also provide military and economic support to the Chinese Nationalist Government, and we co-operate in every proper and feasible way with that Government in order to promote its security and stability. All of these military and related activities will be

continued In addition, there was signed last December a mutual defence treaty between this Government and the Republic of China covering Formosa and the neighbouring Pescadores. It is a treaty of purely defensive character That treaty is now before the U.S Senate.

" Meanwhile, Communist China has pursued a series of provocative political and military actions establishing a pattern of aggressive purpose. That purpose, they proclaim, is the conquest of Formosa. In September 1954 the Chinese Communists opened up heavy artillery fire upon Quemoy Island, one of the natural approaches to Formosa, which had for several years been under the uncontested control of the Republic of China. Then came air attacks of mounting intensity against other free China islands, notably those in the vicinity of the Tachen group to the north of Formosa. One small island [Yikiangshan] was seized last week by air and amphibious operations after a gallant few fought bravely for days against overwhelming odds There have been recent heavy air attacks and artillery fire against the main Tachen Islands themselves.

" The Chinese Communists themselves assert that these attacks are a prelude to the conquest of Formosa. For example, after the fall of Yikiangshan, Peking radio said that it showed a ' determined will to fight for the liberation of Taiwan [Formosa] Our people will use all their strength to fulfil that task.'

" Clearly, this existing and developing situation poses a serious danger to the security of our country and of the entire Pacific area and, indeed, to the peace of the world. We believe that the situation is one for appropriate action by the United Nations under its Charter, for the purpose of ending the present hostilities in that area. We would welcome assumption of such jurisdiction by that body.

" Meanwhile, the situation has become sufficiently critical to impel me, without awaiting action by the United Nations, to ask the Congress to participate now, by specific resolution, in measures designed to improve the prospects for peace. These measures would contemplate the use of the armed forces of the United States, if necessary, to assure the security of Formosa and the Pescadores. The actions that the U.S A. must be ready to undertake are of various kinds For example, we must be ready to assist the Republic of China to re-deploy and consolidate its forces if it should so desire.

" Some of these forces are scattered throughout the smaller off-shore islands as a result of historical rather than military reasons directly related to defending Formosa Because of the air situation in the area, withdrawals for the purpose of redeployment of Chinese Nationalist forces would be impractical without the assistance of the armed forces of the United States. Moreover, we must be alert to any concentration or employment of Chinese Communist forces obviously undertaken to facilitate attack upon Formosa, and be prepared to take appropriate military action

" I do not suggest that the United States enlarge its defensive obligations beyond Formosa and the Pescadores, as provided in the treaty now awaiting ratification. But, unhappily, the danger of armed attack directed against that area compels us to take into account closely related localities and actions which, under current conditions, might determine the failure or success of such an attack. The authority that may be accorded by Congress would be used only in situations which are recognizable as parts of, or definite preliminaries to, an attack against the main positions of Formosa and the Pescadores

" Authority for some of the actions which might be required would be inherent in the authority of the Commander-in-Chief. Until Congress can act, I would not hesitate, so far as my Constitutional powers extend, to take whatever emergency action might be forced upon us in order to protect the rights and security of the United States. However, a suitable Congressional resolution would clearly and publicly establish the authority of the President as C.-in-C. to employ the armed forces of this nation promptly and effectively for the purpose indicated if, in his judgment, it became necessary. It would make clear the unified and serious intentions of our Government, our Congress, and our people Thus it will reduce the possibility that the Chinese Communists, misjudging our firm purpose and national unity, might be disposed to challenge the position of the U.S.A. and precipitate a major crisis which even they would neither anticipate nor desire.

" In the interest of peace, therefore, the United States must remove any doubt regarding our readiness to fight, if necessary, to preserve the vital stake of the free world in a free Formosa, and to engage in whatever operations may be required to carry out that purpose. This would require not only Presidential action but also Congressional action. In a situation such as now confronts us, and under modern conditions of warfare, it would not be prudent to await the emergency before coming to Congress. Then it might be too late. Already the warning signals are flying.

" I believe that the threatening aspects of the present situation, if resolutely faced, may be temporary in character. Consequently, I recommend that the resolution expire as soon as the President is able to report to Congress that the peace and security of the area are reasonably assured by international conditions, resulting from U.N. action or otherwise. Again I say that we would welcome action by the U.N. which might, in fact, bring an end to the active hostilities in that area.

" This critical situation has been created by the choice of the Chinese Communists, not by us. Their offensive military intent has been flaunted to the whole world by words and deeds. Just as they created the situation, so they can end it if they choose

" What we are now seeking is primarily to clarify present policy and to unite in its application. We are not establishing a new policy. Consequently, my recommendations do not call for an increase in the U.S. armed forces, or any acceleration in military procurement or levels of defence production. If any unforeseen emergency arises requiring any change, I will communicate with Congress I hope, however, that the effect of an appropriate Congressional resolution will be to calm the situation rather than to create further conflict

" One final point The action I request is, of course, no substitute for the treaty with the Republic of China which we have signed and which I have transmitted to the Senate Indeed, present circumstances make it more than ever important that this basic agreement should be promptly brought into force, as a solemn evidence of our determination to stand fast in the agreed treaty area and to thwart all attacks directed against it If delay should make us appear indecisive in this basic respect, the pressures and dangers would surely mount

" Our purpose is peace That cause will be served if . . . we demonstrate our unity and determination In all that we do we shall remain faithful to our obligations as a member of the U N. to be ready to settle our international disputes by peaceful means in such a manner that international peace, security, and justice are not endangered For the reasons outlined in this message, I respectfully request that Congress take appropriate action to carry out the recommendations contained herein "

Congressional Resolution adopted by Senate and House of Representatives.

The following joint resolution was introduced in the Senate and the House of Representatives on the same day :

" Whereas the primary purpose of the United States, and its relations with all other nations, is to develop and sustain a just and enduring peace for all ;

" Whereas certain territories in the West Pacific under the jurisdiction of the Republic of China are now under armed attack, and threats and declarations have been made and are being made by the Chinese Communists that such armed attack is in aid of, and in preparation for, armed attack on Formosa and the Pescadores ;

" Whereas such armed attack, if continued, would gravely endanger the peace and security of the Western Pacific area and particularly of Formosa and the Pescadores ;

" Whereas the secure possession by friendly Governments of the Western Pacific island chain, of which Formosa is a part, is essential to the vital interests of the United States and all friendly nations in or bordering on the Pacific Ocean , and

" Whereas the President of the United States on Jan 6, 1955, submitted to the Senate . . . for ratification a mutual defence treaty between the U S A. and the Republic of China, which recognizes that an armed attack in the West Pacific area directed against territories therein described, in the region of Formosa and the Pescadores, would be dangerous to the peace and safety of the parties to the treaty ;

" Therefore be it resolved by the Senate and House of Representatives, in Congress assembled, that the President be and hereby is authorized to employ the armed forces of the United States as he deems necessary for the specific purpose of securing and protecting Formosa and the Pescadores against armed attack. This authority [is] to include the security and protection of such related positions and territories of that area now in friendly hands and the taking of such other measures as he judges to be required or appropriate in assuring the defence of Formosa and the Pescadores

" This resolution shall expire when the President shall determine that the peace and security of the area is reasonably assured by the international conditions, created by action of the United Nations or otherwise, and shall so report to Congress."

The resolution was unanimously adopted by the House Foreign Affairs Committee on Jan. 24, and by 409 votes to three in the full House of Representatives on Jan. 25. The dissenting votes were cast by Representatives Graham A. Barden (Dem., North Carolina), Timothy P. Sheeham (Rep., Illinois) and Eugene Siler (Rep., Kentucky).

The Congressional resolution was adopted jointly by the Senate Foreign Relations and Armed Services Committees on Jan. 26, by 27 votes to two, and by the full Senate on Jan. 28, by 85 votes to three.

When the resolution came before the two Senate Committees (meeting in joint session) on Jan 26, **Senator Wayne Morse** (Ind., Oregon) opposed it on the grounds that it implied the threat of " aggression " and of a " preventive war " by the United States. **Senator William F. Knowland** (the Republican floor leader) strongly denied this interpretation, and emphasized that the resolution was designed precisely to restore, and not to endanger, the stability of the Pacific. He declared : " There is not one iota of desire or intent for a preventive war or aggression I only hope and pray that the misinterpretation [i e Senator Morse's contention] has not already done great damage to our national security and the security of our Seventh Fleet."

In reply, **Senator Morse** emphasized that he whole-heartedly supported the President in his determination to protect Formosa and the Pescadores. He maintained, however, that the Congressional resolution left undetermined the area into which U.S. forces might be sent for this purpose—specifically, whether U.S. military action might be extended to include the islands of Quemoy and Matsu, which were just off the Chinese coast [see map, page 14017] In effect, he declared, the resolution said to the Chinese Communists : " We threaten you with aggression if you follow some course of action on your mainland that we think . . . may result in your making an attack on us."

Senator Hubert H. Humphreys (Dem., Minnesota) moved an amendment to delete the phrase in the resolution that would extend the President's authority in protecting Formosa and the Pescadores "to include the security and protection of such related positions and territories of that area now in friendly hands." Like Senator Morse, he argued that this phrase might involve U.S forces in the defence of Quemoy and Matsu, even though these islands were only a few miles from the Chinese coast After **Senator Knowland** had replied that the effect of Senator Humphreys' amendment would be to "set up a green light on Quemoy and Matsu telling the Communists just to come and get them," the amendment was rejected by 20 votes to eight Its supporters, in addition to Senator Humphreys, were Senators J William Fulbright (Dem , Arkansas), Harry F. Byrd (Dem., Virginia), John J. Sparkman (Dem., Alabama), Estes Kefauver (Dem., Tennessee), Mike Mansfield (Rep , Montana), William H. Langer (Rep , North Dakota) and Wayne Morse.

Senator Kefauver then moved an amendment which (like that of Senator Humphreys) would have pledged the U S.A. to defend Formosa and the Pescadores only, and which declared that the United Nations was the ultimate proper authority both to arrange a cease-fire in the Formosa Straits and to settle the ultimate status of Formosa It was defeated by an identical vote (20 to eight), its supporters being Senators Kefauver, Fulbright, Sparkman, Langer, Humphreys, Mansfield, Morse, and Henry M. Jackson (Dem., Washington). The Congressional resolution was thereupon adopted by 27 votes to two (Senators Morse and Langer).

In their report to the full Senate, the Foreign Relations and Armed Services Committees said that the possible invocation by the Chinese Communists of the Sino-Soviet mutual assistance treaty of 1950 was "a calculated risk which the United States must take." The report added, however, that the President and his advisers did not expect Russian intervention in the event of "further difficulties" between the U.S A. and Communist China Expressing doubt whether the 1950 treaty could apply to the Formosa area, the report said · "In the first place, it is not the intention of the U.S A. to take aggressive action against any country. In the second place, the language of the Soviet-Chinese treaty is open to widely different interpretations." After noting that a majority of the members of the Committee hoped that the United Nations "might soon be in a position to bring an end to hostilities in the Formosa Straits," the report said—in connexion with Communist China's opposition to U N intervention for a cease-fire—that the Senators "cannot agree that the use of force in this area is a matter of domestic concern to the Government of the Republic of China [i.e. the Chinese Nationalists] or to the Chinese Communist Government" As regards the position of Quemoy and Matsu, the report said that if American support for these islands were to be specifically forbidden, U S. forces might be deprived of "flexibility that may be needed to meet unforeseen situations" "In this particular case," it added, "it would seem unwise to define too precisely the geographic scope of the resolution."

Before adopting the Congressional resolution on Jan. 28, the Senate rejected the following three amendments :

(1) An amendment by **Senator Langer** to forbid the despatch of U.S. armed forces to the Chinese mainland or to any spot nearer than 12 miles from the Chinese coast. Rejected by 83 votes to 3—Senators Langer, Morse, and Herbert H. Lehman (Dem , New York)

(2) An amendment by **Senator Kefauver** which would have excluded the Quemoy and Matsu Islands from the area to be protected, if necessary, by U.S force of arms. Rejected by 75 votes to 11.

(3) An amendment by **Senator Lehman** to delete the phrase authorizing the President to "include the security and protection of related islands" [i e. Quemoy and Matsu] in defending Formosa and the Pescadores. Rejected by 74 votes to 13.

The Congressional resolution was approved by 83 votes to three (Senators Langer, Lehman, and Morse).

Eight Senators abstained from voting—Denis Chavez (Dem., New Mexico), J. Allen Frear (Dem., Delaware), John F. Kennedy (Dem., Massachusetts), Matthew M. Neely (Dem., West Virginia), Lyndon B. Johnson (Dem., Texas), Charles E. Potter (Rep., Michigan), Ralph E. Flanders (Rep , Vermont) and John W Bricker (Rep., Ohio).

President Eisenhower signed the Congressional resolution on Jan. 30, and at the same time issued the following statement :

". . The American people, through their elected representatives, have made it clear to the world that we are united . . . in our determination to help a brave ally and to resist Communist aggression. By so asserting this belief we are taking a step to preserve the peace in the Formosa area. We are ready to support a U.N. effort to end the present hostilities in the area, but we are also united in our determination to defend an area vital to the security of the United States and the free world."

President Eisenhower's Meetings with National Security Council and Service Chiefs.

On Jan. 27 the President had had a meeting with the National Security Council, and afterwards conferred with the Secretary of Defence (Mr. Wilson), the Secretaries of the Army, Navy, and Air Force (respectively Mr. Stevens, Mr. Thomas, and Mr. Talbott), the chairman of the Joint Chiefs of Staff (Admiral Radford), and the Army Chief of Staff, the Chief of Naval Operations, and the Air Force Chief of Staff (respectively General Ridgway, Admiral Carney, and General Twining). The following statement was issued from the White House after these discussions : "They discussed the deployment of U.S. air and naval forces in the Formosa area. The President made it clear that these forces were designed purely for defensive purposes, and that any decision to use U.S. forces other than in immediate self-defence or in direct defence of Formosa and the Pescadores would be a decision which he would take and the responsibility for which he has not delegated."

Sir Anthony Eden's Statement on Formosa Crisis.

In London, the British Foreign Secretary (Sir Anthony Eden) made a statement on the Formosa crisis to the House of Commons on Jan. 26, and replied to a number of questions by Mr. Clement Attlee, the Leader of the Opposition.

Sir Anthony Eden said : "H.M. Government have been in close and constant touch with the U S. Government in recent months concerning the dangerous situation arising out of Chinese Communist attacks upon the islands off the coast of China near the Formosa Straits. We have also maintained close contact with the Governments of the Commonwealth and particularly with New Zealand, which is the other Commonwealth member of the Security Council

'These small islands have been in Chinese Nationalist hands ever since the Japanese surrender in 1945. There had been a lull in attacks upon them between 1949-1954, but these were resumed in August last, shortly after the fighting had been ended in Indo-China by the Geneva settlement The attacks were accompanied by a marked increase in the vehemence of Chinese Communist demands for the transfer of Formosa to the administration of the Chinese Communist Government.

"In this situation the first concern of H M Government is to stop the fighting. They have therefore continued to urge on all concerned the importance of doing this and of preventing a wider conflagration. A solution of these delicate and difficult problems is not to be reached by force. A settlement can only be arrived at by the peaceful processes of patient negotiation The Government are convinced that the object of the U.S. Administration has also been to reduce the risks of any extension of the fighting. Their treaty with General Chiang Kai-shek, which defines their commitments, was concluded with this object in view

"President Eisenhower, in his message to Congress, has been careful to say that he is not suggesting that the U.S.A. should enlarge its defensive obligations beyond Formosa and the Pescadores as provided by the mutual defence treaty with General Chiang Kai-shek. The President has again emphasized the purely defensive nature of the arrangements with the Chinese Nationalists We in this country respect President Eisenhower and know that he would sanction the use of U.S. forces only with the greatest reluctance and when, in his view, the circumstances constituted an immediate and serious threat to the security of Formosa and the Pescadores This is not a new element in U.S. policy.

"On the other hand, the Government also understand the position of the Chinese Government in the matter of the coastal islands, and do not expect them to act in such a way as might seem to prejudice what they regard as their rights in this respect.

"The Government are, however, satisfied that the problem of the coastal islands is susceptible of a peaceful solution if all concerned are prepared to work for it In consultation with the U.S. and other friendly Governments, the Government are examining various courses of action which might further this aim. I will give the House additional information on this subject as soon as I am in a position to do so . . ."

Mr. Attlee. "It is, of course, clear that in this matter of Formosa and the islands there is an intervention in a civil war It is clearly an action by the U.S.A. and not an action of the United Nations But in view of the need for preventing hostilities and trying to get some peaceful arrangement, is it not clear that the right thing would be that China should occupy her proper position in the United Nations ? "

Sir Anthony Eden. "I am surprised that Mr. Attlee should couple Formosa with the offshore islands, because he must surely be aware that the islands have always been treated as separate areas, including during the period when he was responsible as Prime Minister Formosa has never in this century been a part of China, and the status of Formosa was dealt with by the treaty of San Francisco signed by the late Government, whereas the offshore islands have always been regarded by us as part of China. Therefore we have always been careful to draw the distinction, which, I think, the House should carefully maintain. No one knows better than the late Government what caused the delay in the admission of the present Chinese Government to the United Nations It was the act of aggression by the Chinese Communist Government in Korea which unfortunately held up the whole process of the admission of China to the U.N. It is not until we can get a settlement of these issues, the first stage of which is a cessation of fighting in this particular area, that we can hope that the wider issue can be settled."

Mr. Attlee. "The Foreign Secretary has left out some history. It is quite true that Formosa was seized from China by an act of aggression by Japan. It is equally true that at the end of the war Formosa was declared to be an integral part of China, and no-one stated that more clearly and with more emphasis than Chiang Kai-shek. The fact that he has been put out in favour of another Government does not alter that fact. Surely the question of the admission of China to the U.N was raised for some considerable time before the aggression in Korea, and it was denied to her ? "

Sir Anthony Eden. "The whole of that period was in the administration of the late Government. Therefore Mr. Attlee has no call whatever to charge us with any failure at that time."

Mr. Attlee. "I made no charge against the Government The line we took was that the Chinese Republic were the proper people to be represented, and not the remnant on Formosa"

Mr Aneurin Bevan (Lab) "The Foreign Secretary has stated that the position of Formosa is much different from that of the offshore islands This has been described in the U S A as a sort of jurisdictional line We have not been able to understand that situation at all because it has always been understood that Formosa, equally with the offshore islands, belongs to the mainland of China Does he now suggest that the situation has been altered by virtue of the fact that Formosa was stolen from China in 1896 ? Is it now an interpretation of international law that if you steal property from a thief you can hold it ? "

Sir Anthony Eden. "I think we should be doing very little good to our relations with Peking if we were to indicate to the world that the position of the offshore islands was comparable to the position of Formosa It is, of course, no such thing, because throughout this period the offshore islands have been, beyond dispute, part of China whereas for well over half a century Formosa was part of Japan"

Mr. Attlee. 'The Foreign Secretary has made clear that acts of aggression alter these things It was the act of aggression of Japan that made the Powers accept the position that Formosa was an integral part of China and should be returned to her at the end of the war"

Sir Anthony Eden. "I do not think for a moment that the House would be wise to accept Formosa, which for half a century has not been part of China, as in the same position as these islands, which at all times and today are recognized as part of China"

Formosa Dispute before Security Council. - New Zealand Initiative for Cease-fire. - Invitation to Chinese People's Republic.

The New Zealand member of the U.N. Security Council (Sir Leslie Munro, chairman of the Council during January), on the instructions of his Government, convened a meeting of the Security Council for Jan. 31 to consider the situation in the Formosa Straits—a situation described by Sir Leslie as one which was "likely to endanger the maintenance of international peace and security." Sir Leslie Munro took this action on Jan. 28, with the full support of the British and U.S. members of the Council (Sir Pierson Dixon and Mr. Cabot Lodge).

On the same day (Jan. 28) the British Ambassador in Moscow, Sir William Hayter, called on M. Molotov to inform him of the British Government's views on the Far Eastern situation and to give him formal notification that New Zealand had raised the matter in the United Nations. A statement issued by the British Embassy in Moscow said that Sir William Hayter had given M. Molotov the British Government's general views "on the lowering of tension without prejudice to the claims of either side"; that he had expressed the hope that the Soviet Government would urge restraint on the Chinese Communists; and that it was the intention of both the British and U.S. Governments that the Chinese People's Republic should be invited to take part in the Security Council's discussions. The British Chargé d'Affaires in Peking (Mr. Humphrey Trevelyan) similarly informed the Chinese People's Government on Jan. 28 of New Zealand's intention to convene the Security Council with the aim of reaching a peaceful settlement of the question of the disputed islands.

The Tass Agency stated on Jan 31 that M Molotov had expressed to Sir William Hayter the Soviet Government's concern at the situation in the Formosa area, which had been intensified by the "aggressive actions" of the United States It added that the Soviet Government shared the British Government's opinion that the matter should be discussed in the Security Council, that instructions had accordingly been sent to the Soviet representative on that body; that the Soviet Union desired to lessen the tension in the Far East and to "co-operate in strengthening peace throughout the world", and that M Molotov had passed on to Peking the British view that a cease-fire was necessary to guard against the danger of a general war.

The Security Council met on Jan. 31, under the chairmanship of Sir Leslie Munro, to consider the situation in the Formosa Straits and the islands off the Chinese coast.

M. Sobolev, the Soviet member, had previously presented a resolution accusing the U.S A. of "unprovoked attacks on Chinese town and coastal areas carried out by U.S armed forces," of "threatening the use of armed force against the People's Republic of China," and of "flagrant intervention in the internal affairs of China in violation of the principles of the U.N. Charter." The resolution called upon the Security Council (1) to condemn "these acts of aggression by the United States against the People's Republic of China"; (2) to recommend that the U S. Government should "take immediate steps to put an end to the said acts of aggression and to intervention in the internal affairs of China", (3) to call upon the U S Government "to withdraw immediately all its naval, air and land forces from the island of Taiwan and other territories belonging to China", and (4) to urge that "no military action should be permitted in the Taiwan area by either side, so that the evacuation from the islands of all armed forces not controlled by the People's Republic of China may be facilitated" M. Sobolev also presented a resolution asking that the Chinese People's Government should be invited to send a representative to take part in the Security Council's debate.

When the Council opened its debate, **M. Sobolev** moved a resolution to unseat the Chinese Nationalist representative (Dr. Tsiang) and to seat in his place a representative of the Peking Government. **Mr. Cabot Lodge** (U S.A) moved a counter-resolution that the membership of the Council should remain unchanged, and that his [Mr Lodge's] resolution should have priority over that presented by M Sobolev This was agreed to by ten votes to one, and the Soviet resolution therefore went by default

Sir Leslie Munro (New Zealand), opening the general debate, explained that his Government had taken the initiative in calling the Council with the sole aim of stopping the fighting in the Chinese islands and of preventing its possible extension into a general conflict. With the object of bringing about a cease-fire in the Far East, he proposed that the U N Secretary-General (Dr Hammarskjöld) should be authorized to invite the Chinese People's Republic to send a representative to take part in the Security Council's debate and present the views of his Government

M. Sobolev (U S S R) reiterated the allegations of U S. "aggression" contained in the Soviet resolution, and asserted that the question of Formosa and the other Chinese islands was an internal matter lying solely within the competence of the Government in Peking He made no comment on the New Zealand proposal for a cease-fire **Sir Pierson Dixon** (U K.), who strongly supported the New Zealand initiative, emphasized that Britain's motives were completely disinterested, that she desired only "to stop the fighting, remove tension, and promote peace," and that there was no question of "allocating blame to either side for the past" He felt that it would be proper for the Security Council to place both the New Zealand and Soviet resolutions on its agenda

Mr. Cabot Lodge (U S A) described the Soviet resolution as "a preposterous cold war fraud," saying in this connexion 'Here is the Soviet regime, which always interferes to the maximum possible extent in the internal affairs of all countries, which has interfered and is interfering with deadly effect and to the fullest extent of its power in the internal affairs of China . . making, if you please, a charge of interference against the United States " He added, however, that his Government would not oppose the inclusion of the Soviet resolution on the Council's agenda, and would in fact "welcome" a discussion on it **Dr. Tsiang** (Nationalist China) opposed not only the Soviet resolution but also that of New Zealand, on the ground that a cease-fire would "legalize the fruits of Communist aggression" and "sterilize" the situation in the Formosa Straits.

By ten votes to one (Nationalist China), with the Soviet Union abstaining, the Security Council agreed to invite the People's Republic of China to send a representative to discuss the New Zealand proposal for a cease-fire. It was also agreed, by ten votes to one (Nationalist China), to keep the Soviet resolution on the Council's agenda. An invitation to the Chinese People's Republic to participate in the Security Council's discussion was accordingly sent by Dr. Hammarskjold the same evening (Jan. 31).

Peking Rejection of U.N. Invitation.

It was announced on Feb. 3 in Peking that the Chinese People's Republic had rejected the invitation to attend the Security Council's discussions unless (1) the Chinese Nationalists were ousted from the Council and their seat given to the People's Republic; (2) the Council discussed only the Soviet resolution and not that presented by New Zealand.

The text of the reply sent by Mr Chou En-lai to Dr Hammarskjold, for transmission to the president of the Security Council—Dr. Victor Belaunde (Peru), who had succeeded Sir Leslie Munro as chairman of the Council for the month of February—was broadcast by Peking radio After reiterating the allegations of U S "aggression" against Formosa, denouncing the mutual security treaty between the U.S A. and the Chinese Nationalists, and accusing the U.S Government of despatching "large naval and air forces" to the area of the Formosa Straits with the aim of "war threats and war provocations against the Chinese people," it continued ·

". . The Government of the People's Republic of China fully supports the resolution submitted by the representative of the Soviet Union in the U N. Security Council . It is of the firm opinion that the Security Council should condemn the United States for its acts of aggression against China, and call upon the U.S A. to cease immediately its intervention in China's internal affairs and withdraw all its armed forces from Taiwan and the Taiwan Straits.

"Taiwan, the Penghu islands [the Pescadores], and other coastal islands are all inalienable parts of China's territory. The Chinese people's exercise of their own sovereign rights in liberating their own territory is entirely a matter of China's internal affairs and has never caused international tension, nor can it threaten peace and security. But the New Zealand representative proposes that the Council should consider the 'hostilities in the area of certain islands off the coast of the mainland of China' between the People's Republic of China and the traitorous Chiang Kai-shek clique This is obviously meant to intervene in China's internal affairs and to cloak the U S. acts of aggression against China, and is therefore in direct violation of the fundamental principles of the U.N. Charter The Government of the People's Republic of China is firmly opposed to this proposal.

"Since the U S A occupied Taiwan in 1950 the People's Republic of China has repeatedly lodged charges with the United Nations demanding that the U N should put an end to the acts of aggression against China by the United States. However, the U N. never took any action . . . and, on the contrary, repeatedly slandered the People's Republic of China.

"What is especially intolerable is the fact that the People's Republic of China representing the 600,000,000 Chinese people, is still deprived of its legitimate position and rights in the U.N., whilst the representatives of a small remnant of the traitorous Chiang Kai-shek clique, repudiated long ago by the Chinese people, continue to usurp the representation of China in the United Nations. Therefore the People's Republic of China cannot send a representative to take part in the discussion of the New Zealand proposal in response to the invitation of the Security Council. At the same time it must be pointed out that, without the participation of the People's Republic of China in the Security Council's discussions, all decisions taken in the Council on questions concerning China would be illegal and null and void.

"The People's Republic of China can send a representative to take part in the Security Council's discussions only for the purpose of discussing the Soviet resolution, and only when the representative of the Chiang Kai-shek clique has been removed from the Council and the representative of the People's Republic attends in the name of China.

"The People's Republic of China consistently works for the easing of tension in the Far East and the safeguarding of international peace. The tension in the area of Taiwan was brought about by the U.S. occupation of Taiwan and intervention in China's internal affairs. All genuine international efforts to ease and eliminate the tension caused by the United States in this area and in other areas of the Far East will receive the support of the People's Republic of China."

U.S. Naval Commanders' Visits to Formosa. - Reinforcement of U.S. Seventh Fleet.

Vice-Admiral Alfred M. Pride, Commander of the U.S. Seventh Fleet, arrived in Formosa on Jan. 23 in the cruiser U.S.S. *Helena* for discussions with General Chiang Kai-shek, the U.S. Ambassador (Mr. Karl Rankin), and the head of the U.S. Military Assistance Group in Formosa (Major-General William C. Chase). The Commander of the U.S. naval forces in the Pacific, Admiral Felix Stump, also paid a 12-hour visit to Formosa on Jan. 30 for discussions with General Chiang, Vice-Admiral Pride and Major-General Chase. In a press statement at Taipeh, Admiral Stump said that he had not yet received any instructions with regard to the evacuation of the Tachen Islands, and declared that the U.S. forces would defend themselves "any time and anywhere if attacked with intent." It was reported on Jan. 27 that a wing of U.S.A.F. *Sabre* jet fighters had arrived at Formosan airfields to reinforce the Seventh Fleet, whilst on Feb. 1 it was announced that the Seventh Fleet would be further reinforced by the 45,000-ton aircraft-carrier U.S.S. *Midway*, which had been visiting Singapore.—(New York Times - New York Herald Tribune - Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. 14007 C; 13986 A.)

Note. The following comment on the legal status of Formosa and the other Chinese islands in dispute was given by the Diplomatic Correspondent of *The Times* on Jan. 27: "The position of Formosa and the Pescadores is clearly different from that of the coastal islands. *De jure* sovereignty over these presumably lies with the Communists, though *de facto* sovereignty is with the Chinese Nationalists. Formosa and the Pescadores were ceded by China to Japan in 1895. At the Cairo conference in 1943 it was decided that all the territories taken from China by the Japanese should be returned to the Republic of China. At Potsdam in 1945 it was agreed that the terms of the Cairo declaration should be carried out. At the end of the war the administration of Formosa and the Pescadores was taken over from Japan by the Chinese Nationalists, but this was not a cession of territory to China. The Japanese peace treaty of 1951 signified the relinquishment of Japanese sovereignty, but did not cede the territory to General Chiang Kai-shek's Government or to any other. Formosa and the Pescadores became territory the *de jure* sovereignty over which had still to be determined, and that is still the position. This view has throughout been held by the British Government, and it is clear . . . that it is also the view of the American Government."

A. UNITED KINGDOM. — Gold and Dollar Reserves in January. - Surplus of $1,000,000.

The sterling area had a gold and dollar surplus in January of $1,000,000 after taking account of (*a*) $13,000,000 received from the U.S.A. in defence aid; (*b*) $10,000,000 paid to the E.P.U. in respect of the December deficit; and (*c*) $2,000,000 paid to E.P.U. creditors in bilateral settlements. As a result, the gold and dollar reserves rose to $2,763,000,000 on Jan. 31.

Provisional figures for the E.P.U. January settlement showed that the U.K. had a surplus of $11 200 000 (£4,000,000), which will be settled in February.—(Treasury Press Office)

B. UNITED STATES. — Federal Mediation Service.

Mr. Joseph F. Finnegan, a New York lawyer, was nominated by President Eisenhower on Jan. 11 as Director of the Federal Mediation and Conciliation Service in succession to Professor Whitley P. McCoy, who had resigned.—(New York Times)

(Prev. rep. 13025 F.)

C. NETHERLANDS NEW GUINEA. — Repulse of Indonesian Commando Landing.

The Netherlands Foreign Ministry issued a statement on Nov. 8, 1954, in connexion with a landing by a party of armed Indonesians which had taken place on Oct. 21, 1954, in Etna Bay, Netherlands New Guinea. The statement refuted a denial by the Indonesian Government that it had had no part in these landings, and alleged that the Indonesian Army was directly involved in a "flagrant violation" of Netherlands territory.

The statement said that interrogation of prisoners and perusal of captured documents had proved that the landing had not only been launched from Indonesian territory but had also been planned with the full knowledge and approval of the Indonesian Army. The landing party of 48 men, equipped with Bren and Sten guns, mortars, and rifles, had belonged to a unit attached to the 25th Infantry Regiment of the Indonesian Army, and this semi-military unit had [it was alleged] been training personnel for organized infiltration into Dutch New Guinea with the aim of "fighting as guerrillas and creating unrest which might give the impression that a spontaneous people's movement existed in New Guinea." It was stated that the commander of the "training unit" was a Captain Sapiah, who was directly responsible to Lieut.-Colonel Sukawati, Commander of the 25th Infantry Regiment, that Sapiah's second-in-command, Lieut. Dimara, had been in charge of the landings; and that he [Dimara] had had orders to march inland, launch guerrilla warfare, make propaganda for the transfer of Dutch New Guinea to Indonesia, and try to induce Papuans to form rebel bands against the Dutch.

The Indonesian "commando group" had come from the Indonesian island of Dobo and had landed in Etna Bay from two boats flying the Netherlands flag. During the fighting that followed the landing Dutch Marines and police killed five of the Indonesians, captured 25, and seized arms and documents.

It was announced in The Hague on Jan. 26, 1955, that reinforcements had been sent by air to New Guinea.
(Netherlands News Agency) **(Prev. rep. Dutch New Guinea, U.N. Debate, 13993 A, page 13996.)**

D. PAKISTAN. — Diplomatic Appointments. - Rome Legation raised to Embassy Level.

The following diplomatic appointments were announced in Karachi during the second half of 1954: Mr. Mian Aminuddin, Governor of the Punjab, as Ambassador to Turkey; Mr. Mohammed Mir Khan to succeed Professor Ahmed Bokhari as Pakistan's permanent representative to the United Nations; Mr. Lal Shah Bokhari as Minister to Syria, the Lebanon and Jordan, Mr. Shahid Suhrawardy as Ambassador to Spain; Mr. S. Khalilur Rehman (a former Minister of Defence) as Ambassador to Burma, Chaudhuri Khaliquzzaman, formerly Governor of East Bengal, as Ambassador to Indonesia and concurrently Minister to the Philippines; Khwaja Shahabuddin, formerly Governor of the N.W. Frontier Province, as Ambassador to Saudi Arabia; Mr. Sultanuddin Ahmad, Ambassador in Rangoon, as Ambassador to the Chinese People's Republic; and Dr. Omar Hayat Malik as Ambassador to Japan.

On Jan. 15, 1955, it was announced that Pakistan and Italy had decided to raise their respective Legations to Embassy status, whilst on Feb. 1 it was announced that Pakistan had decided to establish diplomatic relations with Switzerland at Embassy level and with Austria and the Holy See at Legation level.—(Pakistan High Commissioner's Office, London)

(Prev. rep. 13607 C.)

E. ALGERIA. — New Governor-General.

M. Jacques Soustelle, a leading member of the Social Republican (Gaullist) party, was appointed Governor-General of Algeria on Jan. 26 in succession to M. Roger Léonard, who had held that post since 1951.

M. Soustelle (42), a distinguished ethnologist, took part before the war in several French scientific expeditions to little-known parts of Mexico and Central America, and is an authority on the pre-Columbian cultures of America. In 1938, at the time of the Munich crisis, he became secretary-general of the *Union des intellectuels français*, an anti-Fascist body formed to combat Nazi propaganda, and in 1940 joined the Free French movement under General de Gaulle. He held important posts in the French Committee of National Liberation during the war—including that of Commissioner for Information, and later for relations with the Resistance movement in France—and for a few months in 1945 was Minister for Information and for Oversea Territories. He retired from political life after the war but returned in 1947 as a member of General de Gaulle's French People's Rally (R.P.F.), of which he was secretary-general until 1951. He was elected to the National Assembly in the latter year as a Gaullist deputy for the Rhone *département*.

M. Roger Léonard was appointed president of the *Cour des Comptes*, a post analogous to that of paymaster-general in the French Government.—(Le Monde, Paris) **(Prev. rep. 11664 A.)**

A. WESTERN GERMANY. — Bavarian and Hessian Landtag Elections. - West Berlin Elections.

Elections to the *Landtage* of Bavaria and Hesse took place on Nov. 28 and to the House of Deputies in West Berlin on Dec. 5, 1954. The results were as set forth below:

Bavarian Elections.

	1954 *Landtag* seats	1950† *Landtag* seats
Christian Social Union*	83	64
Social Democrats	61	63
Bavarian Party	28	39
Free Democrats	13	12
Refugee Party (All-German Bloc)	19	26‡
Others	nil	nil

* The name of the Christian Democrats in Bavaria.

† Owing to changes in party affiliations, etc, the position at the dissolution of the former *Landtag* was: Christian Social Union 71, Social Democrats 61, Bavarian Party 32, Free Democrats 11, Refugee Party 24, German Community 2, Communists nil, others 3.

‡ Electoral coalition between the Refugee Party (All-German Bloc) and the Bavarian Right Block (German Community), which was subsequently terminated, the Refugee Party retaining 20 seats and the Bavarian Right Block 6 seats

The number of votes was as follows, those in the 1950 *Landtag* elections and the 1953 *Bundestag* (Federal) elections being shown for comparison:

	1954 *Landtag*	1953 *Bundestag*	1950 *Landtag*
Christian Social Union	3,690,362	2,426,982	2,527,370
Social Democrats	2,733,048	1,183,895	2,588,549
Bavarian Party	1,286,246	465,552	1,657,713
Free Democrats	702,783	315,214	653,741
Refugee Party	990,025	417,392	1,136,148
Bavarian Right Block	54,888	31,759	
Communists	205,174	81,656	177,768
Others	57,634*	106,147*	596,551

* Including 39,245 in 1954 and 28,231 in 1953 for the "neutralist" League of Germans headed by Dr. Josef Wirth (the former Reich Chancellor) and Dr. Heinemann (the former Federal Minister of the Interior).

Polling percentages in the three above-mentioned elections were respectively: Christian Social Union, 38.0 (1954), 47.9 (1953), 27.4 (1950); Social Democrats, 28.1, 23.3, 28.0; Bavarian Party, 13.2, 9.2, 17.9, Refugee Party, 10.2, 8.2, 12.3 (including Bavarian Right Block); Free Democrats, 7.2, 6.2, 7.1; Communists, 2.1, 1.6, 1.9; Bavarian Right Block, 0.6 (in 1954 and 1953); others, 0.6 (including 0.4 for the League of Germans), 2.1, 5.4.

The electorate totalled 6,081,148, of whom 82.6 per cent went to the polls.

Although the Christian Social Union considerably increased its vote as compared with the 1950 *Landtag* elections and emerged as the strongest party (a position previously held by the Social Democrats), it was nevertheless ousted from the *Land* Government, which had hitherto been based on a coalition between the Christian Social Union, the Social Democrats, and the Refugee Party, with Dr. Ehard (Christian Social Union) as Prime Minister. Christian Social efforts to form a new coalition with the Bavarian Party, to the exclusion of the Social Democrats, broke down on Dec. 7, and on Dec. 10 the Social Democrats, the Bavarian Party, the Free Democrats, and the Refugee Party announced that they had concluded a coalition agreement for the formation of a new Government.

The agreement included the following principles of policy: defence of Bavarian interests against any prejudicial action on the part of the Federal Government; early legislation to regulate the controversial question of the training of teachers, by requiring such training to be given at universities or teachers' training colleges, instead of at religious seminaries as had been advocated by the Christian Social Union; educational reforms, with special emphasis on furtherance of the democratic spirit; an undertaking not to engage in "economic experiments" and not to interfere with private property or private enterprise, a progressive social policy, with special concern for refugees and bombed-out families; increased industrialization; and support for agriculture, farm settlement, and agricultural training.

On Dec. 14 the new *Landtag* elected Dr. Wilhelm Hoegner (Social Democrat) as Prime Minister of Bavaria. Dr. Hoegner, who received 112 votes out of 197, formed a new *Land* Ministry the same day with the following membership:

Dr. Wilhelm Hoegner (Social Democrat), Prime Minister; Dr. Joseph Baumgartner (Bavarian Party), Deputy Premier and Agriculture; Dr. August Geislhoringer (Bavarian Party), Interior, Dr. Fritz Koch (Social Democrat), Justice; Professor August Rucker (non-party), Education; Herr Friedrich Zietsch (Social Democrat), Finance; Herr Otto Bezold (Free Democrat), Economy and Communications; Herr Walter Stain (Refugee Party), Labour. In addition, two Social Democrats, two members of the Bavarian Party, two Refugee Party members, and one Free Democrat were appointed State Secretaries.

Dr. Hans Ehard, the former Premier, had been elected President of the Bavarian *Landtag* on Dec. 13.

Hessian Elections.

	1954 *Landtag* seats*	1950 *Landtag* seats
Social Democrats	44	47
Christian Democrats	24	12
Free Democrats	21	13
Refugee Party	7	8

* Total number of seats increased from 80 to 96.

The number of votes was as follows, those in the 1950 *Landtag* elections and the 1953 *Bundestag* (Federal) elections being shown for comparison:

	1954 *Landtag*	1953 *Bundestag*	1950 *Landtag*
Social Democrats	1,065,537	862,439	821,268
Christian Democrats	603,541	848,825	348,148
Free Democrats	513,314	502,490	588,739
Refugee Party	192,273	163,403	
Communists	83,991	63,785	87,878
Others	41,873	115,191	5,054

Polling percentages in the three above-mentioned elections were respectively. Social Democrats 42.6 (1954), 33.7 (1953), 44.4 (1950); Christian Democrats, 24.1, 33.2, 18.8, Free Democrats, 20.5, 19.7, 31.8 (Free Democrats and Refugee Party together); Refugee Party, 7.7 (1954), 6.4 (1953); Communists, 3.4, 2.5, 4.7; other parties, 1.7, 4.5, 0.3.

The electorate totalled 3,115,988, of whom 82.1 per cent went to the polls.

The Christian Democrats, by gaining 12 seats, nullified the absolute majority hitherto held by the Social Democrats, whilst the Free Democrats also made important gains by increasing their seats from 13 to 21. The Social Democrats, who had hitherto been in power without the support of other parties, concluded a coalition agreement with the Refugee Party on Dec. 12, thereby securing the support of 51 members of the *Landtag* out of the total membership of 96. Both parties agreed that Dr. Zinn, the outgoing Premier, should preside over the new *Land* Government, whose composition was announced on Jan. 19, 1955, as follows:

Dr Georg August Zinn (Social Democrat), Prime Minister and Justice, Herr Heinrich Schneider (Social Democrat), Interior; Dr. Heinrich Troger (Social Democrat), Finance; Herr Arno Hennig (Social Democrat), Education; Herr Gotthard Franke (Refugee Party), Economic Affairs; Herr Gustav Hacker (Refugee Party), Agriculture

West Berlin Elections.

	1954 Seats	1950 Seats
Social Democrats	64	61
Christian Democrats	44	34
Free Democrats	19	32

The votes cast for the various parties were as follows, those in the 1950 elections to the House of Deputies being shown for comparison:

	1954 Votes	1954 Percentage	1950 Votes	1950 Percentage
Social Democrats	684,646	44.0	654,211	44.7
Christian Democrats	466,595	30.0	361,050	24.6
Free Democrats	196,845	12.7	337,589	23.0
German Party	75,159	4.8	53,810	3.7
Refugee Party	39,205	2.5	31,918	2.2
Socialist Unity Party	51,225	2.7	nil	nil
Others	30,778	2.0	25,892	1.8

The East German Socialist Unity (Communist) Party had announced on May 6, 1954, that it would contest the forthcoming West Berlin elections for the first time. A proposal by the Free Democrats for an official ban on the Communists in West Berlin had been overruled by the Social Democrats and Christian Democrats, and on Oct 4 it was announced that the West Berlin Senate (the City Government) had decided—in accordance with a four-Power agreement of 1946, and in implementation of the principle of free speech—that the Socialist Unity Party should have the same electoral rights and duties as the other parties.

The electorate numbered 1,697,278, of whom 91.6 per cent went to the polls.

Following the elections, the Social Democrats and the Christian Democrats agreed, after prolonged negotiations, to form a coalition without the participation of the Free Democrats, who had declined to take part in any coalition with the Social Democrats. West Berlin had been governed by a Christian Democrat - Free Democrat coalition since the death of Professor Ernst Reuter (the former Chief Burgomaster) in September 1953.

In accordance with the coalition agreement, Dr. Suhr (Social Democrat), previously President of the House of Deputies, was elected Chief Burgomaster on Jan. 11, by 104 votes out of 126. The other members of the new City Senate were elected on Jan. 22 as follows:

Herr Franz Amrehn (Christian Democrat), Second Burgomaster; Herr Joachim Lipschitz (Social Democrat), Interior; Herr Otto Theuner (Social Democrat), Communications; Herr Günther Klein (Social Democrat), Federal Affairs; Herr Paul Hertz (Social Democrat), Economic Affairs, Herr Rolf Schwedler (Social Democrat), Construction; Frau Ella Kay (Social Democrat), Youth, Herr Friedrich Haas (Christian Democrat), Finance; Herr Joachim Tiburtius (Christian Democrat), Education, Herr Heinrich Krel (Christian Democrat), Labour and Social Welfare; Herr Hans Schmiljan (Christian Democrat), Health; and Herr Valentin Kielinger (Christian Democrat), Justice

Herr Willy Brandt (Social Democrat) was unanimously elected President of the House of Deputies on Jan. 11.
(Frankfurter Allgemeine Zeitung - Suddeutsche Zeitung, Munich - Tagesspiegel, Berlin) **(Prev. rep. Bavaria, Hesse, 11124 A; West Berlin, 13256 A; 11142 C.)**

A. SOUTH AFRICA. — Suppression of Communism Act. - Sentence on Mr. Sam Kahn. - Further Restriction Orders. - Total of "Named" Persons under Act.

Two former M.P.s, Mr. Sam Kahn and Mr. Brian Bunting, together with a Mr. Wolf Kodesh, were arrested at a party at Mr. Bunting's house on July 10, 1954, and charged with contravening an order issued under the Suppression of Communism Act forbidding them to attend any gatherings for two years. Mr. Kahn was sentenced by the Cape Town Regional Court on Oct. 12 to three months' imprisonment (two months of which were suspended for three years), an appeal against this sentence being rejected by the Cape Supreme Court on Dec. 30. A further appeal was lodged by Mr. Kahn in the Supreme Court's Appellate Division. The case against Mr. Bunting and Mr. Kodesh was postponed until March 7, 1955.

A number of other actions taken in recent months under the Suppression of Communism Act are described below.

Mrs. Z. Gool, a member of the Cape Town City Council, was "named" as a Communist under the Act on Oct. 22 [Mrs. Gool, who described the action as "completely unjustifiable," is one of the six non-European members of the Council.] Among persons recently banned under the Act from attending any gathering for two years, and ordered to resign from certain organizations to which they belonged, were the following: Mr J. M. Maseko, a member of the National Executive of the African National Congress (June 30, 1954); Mr Thomas Esitang, secretary of the Cape Town Stevedoring and Dock Workers' Union (Sept. 14); Mr. Joseph Nkatlo, Cape regional president of the South African Congress of Democrats, and a member of the Cape Town branch of the African National Congress (Sept. 14); Mr. Alex Bono, an executive member of the African National Congress Youth League and of the African Commercial Distributive Workers' Union (Sept. 14); Mr. Nonjolo Ntunja, a member of the African National Congress (Sept. 27); Mr. M. P. Naicker, vice-president of the Natal Indian Congress (Oct. 15); Dr. H. J. Simons, a lecturer at the University of Cape Town, and husband of Miss Ray Alexander—see 13580 A—(Oct. 29); Miss Ruth First, a journalist (Oct. 29); and Miss Rebecca Lan, acting general secretary of the Canning Workers' Union (Nov. 2).

On Jan. 6, 1955, Mr Greenwood Ngotyana, secretary of the Action Council of the Congress of the People, was banned by the Minister of Justice from attending gatherings for five years. Mr Ngotyana, who had not been "named" under the Suppression of Communism Act, was believed to be one of the first persons to receive notices banning them for five years, all previous notices having been for two years only. Three former Indian Congress leaders—Ahmed Kathrada, former secretary of the South African Indian Youth Congress; H. Thandray, acting secretary of the Transvaal Indian Congress; and Paul Joseph, a member of the executive committee—were arrested in Johannesburg on Jan. 13 following a raid on the headquarters of the Transvaal Indian Congress, and formally charged with contravening orders issued to them under the Suppression of Communism Act.

The printing, publication and dissemination in the Union and South-West Africa of the weekly newspaper *Advance* was prohibited by the Government on Oct. 22. *Advance*, which was edited by Mr. Brian Bunting, had succeeded *The Guardian*, the publication of which had been banned in May 1952 (see page 12245).

A special police force order, issued on Oct. 20, made liable to expulsion any policeman, European or Native, who associated with persons "named" as Communists under the Suppression of Communism Act. Attached to the order were the names and addresses of the 576 people who had been "named" under the Act up to that date.—(Cape Times) **(Prev. rep. 13580 A.)**

B. AUSTRALIA. — New Ambassador to Indonesia and High Commissioner in India.

The Secretary for External Affairs (Mr. Casey) announced on Jan. 12 that Mr. W. R. Crocker, at present Australian High Commissioner in India, would succeed Mr. C. Kevins as Ambassador to Indonesia. The appointment of Mr. Peter R. Heydon as Australian High Commissioner in India, *vice* Mr. Crocker, was announced on Feb. 3. Mr. Heydon (41) had been High Commissioner in New Zealand since 1953.
(Australian News Bureau) **(Prev. rep. 13480 G.)**

C. DENMARK. — Death of Hr. Hedtoft. - Hr. H. C. Hansen appointed Prime Minister.

Hr. Hans Hedtoft, Prime Minister of Denmark, died suddenly on Jan. 29 in Stockholm, where he was attending a meeting of the Nordic Council. He was 51 years of age.

Born at Aarhus (Jutland), and largely self-educated, Hans Hedtoft started life as a lithographer's apprentice, subsequently becoming a trade union official. A prominent member of the Social Democratic Party, he was elected party chairman in 1936 but was forced to resign in 1941 on account of his outspoken opposition to the German invaders after the occupation of Denmark. He played an active part in the Danish Resistance movement during the war years and was a member of the first post-liberation Government. In 1947, at the age of 43, he became Prime Minister—one of the youngest in the country's history—but went out of office in 1950 when the Social Democrats were replaced by a Conservative-Agrarian coalition. He returned to office in 1953, after the elections of that year, as head of a Social Democratic minority government. Hr Hedtoft was one of the principal architects of the Nordic Council—formed in 1951 to promote closer co-operation between the Scandinavian countries—and a strong supporter of Denmark's entry into the North Atlantic Treaty Organization.

Hr. H. C. Hansen (49), Foreign Minister in Hr. Hedtoft's Cabinet, was appointed Prime Minister by King Frederick on Feb. 1, and on the same day was unanimously elected chairman of the Social Democratic Party. It was announced that he would continue to hold the portfolio of Foreign Affairs concurrently with the Premiership. Hr. Hansen had been Foreign Minister since the formation of Hr. Hedtoft's Government in 1953, and had been Minister of Finance from 1947-50 and also in 1945.—(Politiken - Berlingske Tidende, Copenhagen)
(Prev. rep. Hr. Hedtoft, 13268 B; Hr. Hansen, 13172 A.)

D. LITERATURE. — Book Selections for January.

Selected books of the month published in Great Britain, the United States, France and Denmark are given below:

Great Britain. Carswell, John—"The Old Cause: Three Biographical Studies in Whiggism" (Cresset Press, 30s)
Diole, Philippe—"The Seas of Sicily" Translated from the French (Sidgwick & Jackson, 12s 6d)
Hoare, Geoffrey—"The Missing Macleans" (Cassell, 12s 6d.)
Jameson, Storm—"The Hidden River." (Macmillan, 12s 6d.)
McKenzie, R. T.—"British Political Parties: The Distribution of Power within the Conservative and Labour Parties" (Heinemann, 30s)
Migot, André—"Tibetan Marches" Translated from the French. (Rupert Hart-Davies, 18s)
Paul, Robert—"The Lord Protector. Religion and Politics in the Life of Oliver Cromwell" (Lutterworth Press, 35s)
Stamp, L. Dudley—"Man and the Land." (Collins, New Naturalist series, 25s)
Wedgwood, C. V.—"The King's Peace, 1637-1641" The Great Rebellion, Volume I (Collins, 25s.)

United States. Cochran, Louis—"Hallelujah, Mississippi" (Duell, Sloan & Pearce, New York, $3 50)
Notestein, Wallace—"The English People on the Eve of Colonization, 1603-1630." (Harper & Bros., New York, $5 00.)
"The Secret Diary of Harold L. Ickes: Volume III—The Lowering Clouds, 1939-1941" (Simon & Schuster, New York, $6 00.)

France. Bauer, Gérard—"L'Europe sentimentale." (Editions Ventadour, Paris.)
Billy, André—"Les frères Goncourt." (Flammarion, Paris, 950 francs)

Denmark. Bredsdorff, Elias—"H.C. Andersen og England." (Hans Andersen and England) (Rosenkilde & Baggers Forlag, Copenhagen, 27 50 kr)

(Ed. K.C.A.) **(Prev. rep. Book Selections, 13957 B.)**

E. UNITED KINGDOM. — Public Employees.

The Parliamentary Secretary to the Ministry of Labour (Mr. Watkinson) announced on Feb. 1, in a written reply, that the total number of persons employed by the Central Government, local authorities, nationalized industries, and other public corporations in Great Britain in June, 1954, was estimated at 6,170,000, divided as follows:

	Estimated number	Per cent of working population
Central Government (including H.M. Forces)	1,970,000	8½
Local authorities (including police) ..	1,490,000	6½
Nationalized industries and other public corporations	2,710,000	11½

The third category covers the National Coal Board, the British Transport Commission, the gas and electricity supply industries, the water boards, the Iron and Steel Holding and Realization Agency, hospital boards, the airways corporations, the B.B.C., and a few small corporations and commissions. Doctors and dentists, other than those in the service of hospital boards, are excluded.

The information was supplied in answer to a question by Mr. David Renton (Nat. L. and C.), who had asked how many people were being paid wages and salaries from public funds.
(Times)

A. UNITED KINGDOM. — Fifteen-year Plan for Reorganization of British Railways at Cost of £1,240,000,000. - Replacement of Steam Locomotives by Electric and Diesel Traction.

Details of a comprehensive plan put forward by the British Transport Commission for the modernization of British Railways at a capital expenditure of £1,240,000,000 were published on Jan. 24. The plan, which is scheduled for completion within 15 years, and envisages the complete replacement of steam locomotives by electric and diesel traction designed to give "reliable and speedy transport on a large scale," is summarized below.

(1) Track and signalling would be improved to make higher speeds possible over trunk routes and to provide for better use of the railways' physical assets. There would be an extended use of colour light signalling, track circuits, automatic train control, power-operated signal boxes, and modern telecommunication services, and centralized traffic control would be installed where conditions were suitable. Estimated cost—£210,000,000.

(2) Electric or diesel traction would be rapidly introduced as the plan developed, involving the electrification of large route mileages and the introduction of several thousand electric and diesel locomotives. Estimated cost—£345,000,000.

(3) Much of the existing steam-drawn passenger rolling-stock would be replaced, largely by multiple-unit electric or diesel trains, and the remaining stock would be modernized. The principal passenger stations and parcels depots would also require large expenditure. Estimated cost—£285,000,000.

(4) Freight services would be drastically remodelled. Continuous brakes would be fitted to all goods wagons, leading to faster and smoother operation of freight traffic; marshalling yards (to be reduced in number) and goods terminal facilities would be re-sited and modernized; larger wagons would be introduced, especially for mineral traffic; and loading and unloading appliances would be modernized. Estimated cost—£365,000,000.

(5) Other items would cover improvements at packet ports, staff welfare, office mechanisms, and at least £10,000,000 for development and research work in connexion with the plan. The cost of these items was put at about £35,000,000.

The Commission believed that the plan would result in "a transformation of virtually all the forms of service now offered by British Railways," and that the expenditure envisaged would "ultimately attract a return of at least £85,000,000 yearly," besides benefiting the public directly by making possible better services and lower charges, and contributing to the relief of road congestion Remodelling of passenger operations would provide fast, clean, regular and frequent services, either diesel or electric, in all large urban areas; inter-city main-line trains would be accelerated and made more punctual; and services on other routes would either be made reasonably economic or transferred to road. In freight operations there would be a complete reorientation to speed up movement, reduce costs, provide direct transits for the main streams of traffic, and attract "a due proportion of the full-load merchandise traffic which now passes by road."

The Commission anticipated that "the remarkable growth in personal travel of the last few years" was likely to continue, and that, in spite of air transport and private motoring, there would remain "a large pool in which the railways will take a greater share once the quality and cost of the services are transformed" They also believed that the demand for freight transport would grow, and that the railways' share would depend on their ability to provide improved services at lower cost, the possibilities in this direction being described as "great."

Details of the 15-year plan are given below under cross-headings:

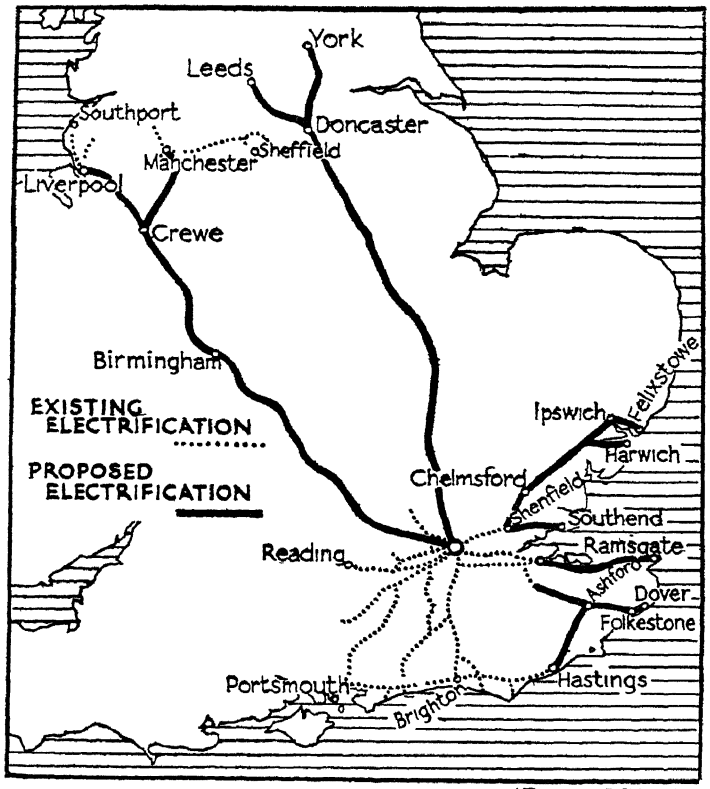
Track and Signalling. The Commission stated that although the engineering standards of the main trunk lines were "still among the best in the world," these lines were "sorely in need of replanning and improvement to meet future needs" In particular, it was intended to remove permanent speed restrictions by improving the track on important trunk routes, especially at curves and junctions, with the aim of achieving on main lines, and where conditions permitted, "speeds of at least 100 m.p h" On certain sections of the line a system of centralized traffic control (already widely used in America and elsewhere) would be introduced allowing the operation from a central control of all points and signals over a considerable length of line Expenditure of £20,000,000 had also been assumed for the progressive introduction of automatic train control

The End of the Steam Era and the Change to Electricity and Diesel Power. Declaring that "although the steam locomotive has served the railways well, many factors combine to indicate that the end of the steam era is at hand," the Commission stressed that a widespread change to electric or diesel traction was "a prerequisite of the improved quality of service which will be required by the industry and the travelling public in future," and which it intended to provide. It was therefore proposed to build no new express passenger or suburban steam locomotives after the 1956 programme, and to discontinue the building of steam locomotives altogether within a few years.

Discussing the respective merits of diesel and electric traction, the Commission pointed out that both had the advantage of cleanliness, acceleration, and uniform performance The chief disadvantage of electrification was the extensive engineering work needed, on the other hand the potential economies on heavy-traffic lines were greater than with diesel traction, and electrification would make it possible to realize any advantages which might flow from the use of atomic power at electricity-generating stations [In this connexion it was explained that the indirect use of atomic power seemed more probable than the development of atomic-powered locomotives] After stressing that "it is not a question of choosing between electricity and diesel traction, but rather of combining the two to the best advantage," the Commission claimed that the plan was flexible enough to take advantage of any other technical developments, including gas-turbine propulsion. It was proposed to electrify "a substantial proportion" of suburban services, two major trunk routes, and a third main-line route of lesser traffic density, and to use diesel traction for other principal main-line services as soon as possible.

Suburban Electrification. The proposals for suburban electrification covered the following lines, the approximate mileage and estimated cost of fixed equipment being shown in parentheses (*a*) London, Tilbury and Southend (85 miles, £11,000,000), (*b*) Liverpool Street to Enfield and Chingford (20 miles £2,000,000), (*c*) Liverpool Street to Hertford and Bishop's Stortford (35 miles, £4,000,000); (*d*) King's Cross and Moorgate to Hitchin and Letchworth, including Hertford loop (60 miles, £5,000,000, excluding signalling); (*e*) Glasgow suburban lines (190 miles, £18,000 000) Total—390 miles at a cost of £40,000,000.

In addition, it had always been the intention that as soon as circumstances permitted, all main routes of the Southern Region east of a line from Reading to Portsmouth should be electrified—thus extending to the coast the electrified zone which now terminated at Gillingham, Maidstone, and Sevenoaks, and carrying electric services to Ramsgate, Dover, Folkestone, and Hastings (*via* Ashford) In conjunction with diesel services to be introduced, this would eliminate steam traction from all Southern Region lines in the area mentioned, and would entail the electrification of about 250 route miles at a cost, for fixed equipment, of about £25,000,000.



(*Financial Times*)

Main-Line Electrification. The two major schemes planned were. (1) the main line of the Eastern and North-Eastern Regions from King's Cross to Doncaster, Leeds, and possibly York; (2) the main line of the London Midland Region from Euston to Birmingham, Crewe, Liverpool, and Manchester The subsidiary main-line scheme would consist of the extension of the existing electrification from Liverpool Street (which would soon reach Chelmsford) to Ipswich, including the Clacton, Harwich, and Felixstowe branches. These schemes would together mean the virtual elimination of steam from important areas of Britain at an estimated cost of about £125,000,000 for fixed installations and about £60,000,000 for the 1,100 electric main-line locomotives required The Commission stated that it was taking advice about the capacity of available technical staff and the electrical manufacturing industry to carry out "this very large programme"; if it proved necessary to limit it, one of the main routes concerned would be converted in the meantime to diesel traction, without prejudice to its eventual electrification.

Conversion to Diesel Traction. The plan envisaged a great improvement in net revenue through a much-extended use of diesel-powered trains, ranging from single-units to six-coach sets These would be used for three main types of service (*a*) city-to-city expresses; (*b*) secondary and cross-country routes, (*c*) branch lines An estimated 4,600 diesel vehicles would be required, including the 300 now on order or already in use. In addition, about 1,500 steam engines used for shunting and trip-working would be replaced within the next 15 years by about 1,200 diesel locomotives (apart from those already authorized) at a cost of about £25,000,000 The Commission pointed out that diesel traction had many of the advantages of electricity, could be introduced more quickly, and was essentially flexible; a "very substantial" investment was therefore proposed, beginning forthwith, in order to achieve 'a quick and complete changeover from steam in specified areas." By this means (it was explained) the maximum economies would be obtained by closing steam motive-power depots, and it would also be possible to obtain experience of the operating costs of diesel units without mixed working involving two forms of traction It was intended to standardize design as much as possible

The Commission stated that about 2,500 main-line diesel locomotives, estimated to cost £125,000,000. would be in use by the end of the 15 years covered by the plan On the Western Region it was intended to eliminate all steam working west of Newton Abbot (Devon), and also to employ diesel units based in that area to haul many of the passenger and freight trains from the West to Bristol and London and back. On the Southern Region, diesel locomotives would be employed in place of steam between Waterloo and Exeter, and between Waterloo and Southampton, Bournemouth and Weymouth. These two schemes would require about 200 main-line diesel locomotives in place of about 300 steam locomotives changes to diesel traction in other areas would be effected progressively. By taking full advantage of the high availability for work of diesel units, it would be possible to reorganize time-tables both for the greater convenience of the public and for more economical working, since when timing trains allowance would no longer have to be made for locomotive changing or refuelling

The Gradual Withdrawal of Steam Locomotives. Since many of the 19,000 steam locomotives at present in service were of modern design, it was proposed to make a careful selection of types for the "condemnation programme," so as to eliminate quickly the less efficient types and small classes for which it would not be economical to maintain spares Some capital expenditure on steam motive-power depots would be necessary to meet essential requirements, but in the main the object would be to eliminate steam depots in areas chosen for complete conversion as soon as electric or diesel maintenance centres had been constructed. The Commission estimated that £10,000,000 should cover expenditure on steam depots.

Improvements at Passenger Stations and Parcels Depots. £55,000 000 would be allotted under the plan to improvements at passenger stations, parcels depots, and carriage-cleaning and servicing depots. The Commission explained that it felt that "an improved quality of train service might not make its proper impact on the public if the standard of station accommodation and amenities lags behind" Moreover, realizing that "dirty carriages are a frequent cause of complaint," it acknowledged "a commercial need to provide the public with rolling-stock which is thoroughly clean, inside and outside." This, in turn, would require more highly mechanized carriage-cleaning depots.

Passenger Carriages. Important changes were also proposed in both the number and type of passenger carriages, at present numbering 42,000 A large carriage-building programme would be necessitated by the changeover to multiple-unit diesel or electric vehicles, and the main-line electrification schemes (including the Southern Region extensions) alone would entail the construction of about 3,600 multiple-unit vehicles. Some reduction in total stock, however, could be achieved through more extensive use, and by the end of the 15-year period all steam-hauled non-corridor carriages would have been replaced In this connexion it was explained (*a*) that certain stopping and branch-line services (now carried on at heavy loss) used non-corridor carriages, and would be replaced by diesel multiple-unit trains if there was a reasonable prospect of stimulating traffic, or else by road services; (*b*) that non-corridor coaches would be retained only on certain suburban electric services for their high seating capacity and loading advantages. No change had been assumed in the number of dining cars, but there might be big changes in design.

During the period of the plan about 31,000 new passenger carriages would be built at a cost of about £230,000,000, the aim being an ultimate carriage stock of 36,200 (compared with 42,300 at present), divided as follows: locomotive-hauled vehicles, 23,200 (against 37,200); electric multiple-unit vehicles, 8,400 (4,800); diesel railcars and multi-unit vehicles, 4,600 (300).

Reorganization of Freight Services. The Commission believed that a freight service giving shorter transit times and greater reliability and punctuality in deliveries could be achieved by (*a*) improved forms of motive power; (*b*) the adoption of continuous brakes on goods vehicles; (*c*) the re-siting and modernization of marshalling yards, (*d*) new or reconstructed goods stations. In regard to (*b*) it was proposed to spend £75,000,000 on fitting continuous brakes to wagon stock, the report pointing out that Britain was the only major industrial nation with so much freight still carried in loose-coupled wagons. The Commission estimated that the higher average speeds of train-movements and the greater punctuality as a result of this "most important" improvement would reduce the number of locomotives required by about 2,000. In respect of (*c*) and (*d*). about 55 marshalling yards would be constructed or reconstructed and about 150 existing yards closed or partially closed, at an estimated cost of about £80,000,000. whilst about £50,000,000 would be spent on new and reconstructed goods stations

It was proposed to reduce the stock of wagons from the existing level of 1,141,500 to about 752,000 in 1974, partly by building larger wagons and partly through an overall reduction of about 30 per cent in wagon turn-round time The total number of wagons to be built by 1974 was 297,000, at a cost of £177,000,000, and 255,000 of these (costing £130,000,000, included in the plan) would be built in the period 1956-70.

Sundry Items. These included £12,000,000 to be spent on packet ports, but no provision was made for new ships, which, in general, would be built (as now) as renewals of existing ships Besides the £10,000,000 to be provided for research, sums had been included for office accommodation for the additional technical staff required, and for office appliances such as electronic computing machines.

Staff Training. A big increase would be necessary in the Commission's technical staff, and outside assistance would also have to be enlisted Trainees would be recruited to strengthen the traffic staff, and men already in the service would be trained for the special working resulting from the plan.

Financing the Plan. As detailed priorities for individual works within the regions had not yet been worked out, it would not be possible at the present stage to forecast dates for the completion of the major components of the plan, which must be "pushed on at the fastest pace possible" The statement continued: "It would be useless or worse than useless, to limit the plan so that the investment incurred would do no more than enable the railway services to continue in more or less their present form. This would still require almost half the investment now proposed; yet this outlay would not be offset by improved results, nor would the trend towards obsolescence be arrested. On the other hand, if the total outlay of £1,200,000,000 were spread evenly over 15 years, it would represent an annual investment of about £80,000,000, or about 5 per cent of the gross capital formation of the country in 1953." Of this total outlay of £1,200,000,000, it was estimated that about £400,000,000 would be provided from internal sources such as depreciation provisions, leaving £800,000,000 to be borrowed from external sources The annual charge for interest and redemption on these borrowings could be estimated at £40,000,000. In addition, it would be necessary to meet increased depreciation charges of £15,000,000, whilst to put the railways in a healthy state traffic receipts ought to be increased by £25,000,000. Against the £80,000,000 represented by these three requirements, the actual return from the investment should be at least £85,000,000 annually, and possibly much more.

Explaining how this minimum economic improvement of £85,000,000 was arrived at, the Commission said that the major economy under the plan would lie in the reduction of direct cost of train movement, resulting mainly from changes in motive-power and methods of operation It was estimated that diesel power and electrification should together effect an improvement of over £30,000,000 yearly in the margin between movement costs and passenger receipts, reduction being also expected in the cost of terminal and commercial services. Provided that the passenger service as a whole could be overhauled, and an improved and highly competitive service offered in those fields in which the railways had a natural advantage, there should be an aggregate improvement of £35,000,000 annually. In freight services there should be an improvement of about £30,000,000 a year as a result of the introduction of continuous brakes, the smaller number of wagons needing maintenance, and improved marshalling and terminal facilities. A further £10,000,000 would be yielded by mechanization of goods-handling at freight terminals, and, taking other factors into account, the total improvement from freight services should amount to almost £60,000,000 From the total estimated economies of £95,000,000 from passenger and freight services, the Commission deducted £10,000,000 for increased expenses, leaving a net amount of £85,000,000

The Commission added that the plan should result in practically all forms of traffic covering at least the direct costs of their movement, and that the importance of this from the point of view of healthier finances could "hardly be exaggerated"

The House of Commons, after rejecting a Labour amendment, adopted a Government motion on Feb. 3 which expressed the conviction that "the steps proposed by the British Transport Commission will, with the co-operation of all concerned, lead to the establishment of a modern and economic railway system for the benefit both of industry and of the travelling public."

Mr. R. A. Butler (Chancellor of the Exchequer) commended the "courageous and imaginative" conception of the modernization plan, and said that he had no reason to think that the Transport Commission counted on any Exchequer subsidy to help them in fulfilling their statutory duty to achieve a balanced revenue account, taking one year with another. Allowing for all the uncertainty of forecasting for 15 years ahead, there was a "reasonable prospect" that the Commission's plan would pay its way, and the Government therefore considered that funds for the plan must be found. This meant that over the period of the plan, sums of the order of £800,000,000 must be borrowed on the market; subject to the details of the plan proving satisfactory, the Government would do all it could to facilitate the borrowing programme. The Chancellor emphasized that these sums would be raised "on the market," and

that there was no question of the Exchequer advancing any part of the money to the railways In reply to a question by Mr. Herbert Morrison (Lab), Mr Butler said that the Transport Commission would be able to borrow on the market with a Treasury guarantee.

Earlier in his speech Mr Butler had referred to the Opposition's amendment (see below) as follows: "The amendment appears to suggest that to make the railways pay, there has to be a continuous subsidy from road to rail. We say that is undesirable It would be a continuous drain on the road-haulage industry and its customers, and it would remove from the railways the incentive to cure their own ills It is important that the railways should pay and that the roads should pay, and it is not right that one should milk the other to live Our policy is to proceed with the modernization of the railways and to look forward, at the same time, to the profitability of the appropriate British Road Services' fleet which remains."

Mr. Herbert Morrison (Deputy Leader of the Opposition) moved an amendment accusing the Government of having "wrecked the policy of transport co-ordination and integration pursued by the Labour Government" Whilst agreeing that British Railways were "not perfect," he maintained that substantial improvements had been secured over the past six years—e g., in greatly increased freight traffic compared with pre-war, in reducing considerable arrears of maintenance, and in staff reductions After declaring that "the dream of the transport man—co-ordination between road and rail —had been coming true," Mr. Morrison said that "the Government, for mere doctrinaire, spiteful, catty, political reasons, has gratuitously barged into this matter and wrecked the whole basis of co-ordination and integration."

The Labour amendment was negatived by 302 votes to 265, and the Government's motion adopted without a further division.—(Times - Daily Telegraph - Manchester Guardian - Financial Times) **(Prev. rep. B.T.C. Report, 13903 A; 13228 B; Signalling, 13099 C.)**

A. UNITED STATES. — Land Speed Record.

The U.S. Air Force disclosed on Dec. 27 that Lieut -Colonel John Paul Stapp, an aero-medical scientist, had set up a land speed record of 632 m.p.h. in a rocket-propelled sled during tests carried out at Alamagordo, New Mexico. Colonel Stapp's speed was 229 m.p h. higher than the previous land record of 403 m.p.h. set up by the late John Cobb in 1947 (see 8846 C).

It was explained that Colonel Stapp was strapped to a 2,000-lb tubular steel sled mounted on steel rails and propelled by nine rockets giving a thrust of 40,000 lb. The sled reached top speed (i e 632 m p h) five seconds after starting and within a space of 2,800 feet, and was halted by a water-brake method in 1½ seconds. Colonel Stapp, who wore no special equipment except for a plastic helmet and visor to cover his face, withstood sudden deceleration forces up to 35 times his own weight, and a wind pressure of more than two tons. He suffered no ill effects except for small blood blisters from dust particles in the air, and two black eyes as a result of their sudden movement forward against the eye-lids during deceleration

The record was set up during a series of tests designed to discover how quickly and safely a human being could come to a dead stop after travelling at great speeds. The tests were designed to help paratroopers and aircrews who had to bale out of aeroplanes travelling at supersonic speeds.

B. SOVIET UNION. — Resignation of M. Mikoyan.

It was announced in Moscow on Jan. 24 that the Presidium of the Supreme Soviet had acceded to a request by M. Anastas Mikoyan to be released from his duties as Minister of Trade, and that he would be succeeded in that post by M. Dimitri Pavlov. No reasons were given for M. Mikoyan's resignation, nor was it known whether or not M. Mikoyan continued to remain a Deputy Premier and a member of the presidium of the Communist Party of the Soviet Union. M. Mikoyan (an Armenian), one of the leading personalities in the Soviet Government, had been concerned for nearly 30 years with Soviet trade policy.—(Times - Manchester Guardian) **(Prev. rep. Soviet Cabinet, 12869 A.)**

C. MOUNTAINEERING. — Everest Foundation.

A company known as the Mount Everest Foundation, the object of which is to encourage expeditions "for the exploration of the mountain regions of the earth, etc," was formed in London on Feb. 3, its committee consisting of Brigadier Sir John Hunt (leader of the British Everest Expedition of 1953), General Sir James Marshall-Cornwall, Lord Nathan, and Major-General R. L. Brown. Sir John Hunt said that the foundation would administer the money from lectures, books, films, and "all other means by which we have endeavoured to tell the story of Mount Everest to the world." It would encourage people to make their own plans for expeditions, and to ask for any financial backing they might need.

D. ETHIOPIA. — The Emperor Haile Selassie's Tour of North America and Europe.

The Emperor of Ethiopia, H.M. Haile Selassie I, made an extensive tour of North America and Europe during 1954 in the course of which he paid State visits to 14 countries—the U.S.A., Canada, Mexico, Yugoslavia, Greece, Great Britain, France, the Netherlands, Western Germany, Sweden, Norway, Denmark, Switzerland, and Austria, in that order. The tour was the first of its kind ever undertaken by an Ethiopian sovereign.

During his visit to the United States (May 25 - June 3) the Emperor stayed at the White House as the guest of President Eisenhower, addressed a joint session of the U.S. Congress, and visited the headquarters of the United Nations in New York, where he was received by the U.N. Secretary-General, Dr. Hammarskjold. In his speech to the U S. Congress (May 28) the Emperor stressed that the system of collective security, having been successfully applied by the U.N in Korea, must be supported "fearlessly" and "at whatever cost" to resist aggression, in whatever part of the world it might occur After recalling that U.S. and Ethiopian troops had fought side by side in Korea to resist aggression, the Emperor declared . "Collective security is either a universal principle or no principle at all It cannot admit of regional application or be a regional responsibility. That is why we, like you, sent troops half-way round the world to Korea . . ."

During his State visit to Britain (Oct. 14-27) H M. the Queen gave a banquet in the Emperor's honour at Buckingham Palace, at which the speeches of her Majesty and the Emperor were broadcast. The Emperor was also received by the Lord Mayor (then Sir Noel Bowater) and Corporation of the City of London at Guildhall. On the occasion of the State banquet at Buckingham Palace (Oct. 14) her Majesty conferred the Order of the Garter on the Emperor, who, in turn, conferred the Order of the Seal of Solomon on the Queen and the Order of the Queen of Sheba on the Duke of Edinburgh. [According to the Ethiopian national saga, the *Kebra Nagast* ("Glory of the Kings"), the Ethiopian dynasty claims descent from Menelik I, the son of King Solomon and the Queen of Sheba.]

While in Britain, the Emperor visited Bath on Oct. 18 to receive the Freedom of that city, which had been conferred on him in recognition of his "eminent services as friend and ally of Great Britain" and his close association with Bath. [The Emperor resided in Bath from 1936, following the Italian occupation of his homeland, until 1941, when he returned to take part in the liberation of his country. He still possesses a residence in the city, whose only other living Freeman is Sir Winston Churchill.] The Emperor visited Oxford on Oct. 20 to receive the honorary degree of Doctor of Civil Law from Viscount Halifax, Chancellor of the University

In the course of his tour of North America and Europe the Emperor visited many educational institutions, hospitals, and industrial installations, including the Donzère-Mondragon hydro-electric scheme in France, the Rotterdam shipbuilding yards, and the Ruhr industrial area His visits to Yugoslavia, Western Germany and Austria were the first paid by a Head of State to those countries since the war.

The Emperor's tour of North America lasted for some seven weeks in May, June and July, and was followed by visits to Yugoslavia and Greece (at the end of July) before his return to Addis Ababa. He left Ethiopia again on Oct 5 for his State visits to Britain and other Western European countries, which took place in October, November, and the first few days of December. He arrived back in Addis Ababa on Dec. 6, 1954.

The Emperor was accompanied throughout his tour by his son, the Duke of Harar.

E. FRANCE. — Ratification of SEATO Pact.

M. Mendès-France informed the Foreign Affairs Commission of the National Assembly on Feb. 1 that President Coty had signed a decree on Jan. 12 ratifying the South-East Asia collective defence treaty, and that parliamentary approval was unnecessary since the Manila pact and the accompanying Pacific Charter represented a defensive alliance. The Foreign Minister, M. Faure, explained on the same day (Feb. 1) that the French Constitution did not require parliamentary approval for the ratification of a defensive treaty, although the Government could, if it wished, consult Parliament before authorizing the President of the Republic to sign the documents of ratification. Although it was true that the NATO pact had been submitted for parliamentary approval, whilst the SEATO pact had not, M. Faure pointed out that the former constituted a "turning-point" in French policy, which was not the case with the SEATO pact —(Le Monde, Paris) **(13944 B.)**

F. UNITED KINGDOM. — National Savings in 1954.

The National Savings Committee announced on Jan. 2 that savings during 1954 totalled £1,248,000,000 (compared with £1,142,000,000 in 1953) and withdrawals £1,127,000,000 (£1,147,000,000 in 1953). The excess of net savings over withdrawals thus amounted to £121,000,000 (a net improvement of £126,000,000 over 1953), making 1954 the best National Savings year since 1948.—(Financial Times) **(13892 A.)**

A. SOVIET UNION - WESTERN POWERS. — Soviet Declaration on "Normalization" of Relations with German Federal Republic. - Ending of State of War with Germany. - British and French Replies to Soviet Notes on Possible Annulment of Anglo-Soviet and Franco-Soviet Treaties. - Soviet Notes to W.E.U. Countries. - Allegations of Infringement of Geneva Protocol on Chemical and Bacteriological Weapons.

The Soviet Government issued a declaration on Jan. 15 expressing its readiness to "normalize" its relations with the German Federal Republic on condition that the Paris agreements were not ratified. This declaration was followed on Jan. 25 by a decree, issued by the Presidium of the Supreme Soviet, ending the state of war between the U.S.S.R. and Germany, which had existed since the German invasion of the Soviet Union on June 22, 1941. Prior to these developments, the Soviet Government had sent Notes on Jan. 11 to all member-countries of the Western European Union except the German Federal Republic (i.e. to Britain, France, Italy, Belgium, Holland, and Luxemburg) alleging that the Paris agreements violated the Geneva Protocol of 1925 by permitting the W.E.U. countries to stockpile bacteriological and chemical weapons, as well as atomic weapons. On the Western side, the British and French Governments sent Notes to the U.S.S.R. on Jan. 26, in reply to the Soviet Notes of Dec. 16 and Dec. 20 (see 14002 A), repudiating the Soviet contention that ratification of the Paris agreements would "fundamentally contradict" the Anglo-Soviet and Franco-Soviet treaties of alliance concluded during the war.

Soviet Declaration on Germany.

The Soviet declaration issued on Jan. 15 made the following three points:

(1) "The most important and urgent matter for settling the German problem is to solve the task of restoring German unity. In order to carry out this task, talks are necessary between the U.S.A., Britain, France and the Soviet Union, on the question of restoring the unity of Germany on the basis of free all-German elections. Such talks would lose all point and would become impossible if the Paris agreements were ratified."

(2) The Soviet Union, which had "good relations with the German Democratic Republic" (i.e. Eastern Germany), was "likewise prepared to bring about normal relations between the U.S.S.R. and the German Federal Republic" with the aim of "promoting better mutual understanding and the search for more successful ways of carrying out the task of restoring German unity."

(3) "If the Paris agreements are ratified, a new situation will be created in which the Soviet Union would concern itself, not only with further strengthening friendly relations with the German Democratic Republic, but also, through the joint efforts of the peace-loving European States, with helping to strengthen peace and security in Europe."

The declaration said that the ratification of the Paris agreements would "draw the German Federal Republic into adventurist plans for preparing a new war," "establish the division of Germany for long years to come," and "be an obstacle in the way of the peaceful restoration of German unity" It added: "There are still possibilities, which have not been utilized, of reaching agreement on the question of German unification with due consideration for the legitimate interests of the German people, and for the holding in 1955 of free all-German elections with this end in view. Such possibilities exist if the main obstacle that now stands in the way of German reunification—the plans for the remilitarization of Western Germany and its inclusion in military groupings—is removed. The German people should be given the opportunity, by free general elections throughout Germany, including Berlin, to express their will freely, so that a united Germany can again arise as a great Power occupying a worthy place among the other Powers . . .

"The Soviet Government considers it possible, in the event of assent by the German Democratic Republic and the German Federal Republic, to come to an understanding on the establishment of appropriate international supervision over the holding of all-German elections. In this connexion, no section of Germany must be bound by any conditions of separate agreements regarding its participation in military groupings . .

"The German people must make a choice. They must choose the road they are to follow. One road leads to the restoration of German unity and the establishment of normal relations with all European States This road precludes participation by any section of Germany in military groupings directed against other States, and can best be ensured by Germany's participation in a system of European collective security. The other road, on to which the Paris agreements are dragging the German people, leads to the division of Germany, the restoration of militarism in Western Germany, and the inclusion of Western Germany in the plans for preparing a new war. There can be no doubt that the overwhelming majority of the German people reject this militarist road—a road of hopeless new military adventures which Germany has tried more than once, and which holds out to the German people nothing but new and still more terrible disasters . ."

An official statement issued in Bonn on Jan. 16 described the Soviet declaration as a new move in the "continuing struggle of the Soviet Union" to prevent the unity of the Western world. It denied *in toto* the allegation that the Paris agreements would mean the remilitarization of Western Germany; declared that negotiations with the Soviet Union on the reunification of Germany had no chance of success until the "alliance of the free peoples" had come into being; and recalled that the Soviet Government itself, at the Berlin Conference of 1954, had refused free all-German elections and had blocked "every step towards the reunification of Germany in peace and freedom."

Ending of State of War with Germany.

The decree issued on Jan. 25 by the Presidium of the Supreme Soviet, ending the state of war between Germany and the U.S.S.R., was worded as follows:

"On June 22, 1941, as a result of the treacherous attack by Nazi Germany, the Soviet Union found herself in a state of war with Germany. In its self-sacrificing struggle, waged together with the peoples of the countries belonging to the anti-Hitlerite coalition, the Soviet people smashed the Hitlerite aggressors and freed the peoples of Europe, including the German people, from Fascist enslavement.

"At the Potsdam Conference held in 1945 the lines of the future development of Germany as a united, peace-loving and democratic State were defined, and the necessity of concluding a peace treaty with Germany was confirmed The Presidium of the Supreme Soviet considers it as anomalous that although some 10 years have elapsed since the cessation of military activities against Germany, Germany is still in a state of division and has no peace treaty, while the German people continue to remain in a state of legal inequality as compared with other peoples.

"The Presidium takes cognizance of the fact that the policy of the U.S.A., Britain, and France aimed at remilitarizing Western Germany and integrating her into aggressive military alignments, which has found its expression in the London and Paris agreements, has made it impossible to reach the necessary agreement on restoring the unity of Germany along peaceful and democratic lines and to conclude a peace treaty with Germany.

"Having in view the strengthening and extension of peaceful and friendly mutual relations between the Soviet Union and the German Democratic Republic, based on the recognition of the principles of sovereignty and equality; taking into consideration the opinion of the Government of the German Democratic Republic; and taking into account the interests of the population of both East and West Germany, the Presidium of the Supreme Soviet declares:

(1) The state of war between the Soviet Union and Germany is terminated, and peaceful relations are being re-established.

(2) All judicial restrictions occasioned by the war in respect of German citizens who were regarded as citizens of an enemy State are abolished.

(3) The declaration on the ending of the state of war with Germany does not alter her international obligations, and does not affect the rights and obligations of the Soviet Union which derive from existing international agreements of the four Powers concerning Germany as a whole."

Great Britain had terminated the state of war with Germany on July 9, 1951 (see 11589 A), France on July 13, 1951 (11589 A), and the United States on Oct. 24, 1951 (11811 D). Many other Allied countries had taken similar action, but the Soviet Union and Eastern European countries had remained technically at war with Germany.

It was officially stated in Bonn on Jan.26 that the Soviet termination of the state of war would be a practical step towards the restoration of normal Russo-German relations only if the Soviet Government were to agree to "really free elections for the whole of Germany," and to the negotiation of a peace treaty with a free all-German Government. The hope was expressed that the Soviet Government, as a first step towards the normalization of relations, would release all German prisoners-of-war and civilians still in its custody.

British and French Replies to Soviet Notes.

Both the British and the French Governments replied on Jan. 26 to the Soviet Notes presented in December.

British Reply. The British Note was worded as follows: "H.M. Government have noted the statement in the Soviet Government's Note of Dec. 20 that, after the ratification of the Paris agreements, they will submit to the Presidium of the Supreme Soviet a proposal for the annulment of the Anglo-Soviet Treaty of Mutual Assistance concluded in 1942.

"In view of the sacrifices of the two countries during the Second World War, and of their common interest in co-operation thereafter, H.M. Government believed that the Anglo-Soviet Treaty would lead to real and fruitful collaboration between the two countries. They hoped that the U.K. and the Soviet Union would not only assist one another in the tasks of reconstruction, but would join together with other countries in restoring security and prosperity to Europe.

It is a matter of deep regret to H M Government that it has not hitherto proved possible to find a basis for such collaboration with the Soviet Government They must, however, reject the suggestion that the responsibility for this lies with British policy. It is not H M. Government who have imposed harsh political, economic and social barriers across Europe It is rather the policies of the Soviet Government which have led to this tragic and dangerous division of Europe

" In particular, the policies of the Soviet Government have been directly responsible for the division of Germany, the three Western Zones of which have long been united The Soviet Zone has long possessed considerable armed forces, organized in regular military, naval, and air units In this situation the German Federal Republic manifestly cannot any longer be denied its rights including the right to defence. Confronted with the great weight of Soviet and Soviet-controlled armaments, the Western nations have felt impelled, in accordance with the clearly expressed views of their freely elected Governments, to join in an association to which a German defence contribution can be made The Paris agreements provide for such an association. Under these agreements a system of controls, limitations and prohibitions is established, to be applied to the forces and armaments of all members Any member is thus precluded from having independent recourse to the threat or use of force.

" In view of the allegations in the Soviet Note, H M Government feel impelled once more to repeat that the NATO, of which the German Federal Republic is now to become a member, is purely defensive. As the Soviet Government must be well aware the military provisions of the treaty will enter into effect only in the event of an armed attack against one or more of the members of NATO The North Atlantic Treaty is not directed against any country, and is in no way inconsistent with the Anglo-Soviet Treaty.

" In consequence, H M Government are unable to accept the assertion in the Soviet Note that the participation of H.M Government in the Paris agreements is contrary to their obligations under the Anglo-Soviet Treaty They deplore the Soviet Government's declared intention of using this pretext to annul the Treaty which H M. Government, for their part, believe could still make an important contribution to Anglo-Soviet relations as well as to European security. But H.M Government cannot allow themselves to be deflected by any threats from their chosen course They are convinced that the association of like-minded nations, which is being built up in Western Europe, will serve the promotion of European security and contribute to the cause of peace "

French Reply. The French Note, which was worded in similar terms, described the Soviet Government's attitude as " completely unjustified," and denied that the principles underlying the Paris agreements were in any way incompatible with the Franco-Soviet Mutual Assistance Treaty of 1944 It reiterated the French Government's determination to seek every opportunity of negotiating a settlement of all outstanding problems with the Soviet Union, as had been made clear by M Mendès-France in his speech to the U N General Assembly (see 13910 A), emphasized that France, for her part, would remain faithful to the spirit of the Franco-Soviet Treaty, and declared that the Soviet Government would incur " the entire responsibility " if it annulled the treaty.

Soviet Notes to W.E.U. Countries.

As stated above, the Soviet Government sent Notes on Jan. 11 to all the W.E.U. countries (excluding Western Germany) alleging that the Paris agreements " contain clauses contradicting the Geneva Protocol of June 17, 1925, on the prohibition of the use in war of asphyxiating, poisonous or other similar gases, and of bacteriological weapons."

After recalling that the Geneva Protocol had been adhered to by 50 countries, including all the W E U. member-States (among them Germany), the Notes said *inter alia* . " . The Geneva Protocol played an outstanding role in preventing the use of chemical and bacteriological weapons during the Second World War Not even the Hitler Government, whose chief members were condemned by the International Tribunal as war criminals, dared to use chemical and bacteriological weapons and to violate the Geneva Protocol . . Protocol No. 3 of the Paris agreements states that the partners of the military bloc shall set up, alongside stocks of atomic weapons . . . stocks of chemical and bacteriological weapons . . . The Soviet Government considers it its duty to issue a warning, in particular, that the Paris agreements give chemical and bacteriological weapons, as well as atomic weapons, to the West German Army whose establishment is stipulated in those agreements. Such a situation cannot fail to increase the threat of a chemical and bacteriological war of annihilation in Europe, with all its grave consequences . "

The Interim Commission of the Western European Union (representing all seven W.E U. member-countries, including the German Federal Republic), met in London on Jan. 20 to draft a joint reply to the Soviet Note of Jan 11.—(Times - Daily Telegraph - Le Monde, Paris - Frankfurter Allgemeine Zeitung - Soviet Weekly) **(Prev. rep. Soviet Notes, 13002 A.)**

A. ISRAEL. — Merger of Religious Parties.

Two of the four religious parties in Israel—the *Mizrachi* (Religious Conservative) and *Hapoel Hamizrachi* (Religious Workers') parties—decided on Jan. 17 to merge into a single party under the name of the *Mizrachi-Hapoel Hamizrachi* party. The combined party has ten members in the 120-member Parliament (*Knesset*) and two Ministers in the Israeli Cabinet. (New York Times) **(Prev. rep. 13383 B.)**

B SOUTH AFRICA. — Mr. Strydom's Message to Bantu Population.

The Prime Minister of South Africa, Mr. Strydom, sent the following Christmas message to the Bantu population of South Africa on Dec 21, 1954

' When I addressed the people of South Africa over the radio (see 13941 A) I pointed out that we were mindful of the fact that we acknowledged the sovereignty and guidance of Almighty God in the destiny of countries and peoples, and that we seek the development of our country along Christian national lines. I went on to explain that everything possible would be done by this Government to see that justice and fairness were meted out to all sections of the community

This Government will continue, as in the past, to guide you on the road of self-development towards maturity. The Bantu of South Africa still have a long way to go, but everything possible will be done to help you along the road ahead. Through the Bantu Authorities, the Bantu Education Act, and other measures, my colleague, the Minister of Native Affairs, has already opened the road for you that leads to self-reliance and self-dependency There are those who, in their ignorance, tell you that you are not yet ripe for this, that you should continue being dependent on others, that self-development is an idle dream My reply to them is that they do not have the welfare of their people at heart

There lies a great task ahead of you You must learn to develop and reclaim your own areas so that your homeland can become prosperous You must learn to govern yourselves in your areas You must learn to become your own traders, builders, carpenters, doctors, welfare workers, and so forth This is separate development and must be based on your own way of life. In all respects you must learn to make your own communities self-sufficient All these things will come about in time.

We hope the day will soon dawn when each Bantu will serve his own community, and be of service to his fellow-Bantu This is a necessary prerequisite for the healthy development of the Bantu peoples along their own lines towards a future that holds much in store for them Those who oppose separate development wish to be absorbed in a mixed community The resistance of the European and the wise Bantu will make this impossible. Why should one strive after an impossible ideal in which one's nation would perish, instead of setting as an objective the preservation of one's heritage and development on those lines ?

It is a difficult but just road that you will have to travel—to preserve your racial identities and develop on your own. When the final goal is reached, however, the prize will be worthwhile."

Mr Strydom's message was issued through the African paper *Bantu World*.—(Cape Times) **(Prev. rep. 13941 A.)**

C. INDIA. — Diplomatic Appointments. - Minister appointed to Cambodia. - "De Facto" Recognition of Laos and North Vietnam.

The following appointments in the Indian Foreign Service were announced in New Delhi during November and December : Mr. Bhagwan Sahay, Chief Commissioner of Bhopal, as Ambassador to Nepal ; Mr. Y. D. Gundevia, Ambassador in Berne, as Deputy High Commissioner in London ; Mr. B. R. Sen, Ambassador in Rome, as Ambassador to Japan ; Mr. Naranjan Singh Gill as Ambassador to Ethiopia ; and Mr. Rajeshwar Dayal, Ambassador in Belgrade, to serve concurrently as the first Indian Minister to Rumania. Mr. C. C. Desai, lately High Commissioner in Ceylon, was appointed High Commissioner to Pakistan on Jan. 25, 1955.

It was announced on Dec. 13, 1954 that India had decided to establish a diplomatic mission in Cambodia, with Mr. B. K. Acharya (Deputy High Commissioner in Dacca) as Minister in Pnom-Penh. Indian *de facto* recognition of Laos and the Democratic Republic of Vietnam (North Vietnam) was announced on Dec. 15.—(Indian High Commissioner's Office, London - The Statesman, Calcutta) **(Prev. rep. 13827 E.)**

D. UNITED KINGDOM. — Stockport By-election.

The by-election at Stockport South, caused by the conferment of a peerage on Sir Arnold Gridley (Conservative) in the New Year Honours—see 13976 A—was held on Feb. 3 with the following result

Steward, H. M. (Conservative)	..	16,321
Davies, Herbert (Labour)	..	13,758
No change. Conservative majority	.	2,563

The figures at the general election were : Sir Arnold Gridley (C) 22,075, F. Bibby (Lab) 18,675—Conservative majority, 3,400. The Conservative candidate received 54 26 per cent of the votes in the by-election and the Labour candidate 45.74 per cent, compared with general election percentages of 54.17 and 45 83 per cent respectively —the Conservative proportion of the poll thus increasing by 0.9 per cent. The percentage of the electorate voting in the by-election was 64 60, compared with 84.17 at the general election. The electorate numbered 46,559, compared with 48.413 in 1951.

Mr Harold Steward (50) is a production engineering manager

The by-election was the 47th during the present Parliament. (Daily Telegraph) **(Prev. rep. By-elections, 14015 A.)**

A. RHODESIA AND NYASALAND FEDERATION. — Legislation for Promotion and Control of Immigration. - Immigration Statistics. - Southern Rhodesian Racial Legislation. - Proposals for Recognition of Native Trade Unions. - Statement by Mr. Garfield Todd.

An Immigration Bill, empowering the Governor-General to prohibit the entry into the Rhodesia and Nyasaland Federation of any class of persons deemed to be undesirable inhabitants on economic grounds, or because of their standards and habits of life, was introduced into the Federal Parliament on July 8, 1954 Other clauses in the Bill provided (*a*) that the Minister for Home Affairs might grant exemption from the prohibition to individual members of a class which had been deemed undesirable, (*b*) that the Minister might declare a person a prohibited immigrant on information received from any Government through official or diplomatic channels, (*c*) that intending immigrants should be able to read and write a European language, (*d*) that an inter-departmental fact-finding committee should advise the Minister on the absorptive capacity of the Federation; and (*e*) that an Alien Immigrants Selection Board should be set up and regulations on immigration quotas and related matters issued.

Moving the second reading on July 21, **Mr. J. M. Greenfield** (Minister for Home Affairs) said that the keynote of the Federal Government's policy was the introduction into the Federation of the largest possible European population that could be absorbed, but on a selective basis It wanted to maintain the greatest possible flow of immigrants from Britain, but the continent of Europe, and particularly Western Europe, must also be regarded as "a potential source of very useful immigrants" Whereas the proportion of non-British immigrants into the Federal area for 1952 was only 6 per cent, the corresponding figures for other Commonwealth countries for 1953 were: Australia, 52 per cent; New Zealand, 23 per cent; Canada, 76 per cent, South Africa, 57 per cent In recent years there had been a slowing of the tempo of emigration from the United Kingdom, and the Government therefore proposed to maintain in Britain both a selection board and an immigration attaché, whose business would be to stimulate emigration to the Federation In addition, certain classes of British emigrants would be given financial assistance in the form of loans to cover the cost of their passage

Replying to the debate, Mr Greenfield declared on Aug 2 that it was the Government's policy to maintain the British way of life and not to permit any further Indian or Asian immigration, with certain exceptions covering teachers, ministers of religion, and the wives of persons already in the country. He subsequently pointed out in this connexion that the Government were standing on the provisions accepted at the Imperial Conference of 1919, at which it had been agreed that self-governing members of the Commonwealth should have the right to determine the character of immigrants entering each particular country

In the Committee stage two amendments were adopted, one of which deleted a clause prohibiting the entry of persons who were not prepared to swear that they were not Communists. The other amendment provided (*a*) that a person deemed to be an undesirable immigrant might make representations in writing to the Ministry within 24 hours of his non-admission; (*b*) that the Minister might inform such persons of the reasons for his decision, if there was no question of breach of confidence with the source of his information.

The Bill was given a third reading on Aug. 25, 1954, and came into operation on Nov. 1. On Oct. 28 the Governor-General (Lord Llewellin) had issued an Order declaring all indigenous Africans of the Union of South Africa to be undesirable immigrants under the Act. Immigrants Selection Boards were set up on Oct. 28 in Salisbury (Southern Rhodesia) and London, under the chairmanship respectively of Sir Eric Thomas (a former Judge of the High Court of Southern Rhodesia) and Mr. J. W. Miller, who was also appointed immigration attaché. Under Federal regulations which also came into force on Nov. 1, it was laid down that three-monthly immigration quotas would be fixed so as to permit adjustments to be made to meet variations in economic conditions and the demand for manpower.

Immigrants entering Southern Rhodesia in 1953 totalled 10,305, compared with 14,560 in 1952 Of the 1953 total, 4,389 (43 per cent) came from the U.K., 4,309 (42 per cent) from South Africa, 857 from other African countries (the majority from British Colonies), and 750 were aliens (including 205 from the Netherlands and 107 from Italy). The capital declared by immigrants amounted to £3,439,330 (£3,272,916 in 1952)

Immigrants entering Northern Rhodesia in 1953 totalled 8,861, or 16 per cent more than in 1952 Of these, 8,283 were British subjects (including 2,955 U.K citizens, 3,819 South Africans, 414 Southern Rhodesians, and 648 Asians), whilst 578 were aliens.

It had been announced in March 1954 that the Southern Rhodesian Government had concluded an agreement with the Netherlands whereby emigration facilities would be made available for Dutch skilled workers wishing to settle in Southern Rhodesia.

The Central African Statistics Office stated on Nov 1, 1954, that although 16,770 European immigrants had entered the Federation during the year ending June 30, 1954, the net gain in population was only 2,200, as about 14,500 Europeans had emigrated. During this period the population had increased by 169,000 (160,000 Africans, 6,700 Europeans, and 2,300 Asians and Coloureds) and on June 30 totalled 6,876,000, of whom 6,630,000 were Africans, 220.000 Europeans, and 26,400 Asians and Coloureds

The Aliens (Registration and Status) Bill and the Aliens Deportation Bill were also given third readings on Aug 25, 1954.

The former Bill, which came into effect on Nov. 1, required all aliens (except diplomatic representatives, tourists, and aliens in transit) to carry identity cards, to supply photographs and finger- and palm-prints when applying for them, and to notify the authorities of changes of employment or address

The latter Bill provided that the Home Minister might issue an order directing any alien (defined as any person who was neither a British subject, a British-protected person, nor a citizen of the Irish Republic) to leave the Federation within a specified period; that failure to comply with an order would be punishable by imprisonment for up to six months, a fine of up to £100, or both, that any person aiding or abetting an alien to contravene any provision of the Act would be liable to imprisonment for up to two years; that aliens would not have the right to be heard before or after the issue of a deportation order; and that the courts would have no jurisdiction to review or quash an order The Bill also provided for the deportation of criminals, with the exception of (*a*) persons born within the Federation, and (*b*) British subjects who had lived in the Federation for seven years before the coming into force of the Act, and who had not been convicted of certain specified offences.

The Inter-Territorial Movement of Persons (Control) Bill, which received its third reading in the Southern Rhodesian Parliament on Aug. 27 and came into force on Nov 1, provided that Asians, persons previously declared prohibited immigrants, and persons who had been convicted of certain offences might not enter Southern Rhodesia from Northern Rhodesia and Nyasaland without a permit. It prohibited the entry of persons who might engage in activities likely to endanger public order, and authorized the deportation of persons contravening the provisions of the Act.

The Immigration Act and the Inter-Territorial Movement of Persons (Control) Act aroused strong resentment from the Asian community in the Federation and from the Government of India. Asians in Southern Rhodesia protested to the Territorial Government against the latter Act on the ground that Asians would be denied the freedom of movement granted to other races, and Nov. 1 (the day on which both Acts came into force) was observed as a "day of mourning" by Indians throughout the Federation A press statement issued by the Indian Ministry of External Affairs on Oct 6 observed that, although the Federation had started with a solemn declaration against any policy of racial discrimination, within a year the Federal Parliament had "given clear indication of the discriminatory measures to be applied against the African and Asian communities."

Mr Garfield Todd (the Southern Rhodesian Premier), replying to Asian criticisms on Oct 25, emphasized that the Act in no way diminished the existing rights of Asians living in Southern Rhodesia, nor was it intended to prohibit visits for business or holiday purposes to Southern Rhodesia by Asians living in Northern Rhodesia and Nyasaland There would also be no change in the practice of permitting children of Asians resident in Northern Rhodesia and Nyasaland to enter Southern Rhodesia for educational purposes, and "in the practical applications of the laws to Asiatic visitors as little restriction as possible will be imposed"

Recent Southern Rhodesian legislative measures affecting racial policy are summarized below.

The Land Apportionment (Amendment) Act. A Bill to amend the Land Apportionment Act, which was published on Oct 8 and received a second reading on Nov 11 by 19 votes to 10, provided (*a*) that African professors, lecturers, and students at the proposed Rhodesia University (see 13001 B), together with their wives and children, should be permitted to live on the University site, which is in the European area of Salisbury, (*b*) that the Minister of Native Affairs might permit the establishment of inter-racial clubs and hotels, and of recreational facilities—such as sports fields for Africans—in the European areas of towns, if requested by the local authority; and (*c*) that African professional men might rent premises in European areas, with the Minister's permission, if adequate facilities were not available elsewhere. The Confederate Party strongly condemned the Bill as a "blatant infringement of the principle of racial separation established in the country," and a petition of protest bearing nearly 4,000 signatures was presented to Parliament by Mr Keller (Independent Labour), who declared that if the Bill were accepted it would be "the beginning of the end" for White people in Southern Rhodesia.

The Government, which had announced its intention of resigning if the Bill were defeated, accepted a number of amendments in the Committee stage, whereby (*a*) only the families of African professors and lecturers, and not those of students, might live on the university site, (*b*) inter-racial clubs were required to confine themselves to cultural, welfare, and religious activities, (*c*) only Africans normally resident outside the Federation would be permitted to stay in inter-racial hotels, (*d*) no African professional men except advocates would be permitted to practise in European areas, and such permission would apply only in Salisbury and Bulawayo

The Bill, as amended, passed its third reading on Nov 18 by 19 votes to 10, six Government supporters voting with the Opposition.

The Native Industrial Workers' Unions Bill. A Bill granting a limited measure of recognition to Native trade unions, for the first time in Southern Rhodesia, was introduced into Parliament on Nov. 9 and referred to a select committee. Under the Bill, unions would be enrolled by the Registrar of Native Industrial Unions, and would be required to make available to him copies of their minutes and audited accounts; when the Registrar was satisfied that a union was functioning properly, he would allow it to proceed to full registration. Unions would be organized on an industrial and not a craft basis, only one being allowed in each industry in each centre; the new system, however, would not cover agricultural or domestic workers, nor Africans working in mines with fewer than 300 employees. Conditions of service would be regulated through Native Labour Boards (on which employers and registered unions would be represented), under an independent chairman, and strikes by Native unions would be forbidden.

Mr. Garfield Todd stated on Nov. 9 that the Government would be prepared to go farther than the Bill proposed, and to permit the creation of unions to which both Africans and Europeans could belong, if the Europeans desired it. The select committee would be able to go fully into the matter and could if it thought fit, bring forward a new Bill Mr. Todd pointed out that, although they were not officially recognized, many African unions already existed, and negotiated in the settlement of wage disputes. Some were well conducted and deserved recognition and aid, whilst others were not well run and were not subject to any form of control. Some important industries had no organization whatever such as the Wankie Colliery, where earlier in the year 8,700 Africans had gone on strike. There was no doubt that the strikers had had just grievances, but it had been difficult to get any contact with them because they had no trade union organization of any kind. It was important (Mr. Todd continued) that the Government should know whether workers had just complaints, and that there should be an organization or organizations through which these complaints could be brought to official notice The Government therefore considered that legislation was necessary, but the Bill could only be regarded as an interim measure. Many people and organizations were deeply concerned with the subject, including the existing trade unions, the employers, and the Africans themselves, who had definite ideas and strong feelings on these matters, and the Bill could be improved with their assistance.

The Minister for Native Affairs (Mr. P. B. Fletcher) announced on Oct. 15 that a Native Councils Bill, which would enable the Government gradually to hand over the responsibility for local government in Native townships to the Native residents, would be presented to the Southern Rhodesian Parliament in 1955. Mr. Fletcher was speaking at Seki (near Salisbury), one of the first two African townships in Southern Rhodesia where Africans can obtain freehold title to land, at the handing-over of the agreement of purchase to the first African to buy land in the township. Under the Government's scheme, Africans are able to buy a plot of land at Seki or Ntabazinduna, near Bulawayo, for £25, on condition that a building valued at not less than £150 is erected on it within two years. Seki, when completed, is planned to be a self-contained township covering 5,000 acres, with a population of 25,000, and possessing its own schools, hospitals, churches, business centres, light industries, and recreational facilities.—(Federal Information Department, Salisbury - Cape Times) **(Prev. rep, Immigration, 13333 A.)**

A. UNITED KINGDOM. — Football Pool Figures.

In accordance with the terms of the Pool Betting Act (see 13730 A), which came into force on Jan. 1, 1955, figures were published for the first time on Jan. 19 by the large football pool firms giving their percentage deductions for expenses and commission from the amounts subscribed to the pools for matches played on Jan. 1. These were: Cope's (London), 20.49 per cent; Shermans (Cardiff), 22 per cent; Littlewoods (Liverpool), 19.6 per cent; Vernons (Liverpool), 19.4 per cent; Murphy's (Edinburgh), 19.5 per cent; Clarion (London), 29.6 per cent.

Cope's, Littlewoods, Vernons, and Murphy's are members of the Pool Promoters' Association. Clarion Pools are run by the Labour Party, and, of the 29.6 deduction, 7.5 per cent was distributed to local Labour parties participating in the scheme. Under the terms of the Act, all the figures had to be certified by an accountant appointed by the respective local authority. (Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. 13730 A; 13529 B.)

B. INDIA. — Hydro-electric Development. - Opening of First Bhakra-Nangal Power Station.

The Ganguwal power station, the first hydro-electric station completed under the Bhakra-Nangal project, was opened by President Prasad on Jan. 2. The station, which lies on the Nangal Hydel canal 50 miles from Chandigarh (capital of the Indian Punjab), will produce 48,000 kilowatts of energy and will provide electric power for the States of Punjab, PEPSU, Rajasthan, and Himachal Pradesh. A second power-house on the Nangal Hydel canal at Kotla is scheduled for completion by the end of 1955.—(The Hindu, Madras - Indian High Commissioner's Office, London) **(Prev. rep. 13789 A.)**

C. UNITED STATES. — Foreign Bids for U.S. Contracts. - Easing of Conditions.

President Eisenhower issued an Executive Order on Dec. 17, 1954, which considerably lowered the preference given to American tenders for U.S. Government contracts under the "Buy American" Act. The Order directed Government departments to reject U.S. bids as "unreasonable" if they were more than 6 per cent higher than foreign tenders, including tariff duties and all delivery costs, or more than 10 per cent higher excluding such charges, compared with the previous preference of some 20-25 per cent. It was laid down, however, that the 6 per cent rule could be disregarded if the U.S. tenderer with the lowest bid undertook that the work would be performed in an officially certified area of "substantial unemployment" (i.e. areas where 6 per cent or more of the working population were unemployed). At the time of the Order 48 major urban centres out of 148 listed by the Labour Department had been certified as having substantial unemployment, and an additional 97 minor areas were also in this category.

The modifications had been foreshadowed in the President's message to Congress on March 30, 1954, on U.S. foreign trade policy (see 13590 A) They followed representations by Britain and other European countries about the discrepancy between the rejection of their bids on contracts and the avowed American policy of "trade not aid."

On June 23, 1954, a further rejection by the U.S. Army of two lowest British bids had been announced These were for two generators at the Chief Joseph Dam and for two smaller generators at the Dalles Dam on the Columbia River, near Portland (Oregon), for which the English Electric Export and Trading Company had tendered $1.976,428 and $815,393 respectively; the contracts were, however, awarded to the Westinghouse Electric Corporation (the lowest American bidder), which had tendered $2,180,714 and $835,938 Mr. Heathcoat-Amory (then Minister of State, Board of Trade) stated in the House of Commons on June 29, 1954, that the difference between the British tender and the lowest American one was "substantial" and that the result was therefore "extremely disappointing" Representations stressing the importance which Britain attached to the decisions on these contracts had been made while they were under consideration by the U.S. authorities, and further instructions had been sent to H.M. Ambassador in Washington to make representations "at the highest level" expressing "our disappointment that this decision does not follow the more liberal policy which appeared to be foreshadowed by the President's Message to Congress" Mr. Thorneycroft President of the Board of Trade, said in a further statement on Oct. 21 that the U.S. Government had confirmed, in their reply to the British representations, that the U.K. firm's bids were the lowest which complied fully with the technical requirements, but had stated that, after weighing all the factors involved, the bid of the domestic firm had not been considered "unreasonable" under the provisions of the "Buy American" Act.

A subsequent low bid by English Electric for two turbines at the Table Rock Dam on the Mississippi-Arkansas border was, however, accepted by the U.S. Army on Nov. 5. The English Electric bid was $1,066,662, or $143,000 less than that made by the Newport News Shipbuilding and Drydock Co., the lowest American bidder—a difference of 11.82 per cent, or about 21 per cent after allowing for transport costs and tariff charges.—(New York Times - New York Herald Tribune) **(Prev. rep. Chief Joseph Dam, 13012 A; U.S. Trade Policy, 13685 C.)**

D. EGYPT. — Ratification of Suez Treaty.

The Egyptian Foreign Minister (Dr. Fawzi) announced on Nov. 20, 1954, that the Anglo-Egyptian agreement for the progressive withdrawal of British forces from the Suez Canal Zone had been ratified by the Egyptian Government—which, he explained, had both legislative and executive powers—and had been signed by Colonel Nasser, the acting head of State. Instruments of ratification were exchanged in Cairo on Dec. 6 by British and Egyptian representatives.

The Egyptian War Ministry had announced on Nov. 2 that Egyptian troops had taken charge of security arrangements in the Suez Canal Zone. The appointment of Major-General Taha Fath el-Din as G.O.C., Land Forces, Suez Canal Zone, had been announced by the Egyptian Government on Oct. 28. (Times - Daily Telegraph) **(Prev. rep. 13833 A; 13701 A.)**

E. ISLE OF MAN. — Abolition of Double Taxation.

A Bill abolishing double taxation for people residing in the Isle of Man who derive their income from the United Kingdom was approved on Feb. 1 by the House of Keys. By arrangement with the Inland Revenue, the Bill will mean an additional income of approximately £85,000 a year to the Island, as the British Treasury will pay the Manx exchequer the difference between the U.K. standard rate of income tax (9s. in the £) and the Manx standard rate of income tax (5s. in the £).

(Manchester Guardian)

A. UNITED KINGDOM. — Sir Winston Churchill's Woodford Speech. - Parliamentary Statement on "German Arms" Telegram.

In the course of a speech made by Sir Winston Churchill at Woodford (his constituency) on Nov. 23, 1954, the Prime Minister said *inter alia*: "I believe I was the first well-known person to publicly state the fact that we must have Germany on our side against Russian Communist aggression. Even before the war had ended, and while the Germans were surrendering in hundreds of thousands . . . I telegraphed to Lord Montgomery directing him to be careful in collecting the German arms, to stack them so that they could easily be issued again to the German soldiers whom we should have to work with if the Soviet advance continued."

The Prime Minister's remark aroused much comment in Britain and abroad. *The Times*, in an editorial on Nov. 25, said that it was "impossible to see what purpose or good it can serve at this time," and added: "Sir Winston Churchill was the architect of victory, the first to awaken the Western mind to the nature of the Soviet threat after the war, and now the most tireless and most sincere in seeking an accommodation with the Communist Powers . . How much greater the pity that he threw in his ill-timed remark. It will certainly not help to convince the Russians that the Western Powers are straightforward in their declarations of peace today Nor, by suggesting that we were ready to use Nazi-indoctrinated troops in 1945 will it help the cause of West German rearmament now . . ."

The Moscow paper *Pravda*, in its issue of Nov. 28, attacked Sir Winston Churchill for what it described as the "betrayal" of Russia as a war-time ally, and described his Woodford statement as "the self-exposure of a politician who has many a time concealed his aggressive plans by hypocritical phrases"

In response to a question by Mr. Sydney Silverman (Lab.), who asked the Prime Minister whether he would publish the text of the messages he had sent in 1945 to General Eisenhower [then Supreme Allied Commander in the West] "relating to the storing and preservation of German armaments with a view to their re-issue in certain eventualities," the following written reply was made by Sir Winston Churchill on Nov. 25:

"The relevant message to General Eisenhower has already been published. I included it in Volume VI of *The Second World War* (page 499). It read as follows:

'May 9, 1945.—I have heard with some concern that the Germans are to destroy all their aircraft *in situ*. I hope that this policy will not be adopted in regard to weapons and other forms of equipment We may have great need of these some day, and even now they might be of use, both in France and especially in Italy. I think we ought to keep everything worth keeping. The heavy cannon I preserved from the last war fired constantly from the heights of Dover in this war.'

"I may also direct attention" (the Prime Minister added) "to the reference to the situation in Denmark made in a message sent a few days earlier to the Foreign Secretary, of which the following extract was published on page 469 of the same volume:

'May 5, 1945.—In the North Eisenhower threw in an American corps with great dexterity to help Montgomery in his advance on Lübeck. He got there with 12 hours to spare. There were reports from the British Naval Attaché at Stockholm, which we are testing, that, according to Swedish information, the Russians have dropped parachutists a few miles south of Copenhagen and that Communist activities have appeared there. It now appears there were only two parachutists. We are sending in a moderate holding force to Copenhagen by air, and the rest of Denmark is being rapidly occupied . . . by our fast-moving armoured columns. I think therefore, having regard to the joyous feeling of the Danes and the abject submission and would-be partisanship of the surrendered Huns, we shall head our Soviet friends off at this point too . . .'"

The matter was again raised in the House of Commons on Dec. 1 by Mr. Shinwell (Minister of Defence in the Labour Government), who said that Sir Winston's Woodford speech had caused "confusion and bewilderment" in the public mind.

After pointing out that there was no reference whatever in *The Second World War* to the telegram mentioned by the Prime Minister, nor any mention of the possibility of rearming surrendered German troops, Mr. Shinwell suggested that the Prime Minister might in fact never have sent such a telegram but might have confused it with the many other messages he had sent at the time. He also pointed out that Sir Winston's messages to President Truman and General Eisenhower in 1945, though expressing concern at the spread of Communism in the Balkans and the possibility of a Russian threat to Scandinavia, also made no mention of the rearming of surrendered German soldiers.

Sir Winston Churchill, in reply, said that an extensive search had failed to disclose any trace of the telegram he had mentioned in his Woodford speech, and agreed with Mr. Shinwell that the telegram might never have been sent at all or that he (the Prime Minister) might have confused it with other messages sent at the time. Sir Winston made the following statement to the House setting forth the considerations which had been in his mind at the time of the German surrender.

"When I spoke at Woodford I was under the rooted impression that not only had I sent this telegram to Field-Marshal Montgomery, but also that I had published it in the sixth volume of *The Second World War*. In fact, the telegram was not published in the book. I am sorry that in my speech at Woodford I failed to observe the rule which I have so often inculcated in others: 'Always verify your quotation.' Otherwise I should certainly not have made this particular point . . . Therefore, I express my regrets to the House for what I said last week.

"It may well be that I never used these precise words in a telegram to Field-Marshal Montgomery. Indeed. it may be, as Mr. Shinwell has suggested, that it was never sent at all. At any rate, it has not been traced in the official records, although a search of the utmost extent has been made and is still continuing. I have asked Field-Marshal Montgomery and he has replied that he would, at my request, look through any private records that he may have.

"There are, as Mr Shinwell said, various explanations of this. I do not exclude one, which he himself suggested, that the message might have been mixed up. He said that I might have been confused in my mind, 'You know the sort of thing that happens'—those, I think, were his words We all make factual mistakes from time to time. It may be that there are some other reasons, however. It may be that the telegram to General Eisenhower, which has been published in my book, superseded my original intention of sending such a message to General Montgomery. In any case, all was happily overtaken in a few days by events. An entirely new situation presented itself. The immediate emergency did not mature.

"No Cabinet assent was sought for this particular telegram. It was only of a precautionary character and, if it were sent at all, it went only as one of scores of similar messages which were passing at the time about the German surrender Anyhow, if there is any telegram and any question of responsibility for it, I accept it for myself.

"When I come to the facts of what I did in 1945, what I intended to do, and the motives animating them, I have no misgivings. In those days of victory the thought which filled my mind was that all the efforts we had made to free Europe from a totalitarian regime of one kind might go for nought if we allowed so much of Europe to fall into the grip of another totalitarian regime from the east. This is the theme of the sixth volume of my book This was the tragedy which came on us in our hour of triumph. The realization of it filled many of the messages which I sent at that time. I sent an awful lot at different levels. I may easily have been in error as to any particular one.

"The attitude of our Russian allies at that time gave ample grounds for this fear. We had taken up the sword in 1939 on behalf of the independence of Poland. What was happening to Poland in 1945? What has happened to it since? I also had the gravest anxieties about the fate of Denmark in May, 1945. If the Soviet forces had overrun Denmark they would have controlled the Baltic, with all that that involved In such circumstances the same kind of situation would have arisen as that which, four years later, compelled the Western world to create NATO, to contemplate the E.D.C. arrangements, and now to sign the London and Paris agreements.

"The situation which we faced in May, 1945, was grave and threatening. I can find no better words to describe it than those which I used in my telegram of May 12 [1945] to President Truman, the telegram which I have called 'the Iron Curtain telegram' As it states absolutely my line of thought. I ask the indulgence of the House to read it. This was [the telegram] to President Truman:

'I am profoundly concerned about the European situation. I learn that half the American Air Force in Europe has already begun to move to the Pacific theatre The newspapers are full of the great movement of the American armies out of Europe. Our armies are also . . . likely to undergo a marked reduction. The Canadian Army will certainly leave. The French are weak and difficult to deal with. Anyone can see that in a very short space of time our armed power on the Continent will have vanished except for moderate forces to hold down Germany.

'Meanwhile, what is to happen about Russia? I have always worked for friendship with Russia but, like you, I feel deep anxiety because of their misinterpretation of the Yalta decisions, their attitude towards Poland, their overwhelming influence in the Balkans, except in Greece, the difficulties they make about Vienna, the combination of Russian power and the territories under their control or occupied, coupled with the Communist technique in so many other countries, and above all their power to maintain very large armies in the field for a long time What will be the position in a year or two when the British and American Armies have melted and the French has not yet been formed on any major scale; when we may have a handful of divisions, mostly French, and when Russia may choose to keep two or three hundred on active service?

'An Iron Curtain is drawn down upon their front. We do not know what is going on behind. There seems little doubt that the whole of the region east of the line Lübeck-Trieste-Corfu will soon be completely in their hands. To this must be added a further enormous area conquered by the American armies between Eisenach and the Elbe, which will, I suppose, in a few weeks be occupied by the Russian power when the Americans retreat. All kinds of arrangements will have to be made by General Eisenhower to prevent another immense flight of the German population westward as the enormous Muscovite advance into the centre of Europe takes place. And then the curtain will descend again to a very large extent, if not entirely. Thus a broad band of many hundreds of miles of Russian-occupied territories will isolate us from Poland. Meanwhile the attention of

our peoples will be occupied in inflicting severities upon Germany, which is ruined and prostrate and it would be open to the Russians in a short time to advance if they chose to the North Sea and the Atlantic

'Surely it is vital now to come to an understanding with Russia, or to see where we are with her before we weaken our armies mortally or retire to the zones of occupation This can only be done by a personal meeting. I should be most grateful for your opinion or advice Of course we may take the view that Russia will behave impeccably, and no doubt that offers the most convenient solution To sum up, this issue of a settlement with Russia before our strength has gone seems to me to dwarf all others'"

The Prime Minister continued: "Even if the telegram does not exist [i.e the telegram mentioned in the Woodford speech], in general spirit it is not contrary to my thoughts In addition to what would inevitably have come to pass had the Soviets continued their advance into the Low Countries and towards the sea, there was another set of considerations to be borne in mind As we had in General Montgomery's theatre alone more than 1,000,000 disarmed German prisoners-of-war who had surrendered to us, I felt we were responsible for taking measures for their protection; and if we were unable to carry out our terms of capitulation or to afford them that protection for which we were responsible, it might become a matter of honour as well as of policy to give them back their arms

"No trouble could in any case have arisen with the Soviets unless they had continued their advance to a point at which they forced the breaking-out of a new war between Russia and her Western allies. To prevent such a disaster, it might have been a help to warn them that in such a case we should certainly rearm the German prisoners in our hands, who altogether, including those in Italy, numbered 2,500,000 It was never necessary to tell them because they did not do what I felt we had to consider . . .

"I may say that I did not judge the German Army of that time, whatever may have been their political label, by that label I think the majority were ordinary people compelled into military service and fighting desperately in defence of their native land. I also suggest to the House that in modern times war should not be decided on questions of nationality or of the past conduct of any nation, but only on the new guilt of aggression Resistance to aggression must be our dominating thought. That was where I stood at the moment of victory in 1945, and that is where I believe a large majority of the House stands today I am not unduly disheartened by the Russian reaction to what I said last week *Pravda*, like the *Daily Worker*, can always be turned on or off at will. I have always tried to measure what are the true Russian interests at this present time in history. There lies the key. Personally, I believe their interest is in peace and plenty . . ."

In a further statement to the House on Dec. 7, the Prime Minister said that it had not been possible to find "the text of any message sent by me to Field-Marshal Montgomery in May, 1945, concerning captured German arms"; that every effort was being made to find it; and that it would be officially published if it were found. (Times - Daily Telegraph)

A. TANGANYIKA. — Constitutional Reform. - Composition of New Legislature.

The Governor of Tanganyika (Sir Edward Twining) announced on Dec. 2 that, as from the start of the next session in April, 1955, the unofficial membership of the Legislative Council would consist of 10 Africans, 10 Asians (including Arabs), and 10 Europeans, a total of 30 unofficial members against 31 on the official side. The announcement implemented the recommendation of the Committee on Constitutional Development that the Council's unofficial members should be drawn equally from the three races in the Territory, though originally it had been stated that there would be 28 official and 27 unofficial members—nine of each race, representing each of the eight provinces and the municipality of Dar-es-Salaam. The proposal to increase the unofficial membership by a further three members—with a consequent increase in official members to maintain their majority of one—followed discussions with the British Colonial Secretary, Mr. Lennox-Boyd, who visited Tanganyika in October. The three additional unofficial members will represent interests not fully covered by the geographical representation.

Sir Edward Twining also announced (*a*) that he had asked organizations representing different communities and interests to submit names of persons whom they considered most suitable for nomination by him; and (*b*) that, if a general wish existed, the electoral principle would be encouraged on local government bodies such as municipal or town councils

The present Legislative Council consists of 15 official members and 14 unofficial members, of whom seven are European, three Asian, and four African.—(Times - Manchester Guardian)

B. FRANCE.—Seine-Inférieure Department renamed.

It was announced in Paris on Jan. 21 that the *département* of Seine-Inférieure, on the Channel coast, had been authorized by the Government to change its name to Seine-Maritime. The *département* includes Rouen, Le Havre and Dieppe.
(Le Monde, Paris)

C. JORDAN. — London Discussions on Revision of Anglo-Jordanian Treaty. - New Financial Agreement.

The Prime Minister of Jordan, Tewfik Abulhuda, informed the Jordanian House of Deputies on Nov. 7, 1954, that "in view of the international situation, the altered situation in Egypt, and the expected change of situation in Iraq," his Government thought of amending the Anglo-Jordanian treaty of 1948, and that negotiations would start shortly. The British Foreign Office confirmed on Nov. 8 that the Jordanian Government had made "informal approaches" about a revision of the treaty "in certain respects."

It was pointed out at the Foreign Office that although there was no provision in the treaty (which runs for 20 years but may be revised after 15 years) for a revision of its terms before 1963, the British Government would be prepared to consider any suggestions which Jordan might wish to make [An annex to the treaty provides for the maintenance of R A F. units at Amman and Mafrak airfields, and for the co-ordination of defence questions by the British and Jordanian Governments through a permanent joint advisory body. Britain also has the right to station troops in Southern Jordan and, under the treaty, pays an annual subsidy of £7,500,000 for the support of the Arab Legion This subsidy is paid into an account of the Legion in London, and not to the Jordanian Government.]

Discussions on a possible revision of the treaty were accordingly held in London on Dec. 21-23, the Jordanian Government being represented by Tewfik Abulhuda and Anwar Nuseibi (the Defence Minister), whilst Britain was represented by Mr. Nutting, Minister of State at the Foreign Office, and Mr. Evelyn Shuckburgh, Assistant Under-Secretary for Middle East Affairs, Foreign Office. It was stated on Dec. 23 that the talks had been "purely exploratory." King Hussein of Jordan had arrived in London on Dec. 19 together with his Prime Minister and Defence Minister but took no direct part in the negotiations.

Details of a new Anglo-Jordanian financial agreement were announced in London on Dec. 22, following discussions between a Jordanian delegation, led by the Ministers of Finance and Economics, and British Treasury officials. The agreement provided for British financial assistance to Jordan amounting to £2,500,000 in the financial year beginning April 1955, of which £750,000 would be a grant-in-aid to help the Jordanian Government balance its budget, and £1,750,000 would be an interest-free loan to be spent on a number of agreed projects included in Jordan's five-year economic development plan. The grant-in-aid for 1955-56 was the same as the amounts granted in 1953-54 and 1954-55, whilst the loan compared with £500,000 in 1953-54 and £1,600,000 in 1954-55.

The Jordanian five-year plan (1953-58) covers such projects as irrigation, canalization of the Yarmuk River, food production, exploitation of mineral resources, and improvement of communications by the construction of roads, railways, and a new port at Aqaba.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. U.K.-Jordanian Treaty, 9175 A; Financial Aid, 13261 B; Five-year Plan, 13048 A.)**

D. UNITED KINGDOM. — Purchase Tax Changes.

It was announced on Jan. 21 that the Chancellor of the Exchequer had issued Orders (subject to parliamentary approval) altering the rates of purchase tax on the following classes of goods as from Jan. 24:

Fur skins, fur apparel and fur rugs—reduced from 75 to 50 per cent; paper serviettes, doyleys, table covers, shelf paper, and similar paper articles—reduced from 50 to 25 per cent; household mops—exempted, scientific and clinical thermometers and barometers—no longer liable to the tax charges on similar articles used as household appliances; auxiliary motors for attachment to pedal cycles—hitherto free, now made subject to a tax of 25 per cent.

It was authoritatively stated that the reduction of purchase tax on fur goods, without waiting until the Budget, was a measure of relief to a craft industry similar to that given to the jewellery industry in the pre-Budget tax reductions of January 1954. The heavy rate of purchase tax had affected the home market for the more expensive fur coats to such an extent that production had had to be reduced and foreign buyers were turning for their purchases to Paris or New York rather than to London.

The net cost to the Exchequer of all the changes in a full year was estimated at just under £500,000.

E. RELIGIOUS LIFE. — Church of England. - New Bishop of Chester.

The Rt. Rev. Gerald Ellison (44), Suffragan Bishop of Willesden, was nominated by H.M. the Queen on Jan. 11 as Bishop of Chester in succession to Dr. Douglas Crick, resigning on Feb. 1.—(Church Times) **(Prev. rep. 13952 B.)**

FEBRUARY 5—12, 1955

A. SOVIET UNION. — Resignation of M. Malenkov. - Marshal Bulganin appointed Prime Minister. - Marshal Zhukov becomes Minister of Defence. - M. Malenkov appointed Minister for Electrical Power Stations.

The Supreme Soviet of the U.S.S.R. (consisting of the Soviet of the Union and the Soviet of Nationalities, sitting in joint session) met in Moscow from Feb 3 to Feb. 9. The following important Government changes were announced during the session: the resignation of M. Malenkov from the post of Chairman of the Council of Ministers (Prime Minister), which he had held for nearly 23 months since Marshal Stalin's death; the appointment as Prime Minister of Marshal Bulganin, hitherto Minister of Defence; and the appointment of Marshal Zhukov as Defence Minister *vice* Marshal Bulganin.

At the Supreme Soviet's session on Feb. 8, the chairman of the Soviet of the Union (M. Volkov) read a letter from M. Malenkov in which he asked to be relieved of his duties as Prime Minister, and in which he admitted his "fault and responsibility" for the "unsatisfactory state of affairs" which had arisen in Soviet agriculture. The Supreme Soviet unanimously agreed to accept the resignation of M. Malenkov, who was present when his letter of resignation was read. The letter was worded as follows:

"I beg to be relieved of the post of chairman of the Council of Ministers of the U.S.S.R. My request is prompted by business-like considerations of the need to strengthen the leadership of the Council of Ministers and the desirability of having a Chairman who possesses greater experience in government activities

I clearly see that my inadequate experience in local work and in the direct supervision of particular branches of the national economy has had a detrimental effect upon the fulfilment of the complicated and important duties of Chairman of the Council of Ministers . . . I see particularly clearly my fault and responsibility for the unsatisfactory state of affairs in agriculture, because, for a number of years, I had been entrusted with the duty of controlling and guiding the work of the central agricultural bodies, and of the local party and government organizations in the sphere of agriculture .

On the initiative and under the leadership of the Central Committee of the Communist Party, a general programme has been worked out to overcome the lag in agriculture, and to achieve its rapid development This programme is based on the only correct principle —the further development of heavy industry to the maximum. The fulfilment of this programme can alone create the necessary conditions for a real advance in the output of all the consumer goods needed

It is to be expected that various bourgeois sensation-mongers will resort to slanderous inventions with regard to my statement, and to the fact of my release from the post of Chairman of the Council of Ministers. But we will ignore these lies and slanders. To everyone of us the interests of our country, our people, and the Communist Party come above all else.

In requesting to be released from the post of Chairman of the Council of Ministers, I want to assure the Supreme Soviet that, in the new field placed in my charge, I shall, under the leadership of the Central Committee of the Communist Party and the Soviet Government, fulfil conscientiously those responsibilities with which I shall be entrusted."

When the Supreme Soviet reconvened some two hours later, M. Nikita Khruschev (First Secretary of the Communist Party of the U.S.S.R.) proposed that Marshal Nikolai Bulganin should succeed M. Malenkov as Chairman of the Council of Ministers. M. Khruschev praised Marshal Bulganin for his "great experience in political, State, and economic activities," and expressed confidence that a Government headed by him would "secure the development of heavy industry and, on this basis, of the light and food industries and agriculture." Marshal Bulganin's appointment as Chairman of the Council of Ministers was unanimously confirmed by the Supreme Soviet.

Marshal Nikolai Bulganin (60), who is not a professional soldier, was born at Nizhni-Novgorod (now Gorki), and is reputedly of middle-class origin. The son of a factory accountant, he attended a commercial secondary school, interested himself in economic and financial questions, and joined the Communist Party before the October revolution. During the early years of the Communist regime he was mainly concerned with organizational and counter-intelligence work, and in the 'thirties helped to organize the electrical industry. He was Mayor of Moscow from 1933-1937, and was also chairman of the State Bank. After the German invasion in 1941 he became a member of the Military Council, and was entrusted by Marshal Stalin with the co-ordination of several departments vital to the Soviet war effort—the ferrous and non-ferrous metals, rubber, cellulose and other industries. He organized the civilian defence of Moscow with great ability at the time of the German advance on the capital, and was subsequently given the task of supervising the political indoctrination of the armed forces. Created a Marshal of the Soviet Union towards the end of the war, he succeeded Marshal Stalin as Minister for the Armed Forces in 1946, and at the same time became a Vice-Premier. He relinquished the post of Minister for the Armed Forces in 1948, but re-entered M. Malenkov's Cabinet in 1953, after the death of Marshal Stalin, as a Vice-Premier and Minister of Defence.

Marshal Bulganin made his first speech as Prime Minister to the Supreme Soviet on Feb. 9, extracts being given below:

Heavy Industry. "Heavy industry is the basis of the defensive capacity of our country and our military forces. Without our heavy industry we should not have achieved victory during the war . . . Heavy industry provides for the development of all branches of our national economy, and is the source of the constant growth of the well-being of our people."

Agriculture. One of the Government's most important tasks would be to put into effect the measures worked out by the Communist Party on agriculture, which were directed towards satisfying the growing demands of the population. Among the means of achieving this goal were increased crop yields, lower losses during the harvest, and the reclamation of virgin land The further development of agriculture required an increased supply of tractors and other machinery, which could be provided only by heavy industry. The production of consumer goods would be expanded during the present year "on the basis of heavy industry and agriculture."

Productivity Problems. Special attention would have to be paid to scientific research and its application to production In spite of many technical achievements, there were still "many shortcomings" in the application of modern methods to production The year 1955 would be "a year of further improvement in the well-being of the Soviet people," since industrial production would be increased by 9 5 per cent over 1954 and by 80 per cent over 1950 One of the most important factors was an increase in labour productivity, "but in this vital matter there are serious shortcomings Only on the basis of increasing labour productivity can we raise the production of consumer goods" The cost of the Government apparatus would have to be reduced, and bureaucracy brought to an end.

Relations with the West. Marshal Bulganin said that friendly relations had existed during the war between the United States, Britain, France, and the Soviet Union, and that it was "not our fault that they have changed" He declared that the Western Powers were basing their policy not on friendship and co-operation but on "positions of strength," while the Soviet Union stood for "negotiations and relations which lead to a reduction of international tension" These negotiations could only be successful if all parties strove towards this end

Formosa. After declaring that the United States was following "a dangerous road" over Formosa, Marshal Bulganin said: "One is astonished at the attitude which is taken in connexion with that problem by the United Nations Until now it has not condemned the aggressive action of the U S A against China, and has not demanded from the U S A the immediate withdrawal of her armed forces from Formosa and the restoration of the legitimate rights of the Chinese People's Republic. The policy of the Chinese Government concerning that problem has the complete approval and support of our side. The Chinese People's Republic has the sympathy of the Soviet people and of all progressive mankind because she is leading a struggle for a just cause, for the honour and independence of her country. In that noble cause, the Chinese people can count upon the help of their faithful friend, the Soviet Union."

Defence. Since the war the Government had done "tremendous work" in supplying the Soviet armed forces with modern weapons, and the armed forces were "ready to fulfil any instructions of the Communist Party and Soviet Government." Marshal Bulganin added that history had shown that "all who have attacked us have met their doom," and that "our people have always been able to stand up for themselves" The country's defensive capacity would continue to be one of the Government's main concerns.

Marshal Grigori Zhukov—who commanded the Soviet forces which captured Berlin in 1945, and who, unlike Marshal Bulganin, is a professional soldier—was appointed Minister of Defence on Dec. 9 in succession to Marshal Bulganin.

Marshal Zhukov (58) entered the Russian Army in 1918, joined the Communist Party a year later, and has had an exclusively military career Chief of the Soviet General Staff during the Second World War, he halted the German offensive at the gates of Moscow, subsequently organized the Soviet Army's break-through from Leningrad, and in November, 1944, took over command of the armies which, in a series of great counter-offensives, drove the Germans from Russia and Poland, advanced into Eastern Germany, and captured Berlin. He accepted the surrender of the German Army in 1945 on behalf of the Soviet High Command. For some time after the war he was Soviet C-in-C and High Commissioner in Germany, and maintained cordial relations with General Eisenhower and Field-Marshal Montgomery, the U S. and British commanders-in-chief. In July, 1946, Marshal Zhukov was released from that post and appointed to the relatively minor post of commander of the Odessa garrison. For some years thereafter he remained in obscurity and received little or no mention in the Soviet Press, though continuing to be a member of the Communist Party's Central Committee After Marshal Stalin's death he entered the Malenkov Cabinet as First Deputy Minister of Defence. Marshal Zhukov holds many high Soviet decorations, and was made a Knight of the Bath by the British Government for his part in the defeat of Germany.

It was announced at the final session on Feb. 9 that M. Malenkov had been appointed Minister for Electrical Power Stations (a post hitherto held by M. Alexei Pavlenko) and would also be a Deputy Premier in the Council of Ministers.
(Soviet Weekly - Times - Manchester Guardian)

(Prev. rep. Supreme Soviet, 13614 A.)

A. UGANDA. — Test Case on Deposition of Kabaka of Buganda. - Report and Recommendations of Hancock Commission. - Ending of State of Emergency. - Formation of All-Uganda Party.

A civil action to test the legality of the British Government's deposition and deportation of the Kabaka of Buganda in November, 1953, was heard in the Uganda High Court from Sept. 27 to Oct. 7, 1954, before the Chief Justice of Buganda, Mr. J. B. Griffin, Q C The case was brought by three of the Kabaka's nominees in the Lukiko against four unofficial members and the Attorney-General of Uganda, Mr. Ralph Dreschfield, Q.C. It was claimed that the Kabaka's deposition was null and void and that the Lukiko members were not entitled to take their seats because their appointments had not been confirmed by him. The Attorney-General was named in the case "because it is obviously directed at the British Government."

For the plaintiffs, Mr W J. K. Diplock, Q.C , conceded that in dealing with the Kabaka and with subsequent events the Crown would have had a perfect right to withdraw from the Uganda Agreement of 1900 by act of State, and that no court could then have questioned its action The Crown had purported, however, to fulfil the 1900 Agreement, and although the British Government were therefore still subject to its provisions they had not acted in conformity with them He also argued that if the Kabaka, the chiefs, and the people had all not co-operated loyally there might have been grounds under the Agreement for withdrawing recognition from the Kabaka, but in actual fact the charge had only been made against the Kabaka alone

Mr. Diplock recalled that the Governor, on the instructions of the British Government, had endeavoured to induce the Kabaka to sign three undertakings promising to abide by the Government's decision. The Kabaka, however, had refused to sign without consulting the appropriate constitutional organ set up under the 1900 Agreement to represent the people of Buganda [i e. the Lukiko], and for this reason recognition had been withdrawn from him Mr Diplock challenged the right of the Secretary of State to be the sole judge of whether the Kabaka, the chiefs and the people were co-operating loyally according to the terms of the agreement. He contended that the Governor had deported the Kabaka before the emergency had been proclaimed and had infringed the 1900 Agreement by appointing regents, an eventuality only provided for during the Kabaka's minority , submitted that the Governor had no right to bring emergency powers into force on Nov. 30, 1953, as the country was entirely tranquil ; and claimed that if recognition had been withdrawn from the Kabaka under the Agreement, the Kabaka's powers could not be carried out by Ministers as regents, even under customary law.

Mr. Dreschfield, for the defendants, argued that the withdrawal of recognition and the appointment of regents were acts of State under the Foreign Jurisdiction Act, 1890, and were outside the court's jurisdiction At best, all that the court could do was to submit the question to the Secretary of State, whose answer would be final The court could no more inquire into the withdrawal of recognition from the Kabaka than it could into a withdrawal of recognition "from the King of Spain or the Emperor of Abyssinia" Mr S Chapman (also appearing for the defendants) contended that the Uganda treaty had never been laid before the British Parliament and that nothing in it could alter its status as a quasi treaty—quasi because it had been made with a native ruler who was not recognized as head of a sovereign State. In any case, it gave the British Government powers to protect and overrule, and left their prerogative unfettered and unimpaired.

The Kabaka, in evidence taken in London and read to the court, stated that he invariably consulted his three Ministers on every major matter of administration and policy and that, although he had the theoretical right to reject their advice, he had never done so in any major matter. He denied that there had been any difference between himself and his Ministers on the question of signing the undertakings presented to him by the Governor, saying that it was, in fact, on the advice of his three Ministers that he had refused all the Governor's requests at their final meeting. When asked by Mr. Dreschfield whether the memorandum of March, 1953, on constitutional reform had been kept secret from the Lukiko until it had been agreed and signed, the Kabaka, whilst denying that he had signed it, nevertheless admitted that he had agreed to it without consulting the Lukiko ; he had done this, he said, because the document stated that the Lukiko would be consulted on matters that concerned it.

The Chief Justice, delivering judgment on Nov. 4, rejected the plaintiffs' case on the ground that the Kabaka had no legal right to recognition, and that the Crown could not therefore be forced to recognize him as African ruler of Buganda. However, in case the question went to appeal and his ruling was found to be wrong, the Chief Justice discussed the question of whether any right to withdraw recognition under Article 6 of the Uganda Agreement of 1900 had arisen on Nov. 30, 1953. He found in this respect that the Colonial Secretary had been mistaken because, although the Kabaka had certainly failed to abide by decisions of policy, in which case the Crown could have invoked Article 20, there had been no failure of the kind visualized in Article 6—i.e., failure to co-operate loyally in matters of the day-to-day administration and organization of the Kingdom of Buganda.

The Kabaka's refusal to abide by decisions of policy as communicated to him, said the Chief Justice, "clearly at that stage constituted a disregard on his part of his duty under the terms of the Agreement to acknowledge and abide by the overrule of the Crown through the Protectorate Government." It was manifest that, the Kabaka having evinced an intention to pursue a disloyal policy, the Crown could perfectly correctly have exercised its rights under Article 20 and brought the agreement to an end Similarly, recognition could have been withdrawn by an act of State In fact, however, the withdrawal had been made under Article 6, which did not deal with co-operation in the abstract but with co-operation in the organization and administration of Buganda—an obligation not placed on the Kabaka alone, but on the Kabaka, chiefs and people conjunctively. Article 20, in contrast, did not deal exclusively with organization and administration but with wider matters of policy, and the obligations which it placed upon the Kabaka, chiefs, or people existed disjunctively The Chief Justice recognized that if the Kabaka had consulted the Lukiko a situation might quickly have arisen in which all three parties might have failed in their obligations, "but that stage had not been reached." He found, therefore, in the event of an appeal against his decision being successful, that "a right under Article 6 of the agreement to withdraw recognition had not arisen on Nov 30, 1953." The Attorney-General's argument that withdrawal was an act of State was rejected on the ground that the British Government, in withdrawing recognition from the Kabaka, had purported to apply its legal rights under Article 6 of the Agreement of 1900.

Apart from this, the Chief Justice held that the Governor had a perfect right to bring the emergency powers Order-in-Council into operation, and that the regents had been lawfully appointed

The agreed recommendations of the Conference, which had met from June 24 to Sept. 17, 1954, at Namirembe (near Kampala) under the chairmanship of Sir Keith Hancock to consider the constitutional problems of Buganda, were published as a White Paper on Nov. 16. The Conference proposed, among other things, that the Kingdom of Buganda, under the Kabaka's government, should continue to be an integral part of the Protectorate ; that the conduct of public affairs in Buganda should be in the hands of Ministers ; and that, while all the traditional dignities of the Kabaka should be fully safeguarded, Kabakas should in future be constitutional rulers bound by a Solemn Engagement to observe the conditions of the agreements regarding the Constitution and not to prejudice the security and welfare of the Buganda people and the Protectorate.

The White Paper also contained (*a*) an explanatory memorandum issued by the Namirembe Conference, and (*b*) a statement by the Governor of Uganda (Sir Andrew Cohen) on a number of separate recommendations regarding the Executive and Legislative Councils of Uganda, as an immediate step towards implementing the Government's policy of constitutional development for Uganda as a whole.

It was stated in an introductory section to the White Paper, and announced in the House of Commons on the same day by the Colonial Secretary (Mr. Lennox-Boyd), that the judgment of the Chief Justice of Buganda in the test case before the Uganda High Court, and the constitutional proposals of the Namirembe Conference ("which, if accepted by the Lukiko, will settle satisfactorily the points of difference which arose last year") had created "a new situation in which there is both need and opportunity for a new approach to the question of the Kabaka." The statement continued . "H.M. Government, after full consultation with the Governor, have therefore decided that, subject to certain conditions and after a suitable interval, the Lukiko should be given the opportunity to choose whether a new Kabaka should be elected or whether Kabaka Mutesa II should return as Native Ruler of Buganda."

These conditions were as follows .

"(1) The agreed recommendations of the Namirembe Conference should be accepted as a whole by the Great Lukiko.

"(2) H.M Government and the Lukiko should agree the terms of the Solemn Engagement recommended by the Namirembe Conference to be entered into by the Kabaka. The amendments and additions to the 1900 Agreement to give effect to the agreed recommendations should also be agreed by H.M. Government and the Great Lukiko, and the Amending Agreement should be formally executed by the Governor on behalf of H M. Government and by the regents and representatives of the Lukiko on behalf of Buganda, and be brought into effect.

"(3) In order that the new arrangements may be well established before it is called upon to make the decision, the choice of the Great Lukiko whether Kabaka Mutesa II should return as Native Ruler or whether a new Kabaka should be elected should be made nine months after the new arrangements have been brought into effect H.M. Government will, however, be glad to shorten the period if they are convinced before the end of it that the constitutional arrangements have become well established and are working satisfactory. H.M. Government will make every effort to ensure that they are brought into effect by March 31 next year."

The statement added that when the choice of the Lukiko had been made "the Kabaka will be required to enter into the Solemn Engagement and to sign and thereby confirm the amending Agreement before he is recognized by H.M. Government."

It was also announced that H.M. Government had accepted the Governor's recommendations on the constitutional reforms for Uganda, and that these would be put into effect "as early as possible."

A summary of the recommendations of the Namirembe Conference, and of the Governor's separate recommendations, is given below.

Recommendations of Namirembe Conference.

Constitutional Arrangements in Buganda (Arts. 1-29). The Kingdom of Buganda under the Kabaka's Government should continue to be an integral part of the Uganda Protectorate. The monarchical constitution of Buganda should be retained, as well as the traditional status of the Kabaka, who, it was recommended, should retain all his traditional styles and dignities and continue to be the symbol of the unity of the people of Buganda. Succession would, as hitherto, be by descent and election by the Lukiko, subject, however, to approval by the British Government, without which "no person shall be recognized as Kabaka." The conduct of public affairs should be the responsibility of six Ministers, each of them politically responsible for his own department. They should be elected by the Lukiko, approved by the Governor and formally appointed by the Kabaka.

The duration of a Lukiko should be five years and a Ministry's term of office should be coterminous, provided that it had not earlier been defeated by a two-thirds majority of the Lukiko's membership on a vote of confidence on an "important matter," or collectively dismissed by the Governor in Council for failing to act upon formal advice given to it by the Governor in Council Ministers could be individually dismissed in cases of conviction for grave criminal offences, physical or mental incapacity, or persistent failure to carry out the Minister's policy in important matters. A permanent Civil Service would be established, controlled by an Appointments Board set up by the Kabaka on the advice of the Katikiro (Chief Minister) and with the approval of the Governor. The composition and method of election of the Great Lukiko should remain unaltered for the present.

Article 28 laid down that "every Kabaka shall henceforward on becoming Kabaka enter a Solemn Engagement with the Great Lukiko and people of Buganda and with H.M. Government, formally accepting and agreeing to be bound by these articles and by the Uganda Agreement, 1900, and any amendments thereto, and undertaking not to prejudice the security and welfare of his people and the Protectorate." Article 29 declared that "so long as the Kabaka shall observe his Solemn Engagement, H M. Government agrees to recognize the Kabaka as the ruler of the Kingdom of Buganda."

Relationship of Buganda with the Protectorate (Arts. 30-43). The functions entrusted to the Kabaka's Government would be formally defined in a document which would be brought into operation simultaneously with the present agreement; meanwhile the arrangements of March 1953, whereby important new functions were to be taken over by the Buganda Government, were reaffirmed The Buganda and Protectorate Governments would keep in close touch with each other through consultative committees—consisting of Ministers, high officials, and the Lukiko Committee concerned—on matters of education, local government and community development, medical and health questions, and natural resources. The Protectorate Government would also help the Buganda Government through the advice of Protectorate officers and through the inspection services transferred to the Buganda Government

Disputes between the two Governments which could not be resolved through the consultative committees would be referred to a joint meeting of the Executive Council and the Buganda Ministers under the chairmanship of the Governor; such a meeting (which could also be convened to resolve any disagreement arising out of a reply by the Governor to a resolution of the Lukiko) "shall not only have regard to the general interests of the Protectorate but shall also take fully into account and give due weight to the views of Buganda" If, after these consultative processes had been exhausted, an issue remained unresolved which, in the opinion of the Governor in Council, affected "peace, order, or good government," the Governor in Council could give formal advice to the Buganda Ministry, and if the latter then refused or failed to act in accordance with such advice the Governor in Council could dismiss the Ministry. In agreeing to laws passed by the Lukiko the Governor should be entitled to act in his discretion, after consultation with his Executive Council on any question of principle.

The financial needs of Buganda would be reviewed periodically by the two Governments, so that Protectorate grants to Buganda might be on a firm basis for periods of at least three years. The agreed recommendations also dealt with the development of local government bodies and the appointment of suitably qualified Baganda as Assistant Residents.

Citizenship (Art. 44). H M. Government should be requested to consider the question of creating a citizenship of Uganda, whereby a sense of unity might be fostered.

Justice and Local Administration in Buganda (Arts. 45-47). The work of separating the Judiciary from the Executive should be started immediately, and a committee appointed to examine the problems involved in developing a system of courts of common jurisdiction for all races and for urban and rural areas alike, and in the provision of legal training facilities for Africans A committee should also be set up to consider, as a question of urgency, the establishment of new local authorities in Buganda.

Review (Art. 48). In order to secure a period of stability, no major changes in the above constitutional arrangements should be introduced for six years, after which time there should be a review.

Uganda Agreement of 1900 (Art. 49). This should be amended to the extent required by agreement on the above Articles, but should otherwise continue in its present form.

Governor's Recommendations on Uganda.

General Changes. A ministerial system should be introduced. Seven members of the public (including five Africans) should be invited to join the Government and sit on the Government side of the Legislative Council; five of the seven (including three Africans) would become members of the Executive Council with the status of Ministers, and the two remaining Africans would be appointed Parliamentary Under-Secretaries. Of the five Ministers, two—one African and one other—would have full executive responsibility under the Governor for groups of departments; one (an African) would be an Assistant Minister working under the Minister concerned with Social Services (covering education, health, African housing, and labour); and the two others would be expected to concern themselves with particular spheres of Government activity, without having executive responsibility The selection of these Ministers and Parliamentary Under-Secretaries, and the allocation of responsibilities to them, would be in the Governor's discretion.

Executive Council. The membership should be reduced from 16 to 15, comprising the Governor, nine official members (including the Attorney-General) and the aforementioned five unofficial members (including three Africans) Six or seven of the official members should have ministerial status and executive responsibility for departments. The Executive Council would be the principal instrument of policy and its members would be required publicly to support any policy decided upon by it, whilst the Governor would not act against its advice "save in exceptional circumstances."

Legislative Council. This body had recently been reorganized and enlarged (see 13150 C) and no large-scale alteration was therefore recommended Nevertheless, as Buganda (with three members) was somewhat under-represented, it was proposed that the number of representative members from Buganda be increased to five To make this possible the European and Asian members of the Council had each stated their willingness to give up one of their seven seats, the two members concerned transferring to the Government side of the Council on what was at present the cross-bench; as this would increase the Government side of the Council from 28 to 30, the representative side should be similarly increased by the addition of two further African members and would thus consist of 18 Africans, six Asians and six Europeans.

The Government side of the Council, in addition to 10 or 11 official members, would include the above-mentioned seven members of the public, i e, the five new Ministers and the two African Parliamentary Under-Secretaries. With the introduction of "so substantial an element drawn from the general public on to what has hitherto been the official part of the Government side of the Council (said the Governor) I can see no reason for the retention of the cross-bench in its present form," and it should therefore be converted into a Government back-bench, its members still being free—as at present—to speak and vote as they liked except on a motion of confidence. With these changes, the number of Africans on the Council would be increased to 30 (18 on the representative side, 12 on the Government side) out of a total membership of 60

Review of Arrangements. In order that a period of stability might be secured, no major changes should be made in these constitutional arrangements for six years. Assuming that they were introduced in 1955, the position should be reviewed early in 1961 with a view to introducing any agreed changes early in 1962.

Question of East African Federation. After quoting the assurance on East African Federation given by the Colonial Secretary in the House of Commons on Dec. 2, 1953 (see p. 13346, col 2), the Governor reiterated that this was a "solemn and morally binding pledge" which provided "a full safeguard for the future." He added: "In order to ensure that, should the occasion ever arise in the future, public opinion throughout the Protectorate should be able to express itself fully and clearly, I am prepared to recommend to the Secretary of State [for the Colonies] that it should be laid down now that, should the occasion ever arise in the future to ascertain public opinion in terms of this pledge, the Protectorate Government would at that time consult fully with the Buganda Government and the other Authorities throughout the country as to the best method of ascertaining public opinion."

The Government's decision, which was read to the Lukiko by Sir Andrew Cohen, was misinterpreted by the large crowd who listened to a translation relayed to them over loud-speakers outside the building. The crowd appeared to have been under the impression that the interpreter had said that a new Kabaka should be elected, and their shouts drowned the statement that, alternatively, Kabaka Mutesa II might be allowed to return. Although the Governor was heard in respectful silence by the Lukiko, and although the Katikiro appealed for quiet, the continuing tumult outside the chamber eventually compelled the Governor to break off his speech.

In a broadcast later the same day (Nov. 16) he emphasized that he would not be diverted from a policy which was of "vital importance" to the country by "the ill-mannered action of irresponsible crowds."

In the British House of Commons, Mr. James Griffiths welcomed "the new approach to this problem" on behalf of the Opposition. Mr. C. J. Alport (C) asked whether, in view of the definite position taken up by the Governor 12 months ago, this change of policy was fully acceptable to him or whether any pressure had been brought to bear on him to accept the change of view. Mr Lennox-Boyd, deprecating the phrase "change of policy," stressed in reply that there had been a change of situation which had created both an opportunity and the need for a new approach, and that the Government's decision had been taken after full consultation with the Governor

The Kabaka, in a statement issued in London, expressed satisfaction at the British Government's decision and declared: "My future is now in the hands of the Lukiko. If they decide that they want me back, I hope that I shall return with the least possible delay."

The Lukiko, meeting on Nov. 17, passed a resolution affirming that it would elect no other Kabaka so long as Mutesa II was alive, and also decided to apologize to Sir Andrew Cohen for the events of the previous day. It then adjourned to consider the constitutional proposals, and on reassembling on Dec. 21 decided to appoint a committee of seven Africans to discuss, in conjunction with two legal experts, the implications of the proposals. Replying to the Lukiko's decision on Jan. 13, the Governor raised no objection to the establishment of a new committee, but warned the Lukiko that this was likely to delay the possibility of the return of Kabaka Mutesa II.

The reply pointed out that the Namirembe recommendations, which provided a "very substantial political advance for the Baganda," were closely interrelated and required to be read and decided upon as a whole. "H.M. Government, having accepted the Namirembe recommendations, are most unlikely to be willing to enter into fresh negotiations on the same subject, or to agree to new recommendations as a result of the work of a second Lukiko committee," it stated, adding that it was not clear what the appointment of the new committee was likely to achieve. If the new precedure delayed the bringing into force of their recommendations, responsibility for postponing the possibility of Mutesa's return would rest with the Lukiko.

Before the publication of the recommendations of the Namirembe Conference, the formation had been announced in Kampala on Oct. 20 of a new party under the name of the All-Uganda Party. Formed by a group of African professional and businessmen, the new party had as one of its main aims the return of the exiled Kabaka as a constitutional monarch.

Orders ending the state of emergency in Buganda, lifting the publication ban on the *Uganda Post* and *Uganda Express*, and rescinding the deportation order against the editor of the *Uganda Express*, were signed by Sir Andrew Cohen on Jan. 10. (Times Daily Telegraph - Manchester Guardian)

(Prev. rep. 13794 C.)

A. SOUTH AFRICA. — Election of Senate Natives' Representatives. - Formation of Joint Senate-House Group. - Dr. Colin Steyn elected to Senate.

In elections on Dec. 8, 1954, for the Natives' Representatives in the Senate the two sitting members were re-elected, Mr. W. G. Ballinger (Liberal) defeating Mr. R. F. G. Pretorius for the Transvaal and Orange Free State seat, and Major C. Cowley (Independent) defeating Mr. Sidney Smith for the Natal seat. Mr. Ballinger, who stood as an advocate of equal partnership between the races and as an opponent of "unjust racial discrimination," received 593,902 votes against 386,834 for Mr. Pretorius, who supported the Nationalists' *apartheid* policy. The two other Natives' Representatives in the Senate were returned unopposed—Mr. W. M. N. Campbell (Independent) for the Transkei electoral division of Cape Province, and Mr. Leslie Rubin (Liberal) for the Cape Province outside the Transkei.

The four newly-elected Natives' Representatives in the Senate, together with the three in the House of Assembly (see 13954 F), agreed on Jan. 20 to work as a single group in Parliament, irrespective of their party affiliations, and to hold regular meetings to discuss a common approach to all aspects of Native policy. Mrs. Ballinger was elected chairman of the group.

Dr. Colin Steyn, leader of the United Party in the Orange Free State, who lost his seat in the House of Assembly in the 1953 general election (see 13005 A), was elected a Senator for Natal by the Natal Electoral College on Dec. 8 in succession to Mr. G. Heaton Nicholls, leader of the Union Federal Party, who had resigned after the recent Provincial elections.

B. SOVIET UNION. — Offer to disclose Data on Peaceful Uses of Atomic Energy. - Aid in Atomic Research offered to China and East European Countries.

The Soviet Government issued a statement on Jan. 14 which (1) referred to the fact that the first industrial electric power-station working on atomic energy had gone into operation in the U.S.S.R during 1954; (2) announced that the Soviet Union was prepared to make public the scientific and technical experience gained in this field, as a contribution towards international collaboration in the peaceful uses of atomic energy; and (3) expressed its readiness to submit details of the industrial power-station and its working to the international conference on the peaceful utilization of atomic energy which would be held in Geneva during 1955, in accordance with the resolution adopted at the ninth session of the U.N. General Assembly.

A further announcement was issued in Moscow on Jan. 17 stating that the Soviet Government was ready to give scientific and technical assistance in the utilization of atomic energy for peaceful purposes to the Chinese People's Republic, Poland, Rumania, Czechoslovakia, and Eastern Germany.

The announcement added (1) that the Soviet Union had proposed to these countries that it should give them "all-round assistance in designing, supplying equipment for, and constructing experimental atomic piles of a thermal capacity of up to 5,000 kilowatts"; (2) that these countries would also be allocated "the necessary quantities of fissionable material for atomic piles and scientific work"; (3) that scientists and engineers of the countries concerned would be given the opportunity "to acquaint themselves with scientific research work being carried out in the U.S.S.R. in the sphere of utilization of atomic energy for peaceful purposes, and with the operation of experimental atomic piles", and (4) that, as a result of this co-operation, the countries concerned would be enabled "to develop scientific research in nuclear physics on an extensive scale, to obtain from the experimental atomic piles sufficient quantities of radioactive isotopes for use in medicine and biology, and to train scientific and engineering *cadres* for the further development of work for the peaceful use of atomic energy."

It was stated that consideration was being given to the question of extending the number of countries which the Soviet Union would be prepared to assist in utilizing atomic energy for peaceful purposes.—(Soviet Weekly) **(Prev. rep. U.N. Resolution, 13993 A, page 13994; Soviet Atomic Power Station, 13685 E.)**

C. UNITED STATES. — Congressional Elections. - Final Voting Figures.

Final voting figures for the mid-term Congressional elections on Nov. 2, 1954, tabulated by the Associated Press and published on Dec. 20, showed that the total vote for House candidates was 42,577,696, of which the Democrats received 22,281,988 (52.3 per cent) and the Republicans 20,096,661 (47.2 per cent). The Democratic majority of 2,185,327 included 171,000 Liberal Party votes for Democratic candidates in New York and nearly 18,000 Republican votes cast for the Democratic candidate in New York's 18th District, where the Republicans had no candidate. Outside the traditionally Democratic southern States (where the Democrats received 3,006,063 votes to the Republicans' 656,050), however, the Republicans had a majority of 164,686, with 19,440,611 votes against the Democrats' 19,275,925. The Democrats received a majority of votes in 26 States (including 11 in the South) and the Republicans in 22 States.—(New York Times) **(13881 A.)**

D. BRAZIL - BOLIVIA. — First Rail Link.

A railway linking the Brazilian town of Corumbá, in the State of Mato Grosso, and the Bolivian town of Santa Cruz de la Sierra was opened on Jan. 5 at a ceremony attended by President Café Filho of Brazil and President Paz Estenssoro of Bolivia. The railway, the first rail link between the two countries, has a length of 680 kilometres (425 miles) and took 15 years to build. It was financed jointly by Brazil and Bolivia and marked the penultimate stage in the completion of a transcontinental rail route between the Brazilian port of Santos and the Chilean port of Arica. The remaining stage of the route will consist of a 511-km. stretch in central Bolivia between Santa Cruz de la Sierra and Vila Vila, crossing the Andes. (Bank of London and South America)

E. AUSTRIA. — New Envoys in London and Rome.

It was announced in Vienna on Jan. 13 that Dr. Johannes Schwarzenberg, Austrian Ambassador in Rome, would succeed Dr. Lothar Wimmer (retiring) as Ambassador in London, and that Dr. Max Löwenthal-Chlumecky, the Ambassador in Buenos Aires, would succeed Dr. Schwarzenberg at the Rome Embassy.—(Wiener Zeitung) **(Prev. rep. 13377 E.)**

A. BURMA. — U Nu's Visit to China, North Vietnam, and Cambodia. - Appeal for Friendship between China and the United States.

The Burmese Prime Minister, U Nu, paid a visit to China from Nov. 30 to Dec. 16, 1954, stopping *en route* at Hanoi on Nov. 29 for a meeting with President Ho Chi-minh of North Vietnam. A communique issued in Hanoi on that date said that both Governments were "interested in the problem of consolidating peace in Indo-China," and were in complete agreement on the five principles of peaceful co-existence laid down in the Sino-Indian and Sino-Burmese joint declarations (see 13661 A; 13711 B).

After staying in Peking from Dec. 1 to Dec. 5, during which period he had discussions with President Mao Tse-tung, Mr. Chou En-lai, and other Chinese Government leaders, U Nu made a four-day tour of Manchuria, inspecting industrial enterprises at Mukden and other cities. On Dec. 10 he returned to Peking, where he made an important speech—at a dinner attended by members of the Chinese Government—appealing for friendship between the U.S.A. and China, and giving an assurance that Burma would not allow her territory to be used as a base for unfriendly activities against China.

Declaring that "very firm foundations" had been laid for Sino-Burmese friendship, U Nu continued: "Since our first meeting in Rangoon, and in the course of our subsequent meetings, I mentioned to Prime Minister Chou how we had at one time entertained grave apprehensions about the possibility of interference by the People's Republic of China in our internal affairs" China, he continued, might have similar apprehensions lest Burma should allow herself "to be used as a stooge by the enemies of China" by supplying air and naval bases for a possible attack, and facilities for espionage and sabotage. He could give "an unequivocal assurance," however, that "we will under no circumstances be stooges of any Power," and that Burma would never go back on her pledges of friendship to China. Burma was engaged in constructive long-term plans for uplifting her people, and for that reason was determined to do everything possible for the maintenance of peace.

"I feel," U Nu went on, "that most of the tensions in East Asia will be relaxed if an understanding can be brought about between the People's Republic of China and the United States I also feel that it would not be very difficult to bring about this understanding. If only some people with courage and sincerity can bridge the gulf between these two countries, instead of setting them against one another, most of the tensions between them will be considerably relaxed, if not totally eliminated. Neither of these two countries can be termed evil. Let each of them follow its own political system. Any political system which is accepted by the majority of the people of a country must be considered as the best for that country.

"As a people, the Americans are very generous and brave. In the sphere of scientific knowledge, the Americans have developed to such an extent that they can make this world a happy and prosperous place to live in. The Chinese people are also very generous and brave. They enjoyed a high degree of civilization at a time when the rest of the world were barbarians. Therefore we have a great affection and regard for both these peoples. Our regard for the Chinese is perhaps greater, since the Chinese and the Burmese peoples are close neighbours and have suffered alike in history . . . The Government which I have the privilege of leading, far from accepting one-sided aid that may cause apprehension in either of these two countries, will not even entertain thoughts of accepting such aid. Nor will it pursue any course of action at the behest of one that will cause concern to the other . . . We do not want these two great countries to confront each other with bitterness and hostility. As a friend of both, we want them to be on the friendliest of terms. I want to take this opportunity of assuring Premier Chou En-lai that I will do my utmost to bring about an understanding between the People's Republic of China and the United States . . ."

A communiqué issued in Peking on Dec. 12 stated that the talks between U Nu and members of the Chinese Government had taken place "in a very cordial and friendly atmosphere," and that agreement had been reached on the following points:

(1) The "five principles of peaceful co-existence" had been re-affirmed as a basis for relations between the two countries.

(2) Each country would establish Consulates-General in appropriate cities of the other country in the near future.

(3) Preparations would be made for the opening of an air service, the restoration of road traffic, and the conclusion of a postal and telegraphic agreement between the two countries.

(4) During 1955-57 China would import 150,000 - 200,000 tons of rice annually from Burma, and Burma would import industrial equipment and other goods from China.

(5) Each Government would encourage its nationals living in the other country "to respect the laws and social customs of the country in which they reside, and not to take part in the political activities of that country," and would protect the rights and interests of the other country's nationals resident in its territory. Negotiations on the question of the nationality of such residents would be undertaken at the earliest opportunity through diplomatic channels.

(6) The delimitation of the Sino-Burmese frontier would be settled at an appropriate time through diplomatic channels.

U Nu left Peking on Dec. 12, and after visiting Nanking, Shanghai, Hangchow, and Canton arrived in Phnom-Penh on Dec. 16, where he met the Cambodian Prime Minister, M. Penn Outh. He returned to Rangoon on Dec. 19, and on the following day stated at a press conference that he intended to submit proposals for a reconciliation between China and the United States to Mr. Chou En-lai and President Eisenhower.
(Burmese Government Information Department, Rangoon)
(Prev. rep. Chou En-lai, Rangoon Visit, 13711 B.)

B. UNITED KINGDOM. — Motor Vehicle Production in 1954. - Expansion Plans in Motor-car Industry.

The Society of Motor Manufacturers and Traders announced on Jan. 20 that 1,038,834 motor vehicles had been produced in Britain in 1954, this being the first time that the figure had exceeded a million. The total comprised 769,165 cars and 269,669 commercial vehicles (both figures being a record), compared with 595,000 cars and 240,000 commercial vehicles in 1953. Car exports rose by nearly 64,000 units to 366,000 and exports of commercial vehicles by over 15,000 to 126,700; in addition, the number of agricultural tractors exported rose by 15,000 to the record figure of 110,500. The total value of exports by the motor industry reached the unprecedented level of £340,000,000.

During the latter half of 1954 a number of British motor manufacturers had announced plans to expand their productive facilities, as described below.

Vauxhall. An expansion of the Vauxhall Motors factories at Luton and Dunstable at a cost of £36,000,000 was announced on Sept. 22 by Mr. H. H. Curtice, president of General Motors Corporation, which owns all the shares in the British company. Mr. Curtice said that the programme, which would take five years to complete and would entail an increase of 1,500,000 sq. feet of factory space at Luton and 1,100,000 sq feet at Dunstable, would enable the output of Vauxhall cars and Bedford trucks, at present 130,000 units a year, to be doubled.

British Motor Corporation. Sir Leonard Lord, chairman of the B.M.C, stated on Sept. 27 that the corporation's expansion plans included the spending of £9,000,000 for extensions to the Longbridge (Austin) works, the Cowley (Morris) works and the Fisher and Ludlow body plant, and that output was expected to be raised from 7,450 to 12,500 cars a week by the end of 1956.

Rover. Mr. S. B. Wilkes, managing director of the Rover Company, announced on Oct. 6 that his company would spend £3,000,000 a year on doubling the production of Land Rovers (to 50,000 a year) and on raising output of cars by 50 per cent (to 15,000 a year).

Rootes. Sir William Rootes, chairman of the Rootes Group, stated on Oct. 6 that the Group's assembly plants in five continents were being extended by a floor area of over 50 per cent, and that planned expenditure on expansion work had been increased from £5,000,000 to £10,000,000.

Ford. The Ford Motor Company announced on Oct. 17 that it would spend £65,000,000 during the next five years on an expansion programme which would involve the enlargement and modernization of its factory at Dagenham, the building of new factories at Basildon (one of the New Towns) and Aveley, in Essex, and the taking-over of certain buildings at Woolwich Arsenal No estimate was given of the increased production likely to result from this expansion.

Standard. Mr. A. S. Dick, managing director of the Standard Motor Company, announced on Nov. 8 that production of motor vehicles was planned to be raised to 100,000 units in the year ending Aug. 31, 1955 (compared with 73,000 in the previous financial year) and that production of tractors would be about 61,500, approximately the same as in 1953-54. On the following day the company issued an offer of 3,000,000 5½ per cent £1 cumulative preference shares, the prospectus stating that the money was required for new plant, re-tooling, and major reorganization of works layouts.

The B.M.C. announced on Aug. 26 that it had acquired a 20-acre site with 250,000 sq. ft. of buildings at Fisherman's Bend, Melbourne, for the assembly of B.M.C. parts imported from Britain and components and materials made in Australia. The corporation also announced that its factory at Victoria Park, Sydney, was being extended and would be producing 1,000 engines a week within 12 months. Sir Leonard Lord, giving details of the plans, said that the new Melbourne site was "an integral part of our future long-term world planning" and that its activities would be co-ordinated with the Corporation's other plants in Australia; the whole project, including purchase of the new site, extensions to existing plants, and the installation of machinery, would cost "not far short of £2,000,000."—(Times - Daily Telegraph - Financial Times)
(Prev. rep. Motor Industry, 13555 A.)

C. CZECHOSLOVAKIA. — Ending of State of War with Germany.

Prague radio announced on Feb. 3 that the Czechoslovak Government had ended the state of war with Germany.
(Manchester Guardian) **(Prev. rep. 14027 A.)**

A. BRITISH COMMONWEALTH. — London Conference of Commonwealth Prime Ministers.

A conference of Prime Ministers of the Commonwealth countries was held in London from Jan. 31 to Feb. 8. The United Kingdom, Canada, Australia, New Zealand, India, Pakistan, Ceylon, and the Rhodesia and Nyasaland Federation were represented by their Prime Ministers (respectively Sir Winston Churchill, Mr. Louis St. Laurent, Mr. Robert Menzies, Mr. Sidney Holland, Mr. Jawaharlal Nehru, Mr. Mohammed Ali, Sir John Kotelawala, and Sir Godfrey Huggins) and South Africa by Mr. C. R. Swart, the Minister of Justice, who deputised for Mr. Strydom.

A wide range of subjects was discussed at the meetings, most of which were presided over by Sir Winston Churchill. Two communiqués were issued at the end of the conference, one describing the general scope of the talks and the other relating specifically to regional defence discussions which had taken place during the London meetings. Their texts were as follows (cross-headings inserted):

General Communiqué.

The International Situation. "The Governments of the member-nations of the Commonwealth are resolved to do their utmost to ease international strain. It is their aim, not only to bring any open hostilities to an end, but to promote conditions in which real peace can grow and thrive so that freedom and plenty may be enjoyed by all peoples.

Since the last meeting of Commonwealth Prime Ministers in 1953, agreements have been reached in various parts of the world which have had the effect of removing differences and widening the area of understanding among Governments and peoples. The Prime Ministers welcomed the settlement of the Trieste dispute. They recorded their satisfaction that, in the Middle East, the United Kingdom's differences with Egypt and Persia had been resolved. They looked forward to closer collaboration between all the countries of that area so that its economic development and the welfare of its peoples could be advanced. They welcomed, in South-East Asia, the end of hostilities in Indo-China and stressed the need for strict adherence to the conditions of the Geneva agreement and for increased welfare and stability in that area.

The Prime Ministers were informed that the Commonwealth countries associated with the North Atlantic Treaty were convinced that the early ratification of the agreements reached in London and Paris, and the acceptance of Federal Germany into the community of the Western nations, would mark an important advance towards the security and cohesion of Western Europe."

The Formosa Crisis. "The Prime Ministers met at a time of tension in the Far East. In view of developments which occurred during their meeting [see 14017 A] their discussions of this problem assumed a special significance. They were united in their conviction that it was necessary that incidents should be avoided while means were sought for a peaceful outcome. They were confident that the intimate and personal discussions which they had held at this meeting would be a valuable foundation for future consultations with one another and with other countries directly concerned, and for the development of their policies on this question."

Economic Policy. "The Prime Ministers noted the improvement in the outlook for world trade and prosperity which had taken place since the Commonwealth Finance Ministers met at Sydney in January, 1954. They recognized that Commonwealth countries had made a substantial contribution to this by maintaining the stability of their currencies, by continuing their development programmes, in which the Colombo Plan had played its part, and by expanding their production. They had also continued their progressive approach towards the widest practicable system of trade and payments, which best serves the interest of the sterling area and Canada.

The Prime Ministers affirmed their determination to continue these policies of economic progress. They agreed, in particular, that all Commonwealth countries should strive to develop further their resources and their earning power. By these means they could best consolidate their strength and make an increased contribution to economic stability throughout the world."

Nuclear Energy. "The Prime Ministers gave anxious thought to the problems of nuclear energy. The latest discoveries confront humanity with a force which is almost beyond the capacity of man's brain to comprehend or measure. They present a choice and a challenge. Is this vast power to be developed for the benefit of man, or is it to be used to bring ruin upon the human race?

The Prime Ministers once again declare that their countries will never embark upon aggression. Indeed, it is their hope that, when the peoples of the world understand the magnitude of the disaster which world war would bring, all nations will shrink from violence and follow peaceful means of settling their differences. The annihilating power of the new weapons renders it imperative that sanity should prevail and that war should be prevented.

It is the aim of the Commonwealth countries to work for a disarmament agreement which includes forces and weapons of all kinds, and is both comprehensive and effective. Commonwealth Governments have already devoted much time and thought to producing and furthering practical plans to achieve this purpose, and two of the Commonwealth countries are members of the sub-committee of the U.N. Disarmament Commission.

With international accord on disarmament, it would become possible to turn the vast resources of atomic energy increasingly into channels which benefit mankind. The Prime Ministers were informed of the progress made by the U.K. Government in the use of atomic energy for industrial and other peaceful purposes. They looked forward to the prospects of continued close co-operation between the U.K. and other Commonwealth countries in the development of the civil uses of atomic energy."

Pakistan and the Commonwealth. "In the course of the meeting the Prime Minister of Pakistan informed the other Prime Ministers that Pakistan was about to adopt a republican form of constitution but desired to remain a member of the Commonwealth. They were assured that the people of Pakistan were resolved to maintain, in spite of this constitutional change, their steadfast adherence to the Commonwealth and their recognition of the Crown as the symbol of the free association of its sovereign members. In a declaration issued on Feb. 4 [see below] they signified their agreement that Pakistan should continue on this basis to be a full member of the Commonwealth after becoming a republic. All the Prime Ministers reaffirmed that their countries would remain united as free and equal members of the Commonwealth, freely co-operating in the pursuit of peace, liberty, and progress."

Conclusion. "The Commonwealth is a unique association. Its countries contain a fourth of the world's population, embracing people of many races and religions. Among its members are countries of importance in all quarters of the globe. Its strength and influence in the world today are derived from this and from a common outlook which, in spite of differences of geography, religion, and race, evokes a broadly similar response to most international problems of the day. The Commonwealth countries do not pursue any selfish purpose. They seek no aggrandizement and will always oppose aggression. In concert with all who share their ideals, they are resolved to do their utmost to further the cause of peace throughout the world."

Communiqué on Regional Defence Problems.

"While the Commonwealth Prime Ministers were in London the opportunity was taken to hold a series of additional meetings on regional defence problems. These meetings covered the main areas in which the forces of Commonwealth countries may have to be deployed in the event of war. Each was attended by representatives of those Commonwealth countries whose forces might in war be operating in the particular area under discussion. Their purpose was to enable the representatives of those countries to join together in reviewing the plans for the defence of each area.

The representatives of the Commonwealth countries concerned with these regional defence plans recognized that the advent of thermo-nuclear weapons involves fundamental changes in the strategic approach to defence problems. They agreed that the overwhelming superiority of the Western Powers in nuclear weapons offers at the present time the most effective and practical assurance that world peace will not be disturbed by any deliberate act of aggression. They agreed that their defence policies should be founded on the principle that world war can be prevented if the free democracies are resolved to maintain in readiness forces sufficiently strong to deter any potential aggressor.

In Europe great progress has already been made in building up the defensive shield provided by the forces of the North Atlantic Treaty Powers; and the Commonwealth representatives who took part in these discussions welcomed the steps which are being taken to increase the strength of those forces by a military contribution from Western Germany. The defence problems of the Middle East were reviewed in the light of recent developments, and agreement was reached on the basis for a new approach to defence planning in this area.

Discussion of the defence problems of South-East Asia covered plans to help the countries in that area, not only to resist aggression but also to strengthen their internal security. The four Commonwealth countries which are signatories of the Manila Treaty took this opportunity of reviewing, in preparation for the forthcoming conference at Bangkok, progress in making that treaty an effective instrument for these purposes.

The opportunity was taken to discuss, as one element in the defence of the Manila Treaty area, the security of Malaya, which is regarded by the U.K., Australia, and New Zealand as of vital importance. The strategic position of the area was clarified by these discussions and it was considered that, in future, joint planning among the three Governments and discussions with other participants in the Manila Treaty would go forward more effectively.

Throughout these regional defence discussions it was accepted that military plans must be concerted with other countries involved in the defence of these areas. The Commonwealth countries concerned also recognized the need for the closest association with the U.S.A. in all defence measures. They agreed that on this basis regional defence planning can afford a solid foundation for the preservation of peace."

The following declaration was issued by the Commonwealth Prime Ministers on Feb. 4 in connexion with the status of Pakistan within the Commonwealth when that country became a republic:

"The Government of Pakistan have informed the other Governments of the Commonwealth of the intention of the Pakistan people that, under the new Constitution which is about to be adopted, Pakistan shall become a sovereign, independent republic. The Government of Pakistan have, however, declared and affirmed Pakistan's desire to continue her full membership of the Commonwealth of Nations and her acceptance of the Queen as the symbol of the free association of its independent member-nations, and as such the Head of the Commonwealth.

The Governments of the United Kingdom, Canada, Australia, New Zealand, South Africa and Ceylon, the basis of whose membership is not hereby changed, accept and recognize Pakistan's continuing membership in accordance with the terms of this declaration. The Government of India the basis of whose membership is also unaltered similarly recognize Pakistan's continuing membership

In notifying the other Prime Ministers of Pakistan's intention, Mr Mohammed Ali reaffirmed his country's steadfast adherence to the Commonwealth The other Prime Ministers, in accepting this proposal, welcomed Pakistan's continued association and co-operation as a member of the Commonwealth, and assured Mr Mohammed Ali that the friendship and goodwill of their countries towards Pakistan would remain unaffected by this constitutional change

Accordingly, the United Kingdom, Canada, Australia, New Zealand, South Africa, India, Pakistan and Ceylon hereby declare, as they did in 1949 when a similar decision was taken in respect of India, that they remain united as free and equal members of the Commonwealth of Nations, freely co-operating in the pursuit of peace, liberty and progress."

Among British Ministers participating in the conference were Sir Anthony Eden (Foreign Secretary), who attended the sessions at which the international situation and the Formosa crisis were discussed; Mr. R A. Butler (Chancellor of the Exchequer), who gave a review of the general economic situation, with special reference to the balance of payments of Britain and the sterling area; Mr. Harold Macmillan (Defence Minister), who attended the discussions on regional defence matters; and Lord Swinton, Secretary of State for Commonwealth Relations. British and Commonwealth military advisers also took part in the discussions on regional defence questions.

A communiqué issued on Feb 3 said that Mr Butler had given "a review of the general economic situation and an account of the state and prospects of the balance of payments of the U K and the sterling area." It added: "The Prime Ministers reaffirmed their support of the proposals for a collective approach towards a multilateral system of trade and payments which were formulated by the Commonwealth economic conference of 1952. They noted the satisfactory progress made towards the attainment of economic strength and stability in the sterling area as a whole, but recognized the continuing need for further developments of economic resources and earning power throughout the Commonwealth"

In addition to the formal meetings, a number of private and informal discussions took place between the Prime Ministers attending the conference. During the week-end Feb. 5-6 the Formosa crisis was discussed by Sir Anthony Eden and Mr. Nehru at the Hampshire residence of Lord and Lady Mountbatten, where they were guests. Mr. Krishna Menon (permanent Indian representative at the U.N.) and Mrs. Pandit (Indian High Commissioner in London) were also present at these talks.

Discussions on the Indo-China situation took place on Feb. 6 at Chequers between Sir Winston Churchill, Mr. St. Laurent, Mr. Nehru, Sir Anthony Eden and Mr. Lester Pearson (the Canadian Secretary for External Affairs).

Mr. Menzies paid four-day visits to Colombo and Karachi while *en route* to London, whilst Mr. Mohammed Ali, after his arrival in London on Jan. 20, flew for a brief official visit to Ottawa pending the opening of the Prime Ministers' conference. It was announced at the end of the conference that Mr. Menzies would pay an official visit to France from Feb. 18-22 before returning to Australia, and that Sir John Kotelawala had accepted an invitation from the Prime Minister of the Irish Republic, Mr. Costello, to visit Dublin on Feb. 9-10.

Mr. Swart, who left London on Feb. 6, said before his departure that the conference had been "valuable and informative." He added that the conference had not discussed the question of a republican status for South Africa.

A. RELIGIOUS LIFE. — Rockefeller Fund for Promotion of Protestant Education in the U.S.A.

Securities bearing a market value of approximately $20,000,000 (£7,000,000) were presented on Jan. 11 by Mr. John D. Rockefeller jr. as a gift "to strengthen and develop Protestant theologial education" in the United States. The fund for this purpose will be administered by Sealantic Fund Inc, a corporation with a board of trustees set up in 1938 by Mr. Rockefeller to administer his philanthropic benefactions. The gift was believed to be the largest ever made for the promotion of religious education. (New York Times)

B. UNITED KINGDOM. — G.C.V.O. conferred on the Archbishop of York.

The Archbishop of York, Dr. Cyril Garbett, was made a Knight Grand Cross of the Royal Victorian Order by H.M. the Queen on Feb. 6, on the occasion of his 80th birthday. (Times)

C. WESTERN EUROPEAN UNION. — Repudiation of Soviet Allegations of Infringement of Geneva Protocol.

Notes were presented in Moscow on Feb. 3 by the British, French, Italian, Netherlands, Belgian and Luxemburg Governments repudiating the allegation, contained in the Soviet Notes of Jan. 13 (see 14027 A, page 14028), that the Paris agreements were incompatible with the Geneva Protocol of 1925, which prohibited the use in war of chemical and bacteriological weapons.

The British Note made the following points (1) The Geneva Protocol did not prohibit the manufacture of chemical and bacteriological weapons, but banned their use in war, and both the British and Soviet Governments reserved the right at the time to retaliate in kind if such weapons were used against them (2) The Paris agreements in no way obliged the signatories to produce these weapons, and therefore did not provide (as the Soviet Government had alleged) for the creation of large stocks of such weapons. (3) Moreover, the agreements envisaged an international agency for the control of bacteriological and chemical weapons, as well as of other types of armaments, the British Note said in this connexion that "no comparable system is understood to exist in Eastern Europe" (4) The Soviet Government had apparently assumed that because conditions were laid down in the Paris agreements for the production of chemical and bacteriological weapons (which would be banned in Western Germany), the Western European Union Powers were planning to extend their output and stocks of such weapons, such an assumption misrepresented the essential purpose of the agreements. (5) After recalling that the Soviet Note had suggested that the existence of the Geneva Protocol, rather than the fear of retaliation, had prevented the use of chemical and bacteriological weapons in the Second World War, the British reply added "This was evidently not the view held by the Soviet Government in 1942. At that time they welcomed the assurance that the British Government would use their stocks of gas weapons against Germany in retaliation for any use of poison gas against the U.S S R." In support of this, the British Note quoted a message sent by Marshal Stalin to Sir Winston (then Mr.) Churchill on March 30, 1942.

Whilst repudiating the Soviet allegations, the Note stressed that Britain would continue to respect the Geneva Protocol "as scrupulously as hitherto."

The replies of the other W.E.U. countries were in similar terms.—(Times - Daily Telegraph - Le Monde, Paris)
(Prev. rep. Soviet Notes, 14027 A.)

D. AFGHANISTAN. — Foreign Minister's Visit to Karachi. - Meetings with Pakistani Government Leaders.

The Afghan Foreign Minister, Prince Sardar Mohammed Naim Khan, visited Karachi at the beginning of November 1954, for discussions with Mr. Ghulam Muhammad (the Governor-General), Mr. Mohammed Ali (the Prime Minister) and other members of the Pakistani Government.

In a press statement in Karachi on Nov 7 Prince Naim Khan declared that the basic differences between Pakistan and Afghanistan did not involve any territorial adjustment. He referred, however, to the question of giving the people of "Pushtoonistan" [the Pathan areas of the N.W. Frontier Province, alternatively known as "Pathanistan"] opportunities to express themselves on "their status and way of living." Replying to a question on the possibility of common defence, he said that as both Afghanistan and Pakistan were Moslem countries and in the same geographical region, "neither could be indifferent to the security of the other." The national interests of both countries were similar and there were good possibilities of close economic co-operation.

The Afghan Minister in Karachi, Sardar Mohammed Attiq Khan Rafiq, said in Peshawar on Nov. 11 that the two countries had made "a notable advance towards coming closer to each other," and that the Afghan Foreign Minister's visit to Karachi "might well prove to be the turning-point in relations between Pakistan and Afghanistan." Mr. Mohammed Ali likewise declared that Prince Naim Khan's visit had led to "quite an improvement" in the relations between the two countries.

Marshal Shah Mahmud Khan Ghazi, Prime Minister of Afghanistan until 1953, saw Mr. Mohammed Ali in Karachi on Jan. 14, 1955.—(Pakistan High Commissioner's Office, London)

E. BRITISH COLONIAL EMPIRE.—Nuffield Foundation Grants for Colonial University Colleges.

It was announced on Nov. 18, 1954, that the Nuffield Foundation had set aside the sum of £250,000 for grants to University Colleges in the Colonial Empire. The first two grants made under this scheme were (*a*) £50,000 to the University College of Ibadan, Nigeria, mostly to finance a Nuffield visiting professorship, and (*b*) a like amount to the University College of the West Indies, Jamaica, to establish a Nuffield endowment fund. It was stated that the first Nuffield visiting professor at Ibadan would be Professor P. W. Richards, an authority on tropical rain forests and Professor of Botany in the University of Wales.—(Times) **(13050 A.)**

A. YUGOSLAVIA - INDIA - BURMA. — President Tito's Visits to India and Burma. - Address to Indian Parliament. - Tito-Nehru and Tito-U Nu Statements. - Yugoslav Acceptance of "Five Principles of Peaceful Co-existence." - Yugoslav Military Equipment for Burma. - Burmese Rice Gift to Yugoslavia.

President Tito of Yugoslavia paid State visits to India and Burma from Dec. 16, 1954 to Jan. 25, 1955, at the invitation of the Governments of the two countries, during which he had discussions with their Prime Ministers, Mr. Nehru and U Nu. President Tito's visit was the first paid by the head of a foreign State to either country since their attainment of independence.

Landing at Bombay on Dec. 16 from the Yugoslav cruiser *Galeb*, President Tito—who was accompanied by Vice-President Rankovich and M. Popovich (the Foreign Minister)—arrived at Delhi on the following day. While in the Indian capital he attended a number of official functions and addressed a joint session of the two Houses of the Indian Parliament.

President Tito declared in his speech that India and Yugoslavia, in spite of their geographical separation, were linked together by their common desire for the maintenance of their national independence, of peace, and of peaceful co-operation with other countries. It was incorrect, however to suggest that his visit and the strengthening of Indo-Yugoslav relations was an attempt to create a "third bloc," as their aim was rather "to increase the number of States and nations who place the safeguarding of peace above all else, and who struggle for relations based on equality, for peaceful co-operation between nations, and for the active co-existence of States with different systems."

Referring to the argument that the existence of a one-party system in Yugoslavia meant that there was no democracy in that country, he claimed that Yugoslavia's social development provided "the material basis for a new type of democracy, different from the normal or Western European type." "Our democracy rests on material foundations," he said, "and its growth is inseparable from, and parallel to, the economic progress of the country . . . Such a democracy could not possibly develop while the system of State capitalism prevailed in our country, in other words, before the economic enterprises were placed under the management of workers' collectives. While the system of State capitalism was necessary for a certain period, it later became an obstacle to the further development of our social life along democratic and Socialist lines."

After affirming Yugoslavia's attachment to the principles of the United Nations, President Tito suggested that among the reasons why the U N 's achievements had been less substantial than might have been wished were the exclusion of certain countries, "certain shortcomings of a structural nature, such as the right of veto in the Security Council," and the division of the world into "blocs," which had hampered the U N.'s work. In the immediate post-war years, he continued, Yugoslavia had been disappointed by the "far from friendly" attitude of the Western Powers, particularly in connexion with the peace treaties, and had depended mainly on Soviet support. The Soviet Union, however, had also not paid much heed to Yugoslavia's interests These experiences had strengthened Yugoslavia's determination to rely upon herself, not to become "the appendage of anyone else's foreign policy," and not to permit any interference in her internal affairs. As a result, the Soviet Union and other Eastern European countries had embarked on a violent campaign against her which had lasted more than five years, and their economic blockade had forced Yugoslavia to turn from the East to the West President Tito said in this connexion: "It must be acknowledged that . . . we found [among the Western countries] support and understanding, and that we did not for a moment jeopardize our independence, whether in the field of foreign policy or in that of our internal development. We were never seriously confronted with any conditions which sought to do that . ."

Yugoslavia, he continued, favoured equality as the basis of relations between States, and opposed interference in the domestic affairs of other nations Four fundamental elements lay at the root of all the evils from which humanity at present suffered · lack of equality between States and nations; interference in the internal affairs of other nations; the division of the world into spheres of influence and blocs; and colonialism. Only when these elements had been eliminated from international relations would mankind be freed from fear regarding its fate. The formation of military and ideological blocs, aimed at achieving military superiority for the purpose of settling international issues by force rather than by diplomatic methods or through the U.N., was fraught with the greatest perils for world peace. In opposition to this policy, Yugoslavia favoured "not passive co-existence but active co-operation between nations and States with different systems," as well as "broad co-operation between large and small States" and material and technical assistance for underdeveloped countries from those which were more highly developed.

Turning to relations between Yugoslavia and the Soviet Union, President Tito stated that the initiative for the resumption of normal relations between them had come from the U.S S R, and had been followed by a statement on the part of the present Soviet leaders [not hitherto published] that Yugoslavia had been wrongly treated and condemned in 1948. They had also declared that they respected the principle of equal relations and non-interference in Yugoslavia's internal affairs, and had agreed that normal relations should not be achieved at the expense of Yugoslavia's relations with the Western countries. Relations with other Eastern European countries were also improving, and conditions along Yugoslavia's frontiers had become normal The change in the Soviet attitude towards Yugoslavia, President Tito concluded, "does not merely result from a recognition of the fact that there had, up to the time of Stalin's death, been people in the Soviet Union who knowingly preferred false charges against Yugoslavia, but is due to an even greater degree to a change in domestic and foreign policy which is being brought about by the present leaders of the Soviet Union, although they themselves are unwilling to admit the change"

A joint statement by President Tito and Mr. Nehru, summarizing the results of their talks and affirming their support for the five principles of peaceful co-existence already subscribed to by India, China, and Burma (see 13661 A), was laid before the Indian Parliament on Dec. 23.

The statement emphasized that the policy of non-alignment pursued by both countries "is neither neutrality nor neutralism . . . but a positive, active, and constructive policy seeking to lead to collective peace, upon which alone collective security can really rest" It continued: "The President and the Prime Minister state as their considered view that the relations of their two countries are, and must continue to be, based on the principles of recognition of each other's sovereignty, independence and integrity, of non-aggression, of equality, of mutual respect, of non-interference in the domestic affairs of each other or other countries, and on the promotion both for themselves and for the world of the conditions of peaceful co-existence This basic conception should govern international relations, and be the foremost element in the policy and work of the United Nations.

"It follows, therefore, that the policy of their two countries and their approach to world peace cannot be based upon force or upon the accumulation of armaments as an instrument either of negotiation or of solution of conflicts. The President and the Prime Minister therefore repudiate the erroneous conception that has become prevalent in some quarters of a 'third bloc' or 'third force' of non-aligned countries This is a contradiction in terms, because such a bloc would involve them in the very system of alignments which they regard as undesirable

"The President and the Prime Minister are convinced that the principles on which they have agreed for the governance of their mutual relations are capable of wider application. If they were so accepted they would make a substantial contribution to a lessening of world tension and the resolution of pending conflicts They would widen the area of peace and diminish the terrible prospect of war, promote greater confidence, and open up greater opportunities of world co-operation."

After stating that the two Governments would seek to promote and strengthen economic and cultural relations between their countries, the statement concluded: "The President and the Prime Minister, believing that a lessening of world tension is an essential prelude to the development of collective peace, welcome certain signs of easing tension in the world which have appeared lately, and at the same time will devote their sincere endeavours to a further easing of world tension and the prevention of its growth. The President and the Prime Minister wish to affirm solemnly that the hope of advance of the peoples of the world, and even the survival of civilization, make the acceptance of peaceful co-existence not merely an alternative but a necessity."

After leaving Delhi on Dec. 22, President Tito visited Simla, Gwalior, Agra, and Lucknow, and on Jan. 1, 1955, had further talks with Mr. Nehru on the latter's return from the Bogor conference of the Colombo Powers.

In a statement to Yugoslav journalists before leaving India, President Tito paid tribute to the social progress achieved in India during the past six years, and suggested that industrialization would help to promote national unity by drawing workers of different races and communities closer together. The existence of a large number of political parties, in his opinion, hampered India's development, and it would be necessary for these parties to have at least "a single goal and a picture of what India should look like." Everything that was being done, he concluded, was done in a very democratic way, and many countries, including Yugoslavia, could benefit by India's experiences.

President Tito sailed from Calcutta in the *Galeb* on Jan. 3 and arrived on Jan. 6 at Rangoon, where he was welcomed by President Ba U and Premier U Nu. He subsequently visited the Shan States and Mandalay, in company with U Nu and other members of the Burmese Government, and returned to Rangoon by boat on the Irrawaddy River. It was announced on Jan. 17 that President Tito had offered, as a gift, the supply by Yugoslavia to Burma of equipment for an infantry brigade, and that Burma, in return, would supply rice as a gift to Yugoslavia. The military equipment in question, it was stated, would not be that originally given to Yugoslavia by the United States and Britain.

A joint statement issued by President Tito and U Nu on Jan. 17 said that discussions between them had shown that "Yugoslavia and Burma have hitherto adopted basically the same attitude towards the main problems, and that at the present time their views on these problems are identical" The statement, which was broadly similar to that issued by President Tito and Mr. Nehru, stressed the two Governments' determination to "continue their endeavours towards the strengthening of world peace and the promotion of international co-operation." It rejected "passive neutralism," alignment with either of the existing blocs, or the setting-up of a new grouping of States; reaffirmed the principles of peaceful co-existence, and declared

that the two Governments would "continue their efforts, in the United Nations and elsewhere, for this principle of co-existence to be applied in the conduct of international relations" In conclusion, it was stated that cultural ties between Yugoslavia and Burma would be strengthened, and that special attention had been given to measures for the improvement and intensification of their economic relations.

President Tito left Rangoon on Jan. 17 and, after paying a short visit to southern India, during which he visited Madras, Bangalore, and Mysore, sailed from Cochin on Jan. 25. While in Madras he again met Mr. Nehru, and on Jan. 21 addressed the Indian National Congress session at Avadi (see 14044 A). (Tanjug Agency, Belgrade - Indian High Commissioner's Office, London - Burmese Government Information Department, Rangoon - The Hindu, Madras - The Statesman, Calcutta)

A. NETHERLANDS. — Union of Holland, Surinam, and Netherlands Antilles. - New Statute of the Realm.

A new Statute of the Realm was signed by Queen Juliana on Dec. 15, 1954, under which Holland, Surinam (Dutch Guiana), and the Netherlands Antilles (the Dutch West Indies) were constituted as a single realm under the House of Orange, the former colonial status of Surinam and the Netherlands Antilles being ended. The Statute laid down (*a*) that the three constituent parts of the realm would possess full autonomy in their domestic and internal affairs; (*b*) that defence and foreign relations would be regarded as of common concern to the realm as a whole; and (*c*) that defence and foreign policy would be decided by a Council of the Realm consisting of Ministers appointed by the Crown and Ministers Plenipotentiary appointed by the Governments of Surinam and the Netherlands Antilles. The Statute came into force on Dec. 29, when it was formally promulgated in The Hague, Paramaribo (Surinam) and Willemstad (Curaçao).

The drafting of such a Statute had been under discussion for the past six years, and had been the subject of three round-table conferences held at The Hague during that period. The first two conferences (in 1948 and 1952) were unsuccessful but the third, held from May 20 to June 3, 1954, resulted in final agreement between the heads of the three delegations—Professor Willem Kernkamp (Minister for Realm Affairs and leader of the Netherlands delegation), Dr M F. da Costa Gomez (representing the Netherlands Antilles) and Dr Raymond Pos (representing Surinam). It was agreed that the Statute would have to be ratified by a two-thirds majority in the Netherlands States-General and the *Staten* (Assemblies) of Surinam and the Netherlands Antilles before it could take effect, and that there would be no change in the existing autonomous status of Surinam and the Netherlands Antilles as regards their internal affairs [Since 1950 both territories had possessed their own Governments and elected representative bodies to deal with matters of domestic concern.]

The Statute of the Realm was approved by the Lower House of the Netherlands States-General on July 16, 1954, by 75 votes to 19; by the Upper House on Oct. 27, 1954, by 34 votes to four; by the *Staten* of the Netherlands Antilles on Aug. 26, 1954, by a unanimous vote; and by the Surinam *Staten* on Sept. 10, 1954, also by a unanimous vote.

The opposing votes in the Lower House of the States-General were cast by the parliamentary leader of the Anti-Revolutionary Party (Dr. Schouten), eight of the nine members of the Party of Freedom and Democracy (Liberals), the five Communist members, two members of the Political Reform (Calvinist) party, the two representatives of the Catholic National party, and one member of the Christian Historical Union.

The Statute of the Realm was signed by Queen Juliana on Dec. 15 at a ceremony in the historic *Ridderzaal* (Hall of Knights) in The Hague which was attended by Dr. Willem Drees (Prime Minister of the Netherlands), Professor Kernkamp, Mr. E Jonckheer (Premier of the Netherlands Antilles) and Mr. A. Currie (Premier of Surinam), all of whom counter-signed the document.—(Algemeen Handelsblad - Nieuwe Rotterdamse Courant - Haagse Courant - Netherlands News Agency)

Note. The Netherlands Antilles consist of the islands of Curaçao, Aruba, Bonaire, St Eustatius, St Martin (half of which is Dutch and half French), and Saba. Curaçao, Aruba and Bonaire are off the Venezuelan coast, whilst the other three islands are in the Leeward group, about half-way between the British Leeward Islands and the American Virgin Islands The total area of the Netherlands Antilles is 436 square miles and the total population about 200,000, of whom 75,000 live in Willemstad, the capital of Curaçao. The latter island, the largest in the Netherlands Antilles, has great economic importance because of its extensive oil refineries. In addition to Willemstad, the other administrative centres are Oranjestad (Aruba), Kralendijk (Bonaire), Philipsburg (St. Martin), Oranjestad (St. Eustatius), and Bottom (Saba).

Surinam, on the mainland of South America, is bordered on the east by French Guiana, on the south by Brazil, on the west by British Guiana, and on the north by the Atlantic. The area is 54,000 square miles and the population is estimated at about 200,000, of whom some 75,000 live in Paramaribo, the capital. Surinam possesses some of the world's largest deposits of bauxite, the raw material from which aluminium is made. (Ed. K.C.A.)

B. WORLD VETERANS' FEDERATION.—Admission of New Ex-Servicemen's Organizations. - M. Vincent Auriol elected Ambassador-at-Large.

The World Veterans' Federation, representing 112 war veterans' associations throughout the world with a total membership of some 18,000,000, held its annual session in Vienna from Nov. 27 to Dec. 2, 1954. Four new countries were admitted to membership—Australia, New Zealand, Indonesia, and Siam—bringing the number of countries represented in the W.V.F. to 29. In addition, a second German ex-servicemen's association, the West German *Reichsbund*, was admitted to membership of the Federation.

The *Reichsbund* was admitted to the W.V.F. by unanimous vote (only the Israeli delegation abstaining) after its president had made a statement dissociating it from the former Nazi regime. [The other German ex-servicemen's association in membership of the Federation is the *Verband der Kriegsteilnehmer*.] The secretary-general of the Federation (Mr. Newcomb) speaking on Nov 30, praised the two German member-organizations for their "unequivocal stand" in preventing the rebirth of excessive nationalism and militarism in Germany, he added that while there were still some German ex-servicemen's associations clinging to "negative and dangerous" attitudes, "our group in Germany has done much to check this trend and to avoid the mistakes from which the German people themselves, in common with the rest of the world, have suffered so much"

On the proposal of the *Verband der Kreigsteilnehmer*, the Federation elected M. Vincent Auriol (the former President of the French Republic) as its honorary president and ambassador-at-large, in which capacity he will represent the Federation at international organizations, including the United Nations. M. Auriol paid special tribute to the fact that he had been nominated by a German ex-servicemen's organization—"a symbolic meaning which will escape no-one."

C. ARGENTINA. — New Base in Antarctica.

The Argentine Chief of Naval Operations (Admiral Ramón Brunet) announced in Buenos Aires on Jan. 17, on behalf of the Minister of Marine, that a new Argentine base had been established in the Antarctic only 800 miles from the South Pole. The base, situated on the shores of the Weddell Sea in latitude 78 deg. south, longitude 39 deg. west, was claimed to be the southernmost scientific station in the world.

Admiral Brunet explained that a new icebreaker—the *General San Martin*, recently built in Germany—had made it possible for Argentina to establish the base. The *General San Martin*, after sailing from Buenos Aires, reached the South Orkneys on Dec 27, 1954, and continued southwards through 1,250 miles of icefields—in parts over nine feet thick—until, on Jan. 3, 1955, she had reached a latitude where no ship had ever been before, thereby opening up the most westerly route in the history of Antarctic exploration He added that this route was patrolled by helicopters of the Argentine air and naval forces

The new base—the eighth established by Argentina in the Antarctic—was named General Belgrano in honour of the hero of the Argentine war of independence.

D. UNITED KINGDOM. — Unemployment Figures.

The total number of unemployed in the United Kingdom at Dec. 6, 1954, was 289,222 (256,308 in Great Britain and 32,914 in Northern Ireland), of whom 276,806 (including 5,036 casual workers) were wholly unemployed and 12,416 temporarily stopped. Figures of registered unemployed in Great Britain during the last five months of 1954 (see 13788 B for the first seven months) were as follows:

	Men	Boys*	Women	Girls*	Total
August 9 ..	140,350	16,260	68,939	14,060	239,609
September 13 .	140,073	8,996	78,193	8,765	236,027
October 11 .	153,570	6,029	87,524	6,791	253,914
November 15 .	160,651	5,223	91,037	6,148	263,059
December 6 ..	158,685	4,666	87,229	5,728	256,308

* Under 18.

The December figure of 256,308 unemployed (which included 46,570 married women) was the lowest December total since the war. It represented 1.2 per cent of the total number of employees, the comparable percentage in December, 1953, having been 1.5.—(Ministry of Labour Gazette) **(13788 B.)**

E. LONDON.—Freedom conferred on Mr. St. Laurent.

The Freedom of the City of London was conferred on Feb. 7 upon Mr. Louis St. Laurent, Q.C., the Prime Minister of Canada, who was in London at the time for the conference of Commonwealth Prime Ministers. The ceremony at Guildhall was attended by Sir Winston Churchill and the other Commonwealth Prime Ministers.—(Times) **(Prev. rep. 14038 A.)**

A. FRANCE. — War Crimes Trials.

A number of trials of former German and French members of the German armed forces and the Gestapo took place in France between December, 1952, and October, 1954, on charges of war crimes, and are described below under cross-headings. The most important of these were the trial of 21 Germans and Alsatians accused of participation in the Oradour massacre, and that of General Oberg, head of the German police in France during the occupation.

The Oradour Trial. The trial of seven Germans (a former adjutant, Karl Lenz, and six N.C.O.'s and privates) and 14 Frenchmen of Alsatian origin on charges of participating in the Oradour massacre opened before a military court at Bordeaux on Jan 12, 1953. One of the Alsatians, Georges-René Boos, had volunteered for service in the S.S., whilst the other 13 had all been conscripted into it after the annexation of Alsace by Germany in 1940. The commanding officer of the company which carried out the massacre (Captain Kahn, who was reported to be living in Sweden) and 43 other S S men were tried *in absentia*

The prisoners were tried together under the French "Collective Responsibility Law" of Sept 15, 1948, which laid down, with retroactive effect, that any member of a unit declared guilty of a war crime by the International Tribunal at Nuremberg must share the legal responsibility for it, unless he could prove that he had not participated in the action in question. The report rejected the plea of the Alsatians' counsel for a separate trial, which was opposed by the Germans' counsel, but reserved the right to separate the cases of the Germans and the Alsatians if the evidence should justify it It was also decided that Boos (who was originally to have been tried separately for treason) should be tried with the other defendants.

The indictment described how on June 10, 1944, a detachment of the S.S. *Das Reich* Division had entered the village of Oradour-sur-Glane (near Limoges, in the Haute-Vienne *département*) and herded the men into barns and garages and the women and children into the church. The men had then been mown down with machine-guns and their bodies burned, whilst the women and children had been driven into the church, which was then set on fire; in all, 190 men, 245 women, and 207 children were slaughtered in the Oradour massacre. Particularly grave charges were brought against Boos, who was accused by two of the other Alsatian defendants of having killed two women in cold blood, set fire to the church, and machine-gunned the women and children inside.

Evidence was given by seven villagers who survived the massacre: five men who had escaped by shamming death; a young man who was a boy of eight at the time, and had succeeded in running away and hiding: and a woman who had escaped by climbing through a window of the church. Officials, doctors, and priests who had visited Oradour immediately after the massacre stated that the bodies of 15 children who had been burned alive had been found in the church; that many of the bodies had been deliberately mutilated, and that most of the victims had probably been buried while still living. Defence witnesses, who included leading members of the Alsatian Resistance movement, stressed that young Alsatians had been subjected to intense pressure to force them to join the German Army, and that their parents had been warned that they would themselves be deported if their sons deserted.

After hearing the evidence, the court ordered on Feb. 3, 1953, that the cases of the Germans and the Alsatians should be proceeded with separately, in accordance with the National Assembly's vote of Jan. 27 (see below).

Presenting the case against the Germans, the prosecutor emphasized that "every soldier knows that he cannot break certain rules with impunity," and described other atrocities committed by the S.S. unit, the massacre, he pointed out, had been planned beforehand and had been carried out, with the whole unit's co-operation, in less than three hours He demanded the death penalty for the officers and N.C O 's and sentences of imprisonment for the remainder. Defence counsel argued that the Germans had acted under orders; that Lenz's functions had been principally administrative, and that the other participants in the massacre had been very young at the time

After the court had rejected a defence plea that it had no jurisdiction over the Alsatians, in view of the repeal of the Collective Responsibility Law (see below), the prosecutor pointed out that they had been stationed in France and could have deserted, but had not done so "so long as the war consisted of oppressing the civil population," although most of them had gone over to the Allies when they found themselves under fire He therefore demanded the death penalty for Boos and sentences of imprisonment for the rest. Defence counsel pleaded that the Alsatians had had no alternative, as refusal to obey would have meant death, and desertion would have brought reprisals on their families

On Feb. 13, 1953, the court found all the defendants guilty except one of the Germans, and sentenced Lenz and Boos to death; two of the other Germans to 12 and three to 10 years' imprisonment; and the 13 other Alsatians to terms of imprisonment ranging from eight to five years. All the 44 Germans tried *in absentia*, with one exception, were found guilty and sentenced to death.

While the trial was in progress, the National Assembly adopted on Jan. 27, 1953, a motion proposed by M. Massot (Radical) which (*a*) repealed the clauses of the law of 1948 which established the principle of collective responsibility; (*b*) authorized the trial by military courts of persons individually responsible for war crimes; and (*c*) provided for the separation of the cases of the Germans and the Alsatians after the hearing of evidence. The voting was 364 to 188, with five abstentions and 57 deputies not taking part in the division. The Assembly was sharply divided on the motion, which was supported by most M.R.P deputies, Gaullists (R.P.F.), Independent Republicans, *Paysans*, and Overseas Independents; only the Communists and *Progressistes* opposed it *en bloc*. Of the Socialists, 52 voted against the motion, 25 for, and 25 did not take part in the vote The Radicals (49 for and 25 against), Dissident Gaullists (A R S), and U D S R deputies were similarly divided. The Council of the Republic approved the motion on Jan. 29, 1953, by 212 votes to 93

Widespread indignation was caused in Alsace both by the decision to try the Alsatian and German prisoners together and by the sentences passed upon the former. All the Alsatian deputies in the National Assembly, except M. Rosenblatt (Communist), issued a statement on Feb. 14, 1953, demanding the immediate suspension of the sentences on the Alsatian prisoners, and protest demonstrations were held in Strasbourg and many other Alsatian towns.

A Bill granting a general amnesty to all Frenchmen forcibly enlisted in the German Army, and thereby automatically cancelling the sentences on all the Alsatians except Boos, was introduced into the National Assembly on Feb. 18, 1953, by M. Violette (Radical), with the Government's approval, and was passed on the following day by 319 votes to 211, with 55 deputies abstaining and 28 not taking part in the vote. As with the motion of Jan. 27, 1953, voting did not follow party lines, those supporting the Bill, however, included most of the Gaullist (R P.F.), M R.P., Dissident Gaullists, and Overseas Independent deputies, whilst the Communists again voted against *en bloc*. Of the Socialists, 76 voted against and 8 for, whilst 8 abstained and 13 did not take part in the vote, the Radicals were equally divided, 37 supporting the Bill, 21 opposing it, and 14 abstaining, of the Independent Republicans, 35 voted for and 15 abstained; of the *Paysans*, 36 supported the Bill, 3 opposed it, and 8 abstained; and of the U.D.S.R , 9 voted for and 2 against, whilst 2 abstained and 10 did not take part in the vote.

The Council of the Republic passed the Bill on Feb. 19, 1953, by 174 votes to 79, and the National Assembly accepted the Bill in slightly amended form on Feb. 20 by 324 votes to 216. All the Alsatian prisoners were released in consequence on Feb. 21, 1953, with the exception of Boos, who had previously been tried by the Bordeaux military court on a charge of having voluntarily borne arms against France, and had been sentenced on Feb 19, 1953, to 15 years' imprisonment.

Both the repeal of the "Collective Responsibility" law of 1948 and the granting of the amnesty to the Alsatians aroused strong feeling in Haute-Vienne. Over 40,000 people took part in a demonstration at Limoges on Feb. 3, 1953, protesting against the repeal of the 1948 law, whilst on Feb. 20 the municipality of Oradour, as a protest against "the rehabilitation of the murderers," returned to the Government the *Croix de Guerre* which had been conferred upon the village. In Western Germany, on the other hand, the amnesty was widely criticized, notably by Dr. Dehler (the Federal Minister of Justice), on the ground that it made an unfair distinction between the Alsatian and the German prisoners.

The *Cour de Cassation* (the French Supreme Court of Appeal) rejected the appeals of Boos and Lenz on July 23, 1953. It was reported in the French Press over a year later (on Sept 14, 1954), however that the death sentences on Boos and Lenz had been commuted by President Coty to life imprisonment.

Trial of General Oberg. The trial for war crimes of S.S. General Karl Oberg, commander of the German police forces in France in 1942-44, and of his principal assistant, Colonel Helmuth Knochen, opened before a military court in Paris on Feb. 22, 1954, but was broken off on Feb 24, when the presiding judge, by a slip of the tongue, stated that Oberg was "not a prisoner-of-war but a war criminal," instead of "a civilian accused of war crimes." The prosecution immediately demanded that the case should be transferred to another court, in order to avert the probability that the court's decision would be annulled on the ground that the judge was prejudiced

The indictment against Oberg and Knochen, which covered 241 pages, accused them of responsibility for the deportation of 140,000 Jews, only 10,000 of whom had returned, and of 80,000 political suspects, about half of whom had died in concentration camps; of the deportation, in particular, of MM. Herriot, Blum, Reynaud, Daladier, and Jouhaux, and General Gamelin; of the murder of M. Georges Mandel, the former Cabinet Minister; of the execution of about 1,000 hostages, and of the torture and summary execution of many members of the Resistance movement Oberg, after having been arrested in Germany in 1945, had been sentenced to death by a British court in 1946 for the murder of British prisoners-of-war, but the sentence was subsequently commuted to 20 years' imprisonment The preparation of the French indictment—which was largely based on evidence given at previous trials, notably that of Otto Abetz (see 10151 A)—had been completed by November, 1950, but the opening of the trial had been delayed by a number of appeals made by the defence against the decision to try Oberg a second time on other charges of war crimes

The second trial of Oberg and Knochen opened in Paris on Sept. 13, 1954, evidence being given, among others, by M. Reynaud, who described his imprisonment in Germany, and M. Bousquet, formerly secretary-general for police in the Vichy Government. Documentary evidence was put forward that in 1942 Oberg had ordered that where "saboteurs" could not be traced, the male members of their families should be punished with death and the women and children with deportation, and that both the accused had suggested to Himmler the deportation of members of the French intelligentsia. The prisoners, whilst admitting most of the charges against them, pleaded

in their defence that they had passed on and enforced orders from their superiors On Oct 10, 1954, the court found both defendants guilty and sentenced them to death An appeal was lodged against the verdict.

The " Rue de la Pompe " Trial. The trial before a military court in Paris of 11 Frenchmen, a Frenchwoman, and two Germans accused of taking part in the murder and torture of members of the Resistance Movement ended on Dec 22, 1952. The prisoners belonged to an organization known as the " Gestapo of the Rue de la Pompe " (from the Paris street in which it had its headquarters), which was held responsible for the deaths of 60 people and the deportation of 120. Eight of the accused, as well as seven other members of the group who were tried *in absentia*, were sentenced to death, three to life imprisonment, the woman to 20 years' imprisonment, and one of the Germans to five years' imprisonment, the other being acquitted Three of the condemned men—Theodore Leclercq, Georges Favriot, and Ferdinand Poupet—were executed by a firing-squad on May 22, 1954.

The Struthof Trials. Two German doctors, Eugen Haagen and Otto Bickenbach, were found guilty by a military tribunal at Metz on Dec. 22, 1952, of carrying out scientific experiments on prisoners in the Struthof concentration camp (Alsace), and were sentenced to life imprisonment. Haagen was accused of injecting batches of prisoners with typhus germs, whilst Bickenbach (a former professor of Heidelberg University) was alleged to have exposed prisoners to phosgene gas, and to have given no treatment to those who survived in order that the effects of the gas might be better observed. Both the accused claimed in their defence to have acted from " humanitarian motives in the interests of science." Two other doctors attached to the camp, one of whom was accused of ordering the murder of prisoners for use as anatomical specimens, were condemned to death *in absentia*, and a third was acquitted, also *in absentia*

The sentences on Haagen and Bickenbach were quashed on appeal by the *Cour de Cassation* on Jan 14, 1954, on the ground that not all the witnesses for the defence had been heard The case was accordingly transferred for retrial to the military tribunal at Lyons, which found both the accused guilty on May 14, 1954, and sentenced each to 20 years' imprisonment.

A former commandant of Struthof, Fritz Hartjenstein (who subsequently died in hospital), and five subordinate officials of the camp were condemned to death by the military tribunal at Metz on July 2, 1954, on charges of illegal executions, torture, and systematic cruelty. Another former commandant, Hans Hutting, was sentenced to life imprisonment, and nine of the camp guards to terms of imprisonment ranging from six to 20 years, whilst two of the accused were acquitted, 43 other members of the camp staff were sentenced to death and 15 to seven years' imprisonment *in absentia* During the trial evidence had been given by many former prisoners in the camp, where about 3,000 people died or were murdered during 1941-44.

The judgment was, however, quashed by the *Cour de Cassation* on Dec 2, 1954, on appeals by the defendants, on the ground that the military tribunal at Metz had been wrongly composed The case was accordingly sent to the military tribunal in Paris for retrial.

The Schirmeck Trials. Karl Buck, the former commandant of Schirmeck concentration camp in Alsace (who had previously been condemned to death for the murder of British parachutists and later pardoned), and Karl Nussberger, an official of the camp, were condemned to death by a military court at Metz on Jan. 21, 1953, on charges of torturing and murdering prisoners. Evidence was given during the trial by former inmates of the camp that prisoners had been beaten, attacked by savage dogs, and subjected to other tortures, and that many had been murdered, including two youths of 17 who were shot for attempting to escape. Four other members of the camp staff were sentenced to terms of imprisonment ranging from five to 20 years, four to death *in absentia*, and two to 20 years' imprisonment *in absentia*

The sentence on Buck was quashed by the *Cour de Cassation* on April 18, 1953, on the ground that the tribunal which had tried him had been constituted as if he were an officer of the German Army, whereas he was a police official Buck and Nussberger were accordingly brought to trial again on July 7, 1953, before a military tribunal in Paris

The Bordeaux Gestapo Trials. The Bordeaux military tribunal found on March 1, 1953, that two former officials of the Gestapo at Périgueux were guilty of murder One of the defendants, Michael Hambrecht, was sentenced to death and the other to 10 years' imprisonment, a third being acquitted. The defendants were accused, *inter alia*, of responsibility for the murder of 50 hostages at Brantôme, 58 at Mussidan, and 39 at Périgueux, for the deportation of several thousand Jews and others, and for many acts of arson and looting Of four other Germans tried *in absentia*, one was condemned to death and three to 20 years' imprisonment, whilst the case of an Alsatian who acted as interpreter to the group was ordered to be tried separately in view of the repeal of the Collective Responsibility Law.

Three former officials of the Gestapo at Bordeaux (Friedrich Dohse, Hans Luther and Anton Heizelberger) were found guilty on May 5, 1953, to atrocities against Resistance members, and were sentenced to terms of imprisonment ranging from four to seven years; as they had already been awaiting trial for several years, however, they were immediately released. Anton Fillip, a German officer of Czechoslovak origin, who had been in prison since July, 1945, was similarly sentenced at Bordeaux on May 12, 1953, to eight years' imprisonment for war crimes, which meant in practice that he would be released within two months Werner Gartner, formerly head of German counter-espionage at Bordeaux, was sentenced on June 17, 1953, to 10 years' imprisonment for ordering the execution of members of the Resistance Movement.

The Marseilles War Crimes Trials. General Bittrich, former commander of the *Hohenstaufen* Division, who was charged with responsibility for the execution of 17 members of the Resistance movement at Nîmes but denied his guilt, was sentenced by the military tribunal at Marseilles on June 23, 1953, to five years' detention after witnesses had confirmed that the execution order had been given not by him but by his Chief of Staff. One of his officers, Lieutenant Gutmann, was sentenced to 20 years' hard labour for his participation in the executions, whilst five former Gestapo agents were sentenced on Dec. 3, 1953, to life imprisonment, four others being condemned to death *in absentia*.

Major Muehler and Lieutenant Schoerer, the heads of the Gestapo at Marseilles during the occupation, were sentenced to death on Jan. 31, 1954, on charges of ordering the execution of hostages. The *Cour de Cassation*, however, quashed the sentences on July 28, 1954, and ordered a new trial, on the ground that the men should have been tried as members of a police corps and not as Army officers, and that the composition of the military tribunal had therefore been wrong.

The Korf Case. A former Gestapo agent, Wilhelm Korf, was sentenced to death by the military tribunal in Paris on Dec. 9, 1953, for murder, complicity in murder, torture of prisoners, and robbery committed in the Melun district during the occupation. The most serious charge related to the shooting of five monks, suspected of collaboration with the Resistance Movement, at the monastery of La Brosse-Monceaux in 1944, which was described by three monks who had witnessed the murder

The Renouf Case. A Frenchwoman, Madeleine Renouf, was sentenced by a military court at Metz on Dec. 19, 1953 to 10 years' imprisonment for intelligence with the enemy. Evidence was given that she had acted as a Gestapo agent during the occupation, had won the confidence of a member of the Resistance Movement who had subsequently revealed the names of members of his group under torture, and after the liberation had denounced to the French police the former collaborators whom she had known

The Grenoble Gestapo Trial. Paul Heimann, Gestapo chief at Grenoble during the German occupation, and two of his assistants were sentenced to death by the military tribunal in Lyons on Nov. 25, 1954, on charges of responsibility for the unlawful arrest, deportation, and murder of French citizens Specifically, he was found guilty of having ordered the arrest of 600 French people during an Armistice Day ceremony on Nov 11, 1943, of whom 395 were subsequently deported Two other Gestapo agents in Heimann's office were sentenced to nine and eight years' hard labour respectively.

The Ernst Case. Dr Robert Ernst, Mayor of Strasbourg during the German occupation, who had been acquitted by a Strasbourg court in 1947 on a charge of treason against France, was released on Jan 16, 1954. This followed decisions by the appeal courts at Colmar and Nancy which rejected the prosecution's appeal against Ernst's acquittal and confirmed that Ernst, born in Strasbourg at a time when Alsace belonged to the German Empire, was to be regarded as a German national because of his emigration to Germany in 1918 on the return of Alsace-Lorraine to French rule, and his subsequent service in the German Army Ernst was, however, rearrested on the day of his release when he tried to cross the frontier. His case was considered by M. Laniel (then Prime Minister) and other members of the French Cabinet, and on Jan. 21, 1954, it was announced that he would be tried as a war criminal on charges of provoking Frenchmen to treason, complicity in the enrolment of Frenchmen in the German Army, offences against the liberty of citizens, sequestration of French property, and looting The French Government's decision evoked strong criticism in the West German Press, and a Note of protest calling for Dr Ernst's release was submitted on Jan. 21, 1954, by the Federal Chancellor, Dr. Adenauer.

The new trial of Dr. Ernst—delayed by his appeal to the *Cour de Cassation*, against the decision to try him again—opened before the military court at Metz on Jan. 10, 1955. On Jan 13 Ernst was found guilty of inciting Frenchmen to treason, encouraging Frenchmen to join the German Army, and sharing responsibility for the deportation of several residents of Strasbourg to Germany, but was acquitted of complicity in the enrolment of Frenchmen in the German Army; the charge of looting had earlier been dropped by the prosecution. The court sentenced Ernst to eight years' imprisonment, confiscation of his property, and 20 years' banishment from French territory. As Ernst had been under detention since 1945, however, he was held to have served his sentence, and was released on the same day and conducted to the Franco-German frontier.

Charles Develle, a former member of the Vichy militia, was sentenced to life imprisonment by a military court at Lyons on Feb. 24, 1953, for the murder of M. Jean Zay, a former Minister of Education, who was shot near Riom by a party of the militia on June 20, 1944. Three of Develle's accomplices were tried *in absentia*, two being sentenced to death and one to 10 years' imprisonment.—(Le Monde, Paris - Le Figaro, Paris) (Prev. rep. War Crimes Trials, 10175 D ; Oradour, 10053 C.)

A. UNITED KINGDOM. — Fiduciary Issue Changes.

The following changes were made in the fiduciary issue during 1954 :

Jan. 27, £1,575,000,000 ; March 17, £1,625,000,000 ; June 2, £1,675,000,000 , July 13, £1,725,000,000 ; July 28, £1,750,000,000 ; Aug. 18, £1,700,000,000 ; Sept. 1, £1,675,000,000 , Dec. 2, £1,725,000,000 ; Dec. 15, £1,775,000,000.

On Jan. 20, 1955, the fiduciary issue was reduced again to £1,725,000,000.—(Economist) (Prev. rep. 13431 C.)

A. INDIA. — 60th Session of Indian National Congress. - Resolutions on Economic Policy and International Affairs. - Recognition of "Socialistic Pattern of Society" as Party's Aim. - New Working Committee.

The 60th session of the Indian National Congress met at Avadi (Madras) from Jan. 21-23, the proceedings being summarized below.

Resolution on Socialism. The session adopted a resolution on economic objectives which stated that "planning should take place with a view to the establishment of a Socialistic pattern of society in which the principal means of production are under social ownership or control, production is progressively speeded up, and there is equitable distribution of the national wealth"

Submitting this resolution on Jan. 19 to the All-India Congress Committee [which met before the Avadi session] Dr Kalam Azad (the Minister of Education) emphasized that the phrase "Socialistic pattern of society" rather than "Socialism" had been deliberately used in order to make it clear that no change in the party's constitution was intended, and that it was not being bound to any dogma or doctrine. The important thing was that distribution of wealth should be on an equitable basis, and whether this was achieved through nationalization or not was another matter The private sector of the national economy would have its full place in achieving the Socialistic pattern of society, and would receive Government help in increasing production, although prices and profits would be subjected to some control. Nationalization was bound to retard production, as the State personnel who might take over existing industries would not have the experience of their present owners; it would, therefore, be better to use the money that would otherwise go in payment of compensation to nationalized private industries for the establishment of new State enterprises in key industries.

During the ensuing debate the motion was criticized by some members of the Committee as a departure from the principles laid down by the late Mahatma Gandhi, and by others, on the ground that no time-limit was given for the fulfilment of the objective specified in the resolution. It was, however, finally approved by an overwhelming majority.

Economic Policy. A resolution on economic policy, which was also adopted, expressed satisfaction at the improvement in India's economic situation, and particularly in the food situation. It declared: "The time has come for a substantial advance on the economic and social plane with the definite objective of increasing production greatly, raising standards of living, and having progressively fuller employment, so as to lead to full employment within a period of 10 years. The national aim is a Welfare State and a Socialist economy This can only be achieved by a considerable increase in national income and a much greater volume of goods and services and employment. Economic policy must therefore aim at plenty and at equitable distribution The second Five-Year Plan must keep these objectives in view, and should be based on the physical needs of the people, which should be mainly provided for by production within the country. This necessitates the building-up of heavy industry as well as a wide extension of small-scale and cottage industries."

The resolution went on to say that the State would necessarily "play a vital part in planning and development," and, in particular, would "(1) initiate and operate large-scale schemes providing services such as power, transport, etc , (2) have overall control of resources, social purposes and trends, and essential balances in economy , (3) check and prevent evils of anarchic industrial development by the maintenance of strategic controls, prevention of private trusts and cartels, and maintenance of standards of labour and production ; (4) plan the economy of the nation in its basic and broad aspects." Although the public sector of the national economy must play a progressively greater part, particularly in the establishment of basic industries, the private sector and voluntary enterprises—such as co-operatives and small-scale industries—would continue to "have a definite place in our economy at present," provided that they functioned in terms of the national plan

Moving the resolution in the A.I.C.C , Mr. Nehru said : "We have to keep always before us a picture of the Socialistic pattern of society we want to build. What does not hinder us in building it up should be left to flourish . . We therefore propose to control only obstacles created by the private sector in the way of attaining a Socialistic pattern. But even here we want to remove these obstacles slowly." In India, he declared, Socialism would have to be achieved by peaceful methods, and it would be "foolish" for the Indian people to go through the "class war" troubles experienced in Europe. The pattern they had in view must conform to Indian conditions and have its roots in India's soil, and could not be a mere imitation of Socialism as practised in any other country In this connexion he compared the position with that in China, where, although the Government was composed of Marxists, they were interpreting Marxism very differently from the Russians and still retained plenty of private enterprise.

Foreign Policy. A resolution on international affairs (also adopted by the Congress) welcomed recent developments which had contributed to some lessening of international tension, notably the Geneva Agreements, and expressed the hope that the future of Indo-China would be decided by its peoples without outside interference or pressure, and that steps would be taken to continue negotiations for a peaceful settlement of the Korean question. It deplored the establishment of SEATO on the grounds that it had "added to the insecurity of that region and extended the area of cold war", warmly welcomed the "five principles" or *Panch Sila* set out in the joint statements issued by India, China, Burma, and Yugoslavia (see 14038 A, 13361 A), and expressed the opinion that "these principles must basically govern international relations and establish peaceful co-existence, which is imperative in the circumstances of today for the survival of civilization." The resolution regretted the continued exclusion of the Chinese People's Republic from the U.N. as retarding "the progress of peace and stability in Asia and the world," and expressed the hope that during 1955 "China will take her rightful place in the United Nations" After welcoming the proposal for an Asian-African conference, the resolution concluded by calling for the total prohibition of the manufacture and use of atomic, hydrogen, and other weapons of mass destruction, the cessation of experiments in their use, and immediate consideration of the matter by the U N Disarmament Commission.

Foreign Settlements. A resolution on foreign settlements in India expressed gratification at the *de facto* transfer of the French Settlements, and welcomed "the assurance given that French culture will continue to be preserved in Pondicherry, and thus add to the richness of India's life and culture." "The Congress is confident," the resolution added, "that the Portuguese Settlements in India will also join the Indian Union before long, and thus satisfy the aspirations of the people of India"

Party Organization. Two resolutions on party discipline were adopted. The first of these expressed serious concern at tendencies within the party's organization which were "symbolic of a general deterioration in social and moral standards," and directed the Working Committee to "take firm and adequate measures to see that organizational purity is maintained, discipline observed, and any attempt at group or individual aggrandizement effectively checked" The other called on all Congress members to take an active part in constructive activities, such as the Land Gift movement, the organization of co-operatives, and community projects.

Miscellaneous Resolutions. Other resolutions called for the abolition of the caste system and the repression of communalism ; the abolition of all social and legal disabilities affecting women ; the speedy implementation of the Government's proposals for land reform , and the extension of co-operative and other credit facilities in the villages.

The new Congress President, Mr. U. N. Dhebar, announced the membership of the new Working Committee on Jan. 22. This consisted of Mr. Nehru, Dr. Azad, Pandit Pant (the Home Minister), and Mr. Morarji Desai (Premier of Bombay), who, together with Mr. Dhebar, would form the Central Parliamentary Board , Mr. S. N. Agarwal and Mr. K. P. Madhavan Nair, the two general secretaries ; and Dr. B. C. Roy, Mr. S. Sinha, Mr. J. Ram, Mr. N. Chowdhry, Mr. G. S. Musafir, Mr. B. Mehta, Mr. A. V. Kukamalu, Mr. M. Ibrahim, Mr. K. Nadar, Mr. M. M. Chowdhry, Mr. Adityendra, and Mr. T. R. Deogirikar. The last five members had not previously served on the Congress Working Committee.

It was announced on Sept 25 that the "primary" membership of the Congress Party had fallen from 8,800,000 in 1952 to 6,100,000 in 1953, and that the party's "active" membership had fallen during the same period from 300,000 to 71,000.
(The Hindu, Madras - The Statesman, Calcutta - Indian High Commissioner's Office, London) **(Prev. rep. 13916 A.)**

B. UNITED KINGDOM. — Bank of England. - New Directors and Chief Cashier.

It was announced on Feb. 4 (*a*) that Lord Kindersley, Sir Charles Hambro and Mr. L. J. Cadbury had been reappointed to the Court of the Bank of England for four years from March 1, 1955 ; (*b*) that Mr. W. J. Keswick had been appointed for the same period in succession to Sir Patrick Ashley Cooper (whose term of office expires on Feb. 28) ; (*c*) that Lord Braintree was resigning with effect from Feb. 28, and that Sir Harry Pilkington had been appointed for the remainder of Lord Braintree's term, until Feb. 29, 1956.

Mr. Keswick (51) is chairman of Matheson and Co., governor of the Hudson's Bay Company, and a director of a number of other companies. Sir Harry Pilkington (49), is chairman of Pilkington Brothers (the glass manufacturers) and has been president of the Federation of British Industries since 1953.

Mr. L. K. O'Brien (46) was appointed chief cashier of the Bank of England on Dec. 10 in succession to Mr. Beale, whose appointment as general manager of the new Industrial Credit and Investment Corporation of India had been announced on Dec. 5 (see 13974 A).—(Financial Times) **(Prev. rep. 13551 B.)**

C. COLOMBIA - PERU. — Resumption of Normal Diplomatic Relations.

Normal diplomatic relations between Colombia and Peru were re-established on Feb. 4 following the settlement of the five-year-old dispute between the two countries over Señor Haya de la Torre, the Peruvian political leader who had been granted asylum in the Colombian Embassy at Lima in 1949, and who had been allowed to leave for Mexico in April 1954.

FEBRUARY 12—19, 1955

A. UNITED KINGDOM.—Atomic Power for Industry. - Launching of Ten-year Plan. - Construction of 12 Atomic Power Stations at Cost of £300,000,000.

A White Paper (Cmd. 9389) outlining the Government's plans for atomic power developments over the next ten years, and potential plans for the succeeding ten years, was published on Feb. 15 under the title *A Programme of Nuclear Power*. Its main points were as follows:

(1) £300,000,000 would be spent over the next ten years on the building of 12 nuclear power stations, capable by 1965 of generating between 1,500 and 2,000 megawatts of electricity—the equivalent of between 8 and 11 per cent of the present output capacity of the British Electricity Authority. When the whole programme was completed, the 12 stations were expected to save five to six million tons of coal a year. It was estimated that the cost of generating electricity from the first commercial nuclear power stations would be about 0.6d. per unit.

(2) Work on the first two stations would start in 1957 and be completed in 1960-61. The next two stations, which would be of an improved type, were expected to be in operation by 1963.

(3) Eight more stations, which would be of a still more efficient design, and each of which would have a capacity of 150-200 megawatts, would come into operation by 1965.

The White Paper is summarized below under cross-headings.

Preliminary Considerations.

"An important stage has been reached in the development of nuclear energy for peaceful purposes," said the White Paper "Hitherto work in this country has consisted of a military programme, a broadly based research and development programme, and the production and use of radio-isotopes The military programme continues to be of great importance but the peaceful applications of nuclear energy now demand attention . . Our future as an industrial country depends both on the ability of our scientists to discover the secrets of nature and on our speed in applying the new techniques that science places within our grasp. The exact lines of future development in nuclear energy are uncertain, but this must not deter us from pressing on with its practical application wherever it appears promising . . The application that now appears practicable on a commercial scale is the use of nuclear fission as a source of heat to drive electric generating plant. This comes at a time when the country's great and growing demand for energy, and especially electric power, is placing an increasing strain on our supplies of coal and makes the search for supplementary sources of energy a matter of urgency. Technical developments in nuclear energy are taking place so fast that no firm long-term programme can yet be drawn up But if progress is to be made, some indication must be given of the probable lines of development so that the necessary preparations can be made in good time . . H.M. Government have therefore prepared a provisional programme of nuclear power which covers the next ten years in some detail and gives an indication of the probable developments in the following ten years. It will be constantly modified as time goes on, and at each stage final decisions will not be taken until the last possible moment so that new technical developments can be used to the fullest advantage."

Probable Lines of Development of Nuclear Power.

After pointing out that the experimental nuclear power station under construction at Calder Hall (Cumberland) was "the first attempt in the U.K. to produce electricity from nuclear energy on a large scale," the White Paper continued: "Future developments, so far as they can now be foreseen, are likely to be directed at two main objectives: using the main nuclear material, uranium, more efficiently; and reducing the capital cost per kilowatt of a nuclear power station, in terms both of the construction of the reactor and of its initial charge.

"During the next ten years two types of reactor are likely to be brought into use on a commercial scale. The first type will be similar to those now being constructed at Calder Hall, but improvements in design during the period should enable the later models to show a great advance in efficiency compared with the earlier ones. They will be gas-cooled graphite-moderated 'thermal' reactors using as fuel natural uranium or slightly 'enriched' uranium, i.e fuel having a slightly higher fissile content than natural uranium. The first improved models could be designed and built so as to come into operation in about six years' time. These first reactors will burn only a very small proportion of the natural uranium placed in them, but they will produce, in addition to heat, the element plutonium, which does not occur in nature. This plutonium, which can be extracted chemically from the used fuel, is potentially very valuable: it is a pure fissile material, whereas natural uranium contains only one part in 140 of fissile material.

"The second type of reactor that may be built for commercial operating during the next ten years is a liquid-cooled 'thermal' reactor. This type requires more complicated techniques which at present would result in higher costs. But with further development liquid-cooled reactors should be able to give a much higher heat rating than the first gas-cooled reactors for the same capital costs. [The heat rating of a reactor is the rate of production of heat from each ton of fuel in the reactor. They might therefore eventually prove more economic than the gas-cooled reactors . . . The first commercial liquid-cooled reactors might be built during the latter part of the next ten years and begin operating about 1965

"Development after 1965 may take various forms thorium may be used, at first in conjunction with plutonium, as an alternative fuel. 'homogeneous' and 'fast breeder' reactors may be developed. It has already been decided to build a full-scale experimental model of a 'fast breeder' reactor capable of producing power at Dounreay, Caithness [see 13467 A]."

Probable Cost of Nuclear Power.

This subject was discussed under the headings of Capital and Overhead Costs, Fuel Costs, and The Cost of Electricity and the Credit for the Plutonium By-product, as summarized below

Capital and Overhead Costs. "A reasonably accurate estimate of the constructional costs of the first commercial stations can be made. A station of the same type, but designed to produce fissile material for military purposes as well as electricity, is already being built at Calder Hall at a cost of £15-£20 million. Even the first commercial reactors of the Calder Hall type can be expected to show a higher heat rating than those now under construction so that the capital cost per kilowatt will be lower A new station might have an electrical output of 100-150 megawatts or even 200 megawatts. We have no experience on which to base an estimate of the working life of a reactor in a commercial station, but a life of 10 - 20 years seems to be a reasonable technical assumption As nuclear stations will have a higher capital cost and a lower running cost than other stations they will be run as base-load stations at a higher load factor, perhaps 80 per cent [The load factor of a station is the ratio of the average load to the peak load carried by the station in each year. The stations having the lowest running costs are operated on the 'base load' (i.e., they are used to supply the demand that is present the whole time) and therefore have a high load factor.] On these assumptions a rough figure for the annual overhead cost for each unit of output can be calculated . . Developments in reactor design such as the introduction of liquid cooling should gradually lead to much higher heat ratings without much increase in capital cost. This would reduce still further the capital cost per kilowatt and thus reduce the overheads"

Fuel Costs. "The fuel cost depends on three things the cost of the raw material, uranium; the processing cost; and the level of irradiation,' i.e., the amount of heat that can be got from each ton of fuel in the reactor before it has to be taken out. H.M. Government consider that enough uranium will be available for the civil programme over the next ten years, after making the best assessment possible of world supplies and of world requirements for all purposes. The cost of the initial charge of fabricated uranium for one of the early types of station similar to Calder Hall may amount to about £5,000,000; a new charge costing the same will be needed every 3-5 years The cost of processing uranium . . . is known from the processes now being worked at the Springfields and Windscale factories for the military programme. In the early stages of a power programme the processing costs will be similar, but big reductions can be expected later when new factories are built. It is expected that it will be possible to extract as much as 3,000 megawatt-days of heat from every ton of fuel. This is the equivalent of the heat from 10,000 tons of coal. There is as yet no practical experience of this level of irradiation at high temperatures, and the metallurgical behaviour of the fuel elements is uncertain. But there are many lines of development which should overcome such metallurgical defects as may appear."

The Cost of Electricity and the Credit for the Plutonium By-product. "Some credit should be allowed for the fissile by-product plutonium. It is in many ways equivalent to Uranium-235, another form of fissile material. But plutonium can be extracted by chemical means from a power reactor's used fuel for only a fraction of the cost of separating Uranium-235 from natural uranium in a diffusion plant. When concentrated fissile material is available in quantity, there will be great scope for the design and development of more advanced and more efficient reactors that need 'enriched' material and will not operate on natural uranium. Looking further ahead, concentrated fissile material in the form of either Uranium-235 or plutonium is required for a 'fast breeder' reactor or for starting a thorium system. In this manner the early reactors will be producing not only electricity but also the capital equipment (i.e. the initial charge of fissile material) for future power stations. Without the plutonium it would not be possible to build up a system of nuclear power stations of steadily advancing efficiency.

"In the early stages of an expanding nuclear power programme it is to be expected that concentrated fissile material will be scarce and that if there were a free market its price would be high. It will be required for enriching the fuel charge in new commercial reactors, and also for many experimental and development purposes, including the fuelling of prototypes of advanced design. Eventually the system will reach the stage where more plutonium is produced than the new power stations require, its 'market' price will then fall and it might be used as a substitute for natural uranium rather than as concentrated fissile material. This is unlikely to happen for 15 or 20 years.

"It is not obvious what is the right value to put on the plutonium produced, although the effect on the net cost of electricity could be considerable . . . Limits can be set to the value of the plutonium by considering the uses to which it might be put. At worst it could be fed back into a reactor as fuel in place of natural uranium; and since natural uranium contains only one part in 140 of fissile material, plutonium should be worth at least 140 times as much, weight for

weight. At best plutonium is not likely to be worth more than the cost of Uranium-235 separated from natural uranium in a diffusion plant. There is a wide range between these limits, but both values can be measured in terms of thousands of pounds sterling for a kilogram of plutonium In the early period it is thought right to allow for the plutonium at a rate of many thousands of pounds a kilogram, the value should eventually fall but would have a significant effect on the cost of generating electricity.

"On the assumptions set out above, and taking what appears to be a reasonable value for the plutonium, the cost of electricity from the first commercial nuclear stations comes to about 0 6d a unit. This is about the same as the probable future cost of electricity generated by new coal-fired power stations"

A Provisional Programme.

After pointing out that "the programme outlined below is provisional and must be considered only as the best indication that can now be given of the probable line of development," and that "types of stations, numbers, and dates are all subject to change" the White Paper continued:

"The [nuclear power] stations will be built in the normal way by private industry for the Electricity Authorities, who will own and operate them [These are at present the British Electricity Authority, the North of Scotland Hydro-Electric Board, and the Northern Ireland Electricity Board. On April 1, 1955, the South of Scotland Electricity Board will come into existence and the Central Electricity Authority will replace the British Electricity Authority—see 14016 C.] The Atomic Energy Authority will be responsible for giving technical advice on the nuclear plant. British industry and consulting engineers have as yet no comprehensive experience of nuclear technology They will be faced with a major task in training staff, in creating the necessary organization and in designing the stations. This work has already begun. Owing to its complexity and diversity, teams drawn from several firms may have to be formed The preparatory work will call for great efforts from all concerned, and even so it will not be practicable to start building any commercial stations before 1957.

"It is intended that the Electricity Authorities and private industry should obtain as quickly as possible the practical experience in designing and building nuclear power stations that will be the necessary foundation for a big expansion in the later stages of the programme The Atomic Energy Authority, while giving as much assistance and advice to industry as possible, will remain primarily a research and development organization and will continue to design, build and operate pioneering types of power reactor. They will also be responsible for buying uranium, fabricating the fuel elements, processing the used fuel, and extracting the plutonium from it There will therefore have to be a continuous process of co-operation and of financial adjustment between the Electricity and Atomic Energy Authorities."

Nuclear Power Stations. "The provisional programme for the construction of nuclear power stations is as follows:

(1) The construction of two gas-cooled graphite-moderated stations (each with two reactors) would be started about mid-1957. These stations should come into operation in 1960-1961.

(2) The construction of two further stations would be started about 18 months later, i.e in 1958-1959. These would also have two reactors each and would be similar in type to the earlier two stations, but should show an improved performance, particularly in heat rating. Each of the eight reactors in these early stations would have a net output of electricity of 50 to 100 megawatts, so that the total output from the four stations, which should all be in operation by 1963, would be somewhere between 400 and 800 megawatts.

(3) The construction of four more stations might perhaps start in 1960, and then a further four 18 months later, say in 1961-1962. These might come into operation in 1963-1964 and in 1965. It is difficult to specify what type of station these would be, but it is probable that each station would consist of only one reactor, which would be much more highly rated than the reactors in the first four stations. The stations begun in 1960 might be developments of the gas-cooled graphite-moderated type The last four stations might be of the liquid-cooled type, which might by then have been developed sufficiently to be economically satisfactory. The total installed capacity of the eight stations in this group should be well over 1,000 megawatts.

"The ten-year programme would provide a capacity of about 1,500 to 2,000 megawatts. By the end of the ten years this country would probably be needing new generating capacity at the rate of over 2,000 megawatts a year, and the new nuclear stations coming into operation each year would be meeting something like a quarter of this. On the assumption that nuclear stations would be used as base-load stations, they would by 1965 be producing electricity at a rate equivalent to that produced by about five to six million tons of coal a year Assuming that the programme continued to expand rapidly, this contribution towards the country's energy needs should also rise rapidly thereafter."

Cost of the Programme. "The capital expenditure on the . . . programme will be considerable. The cost of the first two stations together would probably be between £30 million and £35 million The next two stations . . . would cost perhaps slightly more, while the cost of the last eight stations would be in the region of £125 million in total. The cost of the initial charges of uranium, including fabrication, might amount to a further £40 million. The new ancillary plant that would be required within the 10-year period might cost £30 million. The concurrent capital expenditure on prototype development might be £30 million to £40 million The cost of the ten-year programme might therefore come to £300 million. The rate of expenditure on the commercial applications of nuclear power would rise steadily during the period and the total over the ten years would amount to more than the £300 million, since it would include expenditure on stations that would not be completed until after 1965 and do not appear in the present programme.

"This investment will not be a wholly additional demand on the economy The nuclear power stations will be built instead of other types of station The investment by the Electricity Authority in new coal or oil-fired generating capacity over the next ten years would, in the absence of nuclear power, probably be of the order of £1,200 million With a nuclear power programme there will be a significant reduction in this figure which can be set off against the investment in nuclear power. The National Coal Board should also be able to reduce its investment programme in some ten years time below what would have been necessary in the absence of nuclear power

"No accurate assessment can be made so far ahead of the amount of additional investment that the economy will be able to afford All that can be said is that, given a normal rate of growth of gross national product, and given that a reasonable proportion of the increase in resources is made available for an increase in investment, there would not appear to be any great difficulty in accommodating a nuclear power programme on the scale proposed. It is unlikely that the rate of expansion of investment in the fuel and power industries over the next ten years, even including this programme, will exceed the rate of the expansion in real terms that has taken place since 1948"

The Long-term Prospect. "On the provisional programme the new nuclear power stations would by 1965 be meeting a quarter of the total requirement of new generating capacity. How quickly it would be possible to expand the programme to match the whole of this requirement will depend upon the progress made in the first ten years . . . The possibilities of expansion will depend to a great extent on the speed with which the necessary techniques are mastered by industry at large. The Atomic Energy Authority will continue to make new information available and to provide training; with this help industry should acquire wide experience in carrying out a 10-year programme of the type that has been outlined, and this would make possible a much greater expansion after 1965 If all went well, it might be practicable by the early 1970s to expand the rate of construction of nuclear power stations to match our total requirement of new generating capacity, which by this time might amount to about 3,000 megawatts a year On this assumption the total nuclear power station capacity installed by 1975 would be of the order of 10,000-15,000 megawatts . . . The nuclear power stations would then be producing electricity at a rate equivalent to that produced by about 40 million tons of coal a year

"Another possible limitation on the rate of expansion in the later years is the supply of nuclear fuel, particularly the more highly enriched material that will be needed for some of the advanced types of reactor. By the late 1960s the early reactors should be producing plutonium in quantity, and this would be available for the later reactors. The provisional programme and the further expansion thereafter will also call for increased supplies of uranium, and no doubt other countries will be increasing their commercial demands at the same time. Recent evidence suggests that uranium is more plentiful than was once thought, considerable workable deposits of medium-grade ore are known, while the widespread evidence of low-grade ores implies that adequate quantities can be produced from them if necessary. Moreover the expansion in the requirement of uranium should be mitigated by the greater economy in its use that will by then have been achieved, and by the possible development of the substitute fuel thorium, which should be available in considerable quantities if it is required. For these reasons H.M. Government are confident that the necessary supplies of raw material will be available to meet the increases in demand."

Siting and Safety. "The history of the development of nuclear energy has made everyone aware of its destructive possibilities, and it would be natural to ask whether there were any special dangers associated with nuclear power installations The first important thing to recognize is that it is impossible for an 'atomic explosion' to take place in a power reactor . . . The main hazards in a nuclear power station are caused by the concentration of highly radioactive materials. But these are known dangers which can be guarded against, both by precautions in the design of the reactor itself and, if necessary, by enclosing some or all of it in a gas-tight container. The reactors that will be built for the commercial production of electricity will present no more danger to people living nearby than many existing industrial works that are sited within built-up areas. Nevertheless the first stations, even though they will be of inherently safe design, will not be in heavily built-up areas.

"The disposal of radioactive waste products should not present a major difficulty The problem is primarily one for the chemical processing plants and not for the power stations The volume of waste will be small, and great efforts are being made to determine the most economical methods of storing or disposing of it. There are many valuable uses for it which may be able to absorb a great part of the output Any material that is discharged will be tested to ensure that it is of extremely low radioactivity, so that it will be harmless and comparable in effect to the natural background radioactivity which is always present."

The Programme and the Government's Fuel Policy.

The White Paper went on to discuss how the development of nuclear energy would "fit in with the energy requirements of this country and with the supply of other fuels," with special reference to electricity and coal supplies.

Electricity. "... There is no sign that the demand for electricity is even beginning to approach saturation point either in this country or anywhere else ... The demand in the U.K. is likely to be some 3½ times the present level in 20 years' time. To meet this growth in demand ... it is estimated that the installed generating capacity, which averaged 20,000 megawatts in 1954 will have to be increased to 35,000-40,000 megawatts by 1965 and to perhaps 55,000-60,000 megawatts by 1975. If the provisional programme suggested above were completed—in practice it is certain to be modified one way or the other—it would provide 1,500 to 2,000 megawatts of nuclear power by 1965 and somewhere between 10,000 and 15,000 megawatts by 1975. The nuclear power stations would be operated on base load and would supply a higher proportion of the total power than the ratio of these figures would suggest."

Coal Supplies. "Without nuclear power the rate of consumption of coal (or its equivalent as oil) by the power stations alone would increase on the assumption in the last paragraph by perhaps 2½ times over the next 20 years, reaching about 65 million tons a year by 1965 and 100 million tons a year in the 1970s ... On the basis of the provisional programme of nuclear power, the coal required by power stations would level off in the region of 60 to 70 million tons a year during the 1960s. This levelling-off ... would come none too soon to help with the difficulties of finding manpower for the mines and of producing at reasonable cost enough coal for the other users of solid fuel, whose demand would have been steadily rising meanwhile.

"Since the war the production of coal from deep mines has increased from 175 million tons in 1945 to 214 million tons in 1954. But the demands of our expanding home industries have been rising even faster. We have had to supplement output from the deep mines by opencast coalmining and by importing coal; even so, supplies for the householder are still restricted and there is not enough for exports. The National Coal Board have in hand a large programme of capital investment, but a great part of this will be needed to maintain the output of the mines at the present level. Greater efficiency in the use of coal, and the substitution of oil for coal in certain processes, including electricity generation, will give some limited relief but the increasing demand for fuel cannot be met without exploiting to the full any new and economic technique available. The provision of enough men for the mines is one of our most intractable problems, and is likely to remain so ... Any relief that can come from other sources of energy, such as nuclear power, will do no more than ease the problem of finding and maintaining an adequate labour force. There can be no question of its creating redundancy. The mining industry will in any case remain one of the major employing industries of the country, but it may hope to be relieved by the advent of nuclear power of the excessive strains which are now being put upon it."

Conclusion.

The White Paper concluded as follows: "Our civilization is based on power. Improved living standards, both in advanced industrial countries like our own and in the vast under-developed countries overseas, can only come about through the increased use of power ... Whatever the immediate uncertainties, nuclear energy will in time be capable of producing power economically. Moreover, it provides a source of energy potentially much greater than any that exist now. The coming of nuclear power therefore marks the beginning of a new era ... It is a major industrial development that will bring with it revolutionary changes in technique.

"The programme described here is provisional and will be altered in many ways in the course of time. But it is hoped that it gives a clear enough picture of the probable scale, scope, and timing of developments to put nuclear power in its proper perspective and to show how it will fit in as one of the sources of energy that will be available to meet the rapidly growing needs of our expanding economy.

"The large-scale production of nuclear power cannot be brought about quickly. The first commercial, as opposed to experimental, stations will not be in operation for at least five years. But if proper preparations are made now, it will be possible for nuclear power to be produced commercially in significant quantities within ten years. The experience gained during these ten years should make possible a much more rapid expansion thereafter at home and abroad.

"New technical developments that cannot at present be foreseen may perhaps lead to a more rapid improvement in the performance of stations than has been assumed. If so, we should be in a good position to take advantage of such developments. On the other hand, the provisional programme may turn out to be too optimistic: the stations may take longer to design and to build; they may cost more; the amount of development work needed may have been under-estimated. If any of these things happened, nuclear power would come later or be more expensive than the programme suggests. H.M. Government consider that these risks must be accepted.

"This formidable task must be tackled with vigour and imagination. The stakes are high, but the final reward will be immeasurable. We must keep ourselves in the forefront of the development of nuclear power so that we can play our proper part in harnessing this new form of energy for the benefit of mankind."

The Government's nuclear power programme was announced in the House of Lords on the same day by Lord Salisbury (who, as Lord President of the Council, is the responsible Minister for the development of atomic energy) and in the House of Commons by Mr. Geoffrey Lloyd, the Minister of Fuel and Power. In a subsequent press statement, Mr. Lloyd said that it was "an historic day for Britain" and that the decision to construct the nuclear power stations was the most momentous ever made by any Minister of Fuel and Power. He added: "These decisions open up tremendous prospects; they offer the possibility of a new industrial revolution with a continuing increase in productivity and in the standards of living of our country. I know of no other nation that has yet launched a nuclear power programme on this scale." In his statement to the House, Mr. Lloyd had said that the programme was "fundamentally based on the brilliant work of Sir John Cockcroft and his research team at Harwell."

A. LIBYA - FRANCE. — Libyan Demand for Withdrawal of French Troops from Fezzan. - French Refusal. - Franco-Libyan Negotiations.

The Libyan Government informed the French authorities on Nov. 13, 1954, that it did not propose to renew a provisional agreement, concluded in December, 1951, and due to expire on Dec. 31, 1954, under which France had been permitted to maintain 400 troops and an air base in the Fezzan. This attitude was reaffirmed on Dec. 9 by the Libyan Prime Minister, M. Mustafa Ben Halim, who declared in the Libyan Parliament that his Government would "not tolerate the prolongation of the occupation of our territory by French troops."

In an interview on Dec. 14 with a correspondent of *Le Monde*, M. Ben Halim denied that his policy was in any way hostile to France, and stated that his Government had demanded the withdrawal of French troops from the Fezzan because "we are proud of our independence and wish to feel ourselves free." Asked why he objected to the presence of a small French force, although much larger British forces were stationed in Cyrenaica and the U.S.A. had been granted the use of an air base in Tripolitania, he said that the military alliance with Britain was sufficient to protect the country, whilst the U.S.A. was financing the greater part of Libya's economic development. Libya did not therefore need a French alliance, but was prepared to conclude a treaty of friendship with France "on condition that the principle of military evacuation is recognized."

During a debate in the French National Assembly on Dec. 6, M. de Moustier (then State Secretary for Foreign Affairs) announced that France had informed the Libyan Government that she could not accept the Libyan demand for the evacuation of French troops and that she would not modify the existing situation until a permanent agreement had been concluded; he also said that the French Government had consulted Britain and the U.S.A. on the subject. The Assembly voted that the French financial contribution to Libya in 1955 should be reduced from 360,000,000 to 260,000,000 francs (£260,000), the latter sum representing the counterpart of the French bases in the Fezzan.

At the French Government's invitation, a Libyan delegation headed by M. Ben Halim arrived in Paris on Dec. 31 for discussions after it had paid a short visit to London for talks with Lord Reading, the British Minister of State for Foreign Affairs. The Paris negotiations, in which M. Mendès-France took part, concluded on Jan. 6, 1955, when the Quai d'Orsay issued a communiqué stating that "the two delegations have examined in a spirit of friendship and co-operation the problems arising from the negotiation of a treaty of friendship and good neighbourliness," and that the conversations would be continued in Libya. M. Ben Halim claimed on Jan. 9 that the talks had been "satisfactorily concluded" and that the French Government had agreed to withdraw its troops from the Fezzan; this, however, was not confirmed in Paris, although an official spokesman said that the French Government might consider a gradual withdrawal from the Fezzan "under certain indispensable guarantees and conditions."

Discussions were resumed in Benghazi on Jan. 28, the French delegation being led by M. Maillard, of the Quai d'Orsay.

A **COSTA RICA. — Invasion by Costa Rican Exiles from Nicaraguan Territory. - Fact-finding Mission appointed by Organization of American States. - U.S. Fighters sent to Costa Rican Government. - Repulse of Insurgent Forces. - Creation of Demilitarized Zone on Costa Rican-Nicaraguan Frontier.**

Costa Rica was invaded on Jan. 11 by a rebel force of Costa Rican exiles, reported to be several hundreds strong, who crossed the frontier from Nicaragua with the apparent intention of overthrowing Dr. Figueres, the President of Costa Rica, and seizing control of the country After an 11-day campaign, however, and after the intervention of the Organization of American States (O.A.S.), the insurgent force was driven back across the Nicaraguan frontier.

It was announced on Jan. 11 in San José (the Costa Rican capital) that "unknown forces" had crossed the frontier from Nicaragua, had made a deep penetration into Costa Rican territory, and had captured the town of Villa Quesada (30 miles north of San José and 50 miles south of the Nicaraguan border), as well as the small towns of Puerto Soley, Pena Blanca and La Cruz, in the north-western part of the country near the Nicaraguan border. Diplomatic relations were immediately broken off with Nicaragua, the Nicaraguan Chargé d'Affaires in San José was declared *persona non grata*, a state of emergency was proclaimed throughout Costa Rica, and President Figueres broadcast an appeal for volunteers to assist the Civil Guard in repelling the invasion, which he described as "an act of aggression which has been in preparation for several years."

Scattered attacks were made by insurgent aircraft on Jan. 12 against several Costa Rican towns, including a machine-gun attack on San José by a single plane. A Costa Rican communiqué said the attacks had been made by aircraft flying from the direction of Nicaragua, that two of the machines bore Venezuelan markings, and that the plane responsible for the attack on San José had subsequently been shot down by anti-aircraft fire near the town of Liberia, in north-west Costa Rica. No casualties were reported in San José, and very few elsewhere.

The Council of the O.A.S. met in emergency session in Washington on Jan. 11 in response to an urgent appeal by the Costa Rican Government, which invoked the Treaty of Rio de Janeiro and demanded collective assistance from the other American Republics in helping to repel the aggression, as provided for under the Rio treaty. The Nicaraguan representative on the O.A.S. strongly denied Costa Rican allegations that his Government were aiding the insurgents, whilst the Venezuelan representative similarly denied that his country was in any way implicated in the dispute between Costa Rica and Nicaragua. It was decided, after discussion, to send a five-man fact-finding mission to Costa Rica to investigate the situation on the spot and to draw up a preliminary report.

The fact-finding mission, consisting of a U.S. representative (Mr. John Dreier) and the Brazilian, Mexican, Paraguayan and Ecuadorean Ambassadors in Washington, arrived in San José on Jan. 13 in a U.S. plane. It reported to the O A.S. on Jan. 14 (1) that foreign aircraft were flying illegally over Costa Rican territory and had attacked San José and other Costa Rican towns; (2) that there were "serious indications" that the insurgents were using arms supplied from foreign sources; and (3) that, up to Jan. 13, military operations had been taking place in north-western Costa Rica, near the Nicaraguan border. After expressing its conviction that "a substantial part" of the insurgents' war *matériel* had been "introduced across the northern frontier of Costa Rica's territory" [i.e. from Nicaragua], the fact-finding mission called upon the Council of the O.A.S. (*a*) to "send immediately a formal call to the Government of Nicaragua emphasizing the seriousness of the situation," and (*b*) to "contemplate at once the measures which, in accordance with the Treaty of Rio de Janeiro, should be applied if the circumstances demand."

The Council of the O.A.S., meeting the same evening (Jan. 14), condemned the attack by foreign forces on Costa Rica, called upon Nicaragua to take steps to stop the flow of war *matériel* to the insurgents; requested the fact-finding mission to send observers to "any place which might be utilized for the transport of troops and military equipment towards Costa Rica"; and asked the Governments of all the American Republics to consider a place and date for a meeting of Foreign Ministers, if the circumstances demanded such action.

After a further all-night session on Jan. 15-16, the Council of the O.A.S. decided to call upon all the American Republics to give "prompt consideration" to a Costa Rican request for aircraft to enable her to defend herself against air attacks. [The request had been made after the O.A.S. had been officially informed of another insurgent air attack on the town of Liberia, and after the Costa Rican Government had pointed out that it possessed no air force to enable her to repel such attacks.] In conformity with the Council's decision, the U.S. Government announced on Jan. 16 that it would immediately supply Costa Rica with four P-51 fighters and a *Globemaster* transport plane, at a price which would be merely nominal. The planes were accordingly flown from Texas to San José on Jan. 17 by U.S. pilots, handed over to the Costa Rican Government, and manned by Costa Rican aviators. The supply of U.S. aircraft was hailed with great satisfaction in Costa Rica, and was regarded by the U S. Press as an historic decision inasmuch as it was the first occasion on which an American republic had received aid under the Rio treaty to enable it to repel external aggression.

The President of Nicaragua, General Anastasio Somoza, complained on Jan 17 that the provision of U S fighter aircraft for Costa Rica was "putting dangerous toys in the hands of a lunatic," and demanded that the U.S Government should sell similar machines to Nicaragua. In an earlier press statement on Jan. 12 in Managua (the Nicaraguan capital), President Somoza had declared that the Nicaraguan Government had nothing whatever to do with the invasion of Costa Rica, that there was no question of Nicaragua being used as a springboard to attack the regime of President Figueres, and that he would welcome an on-the-spot investigation by the O A S.

Military operations against the insurgents, which had been practically at a standstill during the visit of the fact-finding mission, were resumed on Jan. 18, when Costa Rican forces, supported by the fighter planes acquired from the U.S.A., advanced rapidly northwards along the Inter-American Highway after having liberated Villa Quesada. A Costa Rican communiqué of Jan. 21 announced that the insurgents had been driven from all the towns in the north-western part of the country which they had seized at the beginning of the invasion, that all resistance to the Government forces had ceased, and that the remaining insurgent forces were fleeing across the Nicaraguan frontier. It was claimed in San Jose that many prisoners had been taken and that Teodoro Picado—described as the insurgent leader, and the son of a former Costa Rican President—had been killed in action.

Both Costa Rica and Nicaragua accepted on Jan. 20 a plan, proposed by the O.A S., for a demilitarized zone on each side of their common frontier extending from the Pacific coast to Lake Nicaragua.

The plan, which went into immediate effect, laid down (1) that there would be a "buffer" zone three miles wide and 18 miles long on both sides of the frontier between Lake Nicaragua and the Pacific; (2) that neither side would send ground forces into this zone; (3) that Nicaraguan and Costa Rican military aircraft would not fly over the zone; (4) that the Nicaraguan Government would disarm and intern all insurgents crossing the frontier from Costa Rica; (5) that the O.A.S investigation commission would place patrols in the "buffer" zone to ensure that the provisions of the agreement were being observed. It was subsequently announced that 300 insurgents—the last rebel group on Costa Rican territory—had crossed into Nicaragua and had been interned

An article in the *New York Times* (issue of Jan. 12, 1955) gave a "background" description of the hostility between Nicaragua and Costa Rica, and in particular of the hostility between the Presidents of the two countries. The following extracts are taken from the article:

"Enmity between Costa Rica and Nicaragua is a result of animosity between the Presidents of these countries dating back to 1948. Communism, an issue of the Guatemalan revolt, is of no consequence in this situation Communists are barred in Nicaragua and the Communist Party in Costa Rica, though legal, is small and in strong disfavour with the Government . . .

The bad feeling between the countries began when José Figueres—now President of Costa Rica—antagonized General Somoza, President of Nicaragua, by leading a revolt in 1948 that deposed Teodoro Picado as President of Costa Rica Señor Picado was a friend of the Nicaraguan dictator . . . Until then Señor Figueres . had not been conspicuous in politics. Though he had led the revolt to success, he insisted that Señor Ulate take office [as President of Costa Rica]. However, in 1953 Señor Figueres was overwhelmingly elected President . . .

Thereafter relations between Costa Rica and Nicaragua deteriorated steadily. Last April Costa Rica accused Nicaragua of moving troops to their common border The Nicaraguan Government said it was taking precautions because of an attempt to assassinate President Somoza. In May Costa Rica was accused of plotting against the life of General Somoza . . On Nov. 27 President Figueres said . . . that a plot to invade Costa Rica simultaneously with a revolt had failed . . ."

Costa Rica (area 19,650 square miles, population 800,000) abolished its army in 1948 (see 9672 D), the country's defence being entrusted to a national police force known as the Civil Guard. Until the acquisition of the four fighter planes from the United States, Costa Rica also possessed no air force. Nicaragua (area 148,000 square miles, population 1,000,000) has a well-trained army of about 7,500 and one of the strongest air forces in Central America, particularly since the purchase of 25 fighter planes (P-51s) from Sweden in December, 1954.

(New York Times - New York Herald Tribune),

A. FRANCE. — Constitutional Reforms.

The Bill amending 11 Articles of the French Constitution of 1946, which had been passed by the National Assembly on first reading on July 23, 1953 (see 13147 A), was considered by the Assembly on second reading on Nov 29-30, 1954. It had previously been passed on March 18, 1954 (by 240 votes to 47) by the Council of the Republic, which had made a number of amendments.

The most important of these amendments were (*a*) a reversal of the Assembly's decision that in future a simple majority would be sufficient for the *vote d'investiture* for a new Prime Minister, instead of the absolute majority required under the 1946 Constitution, (*b*) a stipulation that a simple majority would be sufficient for a no-confidence vote or a vote of censure, contrary to the Assembly's wish to retain an absolute majority for such votes, (*c*) certain changes in the *navette* "shuttle") system provided for in the case of disagreement between the two Chambers on pending legislation (see 13147 A); and (*d*) a demand that the "procedure of urgency" for a Bill should not be invoked by the Assembly without the prior agreement of the Council of the Republic in the case of legislation involving ratification of an international treaty

During the second reading debate the Assembly accepted many of the amendments proposed by the Council of the Republic, but insisted on its original version in the case of several important points. The provisions as finally adopted were as follows:

(1) A state of siege could be declared "under conditions laid down by law" (Art. 7).

This version had been proposed by the Council of the Republic and was accepted by the Assembly, which had originally detached from the Bill for further consideration the clause relating to the imposition of a state of siege.

(2) The Assembly would meet on the first Tuesday in October and, after sitting for at least seven months (excluding adjournments lasting more than eight full days), might be adjourned by the Prime Minister through a Government decree (Art. 9).

The only change made by the Council of the Republic in the Assembly's original text was the stipulation that only adjournments exceeding eight "full" days would count as interruptions of the session. The Assembly accepted this on second reading.

(3) Each Chamber would elect its *bureau* at the beginning of the session "according to the conditions provided for by its rules" (Art. 11).

The Assembly's original version had stipulated that these elections should be by majority vote, but on second reading the Assembly accepted the version recommended by the Council of the Republic.

(4) If the Assembly was not in ordinary session its *bureau* could convoke an extraordinary meeting of Parliament, whilst the President of the Assembly would be required to summon such a meeting if requested by the Prime Minister or by at least half the deputies. An extraordinary session could be closed by the Prime Minister on the same conditions as laid down in Art. 9, but not until Parliament had dealt with the matters for which it had been specially convened (Art. 12).

The Council of the Republic had proposed a number of amendments (all of which were rejected by the Assembly) providing, *inter alia*, that only the National Assembly could be convened in emergency session.

(5) Legislation (except Bills for the ratification of treaties or on budgetary and other financial matters, which would always be initiated by the National Assembly) might be initiated by the Assembly or the Council of the Republic, and would be passed on to the other Chamber for consideration after its adoption (Art. 14).

The Council of the Republic had proposed that those provisions of the Constitution dealing with the consultation of the Assembly of the French Union and of the Economic Council should also be applicable to Bills examined in the first instance by the Council of the Republic. This, however, was rejected by the National Assembly as unnecessary.

(6) Every Bill would be examined in turn by the two Chambers with a view to the adoption of an identical text. A Bill first introduced in the National Assembly would be voted upon by the Council of the Republic within two months of its adoption by the Assembly, and would then pass backwards and forwards between the two Chambers (the "*navette*" procedure) until agreement was reached. After the second reading in the Council of the Republic each Chamber would be allowed the same period as had been taken up by the other during its preceding consideration, with a minimum of seven days. If, however, there was no agreement within 100 days from the date when the Bill had been remitted to the Council of the Republic for a second reading, the Assembly would have the final say by adopting its previous version, either with or without any of the Council's amendments.

Special provisions were laid down for (*a*) Budget and financial legislation, for which the period allowed for agreement between the two Houses would in no case exceed the time previously spent by the National Assembly on the legislation in question; (*b*) all matters to which the Assembly had given priority (*procédure d'urgence*), in which case the period allowed for the Council of the Republic's consideration would be double the time allowed for the Assembly's deliberations. The time-limit of 100 days was reduced in the case of Budget and financial legislation to one month, and in the case of matters declared by the Assembly to be urgent to 15 days.

If the Assembly exceeded the time-limits laid down for it, the maximum period for final agreement between the two Houses would be extended accordingly. However, any periods during which parliamentary sessions were suspended would not count in the allotted time-limits, which, moreover, could be extended by decision of the Assembly (Art. 20).

This amendment proved to be the most controversial of all those under consideration. Originally, the Assembly's Universal Suffrage Commission had rejected the clause inserted by the Council of the Republic that any delay on the part of the Assembly beyond the period of time laid down for its deliberations would automatically extend the period allowed for agreement between the two Chambers. Following a lengthy debate, M. Mendès-France appealed to the Assembly to make this small concession to the Council of the Republic, and it was only after the Prime Minister's intervention that an amendment maintaining the Council's version was passed by 307 votes to 305. The Article as a whole was then passed by 315 votes to 208.

(7) No Deputy or Senator could be prosecuted or arrested while Parliament was in session without the permission of the Chamber of which he was a member, unless arrested in the act of breaking the law. Between sessions no member of Parliament could be arrested without the permission of the Chamber to which he belonged, unless he was arrested in the act of breaking the law, or his prosecution had been authorized, or a final sentence was being executed. A Deputy or Senator arrested between sessions could vote by proxy when Parliament met again until the Chamber had agreed to the suspension of his parliamentary immunity; if his immunity had not been lifted within 30 days of the opening of the session, he would automatically be released (Art. 22).

The Council of the Republic had deleted the proxy vote for arrested Deputies or Senators, but the Assembly reinserted its original text. On the other hand, it accepted the Council's proposals concerning the arrest of members between sessions

(8) The Prime Minister-designate would choose the members of his Cabinet before presenting his programme and policy to the Assembly, and would take office if he received a simple majority of members present and voting on a *vote d'investiture* (Art. 45). Hitherto a Prime Minister-designate was required to obtain an absolute majority of the Assembly's membership (i.e. at least 314 votes out of 627) on a *vote d'investiture*.

As stated above, the Council of the Republic had proposed that the requirement of an absolute majority of the Assembly's membership, as laid down in the 1946 Constitution, should remain unaltered. The National Assembly, however, rejected an M.R.P. amendment supporting the Council's version by 412 votes to 201, and restored its original proposal for the simple-majority procedure

(9) A motion of confidence could be voted upon 24 hours after it had been moved, instead of after an interval of 48 hours as hitherto required under the Constitution. The rejection of a confidence motion would still require an absolute majority of the Assembly's membership (Art. 49).

The Assembly rejected (by 500 votes to 117) the Council of the Republic's proposal that a simple majority should be sufficient for the rejection of a confidence motion, and reinserted its original text.

(10) Voting on a motion of censure would take place under the same conditions as on a motion of confidence (Art. 50).

In this case the Assembly similarly insisted on its previously adopted text, and rejected the Council of the Republic's proposal for a simple majority

(11) In the event of a dissolution of Parliament, the Cabinet would continue in office unless the dissolution was preceded by the adoption of a motion of censure. In the latter eventuality the President of the Republic would nominate the President of the Assembly as Prime Minister and Minister of the Interior, the other Ministers remaining in office (Art. 52).

Although the Council of the Republic had rejected the Assembly's text concerning the nomination of the President of the Assembly as Prime Minister and Minister of the Interior if a censure motion was adopted, the Assembly insisted that its original text should remain unaltered.

After adopting a clause which provided that the provisions of Article 9 concerning the sessions of the Assembly would come into force on the first Tuesday in October after the promulgation of the constitutional reforms, the Bill as a whole was passed by the National Assembly on second reading (by 412 votes to 141, with 58 abstentions) on Nov. 30 1954.

The 412 supporters of the Bill comprised 103 Socialists, 74 Radicals, 61 Social Republicans (Gaullists), 51 Independent Republicans, 23 U.D.S.R. deputies, 49 *paysans* and Independent *paysans*, 33 Dissident Gaullists (A.R.S.), 10 M.R.P. deputies, two Overseas Independents, and six *non-inscrits*. The 141 dissenting votes comprised 98 Communists and *progressistes*, 21 M.R.P. deputies, 13 Overseas Independents, and nine others, whilst the 58 abstentions comprised 50 M.R.P. deputies, seven Social Republicans and an Independent Republican. Five deputies did not take part in the vote and nine (including four M.R.P. members and two Independent Republicans) were absent.

The Bill thus obtained both the absolute majority and the two-thirds majority required to bring it into operation at once, except for the new provisions of Article 9 and those connected with the election of the parliamentary *bureaux*, which, as mentioned above, will only come into force at the beginning of the new parliamentary session in October 1955.

A. UNITED STATES. — New Supreme Court Judge.

Judge John Marshall Harlan (55) of New York, a Republican, was nominated by President Eisenhower on Nov. 9 as an Associate Justice of the U.S. Supreme Court in succession to Justice Robert H. Jackson, who had died on Oct. 9.

Judge Harlan, who was appointed to the Second Federal Circuit Court of Appeals in March 1954, was previously a New York lawyer and was appointed by Governor Dewey in 1951 as chief counsel to the State Crime Commission. A former Rhodes Scholar, he is a grandson of a former Justice of the Supreme Court—John M. Harlan, a member of the Court from 1877 to 1911.

The other eight Justices of the Supreme Court are as follows, the dates of their appointment being given in parentheses: Chief Justice Earl Warren (1953), Justice Hugo L. Black (1937), Justice Stanley F. Reed (1938), Justice Felix Frankfurter (1939), Justice William O. Douglas (1939), Justice Harold H. Burton (1945), Justice Tom C. Clark (1949), Justice Sherman Minton (1949).—(New York Times) **(Prev. rep. 13204 B.)**

B. INDIA. — New Army Commander-in-Chief.

It was announced in New Delhi on Jan. 27 that Lieut.-General S. M. Shrinagesh had been appointed Chief of Army Staff and Commander-in-Chief of the Indian Army, with the rank of general, in succession to General Rajendrasinhji (retiring).

General Shrinagesh, the son of a physician to the Nizam of Hyderabad, was educated at Cambridge and passed through Sandhurst. During the Second World War he fought in the Burma campaign and became Commander of the 64th Indian Infantry Brigade. After the war he was deputy chief of the Indian Military Mission in Germany from 1945-46, and subsequently served as G.O.C., Madras Area (1947), Adjutant-General of the Army (1948), G.O.C.-in-C. Western Command (1949), and G.O.C.-in-C., Southern Command (1953). He commanded the Indian forces in Kashmir during the fighting in that State.

The new Commander-in-Chief is 51 years of age.
(The Statesman, Calcutta) **(Prev. rep. 12426 D.)**

C. SOUTH AFRICA. — Termination of Guaranteed Gold Sales Agreement with Britain.

The South African Minister of Finance (Mr. Louw) announced on Feb. 4 that, because of the increased strength of sterling, there was no longer any need for the South African guarantee to sell 4,000,000 oz. (about £50,000,000) of gold to the Bank of England annually, and that the British Chancellor of the Exchequer had therefore "cordially agreed" that the agreement of 1950 should not be extended beyond the end of 1954. Mr. Louw said that because of the "highly successful" anti-inflationary policies followed by Britain during recent years, she was again in a position to acquire the major portion of South African gold production in open competition on the world market.—(Cape Times - Financial Times) **(12130 A.)**

D. GIBRALTAR. — New Governor.

It was announced in London on Feb. 16 that Lieut.-General Sir Harold Redman, Vice-Chief of the Imperial General Staff, had been appointed Governor of Gibraltar in succession to General Sir Gordon Macmillan, retiring. Sir Harold Redman (55) was successively Head of the British Military Mission in France, Director of Military Operations at the War Office, and principal staff officer to Field-Marshal Lord Montgomery at SHAPE before becoming Vice-Chief of the Imperial General Staff in 1952.—(Times) **(Prev. rep. 12296 A.)**

E. LIBYA.—Execution of Sharif Muhieddin el-Senussi.

Sharif Muhieddin el-Senussi, a nephew of the Queen of Libya, was hanged on Feb. 6 for the murder of the Minister for Palace Affairs in October last.—(Manchester Guardian) **(Prev. rep. 14004 B.)**

F. ITALY - TURKEY. — Turkish Ministerial Visit to Rome. - Joint Communiqué.

The Turkish Prime Minister and Foreign Minister, M. Adnan Menderes and Professor Fuat Koprulü, arrived in Rome on Jan. 30 as guests of the Italian Government, and had discussions with the Italian Premier and Foreign Minister—respectively Signor Scelba and Professor Martino—from Jan. 31 to Feb. 2.

A communiqué issued on Feb. 2 spoke of the "close relations of friendship" between the two countries, and recorded the Ministers' agreement "on the fundamental importance of the Atlantic alliance and on the need to strengthen it in all its aspects, including the economic and social spheres." In particular, the Ministers had agreed "on the value of the contributions of their countries to common defence, and on the special functions which fell to them in the Mediterranean as two of the major strongholds of Western defence"; they had also been "unanimous in recognizing that . . . the best way of ensuring a just peace is to neglect nothing to strengthen the means for its protection, in the closest possible solidarity with all countries sincerely pledged to defend it." A "wide survey" of international problems had been made during the talks, and special attention had been paid to Italo-Turkish economic relations and cultural exchanges.

It was authoritatively stated that detailed consideration had been given to the question of how Turkey could be linked to the Western European Union (of which Italy is a member), as well as the co-ordination of the NATO security system with the Balkan alliance and the possibility of a future invitation to Italy to join the latter grouping. The economic discussions, it was reported, had dealt largely with the settlement of Turkey's trade debt to Italy (amounting to about 20,000,000,000 lire, or approximately £11,000,000), in which connexion the Ministers had confirmed recent agreements on additional Turkish exports of grain, tobacco, and cotton to Italy.

During their visit M. Menderes and Professor Koprulu were received in audience by the Pope, this being the first occasion on which Turkish statesmen had been received in Papal audience.—(Corriere della Sera, Milan - Giornale d'Italia, Rome - Turkish Embassy Press Office, London) **(Prev. rep. 13340 B.)**

G. UNITED KINGDOM. — Financial and Monetary Policy. - Treasury Sale of Dollar Securities.

Mr. Butler, the Chancellor of the Exchequer, stated in a parliamentary reply on Feb. 3 that he had decided to start selling on the London market the dollar securities vested in the Treasury which had originally been taken over from U.K. holders as collateral for the wartime loan of $425,000,000 received from the U.S. Reconstruction Finance Corporation in 1941.

These dollar securities were released from pledge when the balance of the loan was repaid on Oct. 1, 1951, the whole of the direct dollar investments and a small part of the marketable securities, which had only been "borrowed" by the Treasury from the holders, were then returned to them, but by far the larger proportion of the marketable securities, which had been bought outright by the Government, was retained by the Treasury.

Mr. Butler added that the first sale would cover about $15,000,000 worth of these securities, that the sale would be made "during the next few months," and that similar sales might be made from time to time in the future. The list of securities to be put on sale was published on the same day.
(Times - Daily Telegraph - Financial Times) **(11772 C.)**

H. UNITED STATES. — Bicentenary of Columbia University.

The bicentenary of Columbia University, New York, was celebrated on Oct. 31, 1954, the celebrations being attended by scholars from all parts of the world and by a number of distinguished guests, including Queen Elizabeth the Queen Mother (see 14053 B), Sir Sarvepalli Radhakrishnan (the Vice-President of India), Dr. Adenauer (Chancellor of the German Federal Republic), and M. Spaak (the Belgian Foreign Minister), on all of whom honorary degrees were conferred.

Columbia University, founded in 1754 by King George II of Great Britain under the name of King's College, is today the sixth largest university in the United States, with 25,000 students and a teaching staff of over 3,400. The present President of Columbia is Dr. Grayson Kirk.
(New York Times - New York Herald Tribune)

I. PAKISTAN. — Nationalization of Civil Airlines.

The Pakistani Government issued an Ordinance on Jan. 10 nationalizing all civil airlines in the country and setting up the Pakistan International Airlines Corporation to provide and develop co-ordinated and cheaper services, both within Pakistan and on international air routes. The new corporation, which took over Orient Airways Ltd. and the National Air Company, has an authorized share capital of 60,000,000 rupees (over £5,000,000). In addition to an existing service from Karachi to Dacca (East Pakistan) and Bombay (India), a new service to London was inaugurated on Jan. 19.
(Pakistan High Commissioner's Office, London)

A. CHINA. — Adoption of New Constitution. - Re-election of Mao Tse-tung and Chou En-lai as President and Prime Minister. - General Chu Teh elected Vice-President. - Cabinet Changes.

China's first Parliament, the National People's Congress, unanimously approved on Sept. 20, 1954, a new Constitution intended to replace the "Common Programme" adopted in 1949 (see 10441 A) and to cover the period of transition to Socialism. The main provisions of the Constitution are summarized below.

Preamble. This defined the Chinese People's Republic as "a people's democratic State led by the working class and based on the alliance of the workers and peasants," and stated that its central task during the period of transition to Socialism would be "the Socialist industrialization of the country and the Socialist transformation of agriculture, handicrafts, and capitalist industry and commerce," under the leadership of the Communist Party. [This was the only mention of the Communist Party in the Constitution.] China's "indestructible friendship with the great Union of Soviet Socialist Republics and the People's Democracies" was emphasized, whilst the preamble also referred to the war in Korea and to China's role in "resisting U.S. aggression."

General Principles. This section, dealing with the fundamental political and economic principles of the State, recognized State ownership, co-operative ownership, individual ownership, and capitalist ownership of property, and guaranteed State protection for privately-owned incomes, savings, houses, and "means of life," as well as the right of inheritance. The State also protected "the ownership of means of production and other property by capitalists according to law," but reserved the right to "buy, take over, or nationalize" such property, and to transform it into "various forms of State-controlled economy." The peasants might own land and other means of production, but the "rich peasant" economy would be "restricted and gradually eliminated." All forms of economic life would be subordinated to the State plan.

The statement of political principles provided for the equality of all nationalities, but (unlike the Soviet Constitution) made no mention of the right of secession. Article 19 laid down that "the Chinese People's Republic . . . suppresses all kinds of treasonable and counter-revolutionary activity and punishes all traitors and counter-revolutionaries."

National People's Congress. The National People's Congress, described as "the highest organ of State power," would be elected by local government bodies, the armed forces, and "Chinese resident abroad" for a four-year term, which might be extended if exceptional circumstances made elections impossible. It would meet at least once a year to adopt the Budget, the economic plan, and major laws, to elect the highest executive and judicial officials, and to exercise all other functions which it considered necessary; it was also empowered to amend the Constitution. During the time it was not in session its Standing Committee [corresponding to the Presidium of the Supreme Soviet in the U.S.S.R.] would have power to convene emergency sessions of the Congress, to conduct elections, to issue decrees, to appoint or remove Ministers and judges, to supervise the work of the courts, and to annul decisions of legislative bodies at lower levels.

The President and Vice-President. The Chairman or President of the Republic would be elected for four years by the National People's Congress, and would have power to appoint or dismiss the Prime Minister and the State Council (Cabinet), to promulgate laws and decrees, to ratify treaties, to declare war, and to proclaim martial law, in accordance with the decisions of the Congress or its Standing Committee. He would act as Commander-in-Chief of the armed forces and as chairman of the National Defence Council. In order to decide on questions of policy, he might summon a Supreme State Conference comprising the Vice-Chairman of the Republic, the chairman of the Standing Committee of the People's Congress, the Prime Minister, and others concerned. The Vice-Chairman of the Republic, who would also be elected by the People's Congress for four years, would deputize for the Chairman and, in the event of his death, would succeed him.

[The provisions relating to the Chairman differed strikingly from those of the Soviet Constitution, under which the nominal head of the State (the chairman of the Presidium of the Supreme Soviet) has strictly limited powers. The powers granted to the Chairman resemble those of the U.S. President, although the Chinese Constitution, unlike that of the United States, also provides for a Prime Minister. The system whereby the Vice-Chairman automatically succeeds the Chairman on his death also resembles that existing in the United States. It was suggested in the Western Press that this provision, as well as the reduction of the number of Vice-Chairmen from six to one, was intended to prevent a struggle for power after the death of Mao Tse-tung.]

State Council. The State Council, or Cabinet was described as "the highest administrative organ of the State," and would consist of 35 Ministers. Its tasks would include the direction of foreign policy, the strengthening of the armed forces, the carrying-out of the economic plan, and the control of foreign and domestic trade.

Local Government. For administrative purposes the country was divided into provinces, autonomous regions, and municipalities directly subordinate to the central authority. The provinces and autonomous regions were further divided into autonomous *chou*, counties, autonomous counties, and municipalities, and the counties and autonomous counties were again sub-divided into *hsiang*, nationality *hsiang*, and towns. [A *chou* is an administrative district intermediate between a county and a province, whilst a *hsiang* is an administrative area comprising several villages.] Municipalities directly subordinate to the central authority, and other large municipalities, were sub-divided into districts.

The People's Congresses (legislative bodies) of the smaller administrative units would be elected directly by all citizens over 18 except "former feudal landholders and reactionary elements," who would be deprived of the franchise. These Congresses would elect members to the higher bodies, which in turn would elect the members of the Provincial Congresses. Higher local government authorities were empowered to "suspend the carrying-out of unsuitable decisions by the People's Congresses of lower levels," and to revise or annul "unsuitable decisions" by those bodies.

Judiciary. The judicial branch of the Government would consist of the Supreme People's Court (which would be responsible to the National People's Congress and its Standing Committee and would thus not be an independent judicial body), local courts, and special courts established by law. Trials would be public unless otherwise specified by law, and the accused would have "the right to defence."

Attitude towards Private Capital. "The policy of the State towards capitalist industry and commerce is to use, restrict, and transform them. The State makes use of the positive sides of capitalist industry and commerce which are beneficial to national welfare and the people's livelihood; restricts their negative sides which are not beneficial to national welfare and the people's livelihood, and encourages and guides their transformation into various forms of State-capitalist economy, gradually replacing capitalist ownership by ownership by the whole people. This it does by means of control exercised by administrative organs of the State, the leadership given by the State sector of the economy, and supervision by the workers."

Rights and Duties of Citizens. A concluding section on fundamental rights and duties of the citizen included the right to work, the right to rest, and freedom of speech, the Press, assembly, association, procession, demonstration, and religious belief. No citizen might be arrested except by order of a court or a public prosecutor, and the homes of all citizens were declared inviolable. Duties of the citizen included the payment of taxes and the performance of military service.

The draft Constitution, which had been prepared by the central committee of the Chinese Communist Party, was submitted on March 23, 1954, to a committee of the Central People's Government Council, which approved it on June 14. It was published on the following day for discussion by local government bodies, which submitted in all 1,180,420 proposed amendments, a number of which were adopted. In its final form the Constitution was approved on Sept. 9, 1954, by a special session of the Central People's Government Council.

The National People's Congress met in Peking for the first time on Sept. 15, 1954, to approve the Constitution and elect the President, Vice-President, and Prime Minister. Of the 1,226 deputies, 1,136 (elected by local government bodies) represented the 25 provinces, the autonomous region of Inner Mongolia, Tibet, the district of Tchamdo, and the 14 leading cities; 60 deputies were elected by the armed forces; and 30 represented Chinese citizens resident abroad. Nearly 12 per cent of the Congress's members (147) were women, whilst 150 members represented the various national minorities. The deputies from Tibet included the Dalai Lama and the Panchen Lama. The new Constitution was approved on Sept. 20 without a dissentient vote.

In his opening speech to the Congress, President Mao Tse-tung said that China's main tasks were "to unite the people of the whole country, to win the support of our friends in all nations, to build a great Socialist State, to defend peace between nations, and to further the cause of human progress." With this aim they must "learn from the advanced experience of the Soviet Union" and "be prepared, in the course of several five-year plans, to build up our country, at present economically and culturally backward, into a great industrialized nation with a high standard of modern culture."

Mao Tse-tung was followed by Liu Shao-chi (speaking on behalf of the constitutional committee), who said that the new Constitution was based on "the complete victory of the Chinese people in their struggle against imperialism, feudalism, and bureaucratic capitalism." He claimed that with the Soviet Union's assistance China had "ended its former position as a colony or vassal State under the rule of foreign imperialism" and had emerged as a great Power and "a bulwark in the defence of world peace."

The Dalai Lama, in a speech to the Congress on Sept. 16, promised loyal support for Mao Tse-tung, whom he described as the "great and beloved leader of all China's nationalities." Repudiating "enemy slanders that the Communist Party and the People's Government would eliminate religion," he declared that the Tibetan people enjoyed full religious freedom. He also announced that the Panchen Lama, who had lived in China since his investiture, would return to Tibet to strengthen the country's unity.

On Sept. 27 Mao Tse-tung was elected Chairman (i.e. President) of the Republic, General Chu Teh Vice-Chairman, Chou En-lai Prime Minister, and Liu Shao-chi chairman of the Standing Committee of the Congress. Both Chu Teh and Liu

Shao-chi had previously been Vice-Presidents. Of the four other former Vice-Presidents, three—Soong Ching-ling (Mme. Sun Yat-sen, widow of the founder of the Chinese Republic), Li Chi-sen (leader of the Revolutionary Kuomintang Committee), and Chang Lan (leader of the Democratic League)—were elected vice-chairmen of the Standing Committee, but no mention was made in the official reports of the fourth—Kao Kang, who had been appointed chairman of the State Planning Committee in 1953. The Dalai Lama was elected a vice-chairman and Peng Chen (the Mayor of Peking) secretary of the Standing Committee, which, it was decided, would have 13 vice-chairmen and 65 members. Tung Pi-wu became president of the Supreme Court and Chang Ting-cheng Public Prosecutor.

Biographical details of Mao Tse-tung, Chu Teh, and Chou En-lai are given in an earlier volume (see 9957 A). Liu Shao-chi (54), the fourth-ranking leader in the Chinese Communist hierarchy, comes from a peasant family in Hunan, joined the Communist Party on its formation in 1921 while a student, and devoted himself to trade union organization. He is general secretary of the Chinese Communist Party (being regarded as the party's leading theoretician) and a vice-chairman of the World Federation of Trade Unions. Mao Tse-tung, Chu Teh, Chou En-lai, Liu Shao-chi, Peng Chen, and Tung Pi-wu are all members of the Politburo of the Chinese Communist Party.

Before adjourning on Sept. 28, 1954, the Congress approved the new State Council and Defence Council. The State Council, in which Chou En-lai retained the post of Foreign Minister as well as the Premiership, included 10 Vice-Premiers: General Peng Teh-huai (the former commander of the Chinese forces in Korea, who was appointed to the new post of Defence Minister), General Li Hsien-nien (the Finance Minister), General Lin Piao, General Ho Lung, General Chen Yi, Li Fu-chung, Chen Yung (a member of the Communist Party's Politburo), Teng Hsiao-ping, Teng Tze-hui, and U Lan-fu (Governor of Inner Mongolia). The Defence Council consisted of 15 vice-chairmen, four of whom (Generals Cheng Chien, Chang Chih-chung, Fu Tso-yi, and Lung Yun) were former Nationalist commanders, and 81 other members.

Following the adoption of the new Constitution, the leading organs of government were renamed as shown below, their former nomenclature also being given:

New name.	*Former name.*
1. National People's Congress	1. Chinese People's Political Consultative Conference.
2. Standing Committee of National People's Congress.	2. Central People's Government Council.
3. State Council.	3. Government Administration Council.
4. National Defence Council.	4. Revolutionary Military Committee.

General Li Hsien-nien had become Finance Minister on June 25, 1954, in succession to Teng Hsiao-ping, who had taken over that post on Sept. 19, 1953, from Po Yi-po. Generals Lin Piao, Ho Lung, and Chen Yi had previously been regional commissioners for South-Central, South-West, and East China respectively before the reorganization of regional administration on June 21, 1954 (see 13819 C).—(Times - Manchester Guardian - Le Monde, Paris - New York Times - New York Herald Tribune - Economist - The Statesman, Calcutta) **(12784 E.)**

A. PAKISTAN. — Establishment of Press Commission. - Boycott by Newspaper Editors.

Mr. Mohammed Ali, the Pakistani Prime Minister, announced on Sept. 16, 1954, that the Government had decided to set up a Press Commission to make recommendations regarding the development of the Press in Pakistan. The first meeting of the Commission, held in Karachi under the chairmanship of Mr. Justice Khurshid Zaman, ended on Oct. 18, when decisions were taken on the scope of the inquiry and the procedure to be adopted. The Council of Pakistan Editors, however, decided on Dec. 1 to boycott the Commission on the ground that that body, as constituted, would not be able "to meet the aims and objects of a Press Commission."

(Pakistan High Commissioner's Office, London)

B. UNITED KINGDOM. — New Peerages.

The following titles were taken by the three recipients of peerages in the New Year Honours: Dr. E. D. Adrian, O.M., Master of Trinity College, Cambridge—Baron Adrian, of Cambridge in the County of Cambridge; Sir William Fraser, chairman of the Anglo-Iranian Oil Company—Baron Strathalmond, of Pumpherston in the County of Midlothian; Sir Arnold Gridley, lately M.P. (Conservative) for Stockport South—Baron Gridley, of Stockport in the County Palatine of Chester.—(London Gazette) **(Prev. rep. 13976 A.)**

C. URUGUAY. — General Elections. - New Council of Government.

Elections were held in Uruguay on Nov. 28, 1954, for a new National Council of Government, the nine-member body—modelled on the Swiss Federal Council—which was created in 1952 (see 12078 A) to supersede the former Presidential system of government. At the same time elections were held for a new Senate (31 members) and a new Chamber of Deputies (99 members).

Out of a total of 831,595 votes cast, the *Colorado* (Liberal) party received 387,803 and the *Blanco* (National) party 266,960, the balance going to a number of minor parties, including the Catholic "Civic Union" group (39,368), the National Independents (27,927), the Socialists (26,368) and the Communists (17,773). As that faction of the *Colorado* party led by Señor Luis Batlle Berres—the *Batllistas*—received an overall majority of the votes cast for the *Colorados* (221,490 out of 387,803), it thereby became entitled, under the Uruguayan Constitution, to six of the nine seats on the Council of Government. The other three seats went to that faction of the *Blanco* party headed by Dr. Luis Albert Herrera—the *Herreristas*—as the second largest political group. The new Senate consisted of 17 *Batllistas*, 11 *Herreristas* and three representatives of minor parties, whilst the new Chamber of Deputies consisted of 51 *Batllistas*, 36 *Herreristas* and 13 others. All those elected—the members of the National Council of Government, the Senators, and the Deputies—will hold office for four-year terms.

It was announced that Señor Batlle Berres would serve as President of the National Council of Government for the year 1955-56 (commencing on March 1) and that Señor Alberto Zubiría—formerly president of the *Banco de la República*—would hold that office in 1956-57. [The Uruguayan Constitution lays down that each of the members of the majority party in the National Council shall serve in rotation as President of that body for periods of one year each—a system analogous to the Presidency of the Swiss Confederation.] Señor Batlle Berres was President of Uruguay for most of the period 1946 to 1950. (Uruguayan Embassy, London) **(Prev. rep. 12078 A.)**

D. FRANCE. — Socialist Party. - Expulsion of Opponents of Paris Agreements confirmed.

An extraordinary congress of the French Socialist Party, held at Puteaux on Feb 5-7, decided to confirm the expulsion of the 16 Socialist deputies from the party because of their votes against the ratification of the Paris agreements. The resolution provided, however, that if the expelled deputies were prepared within one month to sign an undertaking accepting party discipline in future, they would be automatically reinstated with full rights and without further formality. This proviso was also made applicable to M. Max Lejeune, who had been previously expelled from the party.

The 16 expelled deputies were MM. Auban (Haute-Garonne), Audegui (Gironde), Baurens (Gers), Binot (Seine-Inférieure), Bouhey (Côte-d'Or), Briffod (Haute-Savoie), Coffin (Cher), Desson (Ardennes), Doutrellot (Somme), Gourdon (Gard), Mabrut (Puy-de-Dôme), Eugène Montel (Haute-Garonne), Naegelen (Basses-Alpes), Rey (Haute-Garonne), Sibué (Savoie), and Titeux (Ardennes).

The voting on the resolution was 1,899 to 1,653, with 43 abstentions.—(Le Monde, Paris - Le Populaire, Paris)

(Prev. rep. 14013 B; 13965 A.)

Corrigendum. The 18th deputy who had voted against ratification of the Paris agreements was not M. Lapie (as stated in 14013 B) but M. Béchard, who, however, was not affected by the expulsion measure because this was his first violation of party discipline (Ed. K.C.A.)

E. CANADA. — Reduction in Bank Rate.

The Bank of Canada reduced its Bank rate from 2 to 1½ per cent on Feb. 15. An official statement said that yields on Treasury bills and short-term Government bonds had declined materially over the past 18 months, and that the Bank rate at the old level had consequently ceased to bear a reasonable relationship to other short-term interest rates. The statement further explained that although the Bank rate in Canada had been changed infrequently in the past, and little use had been made of the Bank's facilities, "the growth in the breadth and scale of activity in the short-term money market over the past two years make it desirable that the Bank rate be made more flexible and bear a closer (though unfixed) relation to other short-term interest rates."—(Montreal Star - Financial Times)

(Prev. rep. 11079 A.)

F. CEYLON. — New President of Senate.

Senator Cyril de Zoysa was elected President of the Ceylonese Senate on Jan. 24 in succession to Sir Nicholas Attygalle, who had resigned in order to become Vice-Chancellor of the University of Ceylon in succession to Sir Ivor Jennings.

(Ceylon Government Information Dept., Colombo) **(12506 D.)**

A. PANAMA. — Assassination of President Remón. - Subsequent Impeachment and Imprisonment of President Guizado. - Installation of President Arias Espinosa.

The President of Panama, Colonel José Antonio Remón, was assassinated on Jan. 2 while visiting the Juan Franco racecourse near Panama City. The assassins, who were concealed in a hedge some 20 yards away and subsequently escaped, opened fire on the President and his suite with a sub-machine gun, the President being riddled by bullets and dying later in hospital. Two other persons were killed, one of them a member of the President's bodyguard.

José Antonio Remón (46), a professional soldier, was born in Panama City, educated at the Military Academy in Mexico City, and became Chief of Police in 1947. In 1949 he took part in the *coup d'état* which brought President Arnulfo Arias to power, but two years later he broke with President Arias and joined the campaign which led to his deposition in favour of President Arosemana At the end of 1951 he resigned as Chief of Police in order to stand for the Presidency, to which he was elected in May 1952. During his tenure of that office he carried through a number of economic, financial and agricultural reforms, outlawed all forms of Communism and Fascism, and negotiated a new and more favourable treaty with the United States with regard to the Panama Canal In November, 1953, he received Queen Elizabeth II and the Duke of Edinburgh while they were passing through Panama *en route* for New Zealand.

The Panamanian Government immediately suspended constitutional guarantees for a ten-day period, offered a reward for information leading to the arrest of the assassins of President Remón, and called in the help of U.S. and Cuban police officers in an endeavour to trace those responsible for the crime. A number of arrests were made in different parts of the country, among those taken into custody being Dr. Arnulfo Arias (a former President), several of his supporters, and two U.S. citizens. Although the police found the weapon with which the assassination had been committed—a sub-machine gun of German manufacture—the assassins themselves remained untraced.

Señor José Ramón Guizado (55), the First Vice-President and Minister for Foreign Affairs, took office as President of Panama following the assassination of President Remón, in accordance with the Panamanian Constitution. On Jan. 15, however, a letter was read in the National Assembly from Señor Ruben Miro—a lawyer, and a member of a well-known Panamanian family—confessing that he had assassinated President Remón, and alleging that President Guizado and other persons were implicated. After hearing the text of this letter, the National Assembly decided that President Guizado should be impeached and arrested. Señor Guizado—who was reported the previous day to have been under house arrest—denied Miro's allegations and demanded that he should be given " leave of absence " in order to prepare his defence. The National Assembly declined to accede to this request.

In his letter of confession to the National Assembly, Miro alleged that President Guizado, Sr Ramón José Guizado jr. (the President's son), and two businessmen—Sr. Rodolfo St.-Malo, described as a business associate of President Guizado, and Sr. José Nieves Perez—were implicated with himself in the plot to assassinate President Remón. Specifically, he alleged that President Guizado had promised him the post of Minister of Justice in his new Government so that he [Miro] could get money to pay off heavy gambling debts, that President Guizado had gone back on his word; and that the two businessmen mentioned, together with Sr Guizado jr., had acted as intermediaries between himself [Miro] and President Guizado in informing the latter of the plot to assassinate President Remón.

Prior to Señor Miro's confession, the National Assembly had heard statements by two Panamanian cadets, Luis Carlos Hernandez and Edgardo Tejada—both of whom had been taken into custody—admitting that they had been involved in the sale of the machine-gun used in the assassination of President Remón. The statements had been preceded by a confession on the part of a girl friend of Tejada in which she said that Tejada had taken part in the fighting in Guatemala in August 1954 on the side of Señor Arbenz Guzman, the former Guatemalan President; that he had returned to Panama after the overthrow of the Arbenz Guzman regime; and that he had brought back with him a machine-gun of German manufacture which he had sold to Hernandez. It was alleged that this machine-gun had subsequently been sold to Miro

As a result of these disclosures, seven persons were held in detention while awaiting trial on charges of complicity in the assassination of President Remón: Ruben Miro, ex-President Guizado, Sr. José Ramón Guizado jr., Sr. Rodolfo St.-Malo, Sr José Nieves Perez, and the two cadets—both of whom, it was stated, had been trained at the Guatemalan Military Academy. The persons previously taken into custody—Dr. Arias, his supporters, and the two U.S. citizens—were all released.

An investigating committee of the Panamanian National Assembly issued a report on Feb. 10 recommending that ex-President Guizado should be indicted for complicity in the assassination of his predecessor. The main conclusions of the report were (1) that Miro was the actual slayer of President Remón; (2) that Rodolfo St.-Malo had been implicated by his own testimony; and (3) that ex-President Guizado had also been implicated by his own testimony and by the testimony of other witnesses, including that of his son.

Whilst no suggestion was made that ex-President Guizado was implicated in the act of murder, the report recommended his indictment under those articles of the Penal Code covering cases of homicide The confession made by Miro was in general accepted by the committee, though it was stated that several particulars in his alleged original confession had been proved false since investigation began Excerpts from the transcript of proceedings showed that whereas Miro and other witnesses were specific in describing the time and place of alleged discussions with Guizado or his business partner, Rodolfo St.-Malo, about the overthrow of President Remón, Guizado's denials of these allegations were in vague terms The transcript also included evidence that Miro had planned to organize the overthrow of President Remón's predecessor, President Arosemana, in 1951. It was pointed out in this connexion that Guizado was First Vice-President in the Arosemana administration, and would therefore probably have become President had Señor Arosemana been ousted

Following the impeachment and imprisonment of President Guizado, Señor Ricardo Arias Espinosa (42)—the Second Vice-President in the Remón administration—was sworn-in on Jan. 15 as President of Panama. The new President—Panama's third within 13 days—is the son of a former prominent political leader (Francisco Arias Paredes) and was educated at Georgetown University, Washington (U.S.A.) and the Catholic University of Santiago, Chile.

(Prev. rep. President Remón, 13368 B.)

B. UNITED STATES - CANADA. — Visit of H.M. Queen Elizabeth the Queen Mother.

At the invitation of President Eisenhower, H.M. Queen Elizabeth the Queen Mother paid an official visit to the United States from Oct. 26 - Nov. 12, 1954, which was followed by a four-day visit to Ottawa as the guest of the Governor-General of Canada, Mr. Vincent Massey.

Her Majesty arrived in New York on Oct. 26 in the liner *Queen Elizabeth*. During a six-day visit to the city she received the honorary degree of Doctor of Law of Columbia University, then celebrating its bicentenary (see 14050 H); was the guest of honour at a dinner given by the English-Speaking Union, at which she formally accepted the proceeds of the King George VI Memorial Fund in America (see 12913 C), and visited Mrs. Eleanor Roosevelt, widow of President Franklin D. Roosevelt.

While in Washington (Nov. 4-9) her Majesty stayed for part of the time at the White House as the guest of President and Mrs. Eisenhower, and subsequently at the British Embassy During her stay in the U.S. capital she visited the Library of Congress, the Pentagon (the Defence Department), the Smithsonian Institution, the National Gallery of Art, and the Arlington National Cemetery. On Nov 8 she paid a visit to Annapolis (the capital of Maryland), where she inspected the U.S. Naval Academy and saw some of the city's historic buildings dating from the British Colonial period

During a three-day tour of Virginia (Nov. 10-12) the Queen Mother visited Richmond (the State capital). Jamestown (the site of the first permanent British settlement in North America) and Williamsburg (formerly the capital of British America). While in Williamsburg she visited the College of William and Mary, the oldest academic institution of university status in the United States

During her stay in Ottawa (Nov 13-16) the Queen Mother was the guest of honour at a State dinner given by the Governor-General, visited the National Gallery of Canada, opened new bridges across the Rideau River, and paid a visit to the city of Hull, across the Ottawa River from the Federal capital.

The Queen Mother, who received an enthusiastic welcome at all the places she visited in the U.S.A. and Canada, sailed from New York for Southampton on Nov. 18 in the liner *Queen Mary*. (Times - New York Times - Montreal Star)

C. ITALY. — Parliamentary Immunity lifted from Five Communist Deputies.

The Italian Chamber of Deputies decided on Jan. 27-28 to lift parliamentary immunity from five Communist deputies: Signori Calendrone, Moranino, Mario Montagnana, Faletra, and Maglietta. Signor Moranino (an Under-Secretary for War in the third De Gasperi Cabinet of 1947) was facing allegations of responsibility for ordering the shooting of five members of a Resistance group, and of the wives of two of these men, in 1944. The other four deputies were facing allegations of having made libellous and defamatory speeches against the Government and of having incited recruits to rebellion.

(Giornale d'Italia, Rome - Corriere della Sera, Milan)

D. LUXEMBURG.—Ratification of Paris Agreements.

The Paris agreements on the rearmament of Western Germany and her entry into NATO were ratified by the Luxemburg Council of State on Feb. 1.—(Times) **(14008 C.)**

A. INDIA. — Political Developments in Indian States and Party Organizations.

A special convention of the Travancore-Cochin State Congress Party decided on Dec. 12 that the party should withdraw its support from the Praja Socialist Government holding office in the State.

A resolution was adopted by the convention alleging that the Government had never consulted the Congress Party on its measures, had openly conducted a campaign of "vilification, ridicule, and abuse" against the Congress, had used its influence to "cripple" the Congress-dominated Indian National Trade Union Congress, and had heightened the estrangement between the Tamils living in the south of the State and the rest of the population. In order to remove the wrong impression in the public mind that the Government had the moral support of the Congress Party, the latter had therefore decided to go into opposition.

This decision was approved on Dec. 17 by the Congress Central Parliamentary Board, which gave the Congress Legislature Party freedom to oppose measures which it considered incompatible with Congress principles or the interests of the State, while stressing the importance of not taking any step which might necessitate the imposition of President's rule. On Dec. 13 the Chief Minister of the State (Mr. P. T. Pillai) had repudiated the Congress Party's charges, and had announced that his Government would not resign unless it were defeated on a motion of confidence or an important question of policy.

The Congress Party's allegations that the Government had heightened the estrangement between the Tamils and the rest of the population referred to the police measures employed against a *satyagraha* (civil disobedience) campaign launched on July 9, 1954, by the Travancore Tamil Nad Congress Party (T.T.N.C.) in support of its demand for the merger of the Tamil-speaking areas of the State with Madras. Although the leaders of the movement had emphasized that it would be confined to strictly non-violent methods (e.g. refusal to pay taxes) serious riots broke out on Aug. 11 in a number of towns in South Travancore, four people being killed by police fire at Puthukadda and five T.T N.C. members of the State Assembly being arrested. Mr. Justice Sankaran, of the Travancore-Cochin High Court, who had been appointed to conduct an official inquiry into the riots, stated in a report issued on Dec. 13 that the evidence had shown that the action of the police was fully justified in the circumstances.

Following the Puthukadda incident, Dr. R. M. Lohia resigned his position as general secretary of the Praja Socialist Party and demanded the resignation of the Travancore-Cochin State Ministry; the party executive, however, adopted a resolution which, while regretting the incident, stated that it was unnecessary for the Government to resign. This resolution was endorsed by 303 votes to 217 at a special party convention held at Nagpur from Nov. 26-28.

It was pointed out in the Indian Press that the controversy on the situation in Travancore-Cochin reflected a long-standing division of opinion inside the Praja Socialist Party on its attitude towards the Congress, dating back to 1953, when Mr. J. P. Narain (then a member of the national executive) took part in negotiations with Mr. Nehru on the possibility of Praja Socialist co-operation in the Central Government and in certain State Governments The majority of the party leadership advocated that it should oppose the Congress only in States where the Communists and communal parties were weak; on the other hand, Dr. Lohia, who was supported by a large section of the party and particularly by its younger members, maintained that no distinction should be drawn between rival parties.

The party chairman, Mr. J. B. Kripalani, who stated that he differed radically from the party's policy, and found himself unable to discharge his functions because he felt that he was not the natural and accepted leader of the party, announced his resignation and that of the executive on Nov. 27. The convention accordingly elected Mr. Narendra Dev as his successor on the following day, and authorized Mr. Dev to nominate his own executive. The 18 members of the new executive, whose names were announced on Dec. 7, included Dr. P. C. Ghosh, Mr. Asoka Mehta, and Mrs. Kripalani. Mr. Narendra Dev stated that Mr. Kripalani and Dr. Lohia had both refused to serve on the executive, but had promised their co-operation.

Recent political developments in other Indian States are summarized below.

Uttar Pradesh. Pandit G. B. Pant, who had been appointed a member of the Central Government on Dec. 1, resigned his post as Chief Minister of Uttar Pradesh on Dec. 18 and was succeeded by Dr. Sampurnanand, the former Home and Labour Minister. The membership of the new Council of Ministers was announced on Dec. 28 as follows: Dr. Sampurnanand (Chief Minister, General Administration, and Home Affairs); Mr. Hafiz Muhammad Ibrahim (Finance, Power, Forests, and Co-operation); Mr. Hukam Singh (Agriculture, and Relief and Rehabilitation); Mr. Girdhari Lal (Excise and Registration); Mr. Chandra Bhanu Gupta (Planning, Health, Industries, and Civil Supplies); Mr. Gharan Singh (Revenue and Transport); Mr. Syed Ali Zaheer (Justice and Local Government); Mr. Hargovind Singh (Education and *Harijan* Welfare); Mr. Kamalapati Tripathi (Information and Irrigation); Mr. Vichitra Narain Sharma (Public Works); and Mr. Jugal Kishore (Labour and Social Welfare—a new Ministry). Mr. Kishore had hitherto been Vice-Chancellor of Lucknow University.

Saurashtra. Mr. U. N. Dhebar, the Chief Minister of Saurashtra, resigned on Dec. 19 following his election as president of the Indian National Congress. A new Ministry was formed on the same day by Mr. R. U. Parikh (the former Home Minister), its other members being Mr. M M. Shah, Mr. J. K. Modi, Mr. G. C. Oza, Mr. D. T. Dave, and Mr. Ratubha Adani.

PEPSU. Following the death on Jan. 7 of Colonel Raghbir Singh, the Chief Minister of PEPSU, Mr. Brish Bhan was appointed his successor on Jan. 8. Mr. Brish Bhan had hitherto been Minister of Finance, Rehabilitation, Education, Local Self-government, Industries, Supplies, and Labour. The new Cabinet was sworn in on Jan. 12.

Mr. M. C. Sharma resigned both from the presidency of the Jan Sangh and from that party on Nov. 3, following internal differences between the party's "authoritarian" wing, led by the R.S.S.S. (see 10246 E), and its "democratic" leaders.

In a statement issued on that date Mr. Sharma said that "acute differences of opinion on the question of interference by the R.S.S.S. in the affairs of the Jan Sangh" had been growing for over a year; that many R S.S.S. workers had been admitted to membership because leaders of the R.S.S.S. had declared that it was a purely cultural body having nothing to do with politics; but that this had not been the case in practice. After declaring that it was essential to maintain "the two basic principles of the Sangh as laid down in its constitution—namely, secular nationalism and unflinching faith in democracy," Mr. Sharma asserted that "domination by those used to authoritarian methods" would "necessarily lead to the dissociation from the Jan Sangh of all free-thinking, progressive, and democratic elements."

Mr. Premnath Dogra, president of the Jammu and Kashmir Praja Parishad, was appointed successor to Mr. Sharma on Nov. 27. The affiliation of the Praja Parishad with the Jan Sangh had been approved by the working committee of the latter party on Nov. 8.—(The Hindu, Madras - The Statesman, Calcutta) **(Prev. rep. Travancore-Cochin, 13490 A; Uttar Pradesh, 12291 A; Saurashtra, 12081 A; PEPSU, 13490 A; Praja Socialist Party, 13032 E; Jan Sangh, 12775 B; R.S.S.S., 10246 E; Praja Parishad, 13236 A.)**

B. WESTERN GERMANY. — Diplomatic Service. - New Envoys in London and Paris.

It was announced in Bonn on Jan. 18 that Herr Hans Herwarth von Bittenfeld had been appointed head of the German diplomatic mission in London in succession to Dr. Schlange-Schoningen, and that Baron Vollrath von Maltzan had been appointed to the similar post in Paris *vice* Professor Hausenstein.

Herr Herwarth von Bittenfeld (50) entered the German diplomatic service in 1927, served at the Moscow Embassy as a third secretary from 1931-39, and during the war years was liaison officer between the German Foreign Office and the armed forces. He entered the service of the Bavarian Government in 1945 (serving in the office of the *Land* Premier) and after the foundation of the Federal Republic became Chief of Protocol, first to the Federal President and later to the Federal Government and the Federal Foreign Ministry. He was never associated with the Nazi party, and his immediate superior during the war was executed for complicity in the attempt on Hitler's life in 1944.

Baron von Maltzan (55) was head of the Foreign Trade Department in the Federal Foreign Ministry at the time of his new appointment. A career diplomat since 1925, he served before the war in Warsaw and Paris, but left the Diplomatic Service for political reasons in 1938 and was for a time with the I.G. Farben concern. After the war he was in charge of the bizonal economic administration at Minden and later at Frankfurt.

Dr. Schlange-Schoningen and Professor Hausenstein left the diplomatic service on reaching the retiring age.
(Frankfurter Allgemeine Zeitung) **(13562 A; 12759 A.)**

C. INTERNATIONAL RED CROSS. — New President.

It was announced in Geneva on Feb. 7 that the International Committee of the Red Cross had accepted the resignation of Dr. Paul Ruegger from its presidency as from Aug. 31, 1955, and that it had unanimously elected Professor Leopold Boissier as its new president with effect from Sept. 1, 1955. Dr. Ruegger, who had been president of the International Committee since May 1948, agreed to hold himself at the committee's disposal for the study of special legal problems, particularly in connexion with the Geneva Conventions of 1949 which were concluded during his term of office. Professor Boissier, formerly secretary-general of the Inter-Parliamentary Union (a post he had held for 20 years), has been vice-president of the International Red Cross Committee since 1946, and has been a member of the Swiss Diplomatic Service.—(Neue Zurcher Zeitung)
(Prev. rep. 9536 A.)

A. UNITED KINGDOM. — Miscellaneous Legislation.

Miscellaneous legislation enacted during 1954 (other than legislation covered in separate reports) is summarized below.

The Agriculture (Miscellaneous Provisions) Bill was given a second reading in the House of Commons on Jan. 19, 1954, and enacted on July 4. It (1) continued without time-limit the Minister of Agriculture's powers (due to expire in August 1954) under the Agriculture Act to make grants for field drainage and water supplies in England and Wales, (2) extended for five years the Minister's power to make Exchequer contributions towards the cost of agricultural liming in the United Kingdom, with power to extend it for further five-year periods, subject to Parliamentary approval; (3) amended the method of appointing land tribunals by providing that the two nominated members on each tribunal should in future be appointed by the chairman from panels selected by the Lord Chancellor, who, in turn, would make his selections from lists provided by representative agricultural bodies; (4) extended the provisions of the Corn Returns Act to Scotland so as to allow the prices of wheat, barley, and oats to be calculated on a uniform basis throughout the country

The Baking Industry (Hours of Work) Bill. This Bill, intended to restrict night work in the baking industry, and based on the recommendations of a committee under Sir Frederick Rees which reported in 1951, was given a second reading in the House of Commons on Jan. 26 1954, and enacted on July 30. It prohibited night baking (i.e. between 10 p.m. and 5 a.m.) unless the employer had notified the Minister of Labour of his intention to use his establishment as a night bakery. In the latter case night work would be permitted, but no worker might be employed between 6 p.m and 6 a.m. for more than 26 weeks in any year, or work at night for more than four consecutive weeks without the Minister's consent Exceptions from the Bill's provisions were allowed in order to cater for the week-end trade, the Jewish Sabbath, or public holidays, or because of breakdowns or emergencies. Master bakers and foremen, and certain directors of bakery establishments were exempted from the restrictions (thus enabling family concerns to work when they chose), and the Minister was authorized to exempt from the Bill employers covered by voluntary collective agreements The Bill may be brought into effect by Ministerial Order on Jan. 1, 1957, but otherwise will come into operation on Jan 1, 1958

The British Industries Fair (Guarantees and Grants) Bill (House of Commons second reading Feb 23; enactment April 14) The Bill implemented the Government's decision (see 13349 C) to transfer the running of the London section of the B.I.F to a limited company, and empowered the Treasury to guarantee loans to the company up to £100,000, provided that they were repaid before June 30, 1959. It also authorized the making of Treasury grants towards advertising costs.

The Development of Inventions Bill, extending and amending the Development of Inventions Act (see 9462 D), was given a second reading in the House of Commons on Jan. 26, 1954, and enacted on March 18.

Mr Thorneycroft (President of the Board of Trade) stated during the debate that the National Research Development Corporation set up under the Act had received about £750,000 capital from the Government and held about 500 patents at home and 227 overseas, including a large number connected with an electronic brain devised by Professor Williams and a research team at Manchester University. As yet, however, only a few of the inventions covered by the patents had reached the final stage when revenue would begin to come in

The Gas and Electricity (Borrowing Powers) Bill, given a second reading in the House of Commons on July 19, 1954, and enacted on July 30, raised the borrowing limits of the British Electricity Authority from £700,000,000 to £1,400,000,000, and of the Gas Council and the Area Gas Boards from £250,000,000 to £450,000,000.

Mr Geoffrey Lloyd (Minister of Fuel and Power), who moved the second reading, explained that, together with money to be found by the industries themselves, the Bill would allow of investments during the next six years of £1,440,000,000 for electricity and £366,000,000 for gas, this "vast expenditure" being needed to meet the ever-growing demand for power in industry and on farms, and for light, heat, and labour-saving appliances in homes

During the debate Mr Lloyd announced that it had been decided to set up an independent inquiry into the working of the nationalized electricity supply industry The chairman would be Sir Edwin Herbert and the other members would be Mr F. C. Bagnall (managing director, British Nylon Spinners Ltd.), Professor Ronald Edwards (the economist), Mr. Albert Healey (a director of the Dunlop Rubber Co. Ltd), Mr. Lawrence Robson (president of the Liberal Party) and Mr. Jack Tanner (then chairman of the T U.C.)

The Hill Farming Bill, repealing that clause of the Hill Farming Act (see 8310 C) which restricted Government grants for the erection or reconditioning of cottages in hill farming areas to "non-tied" dwellings, was introduced in the House of Commons on Nov. 24, 1953, and enacted on March 26, 1954.

The Industrial Diseases (Benefit) Bill. (House of Commons second reading, Nov. 23, 1953; enactment, March 9, 1954) This Bill amended the Pneumoconiosis and Byssinosis Act of 1951 (which provided for the payment of benefits in the event of total disablement or death from these pulmonary diseases, which affect miners and cotton operatives respectively) by empowering the Minister of National Insurance to pay flat-rate allowances of 20s. weekly to partially-disabled sufferers from the diseases, provided they had not received workmen's compensation and were not entitled to benefits under the National Insurance (Industrial Injuries) Act. It also empowered the Minister to make schemes in respect of other diseases where compensation, though provided for under the Workmen's Compensation Acts, could not in fact be paid owing to delay in the onset of disablement

Mr. Osbert Peake (Minister of Pensions and National Insurance) stated during the debate that about 15,000 partially-disabled workers were expected to benefit from the Bill, at an annual cost of about £750,000 for pneumoconiosis and £50,000-£60,000 for other diseases.

The National Gallery and Tate Gallery Bill. This Bill, originally called the National Art Collections Bill, was given a second reading in the House of Lords on Nov 24, 1953, its name being changed during the Committee stage. After passing through both Houses (Commons second reading, Oct 29, 1954) it was enacted on Nov. 25. 1954. As originally introduced, it (1) set up the Tate Gallery as an institution independent of the National Gallery, and vested the Tate art collection in the Tate Gallery trustees, (2) empowered the trustees of either gallery to lend works of art for exhibition abroad; (3) authorized them to sell unwanted works, subject to the proviso that if they had previously been exhibited as part of either collection, details must first be given to Parliament, (4) provided for the transfer of pictures from one gallery to the other; (5) empowered the Treasury, if it thought fit, to allocate gifts and bequests to the nation to other national collections, instead of to the National Gallery.

In the House of Lords Committee stage (March 31, 1954) an amendment by the Duke of Wellington was agreed to deleting the clause permitting the gallery trustees to sell works of art abroad, and also cancelling the power to sell pictures, etc., which had been conferred on the National Gallery trustees by the National Gallery Act of 1865. A Government amendment was agreed to in the Report stage (April 18) prohibiting the lending abroad of foreign pictures believed to have been painted before 1700, unless this had been approved by Treasury Order subject to negative Parliamentary resolution. In the House of Commons Committee stage (Nov. 10) a Government amendment was agreed to limiting the number of art works on loan at any one time to one-twentieth of the total number vested in the National Gallery trustees and one-tenth of the total number in the Tate Gallery

The Overseas Resources Development Bill. This Bill, enacted on Nov. 25, 1954, provided for the dissolution of the Overseas Food Corporation and the transfer of its remaining assets to a new statutory corporation—the Tanganyika Agricultural Corporation—which would be set up by the Tanganyika Government to carry on the development work on which the O F.C had been engaged (see 13651 B)

Mr. Lennox-Boyd, the Colonial Secretary, explained during the debate that the O.F.C.'s surplus assets were valued at over £7,000,000, against which it had paid or would pay about £2,100,000 into the Exchequer, making a loss of over £4,900,000 on the winding-up of the scheme The Tanganyika Government had already passed legislation providing for the setting-up of the new Tanganyika Agricultural Corporation.

The following private members' Bills, including several relating to the protection, and prevention of cruelty to, birds and animals, were enacted during 1954 (names of sponsors in parentheses):

The Juries Bill (Mr. Frederick Harris, C), was introduced in the House of Commons on Nov. 20, 1953, and enacted on July 5, 1954. It amended the Juries Act of 1949 (see 10005 C) in respect of payments to jurymen by abolishing the statutory limitation on "loss of earnings" allowances and leaving their amount entirely in the discretion of the Home Secretary (in Scotland, to the Secretary of State) and the Treasury.

The Law Reform (Enforcement of Contracts) Bill. (Mr. T. C. Skeffington-Lodge, Lab.). This Bill, originally entitled the Law Reform (Miscellaneous Provisions) Bill, repealed the clauses of the Statute of Frauds of 1677 and the Sale of Goods Act of 1893 which required certain forms of contract—including marriage settlement contracts and contracts for the sale of goods valued at £10 and upwards—to be set forth in writing in order to be enforceable. As a result of the Bill, the only contracts now required to be in writing are contracts for the sale of land or any interest in land, and contracts of guarantee, all other contracts, even though made only by word of mouth, may be proved in court by the ordinary processes of evidence. (House of Commons second reading, Feb. 12, 1954, enactment, June 4.)

The Law Reform (Limitation of Actions) Bill. (Mr J. W. Peyton, C.). This Bill was given a second reading in the House of Commons on Dec. 4, 1953, and enacted on June 4, 1954 It (*a*) repealed the Public Authorities Protection Act, which prescribed that actions for damages against local authorities must be brought within 12 months of the incidents giving rise to them; and (*b*) substituted a universal limitation period of three years for all actions for personal injuries and actions under the Fatal Injuries Act (whether against local authorities or private persons or firms) instead of the previous limitation periods (applicable only to actions against private persons or firms) of six years and one year respectively

The Marriage Act (1949) Amendment Bill (Mr. Tudor Watkins, Lab.), which was given a second reading in the House of Commons on March 26, 1954, with Government support, and enacted on July 30, abolished a particular residential qualification on the marriage of Nonconformists. Mr. Watkins explained during the debate that the existing law required Nonconformists to be married either in a Registry Office or in the district where one party lived, with the exception that marriages could take place in the usual place of

worship of either party, provided that this was not more than two miles outside the registration district in which one of the parties lived. The Bill abolished the two-mile restriction, which had caused many difficulties.

The Protection of Animals (Amendment) Bill. (Mr P. F. Remnant, C.). Commons second reading, Feb. 12; enacted July 5, 1954. The Bill increased the maximum penalty for offences involving cruelty to animals from £25 to £50, and empowered the Courts to disqualify persons convicted of such offences from having control of any animal for such periods as the Court might think fit, under penalties of up to £50 fine or three months' imprisonment, or both.

The Protection of Animals (Anaesthetics) Bill (Lady Davidson, C.), making it compulsory to use anaesthetics in all surgical operations (with certain minor exceptions) upon animals where pain was involved, was given a second reading in the House of Commons on Feb. 12, 1954, and enacted on July 30.

The Protection of Birds Bill (Lady Tweedsmuir, C.). This Bill received a second reading with Government support in the House of Commons on Dec. 4, 1953, and was enacted on June 4, 1954. It (1) provided for the protection of certain wild birds, their nests, and their eggs, as well as of captive birds; (2) authorized the creation of additional bird sanctuaries; (3) prohibited certain methods of killing or taking wild birds (including the use of baited boards, bird-lime, and live birds as decoys); and (4) placed restrictions on the sale of live or dead wild birds and their eggs, as well as on the importation of wild birds

The Bill scheduled (*a*) a list of 44 birds which would be protected at all times, including all species of eagle, the hoopoe, avocet, golden oriole, osprey, and Montagu's harrier; (*b*) wild birds that might not be killed or taken inside a "closed season," including the capercailzie, coot, moorhen, golden and grey plover, common and jack snipe, 10 species of duck, four species of geese, and woodcock; (*c*) 61 birds that might not be sold alive, including the cuckoo, chaffinch, lark, and owl In general, offences under the Bill were made punishable by fines up to £25 or imprisonment for up to three months, or both.

The Rights of Entry (Gas and Electricity) Bill, sponsored by Miss Irene Ward (C.), was introduced into the House of Commons on Dec. 2, 1953 and enacted on March 18, 1954. The Bill regulated the statutory rights of gas and electricity officials to enter private premises, and provided that they might only do so in emergency cases or after obtaining a warrant from a Justice of the Peace or sworn information in writing.

The Slaughter of Animals (Amendment) Bill (Mr. Arthur Moyle, Lab.). This Bill, given an unopposed second reading in the House of Commons on Jan. 29, 1954, and enacted on July 30, 1954, provided for (1) the licensing of premises used as slaughter-houses or knackers' yards, as well as of slaughtermen; (2) the regulation of the treament of animals in slaughterhouses; (3) increased penalties for offences under the Slaughter of Animals Act. During the debate Mr. Moyle stated that over 50,000 horses were slaughtered annually in Britain, the number of horses on agricultural holdings having declined from 845,000 in 1949 to 316,000 in 1952.

The provisions of the National Gallery and Tate Gallery Act came into force on Feb. 14, 1955, when the Tate Gallery —for the first time since it was opened in 1897—became an institution completely independent of the National Gallery.

(Times - Daily Telegraph - Manchester Guardian)

A. POLAND. — Ending of State of War with Germany.

It was announced in Warsaw on Feb. 1 that the Polish Government had decided to terminate the state of war between Poland and Germany. The announcement referred to the recent Soviet decision to end the state of war between Germany and the U.S.S.R.; declared that the Polish People's Republic, like the Soviet Union, "desires to contribute to a peaceful stabilization of relations in Europe and to the normalization of its relations with Germany"; and said that, in addition to strengthening still further the "bonds of friendship with the German Democratic Republic," Poland also "considered it possible to normalize her relations with the German Federal Republic." On the other hand, the statement expressed Poland's "firm opposition" to "the revival of German militarism in any shape" and, in particular, to the Paris agreements. It gave a warning that "should . . . the Western Powers and the German Federal Government succeed in forcing through the ratification of the Paris agreements and the remilitarization of Western Germany, the Polish People's Republic, together with other peace-loving States, will take all necessary measures to ensure the security of Poland and other nations."—(Polish Embassy Press Office, London)

(Prev. rep. 14072 A; 14037 C; 13936 A.)

B. RHODESIA AND NYASALAND FEDERATION. — Appointment of U.K. High Commissioner.

It was announced in London on Feb. 15 that Mr. M. R. Metcalf, an assistant secretary in the Commonwealth Relations Office, had been appointed U.K. High Commissioner in the Federation of Rhodesia and Nyasaland (as from August 1955) in succession to Mr. I. M. R. Maclennan, whose term of office would be completed during the present year. Mr. Metcalf was formerly U.K. deputy High Commissioner in Ceylon.—(Times)

(Prev. rep. 13250 C.)

C. FRANCE. — Population Census.

Following the publication in October last of the preliminary results of the population census taken in May, 1954 (see 13834 B), more detailed figures were subsequently issued by the *Institut National de la Statistique* and are summarized below.

The census returns gave the population of Metropolitan France as 42,774,445 (excluding 187,000 servicemen outside the metropolitan territory, as well as officials and their families in the French zones of Germany and Austria), compared with 40,502,513 in 1946 and 41,907,056 in 1936. They showed, therefore, that France had not only increased her population by over 2,000,000 since the end of the war, but had also made good the losses suffered during the war and the occupation.

Of the 90 *départements*, the population of 51 had increased since 1936, that of 36 had declined, and the population of the other three had remained almost stationary. Increases of over ten per cent were registered in Seine-et-Oise (17.2), Haute-Garonne (14.6), Haute-Savoie (13.1), Loire-Inférieure (11.2), Seine-et-Marne (10.7) and Moselle (10.4), whilst the biggest decreases were recorded in Corsica (24.4 per cent), Lozère (16.3), Bouches-du-Rhône (14.3), Creuse (14.1) and Haute-Loire (12.2).

The returns showed that there were 24 cities with over 100,000 inhabitants (six more than in 1936), their populations being given below:

	1936	1946	1954
Paris	2,829,746	2,725,374	2,850,189
Marseilles	914,232	636,264	661,492
Lyons	570,622	460,748	471,270
Toulouse	213,220	264,411	268,863
Bordeaux	258,348	253,751	257,946
Nice	241,916	211,165	244,360
Nantes	195,185	200,265	222,790
Strasbourg	193,119	175,515	200,921
Lille	200,607	188,871	194,616
St.-Etienne	190,236	177,966	181,730
Toulon	150,310	125,742	141,117
Le Havre	169,299	111,004	139,810
Nancy	121,301	113,477	124,797
Rennes	98,538	113,781	124,122
Reims	116,687	110,749	121,145
Rouen	122,832	107,739	116,540
Grenoble	95,806	102,161	116,440
Clermont-Ferrand	101,128	108,090	113,391
Dijon	96,257	100,664	112,844
Le Mans	84,525	100,455	111,891
Brest	118,700	74,991	110,713
Roubaix	107,105	100,978	110,067
Limoges	95,217	107,857	105,990
Angers	87,988	94,408	102,142

Whereas some of the leading cities—notably Marseilles, Lyons and Lille—had declined considerably in population since 1936 (that of Marseilles having fallen by over 250,000), cities such as Grenoble, Le Mans, Nantes, Rennes and Dijon had registered considerable gains owing to the fact that they were becoming increasingly important as industrial centres. The population of Paris showed little change over the past two decades. Cities with a population of 50,000-100,000 numbered 63 (ten more than in 1936), the 50,000 mark having been passed since 1936 by La Rochelle, Aix-en-Provence, Bourges, Saint-Quentin, Nanterre, Poitiers, Vitry-sur-Seine, Drancy, Vincennes, and Cannes.

The census showed a progressive decline in the number of foreigners living in France—from 2,445,524 (5.8 per cent of the population) in 1936 to 1,670,621 (4.1 per cent) in 1946 and to 1,452,000 (3.4 per cent) in 1954. The foreign population of the Seine *département* (Paris and its environs) had fallen from 459,498 in 1931 to 186,164 in 1954. An analogous decline was shown in nearly all *départements* and particularly in Bouches-du-Rhône (which includes Marseilles), where the foreign population had fallen from 248,800 in 1931 to 54,308 in 1954.

The results of a census taken on July 1, 1954, in the four oversea *départements* of Réunion, Martinique, Guadeloupe, and French Guiana (constitutionally parts of Metropolitan France), published in the *Journal Officiel* on Feb. 6, 1955, gave their populations as follows: Réunion 274,370, Martinique 239,130, Guadeloupe 229,120, French Guiana 27,863. Only Réunion showed an appreciable increase.—(Le Monde, Paris)

(Prev. rep. Population Census, 13834 B.)

D. UNITED NATIONS. — New President of International Court of Justice.

Mr. Green H. Hackworth, the U.S. judge in the International Court of Justice, was elected President of the Court on Feb. 9 in succession to Sir Arnold McNair (Great Britain), who had not sought re-election to the International Court. Mr. Hackworth, formerly legal adviser to the State Department, will hold the position for a three-year term. Dr. Abdul Hami Badawi (Egypt) was elected Vice-President of the Court.

(New York Herald Tribune) **(Prev. rep. 13897 B.)**

FEBRUARY 19—26, 1955

A. TURKEY - IRAQ. — Turkish-Iraqi Defence Treaty. - Opposition in Egypt and Syria. - Cairo Conference of Arab Prime Ministers. - Non-attendance of Prime Minister of Iraq. - Breakdown of Cairo Conference. - Deadlock in Arab League.

The Turkish Prime Minister, M. Adnan Menderes, accompanied by Professor Koprülü (the Foreign Minister) and M. Zeytinoglu (Minister of Public Works), visited Baghdad from Jan. 6-14 for discussions with General Nuri es-Said, the Prime Minister of Iraq. At the conclusion of the talks the following joint communiqué was issued, announcing that the two Governments would conclude a mutual defence treaty as soon as possible:

"Turkey and Iraq have decided to conclude a treaty to bring into effect, and to expand as soon as possible, co-operation for the stability and security of the Middle East. The signatories will undertake to co-operate, in conformity with the right of legitimate defence under the U.N Charter, against any aggression which may be made against them from within or without the region—that is, from any quarter —in accordance with the right of legitimate self-defence as stipulated by Article 51 of the U.N. Charter. The Turkish and Iraqi Governments believe that such a treaty will serve to establish security in the Middle East in a manner conforming with the U N. Charter. Therefore they deem it useful and necessary that other like-minded States, taking into consideration their geographical position and the means at their disposal, should join this treaty. Consequently, before the treaty is drawn up, Turkey and Iraq will remain in close contact with those States which express a desire to act in concert with them, and will make every endeavour to persuade those States to sign the treaty simultaneously with them. Should this not prove feasible, they will continue to make the same efforts after the treaty has been signed."

In a press statement before leaving Baghdad, M Menderes claimed that the decision of Iraq and Turkey to co-operate for their mutual defence marked "the beginning of a new era for the common good of the whole Middle East and the entire community of peace-loving nations." Stressing that they wished to achieve multilateral and not bilateral co-operation, M. Menderes declared. "In establishing our co-operation neither Turkey nor Iraq ever had it in mind to secure for themselves material or moral advantages, or any particular superiority . . . It never occurred to us to reserve for ourselves the quality of founder-members."

On his return journey M. Menderes paid a short visit to Damascus, where he met M. Faris el-Khoury (the Prime Minister) and other members of the Syrian Government. He proceeded to Beirut later the same day (Jan. 14) for talks with the Lebanese Government. The Lebanese Foreign Minister, M. Naccache, stated on Jan. 15 that M. Menderes had invited Lebanon to join the proposed Turkish-Iraqi pact, and that Professor Köprulu had given an assurance that Turkey would not enter into similar arrangements with Israel; a communiqué issued before M. Menderes' departure, however, merely stated that the two Governments had agreed to continue conversations for strengthening relations between Turkey, Lebanon, and the other Arab countries. M. Menderes explained in a press statement that the Lebanese Government had expressed the desire to see a sound Middle Eastern defence organization established, but was unwilling to take independent action without the approval of the Arab League.

Strong opposition was expressed in Syria both to the proposed Turkish-Iraqi pact and to M. Menderes' visit to Damascus, which was criticized by Left-wing members in the Syrian Chamber of Deputies. A student demonstration in Damascus was broken up by the police on Jan. 13, and 45 demonstrators were arrested at Aleppo on Jan. 15. Further student demonstrations against the projected Iraqi-Turkish pact occurred in Aleppo on the following day, in which 50 demonstrators and 32 policemen were injured.

The Egyptian Government proposed on Jan. 16 that an emergency meeting of the Prime Ministers of all countries which had signed the Arab League collective security pact should be held in Cairo on Jan. 22 to discuss the "serious blow to Arab unity" caused by the Turkish-Iraqi agreement. Major Salem (the Minister of National Guidance) said that Egypt had envisaged the Arabs as an independent force in international affairs, pursuing a unified foreign policy and taking the responsibility for the defence of their region through the Arab League collective security pact, and had believed that the other Arab countries unanimously accepted this policy. Iraq, however, by declaring her intention of concluding a separate treaty with Turkey without consulting any of the other Arab Governments, had taken a serious step which might "threaten the very existence of the Arab League and endanger the Arab nations as a whole."

In the light of the Egyptian and Syrian denunciations of the proposed Iraqi-Turkish pact, the Iraqi Government issued an official statement on Jan. 18.

The statement said that Iraqi foreign policy was based on two principles laid down by the late King Faisal I: to serve the vital aims of the Arabs, and to assure Iraq's safety. In accordance with the first principle, Iraq had taken part in the foundation and work of the Arab League and had signed the Arab security pact. In pursuit of the second principle she had sought to consolidate relations with her neighbours and with those Powers whose interests were associated with her own, e g., by the treaties of friendship with Turkey, Persia, and Afghanistan, by the Saadabad pact, and by a treaty of alliance with Britain. Iraq considered the joint implementation of these two complementary principles to be "the only logical method of realizing the common interests of the Arabs." Recognizing, as she did, the right of each Arab country to take such measures as were required by its particular interests, she had welcomed the Anglo-Egyptian treaty because she regarded it as a good augury for Arab-Turkish-British relations. The proposed treaty with Turkey was complementary to this agreement and was open to other Arab States, as well as to other countries concerned with the maintenance of peace in the Middle East; moreover, it did not conflict with either the U.N. Charter or the Arab League collective security pact, being based on Article 51 of the former and Article 11 of the latter.

The conference of Arab Prime Ministers met in Cairo on Jan. 22, being attended by the Premiers of Syria, Lebanon, Jordan, and Saudi Arabia, who were later joined by the Premiers of the Yemen and Libya. General Nuri es-Said, however, expressed his inability to attend on the grounds of illness, and proposed that the conference should be postponed until he was well enough to be present. This suggestion was rejected by the Egyptian Government, and allegations were made in the Egyptian Press—which had conducted a violent campaign against Iraq since the announcement of the proposed pact—that General Nuri's illness was "diplomatic."

At the opening session on Jan. 22 the Egyptian Prime Minister, Colonel Nasser, was reported to have strongly criticized the proposed Turkish-Iraqi pact, maintaining that a Turkish alliance would be of no military value to Iraq, which was already sufficiently protected by her treaty with Britain and was also receiving military aid from the United States. Linking the agreement with the Iraqi Government's recent suspension of diplomatic relations with the Soviet Union (see 13971 A), he alleged that Iraq intended to "tie herself completely to the Western Powers"

It was decided on Jan. 22 not to proceed with the business of the conference until it was known whether General Nuri es-Said would be able to attend, and if so, when. In reply to a telegraphic inquiry, the Iraqi Prime Minister stated on Jan. 23 that he hoped to be able to visit Cairo within a few days. On Jan. 25, however, the conference proposed that if General Nuri was still unable to attend he should send a deputy. Dr. Jamali (the former Prime Minister), Sayid Bashayan (deputy Foreign Minister), and Khalil Ibrahim (Director of Propaganda) accordingly joined the conference on Jan. 20 as Iraq's representatives.

Dr. Jamali told the Egyptian Press on Jan. 27 that it was "necessary for the free nations to co-operate in accordance with the principles of the U N. Charter." He added that "neutralism is impossible in existing circumstances" and that "we have an interest in profiting from the economic and military advantages of the West for our own defence" The Egyptian Government organ *Al Goumhouria*, on the other hand, expressed the hope that Dr Jamali would try to convince General Nuri es-Said that it was not in Iraq's interest "that Arab States should be dragged one after the other into Western alliances, either directly with the U.S.A. and Britain or indirectly through Turkey."

At the conference's session on Jan. 27 the Iraqi delegation put their Government's view on the pact, and afterwards had a private meeting with Colonel Nasser, Major Salem, and Dr. Fawzi. During their discussions, which were reported to have been heated, the Egyptian spokesmen were said to have emphasized the danger of a split in the Arab League and to have drawn attention to the hostile reactions which the pact had aroused in Arab countries. After the meeting a member of the Egyptian delegation made a statement again alleging that General Nuri es-Said's illness was feigned, and that other Iraqi political leaders were opposed to his policy. In reply to the latter allegation, however, Dr. Jamali announced on Jan. 29 that a statement had been issued in Baghdad, with the backing of six former Prime Ministers, reasserting Iraq's right to make such treaties as she considered necessary for the protection of her own interests.

In an attempt to reach agreement, a committee drawn from the Iraqi, Egyptian, Syrian, Lebanese, and Jordanian delegations was appointed on Jan. 28 to draft a compromise resolution. On Jan. 30, however, the conference adjourned for four days as the committee had failed to agree on the wording of the resolution. It was decided that in the interim a delegation composed of Major Salem, M. Sami Solh (the Lebanese Premier), M. Faydi el-Atassi (the Syrian Foreign Minister), and M. Waleed Salan (the Jordanian Foreign Minister) should visit Baghdad to discuss the situation with the Iraqi Govern-

ment. Before the Cairo conference adjourned, the Egyptian Government announced that if Iraq proceeded with the Turkish treaty Egypt would take "definite steps"; these, it was reported in the Egyptian Press, would be Egypt's withdrawal from the Arab League collective security pact, and the abandonment of the Egyptian proposals for unifying the armies of the Arab countries.

The delegation visited Beirut on Jan. 31 for talks with the Lebanese President, M. Chamoun, and flew to Baghdad later the same day. The discussions in Baghdad ended on Feb. 2, when it was announced that General Nuri es-Said had accepted a Lebanese proposal that he should meet President Chamoun and Colonel Nasser in Beirut, at a date to be fixed, in an attempt to resolve their differences. It was, however, stated that the Iraqi Prime Minister had rejected an alternative proposal by President Chamoun that Iraq should postpone the signature of her pact with Turkey for a specific period.

When the conference was resumed in Cairo on Feb. 3, Colonel Nasser refused to meet General Nuri es-Said unless Iraq agreed in advance to accept the decision of the majority of the Arab States as to whether she should conclude the Turkish treaty; General Nuri es-Said, however, refused to accept this condition, and the Lebanese proposal for a meeting automatically lapsed. After an Egyptian resolution proposing that the Arab States should not conclude defence pacts with Powers outside the Arab League had been rejected by Syria, Lebanon, and Jordan, the conference ended on Feb. 6 without any statement having been issued.

In an article published on Feb. 7, Major Salem declared that the conference had been a complete failure because of the "wavering" attitude of some of the delegations, which had agreed not to join the Turkish-Iraqi pact but had refused to support a formal resolution to that effect. The delegations, he added, had even failed to agree on whether the Cairo conference should be postponed or terminated, with the result that it had been left "hanging in mid-air." At a press conference on the same day Major Salem stated that Egypt would withdraw from the Arab League collective security pact on the day that Iraq signed the treaty with Turkey, but would simultaneously sign a pact with all other Arab States which undertook not to enter into alliances with Turkey or other non-Arab countries. He also claimed that during his discussions with General Nuri es-Said in August 1954 (see 13787 A), and again at the last meeting of Arab Foreign Ministers in Cairo in December, it had been agreed that no Arab State should conclude a pact outside the Arab League.

The Iraqi Chamber of Deputies unanimously adopted on Feb. 6 a vote of confidence in the Government's foreign policy. During the debate General Nuri es-Said pointed out that the joint statement issued after his visit to Turkey in October (see 13854 C) had not been queried by any Arab State, either at the time or subsequently. He emphasized that the proposed treaty was in accordance with Article 51 of the U.N. Charter —unlike the Anglo-Egyptian agreement, which was bilateral in character and on which the other Arab States had not been consulted.

A spokesman of the Egyptian Foreign Ministry announced on Jan. 24 that Egypt had rejected a Turkish invitation to join the proposed alliance. An offer by M. Menderes to meet Colonel Nasser in Cairo, Ankara, or any other place which he might select was conveyed through the Turkish Ambassador in Cairo on Jan. 23, but was also rejected by the Egyptian Government. The Saudi Arabian Prime Minister (Emir Feisal) had announced in Cairo on Feb. 8, after discussions with Colonel Nasser, that if Egypt seceded from the Arab League collective security pact when Iraq signed her proposed defence treaty with Turkey, Saudi Arabia would immediately follow the Egyptian example.

The Turkish-Iraqi treaty of alliance was signed in Baghdad on Feb. 24 by General Nuri es-Said, on behalf of Iraq, and M. Adnan Menderes and Professor Fuat Koprulu, on behalf of Turkey. It was announced that it would come into force upon ratification by both countries.

The Turkish-Iraqi defence pact was welcomed in Pakistan, where the Ministry of Foreign Affairs and Commonwealth Relations issued a statement on Jan. 20 describing it as "an important step towards the establishment of a collective security system for the region in which Pakistan, by reason of her geographical position, her vital national interests, and her close religious and cultural affinities with the other Middle Eastern countries, must naturally be closely concerned." The Pakistani Prime Minister, Mr. Mohammed Ali, declared in a press interview in New York on Jan. 27 that he would welcome a tripartite alliance between Pakistan, Turkey, and Iraq.

A. UNITED STATES. — Trade Unions. - Agreement on Merger of A.F.L. and C.I.O.

An agreement for the merger of the American Federation of Labour and the Congress of Industrial Organizations, the two trade union groups to which the majority of U.S. unions are affiliated, was signed on Feb. 9 by Mr. George Meany, president of the A.F.L., and Mr. Walter Reuther, president of the C.I.O. The agreement marked the end of a 20-year split in the U.S. labour movement, which began with the formation of a Committee for Industrial Organization inside the A.F.L. in 1935. In 1936 this committee and the unions affiliated to it were expelled from the A.F.L. for trespassing on the jurisdiction and practices of other A.F.L. unions, and in 1938 the C.I.O. was established as a separate trade union federation under its present name. A number of subsequent attempts to reunite the two labour groups broke down, largely because of the personal animosity between their leaders, and the movement towards unity made no appreciable progress until the deaths of Mr. William Green (A.F.L.) and Mr. Philip Murray (C.I.O.) in November, 1953, and the subsequent election of new leaders of the two organizations.

The principal provisions of the merger agreement were as follows:

(1) A "single trade union centre" would be formed in the U.S.A. through a merger process which would preserve the integrity of each affiliated national and international union. It was recognized as a "fundamental basis" for the merger that each affiliated union should become, by virtue of the merger, an affiliate of the unified federation.

(2) A "department" known as the Council of Industrial Organizations would be established within the unified federation, which would have the status of, and in general be comparable to, the existing "departments" of the A F.L. (which would themselves be continued) This "department" would be open to all industrial unions within the unified federation.

(3) The unified federation would take over all the assets of the A F L. and assume all its liabilities and contractual obligations. It would also succeed to the corresponding assets and liabilities of the C I.O., the balance of whose assets (after meeting all liabilities) would go to the proposed Council of Industrial Organizations.

(4) The A F.L. - C.I.O. "no-raiding" agreement (see 13639 E) would be preserved and, with the consent of the signatories, be extended for a further two years from its present date of expiry. It would be amended so as to make it effective between all unions signatory to it, irrespective of their former affiliation. The existing A.F.L. and C I.O. internal agreements on inter-union disputes would remain in force, and a joint committee would be formed to draw up plans for incorporating these two agreements and the "no-raiding" agreement into a single "no-raiding and organizational jurisdictional disputes agreement."

(5) The merger would be effected by the following procedure: (*a*) the merger agreement would first be approved by the executive council of the A.F L and the executive board of the C.I.O., after which a proposed constitution for the unified federation, based on the provisions of the merger agreement, would be drafted by a joint A.F.L. - C.I.O. committee; (*b*) after approval by the executives of the A F.L. and C.I.O. the new constitution, together with the merger agreement, would be submitted to separate conventions of the A F.L. and C I O; (*c*) after the constitution and merger agreement had been approved by the separate conventions, a joint convention would be held The merger of existing State and local bodies of the A F.L. and C.I.O. would be accomplished within two years of the merger of the main organizations.

Latest published figures gave the membership of the A.F.L. as 9,605,840 and of the C.I.O. as about 6,000,000. The principal trade unions outside the two organizations are the United Mineworkers' Union (headed by Mr. John L. Lewis) and the four railway "operating brotherhoods," with a combined membership of over 2,000,000.

The merger agreement was unanimously approved by the executive board of the A.F.L. on Feb. 10, and by the executive board of the C.I.O. (with one union dissenting) on Feb. 24.

B. CHILE - BOLIVIA. — Economic Treaty.

President Ibañez of Chile and President Paz Estenssoro of Bolivia met at Arica on Jan. 31, on the occasion of the signing of an economic treaty between the two countries. The treaty provided for an increase in mutual trade; reciprocal capital investment; revision of Customs tariffs; greater facilities for the transit of goods across the respective frontiers; improvements in transport and communications between the two countries; and the construction of a pipeline between Oruro and Iquique for the export of Bolivian oil. A permanent Chilean-Bolivian commission will be appointed to supervise the implementation of the treaty and to study and recommend supplementary agreements. (Chilean Embassy, London)

A. SOVIET UNION. — M. Molotov's Foreign Policy Speech to Supreme Soviet. - British and American Press Comments on Soviet Governmental Changes. - President Eisenhower's Tribute to Marshal Zhukov.

During the recent session of the Supreme Soviet, an extensive review of the Soviet Government's foreign policy was made by M. Molotov on Feb. 8. Extracts from M. Molotov's speech are given below under cross-headings.

Introduction. M Molotov began by declaring that the most important result of the First World War was "the transformation of Russia into a Soviet Socialist state," whilst the most important result of the Second World War was "the formation, alongside the world capitalist camp, of the world camp of socialism and democracy headed by the Soviet Union and the People's Republic of China." After reviewing the changes that had occurred in Asia since the end of the war, he continued :

"Of great historical significance is the fact that colonial India no longer exists but the Republic of India . . The international prestige of India is a new and important factor in strengthening peace and friendship among the nations, and is steadily growing. Alongside India, Burma and Indonesia have also cast off the yoke of the colonial regimes Let us hope that Pakistan, Ceylon, and other Asian peoples will find their way to genuine national freedom and economic regeneration . We cannot say that the national liberation movement in the countries of the Arab East has attained the power and sweep that it has in a number of Asian States. The countries existing there, particularly those possessing big oil resources, are still heavily dependent on the Western countries, which have laid their hands on local oil and other natural resources . . The peoples of Africa, in the majority, still live in conditions of colonial oppression . . . North and South America are still off the historic highroad upon which the peoples of Europe and Asia have embarked . . ."

The Berlin and Geneva Conferences. After declaring that the Soviet Union stood for "the strengthening of the forces of peace and an easing of international tension," whereas U S. foreign policy "rests on the setting-up of ever new aggressive blocs and groupings, and finds its latest expression in open propaganda and preparation for an atomic war," M Molotov discussed the international situation, with special reference to the Far East and Germany. Although the Berlin Conference had not succeeded in reaching decisions on German unification—for which M Molotov blamed the U.S , British and French representatives, who "did not co-operate with us in this matter"—it had nevertheless had "important and constructive" results, since it had led to the subsequent Geneva Conference on Far Eastern problems. He said in this connexion : "The significance of the Berlin Conference consists primarily in the fact that, after a five-year interval, a beginning was made in the holding of new international conferences by the great Powers for settling urgent international issues. The decision was taken in Berlin to hold another conference, which took place at Geneva and yielded positive results . If the decision to call the Geneva Conference was a success for the Berlin Conference, then the constructive results of the Geneva Conference confirmed how necessary China's participation in that meeting was. The Geneva Conference did not discharge its tasks to the end, since it made no progress in settling the Korean question. It reached agreement, however, for ending the eight-year war in Vietnam, and also for ending hostilities in Laos and Cambodia."

The SEATO Pact. M. Molotov went on to accuse the United States of having made "open attempts" at Geneva to "prevent the re-establishment of peace in Indo-China." He continued : "As soon as the Geneva Conference was over, Mr. Dulles convened a conference of his own at Manila . . . with the obvious aim of preventing the carrying-out of the Geneva decisions . A so-called collective defence treaty for South-East Asia was signed at Manila—a military bloc of such colonial Powers as the U S.A , Britain and France, and certain Asian countries dependent on them such as the Philippines, Siam, and Pakistan. This treaty is filled with a desire to strangle the national liberation movement in Asia, and is obviously spearheaded against the Republic of China . . ."

The Formosa Crisis. Turning to the Formosa Straits crisis, M. Molotov said "Formosa and the Pescadores, not to mention the other offshore islands, are indisputably the territory of China . . . Notwithstanding this, these islands have been seized by the U.S.A., which maintains there Chiang Kai-shek's criminal gang . . Recently matters have gone to such a length that the President and Congress of the United States . . . have openly started to threaten war against the Chinese people, who are upholding their rights to these islands and are defending their national honour and sovereignty . We consider the Formosa question to be a domestic affair of China's, and regard the predatory actions of the U S A , and its threat of war, as aggression which must be condemned unreservedly by the United Nations if it prizes its authority. It is no longer possible to tolerate a situation where the legitimate rights of China in the U.N. have not yet been restored because of opposition by the United States. The U.S.A. must withdraw from Formosa and the Formosa Straits all its armed forces, including air and naval forces. Then hostilities in the Far East will cease and peace will be established . . ."

Germany and the Paris Agreements. As regards the German question, M. Molotov said · "Both the rejected E.D C. project and the Paris agreements boil down to the same thing in the final analysis —both projects pave the way for the resurgence of German militarism and the integration of a remilitarized Western Germany in the aggressive military groupings of the Western Powers . . All this is being done in flagrant violation of international agreements bearing the signatures of the four Great Powers and designed to prevent the revival of German militarism It is also in flagrant violation of the Anglo-Soviet and Franco-Soviet treaties . . Notwithstanding all the pressure from without, and all the U S. threats against those who do not believe in the Paris agreements, it was only a minority of the deputies that voted to approve the Paris agreements in the French Parliament. It was also only a minority of M.P s that voted for the agreements in the British Parliament, where the Labour group decided to abstain in a body In Western Germany, the trade union and mass party organizations of the working-class . . have declared themselves resolutely against the Paris agreements and against remilitarization ; for the German people, naturally, cannot forget the dire consequences of the two world wars for Germany . . . It would be wrong, nevertheless, to underestimate the dangerous consequences of the Paris agreements should they be ratified and put into effect. . . . Should the agreements be ratified, they will become the chief obstacle to the settlement of the German problem and will make the re-establishment of Germany's unity impossible for a long time to come . Abandonment of the Paris agreements, and an agreement by the four Powers—France, Britain, the U.S A., and the U.S.S.R. —would, on the contrary, make it possible to hold free all-German elections this year with the aim of re-establishing Germany's unity on a peaceful and democratic basis"

The Moscow Conference of East European Countries. After referring to the declaration issued at the Moscow Conference on Dec. 2, 1954 (see 13936 A), M Molotov continued : "The eight States that were parties to the Moscow Conference declared categorically that, should the Paris agreements be ratified, they would take all necessary steps to strengthen their international positions and to safeguard European peace and security . First and foremost among such measures is the preparation of a treaty of friendship, co-operation and mutual assistance between the eight countries . . Among the measures that we will have to take in the event of West European military groupings being formed with the participation of a remilitarized Western Germany, the setting-up of a joint military command should be mentioned This follows from the need to strengthen the defensive power of the Soviet Union and other peace-loving European States with a view to forestalling any chance accidents and surprises When such a joint military command is set up, I am pretty sure that the aggressive circles will refrain from hatching adventurist schemes and will behave in a more peaceful way . . "

Relations with Foreign Countries. M. Molotov went on to speak of Soviet relations with foreign countries—specifically, the Western Powers, the neighbour-States of the Soviet Union, India, Japan, Austria, Yugoslavia, and China and the "people's democracies."

Soviet-American relations, he said, "needed improving," and he believed that it was "quite possible" to bring about such an improvement "if not only the Government of the Soviet Union but also the Government of the United States desires it" As regards relations with Britain and France, M Molotov said : "The quite good development that had recently begun in our relations with Britain and France has run up against submerged rocks—the Paris agreements . . Should matters irrevocably proceed along the road of ratifying those agreements, it would mean that Britain and France not only do not value the treaties they concluded with the Soviet Union during the Second World War, but have annulled them . . . The Paris agreements . . . are compatible neither with the Anglo-Soviet nor the Franco-Soviet treaties."

Relations with Finland were developing "in conformity with the treaty of friendship, co-operation and mutual assistance of 1948"; the visit of a Finnish governmental delegation to Moscow in 1954 (see 13847 C), and the return visit of a Soviet governmental delegation to Helsinki, had "promoted the further improvement of Soviet-Finnish relations based on better mutual understanding." As regards relations with Norway, the Soviet Government was "compelled to reckon with the fact that Norway has joined the aggressive North Atlantic bloc," and the Norwegian people "should not forget that the maintenance of good neighbourly relations between the U S.S R and Norway is in the interests not only of our country but of Norway as well"

The Turkish Government, said M. Molotov, had "continued to adhere to positions which do not conform to good neighbourly relations" and had "converted their territory and coastal waters into a sort of arena for military manoeuvres and demonstrations by foreign, and especially American, armed forces." On the other hand, there had been "a certain improvement" in Soviet-Persian relations, as evidenced by the recent agreement on frontier and financial matters (see 13968 C). M Molotov expressed the hope that Soviet-Persian relations would "not be hindered by unceasing pressure upon Persia from foreign forces, who have set themselves the aim of drawing that country into aggressive military and political groupings in the Near and Middle East" Soviet relations with Afghanistan were "developing normally" in accordance with the interests of both countries.

M. Molotov expressed "great satisfaction" at the development of relations between the Soviet Union and India, saying in this connexion . "Political, economic, and cultural relations are developing successfully and are helping to bring closer together the peoples of our countries, who have mutual respect for and sincere sympathy with each other. We have recently concluded an important economic agreement under which the Soviet Union has undertaken to build in India a big iron and steel plant with an annual output of more than a million tons of steel and a corresponding amount of rolled steel products. The Soviet Union will supply all the equipment and will render the necessary technical aid, including the sending of highly qualified specialists. We gladly complied with the request, since the

development of the iron and steel industry in India should help to secure the national independence and economic progress of that great and ancient country" M. Molotov welcomed the fact that Mr. Nehru, the Prime Minister of India would be paying an official visit to the Soviet Union during the summer.

As regards Iraq's action in breaking off relations with the Soviet Union (see 13992 C), M. Molotov said that this could be "explained by the fact that the present Iraqi Government are in too much of a hurry to dance to the tune of the Western imperialists"

The Soviet Union, he continued, was striving to normalize its relations with Japan, to this end it had lately established direct contact with the Japanese Government (see page 14006), and expected "appropriate positive results."

As regards Austria, M. Molotov said that the Soviet Union attached "great importance" to the "restoration of the independence of a democratic Austria" and to the rapid conclusion of a State treaty with that country At the same time, however, it was necessary to "take into account the dangers involved in the plans to remilitarize Western Germany under the Paris agreements," and the Soviet Government had arrived at "the following conclusions with regard to the Austrian question": (1) It was necessary "first and foremost to reckon with the fact that the settlement of the Austrian question cannot be considered apart from the German problem, particularly in view of the plans to remilitarize Western Germany, which intensifies the danger of an *Anschluss*. In concluding a State treaty for Austria, such a solution must be found as would preclude the possibility of Germany carrying out a new *Anschluss*, which involves the taking of appropriate agreed measures by the four Powers on the German question In this event the withdrawal of the troops of the four Powers from Austria could be carried out without waiting for the conclusion of a peace treaty with Germany."

(2) "Austria must undertake not to join any coalitions or military alliances directed against any Power that took part with its armed forces in the war against Hitler Germany and in liberating Austria, and not to permit the establishment of foreign military bases on its territory. The U.S.A., Britain, France and the Soviet Union must similarly undertake to carry out these provisions."

(3) "For the earliest settlement of the Austrian issue, a four-Power conference must be called without delay to examine the German problem, as well as the question of concluding a State treaty with Austria . . . It should, however, be borne in mind that in the event of the ratification of the Paris agreements, which open the way for the resurgence of militarism in Western Germany, a serious danger of an *Anschluss* would be created, and consequently a threat to Austria's independence."

M. Molotov went on to speak of the "successes recently achieved in the relations between the Soviet Union and Yugoslavia" (see 14016 A), saying in this connexion "We do not consider that everything has been done in this direction, but we believe that this depends no less upon Yugoslavia than upon the Soviet Union. In recent years Yugoslavia has apparently departed in some degree from the course she embarked upon after the war. That, of course, is entirely her own domestic concern. The Soviet Union is striving to develop Soviet-Yugoslav relations in the economic, political, and cultural spheres . . . We are convinced that the positive trend in the development of Soviet-Yugoslav relations is in the interests of both peoples."

Relations with Poland, Czechoslovakia, Hungary, Rumania, Bulgaria, and Albania, with the German Democratic Republic, and with the People's Republic of China, the Korean People's Democratic Republic [North Korea], the Democratic Republic of Vietnam [North Vietnam], and Mongolia were developing "on the basis of brotherly friendship and overall co-operation" M. Molotov added that the Soviet Union was "bound to the great People's Republic of China by ties of friendship and fraternal relations which are growing stronger from year to year."

Declaring that the Soviet Union, China, and the "people's democracies," with a total population of 900,000,000, represented "a monolithic camp of peace, democracy, and socialism," M. Molotov said: "The Soviet Union and the countries of the socialist camp have not set up, and are not setting up, any military blocs directed against other States. Nor will they do so in the future, but they will be compelled to unite their forces in order to safeguard their security if aggressive plans, with the help of which it is intended to revive German militarism, continue to be carried out."

M. Molotov expressed the Soviet Government's support for the "five principles of peaceful co-existence" to which India, China and Burma had subscribed (see 13661 A; 14037 A); declared that the Soviet Union had always based its foreign policy upon those principles; and added: "We have a right to ask the Governments and Parliaments of all countries—why could not these principles become a common platform for the maintenance and consolidation of peace for all nations?"

Denunciation of U.S. Policy. Denouncing what he described as the American "policy of strength," M. Molotov said that this policy was "chiefly expressed in the establishment of all sorts of military and political blocs and aggressive groupings." He continued: "The North Atlantic grouping set up by the Anglo-American bloc is prominent in this respect . . . In addition there are other military and political groupings, also set up under the aegis of the U.S.A., of which the following could be mentioned: the treaty between the U.S.A., Australia and New Zealand [the ANZUS treaty]; the treaty between the U.S.A. and Japan; the South-East Asian Treaty [SEATO]; the treaty between the U.S.A. and the bankrupt Chiang Kai-shek; the treaty between the U.S.A. and the Syngman Rhee clique in South Korea; the treaty between the U.S.A., France, 'Bao Dai' Vietnam, Laos, and Cambodia . . In this group of blocs can be included the recent agreement between Turkey and Pakistan, as well as the agreement now being prepared between Turkey and Iraq (see 14057A). The Paris agreements provide for a West European military alliance which is to become, so to speak, the assault column of the North Atlantic bloc . . . The military groupings which the U.S.A. is building up in Europe are spearheaded against the Soviet Union and the people's democracies, and in Asia against the People's Republic of China and the peoples friendly to it . . ."

M. Molotov added: "In an entirely special position is the treaty between Turkey, Greece and Yugoslavia, insofar as only two of its members belong to the North Atlantic bloc whilst the third, Yugoslavia, does not. The Balkan peoples, however, cannot but display corresponding caution and attention in this respect."

Atomic Warfare. In the course of an attack on what he described as "propaganda for atomic war" in the U.S.A., M. Molotov claimed that "the Soviet people have made such progress in the manufacture of hydrogen weapons that it is the United States that is lagging behind, and not the Soviet Union." After declaring that the Soviet Union stood for "a substantial reduction of all armaments and unconditional prohibition of atomic and other weapons of mass destruction," he added: "The unleashing of a third world war would inevitably end sadly for the aggressor . . . It is not world civilization which would perish, but the already moribund social system with its imperialist foundations . . . a system which is doomed for its exploitation of the working people and the oppressed peoples."

Conclusion. M. Molotov concluded as follows: "The foreign policy of the Soviet Union is based on Lenin's principles of the co-existence of different social systems . . . We uphold these principles because in co-existence there is a full possibility to ensure peace and freedom for the peoples, peaceful relations between countries, and continued human progress."

In addition to the appointment of Marshal Bulganin as Prime Minister of the U.S.S.R. in succession to M. Malenkov, and of Marshal Zhukov as Minister of Defence *vice* Marshal Bulganin, a number of other decisions were taken by the Supreme Soviet at its session in Moscow from Feb. 3 to Feb. 9, as summarized below:

Cabinet Appointments. The following Cabinet appointments were approved during the session, the Ministers concerned possessing "technical" and not policy-making duties: M. Evgeny Kozhevnikov, Transport and Building; M. Ivan Kozyulya, Urban and Rural Construction; M. Viktor Bakayev, Merchant Marine; M. Zosim Shashkov, River Fleet, M. Alexander Sheremetyev, Ferrous Metallurgy; M. Feodor Loginov, Construction of Electric Power Stations, M. Mikhail Evseyenko, Construction of Petroleum Industry Enterprises; M. Dimitri Pavlov, Trade. The last-named succeeded M. Anastas Mikoyan (see 14026 B), whose resignation was accepted by the Supreme Soviet, and who was present at the Moscow session.

M. Ivan Serov, head of the State Security Committee (see page 13615, col. 2), was given a seat in the Soviet Cabinet.

Supreme Court Judges. Six judges of the Soviet Supreme Court were relieved of their posts and seven new judges appointed. [The Supreme Court consists of some 70 judges and 35 "people's assessors," its members being elected for a five-year term by the Supreme Soviet.]

Foreign and Defence Ministries in Union Republics. The Supreme Soviet authorized each of the 16 Union Republics to set up their own Ministries of Foreign Affairs and National Defence if they desired. It was subsequently announced by Moscow radio that Armenia was the first republic to avail itself of this privilege.

[Towards the end of the war the Ukrainian and Byelorussian Soviet Republics had been given permission to set up their own Foreign and Defence Commissariats—see 6249 A. Both republics were subsequently admitted to the United Nations.]

Foreign Policy Declaration. The Supreme Soviet adopted a declaration on foreign policy which recapitulated, in brief, the principal points made by M. Molotov in his speech on Feb. 8. *Inter alia*, it called for the establishment of a collective security system in Europe; for universal reduction in armaments; for the banning of atomic and other weapons of mass destruction, accompanied by effective international control: and for relations between countries "based on the principles of equality, non-interference in domestic affairs, non-aggression, and respect for sovereignty and national independence" It added: "The observance of these principles, which already underlie the relations of such States as the Soviet Union, China, India, and a number of other countries, will ensure the peaceful co-existence of nations irrespective of their social and State systems." In addition, the Supreme Soviet said that it would "sincerely welcome the establishment of direct contacts between Parliaments, the exchange of parliamentary delegations, and addresses by parliamentary delegations of one country in the Parliament of another," all of which would help to "develop friendly relations and co-operation" between the nations.

British and American Press comment on the governmental changes in the Soviet Union is given below in the following extracts from editorial articles in *The Times*, the *Manchester Guardian* and the *New York Times*:

The Times. "'The job was too much for me.' That, in essence, is the reason Mr. Malenkov gives for resigning his high office as Prime Minister of the Soviet Union . . . There is a note of sincerity in the letter that was read on his behalf . . . and these professed reasons may be accepted as valid up to a point . . . They are valid in the sense that, during the time of Mr. Malenkov's leadership, the Soviet Union has run into two acute difficulties on the home front

Far too high a production of consumer goods was set under way and there has now had to be a return to a drive first and foremost, for the expansion of heavy industry. Secondly, agriculture has not been sufficiently developed or well enough organized to meet the growing needs of the cities and towns Mr. Malenkov has taken the blame . . .

Yet clearly far more is involved for Russia and the world than the failings of one man. Malenkov was encircled by men as ruthless and ambitious, and as devoted to the Soviet cause, as ever he was himself, and the basic reason for [the] change is to be found in the fact that the succession to Stalin has not yet been decided. The experiment in 'collective leadership' has not stood the strain in the clash of personalities and policies After Stalin's death the party was determined that there should be no return to the rule of one man In carrying out this prudent resolution Malenkov made his first big mistake. He had hardly become Prime Minister than he gave up his post of First Secretary of the party in favour of Khrushchev . . . Since then, especially during the past few months, the world has been following the rise into prominence of Khrushchev, a man older than Malenkov, but dynamic, impulsive, vigorous, regularly making speeches on policy while Malenkov was silent. Now Khrushchev apparently judges that he is strong enough to take Russia back to the form of leadership and control that marked the middle period of Stalin's rule Until the imminence of war forced him to take over the post of Prime Minister, Stalin wielded his great power simply as General Secretary of the party, leaving the Council of Ministers to be the technical administrative body. Khrushchev had evidently such an arrangement in mind now.

The pattern is clear. So are Khrushchev's intentions And it would seem that Marshal Bulganin is a fitting choice as the new Prime Minister. Above all, he is a man of great administrative ability, having been everything from mayor of Moscow and president of the State Bank to Minister of Defence Some may see army influence and support behind the appointment No doubt Bulganin has the good will of many soldiers, but he is not first and foremost a soldier himself He remains the party man and the administrator. The only question is whether he and Khrushchev will go on seeing the role of Prime Minister in the same light. Both are strong and able men, and there have been too many surprises since Stalin's death for anyone to imagine that everything is now finally and happily arranged . ."

Manchester Guardian. " . . . It is hard to dismiss the thought that all the reasons given or implied for Mr. Malenkov's eclipse are pretexts, that the first step came when Mr Khrushchev replaced him in the party Secretariat shortly after Stalin's death, and that the end of the struggle is not yet . . The most significant passage of Mr. Malenkov's letter is no doubt that in which he admits 'responsibility for the unsatisfactory state of affairs which has arisen in agriculture.' Now agriculture has notoriously been the weakest part of the Soviet economy since the war, indeed since the beginning of the Five-Year Plans. Here the Communist prescription has proved least apt and production has often failed to keep pace either with the requirements of the plan or with the needs of an increasing urban population . . .

What is odd is that Mr. Malenkov should take all the blame. If anyone has been concerned with agriculture in recent years it is Mr Khrushchev Since September, 1953, he has carried on a campaign against mismanagement and low production in agriculture. This culminated in a long speech to the Central Committee of the party a fortnight ago . . . With some acerbity he criticized Ministries for 'lagging behind,' 'irresponsibility,' 'red tape,' 'scandalous mismanagement,' 'inertia' and so on . . . This, together with the not very impressive record of light industry in the attempt to give the Soviet citizen more of the good things of life, may help to account for the latest overturn in the Kremlin.

Mr. Malenkov's departure is only the latest and most striking sign that the Soviet rulers are giving up the fairly mild policy which they embarked upon after Stalin's death It may be that Mr. Malenkov has resigned not so much because he was the only or the chief advocate of that policy, as because the party needed a scapegoat or a symbol of the change In foreign affairs there is less talk of easing tension and establishing co-existence Instead we have had stiffer warnings against the consequences of going through with the ratification of the Paris Agreements. Mr Molotov went out of his way, first to assert that Russia is stronger than the United States in hydrogen weapons, and secondly to flatter the 'uncommitted' countries of Asia . . . One of the mysteries within the larger enigma is Mr. Molotov's ability to keep up a fairly clever line of propaganda in recent months while, presumably, the inner councils of party and Government must have been less than united or comfortable . . "

New York Times. " . . Evidence of a Soviet change of line and of shifts of power among Soviet leaders has mounted steadily these past few months. Mr. Khrushchev's increasing influence and Mr. Malenkov's increasing obscurity have been plain in the Soviet press. . . . So far as can be judged from the information available, Khrushchev is now closer to being the single ruler of the Soviet Union than anyone has been since Stalin's death. While the façade of 'collective leadership' may be maintained for a time, Khrushchev's impressive demonstration of his power in single-handedly—so far as public evidence goes—bringing about the present change in economic policy is completely in the Stalinist tradition . . . As Stalin did for many years, Khrushchev apparently chooses to rule from the supreme post of First Secretary of the Communist Party, leaving the Premier's post to Mr. Bulganin, a man of obviously inferior stature. But his symbolic superiority to Bulganin is clear from his role in nominating the new Premier.

The real mystery that must be solved before we can fully concede Stalin's mantle to Khrushchev is the role of the military leaders. That [the] change could have been brought about without their active support is dubious . . . The party secretary's power is basically derived from his control of the party apparatus, as was Stalin's after Lenin's death But if future discord should arise between the party and the military cliques, then the real test of Khrushchev's power may be had

There can be little doubt, however, that a new major purge is in the making, one whose first victims, Malenkov and Mikoyan, are far from the last . . . Perhaps the darkest omen for Malenkov personally is the linkage of his 'resignation' with the failure of Communist agricultural policy In all truth, it was Khrushchev—the apostle of super-collectives—who made agricultural policy in Stalin's last years. But now Malenkov takes the blame, thus edging over to the abyss which claimed Beria. The latter, we may recall, was purged in part because, in *Pravda's* words, he 'hindered in every way the solution of very important, urgent problems in the sphere of agriculture' For the free world the chief importance of these events lies in the clues they give to Soviet foreign policy Mr. Molotov's bellicose speech is not a good omen . . ."

President Eisenhower, at his weekly press conference on Feb. 9, replied to a number of questions about the governmental changes in Russia and gave permission for his replies to be quoted directly. He spoke warmly of his former association with Marshal Zhukov (the new Soviet Defence Minister) and said that he did not exclude the possibility of reviving his post-war invitation to the Marshal to visit the United States.

Before replying to questions, the President said: " We have seen this change in the rulership in the Soviets. We know, of course, when any major change of that kind takes place, that it does express dissatisfaction with what has been going on internally. What this means to the world . . won't be apparent for some time It does not change our basic policy—a just and lasting peace . . . While we watch every change in the situation, there is no reason for us changing our basic attitude."

Asked by Mr. Marvin Arrowsmith (Associated Press) whether he thought that " this shake-up in the Soviet Government means a calculated tougher policy towards the U.S.A," President Eisenhower replied: " I would not at the moment speculate on exactly what it is going to mean. It doesn't necessarily mean that, because they would say anything that would suit their purposes at the moment of a great significant change of this kind in their Government I would say that we must be watchful and alert, and pursue our policies as we have been pursuing them."

Mr. Merriman Smith (United Press) asked the President whether he thought that the appointment of Marshal Zhukov—" one of your old friends and associates "—as Soviet Defence Minister indicated a " stronger " defence policy on the part of the Soviet Government, " possibly towards this country." President Eisenhower said in reply: " I can scarcely interpret that act in terms of a specific intent on their part. When I knew Marshal Zhukov, I will say this: He was a competent soldier . . . a well-trained, splendid military leader. He and I developed personally a practice of getting along and seeing eye to eye on a number of our local problems in Berlin . . . The last time I had a direct letter from him was April, 1946—a long time ago."

Asked by Mr. Robert E. Clark (International News Service), whether there was any cause to believe that M. Molotov's claim of Soviet superiority in atomic weapons was true, President Eisenhower said: " Certainly there is no proof to that effect. That would be rather a remarkable feat, but I believe it is not worth while speculating on."

Mr. Chalmers Roberts (*Washington Post and Times-Herald*) asked the President to comment on M. Molotov's statement that a third world war would not destroy civilization; at the same time he pointed out that this statement contrasted with an earlier declaration by M Molotov (in March 1954) in which the latter had said that both sides would be destroyed in a nuclear war President Eisenhower replied. " The thing is so serious that intelligent people ought to forego a great many lesser ambitions in the effort to achieve an understanding under a method where the whole world could be assured that that understanding was going to be obeyed by all parties concerned, which means there must be some kind of inspection service which all the world could trust, that we are not pushing toward that kind of a war So whether or not civilization is destroyed, I say it is so serious that we just cannot pretend to be intelligent human beings unless we pursue with all our might, with all our thought—with all our souls, you might say—some way of solving this problem."

Mr. Garnett Horner (*Washington Star*) drew attention to an interview given by Marshal Zhukov on the previous day (see below) in which he [the Marshal] had recalled that he had been invited by General Eisenhower in 1945 to visit the U S A, and had said that he still " dreamt of doing so." Asked by Mr. Horner whether the President could give his version of the 1945 conversation and his feelings about the prospects of such a visit, General Eisenhower replied: " When I asked him to visit our country I was acting as the agent of my Government, which directed me to do so, and more than that, arrangements had been made once. My plane had been put at his disposal, and my son was detailed as his aide. I remember he made the remark: 'Well, I shall certainly be very safe, with your plane and your son.' We were good friends and we could talk in that fashion "

Asked by Mr Joseph C Harsch (*Christian Science Monitor*) whether the invitation to Marshal Zhukov was still open, President Eisenhower replied "As a matter of fact this is the first time it has been mentioned to me since I have been in my present post. You can well imagine that I wouldn't stand here and suddenly issue an invitation without consulting my advisers" The President added that a visit by Marshal Zhukov "would be a remarkable thing at the present stage of affairs, but I certainly wouldn't hesitate to talk it over with my people if we found it desirable."

Marshal Zhukov gave an interview in Moscow on Feb. 9 to two American journalists—Mr. Randolph Hearst jr. (of the Hearst newspaper chain) and Mr. Kingsbury Smith—in which he spoke of his warm admiration for President Eisenhower and his "dream" of visiting the U.S A. when relations between the two countries were better. He recalled that, when they were in Berlin together in 1945, General Eisenhower had told him that the U.S.A. would never attack the Soviet Union, and that he (the Marshal) had made a similar pledge to General Eisenhower. After saying that they had spoken as soldiers who had seen no ground for war between their two countries, Marshal Zhukov added: "I consider I was not wrong in what I said, and I hope General Eisenhower was right in what he said. I know our relations will get better. Then I hope to be able to visit the United States."

Mr. Hearst was also accorded an interview on Feb. 12 by Marshal Bulganin, who, it was reported, had assured Mr. Hearst that the Soviet Government was sincere in its desire for better relations with the United States. Marshal Bulganin was quoted as having said that during the war with Germany "we did have good relations with the U.S.A., Britain and France, and we would be very satisfied now to have those good relations re-established."—(Soviet Weekly - Times - Manchester Guardian - New York Times) **(Prev. rep. 14033 A.)**

A. RHODESIA AND NYASALAND FEDERATION.—Viscounty conferred on Sir Godfrey Huggins.

It was announced from Buckingham Palace on Feb. 17 that H.M. the Queen had conferred a viscounty on Sir Godfrey Huggins, Prime Minister of the Federation of Rhodesia and Nyasaland. Sir Godfrey, who was in London at the time, had attended the recent conference of Commonwealth Prime Ministers.

On the same day on which this honour was conferred upon him, Sir Godfrey (who is 71) had broken the Commonwealth record for the longest period of continuous service as a Prime Minister, having completed 21 years 165 days of uninterrupted office, first as Prime Minister of Southern Rhodesia (1933-53) and subsequently as Prime Minister of the Rhodesia and Nyasaland Federation since its inception in 1953. The previous Commonwealth record for length of service as a Prime Minister had been that of the late Mr. Mackenzie King, who had been Prime Minister of Canada for 21 years 155 days between 1921 and 1946. Unlike Sir Godfrey Huggins, however, Mr. Mackenzie King was not Prime Minister uninterruptedly for that period, having been out of office for more than five years between 1921-46.
(Times - Daily Telegraph)

B. INDIA. — New Left-wing Party.

A new political party, provisionally named the Mazdoor Kisan Party of India, was formed on Jan. 29 out of the merger of five leftist parties whose representatives had met in Bombay. The new party elected a provisional central committee and appointed Mr. Khadilkar, general secretary of the Peasants' and Workers' Party (who had convened the conference), as its general secretary.

The Mazdoor Kisan Party will be based on the tenets of Marxism-Leninism Its aims include the ejection of the Congress Party from power and "the setting-up of a Socialist Government based on the alliance of the working-class, the peasantry, the poor middle class, toiling intelligentsia, and other sections of the working masses led by the working class." The announcement said that the new party "does not believe that the objective of Socialism can be reached through parliamentary means alone, but by the sanction of militant mass action."

The parties constituting the new party include the Peasants' and Workers' Party, the Revolutionary Socialist Party, the Mazdoor Communist Party, the Forward Communist Party, and the Socialist Party (The Hindu, Madras)

C. JAPAN. — Ambassadorial Exchanges with Ceylon, Persia, Cambodia, and South Vietnam.

It was announced on Feb. 20 in Tokio and the other capitals concerned that Japan would exchange Ambassadors with Ceylon, Persia, Cambodia, and South Vietnam, and that the diplomatic missions of these countries in Tokio would consequently assume Embassy status. (New York Herald Tribune)

D. CANADA. — Uranium Production. - Rio Tinto Participation in Development of Algom Uranium Mines.

The Rio Tinto Company Ltd. of London and Algom Uranium Mines of Canada jointly announced on Feb. 7 the conclusion of an agreement whereby (*a*) about $41,000,000 would be provided by Rio Tinto and an associated group to bring the Algom company's Quirke Lake and Nordic Lake properties in Northern Ontario into production, and (*b*) the Eldorado Mining and Refining Co. Ltd. (a Canadian Crown company) had undertaken to purchase the estimated output of uranium oxide concentrates over a five-year period. It was stated that Rio Tinto, whose managing director (Mr. J. N. V. Duncan) would join the Algom board together with two other Rio Tinto nominees, would be given a management contract, including the right to negotiate sales.

The agreement provided for the immediate purchase by Rio Tinto of 100,000 shares in Algom Uranium Mines at $11 each, and for loans to Algom totalling $40,000,000 These loans would carry option warrants entitling the holders to purchase up to a total of 1,500,000 Algom shares at $11 each, including 500,000 shares which might be bought by Rio Tinto If these options were all exercised, the issued capital of Algom would be brought up to 4,350,000 shares, and a further $16,500,000 of finance would be provided in addition to the above-mentioned $41,000,000.

The group headed by Rio Tinto includes the Commonwealth Development Finance Company, N. M. Rothschild and Sons, Robert Benson Lonsdale and Co., the Belgian-Canadian *Groupe Lambert*, Sogemines Ltd , and the Amsterdam Overseas Corporation. Other participating companies are Messrs Model, Roland and Stone, of New York, and Messrs. Gairdner and Co. and Messrs Burns Bros and Denton, both of Toronto.

The arrangement was stated to involve the largest investment of British capital yet made in any Canadian mining enterprise. It was explained that it was intended to bring the Quirke Lake and Nordic Lake properties into production as speedily as possible on a scale of about 3,000 tons of ore per day each, thereby making Algom Uranium Mines one of the largest producers of uranium in the world.—(Financial Times - Economist - Montreal Star) **(Prev. rep. Rio Tinto, 13766 D; Canadian Uranium, 13053 A; Commonwealth Development Finance Company, 13592 E.)**

Note. The Algom company's Quirke Lake and Nordic Lake properties, situated on the north shore of Lake Huron, are believed to have an overall uranium ore potential of upwards of 100,000,000 tons, although so far only 15,000,000 tons have been outlined by drilling. On the basis of an average grade of 0.1 per cent, 100,000,000 tons of ore would contain 224,000,000 lb. of uranium oxide, worth possibly $2,000,000,000.—(Financial Times)

E. CEYLON.—Establishment of Institute of Scientific and Industrial Research.

The International Bank in Washington announced on Feb. 18 that Dr. Francis Godwin, one of its industrial and scientific experts, had arrived in Colombo at the beginning of February to help in the establishment of the Ceylon Institute of Scientific and Industrial Research, of which he would be the first Director. The Institute would carry out research designed to develop new uses for Ceylon's natural resources, and to improve production processes and equipment used in Ceylonese industrial plants.

It was explained that the Government of Ceylon had already introduced legislation establishing the Institute and providing Rs. 1,000,000 ($210,000) annually for the first five years to cover its costs. The U.N. Technical Assistance Administration (T.A.A.) and the World Bank had jointly agreed to provide the Institute with the services of a Director and another top-level executive, and the T.A.A. would assist in providing additional experts. The Institute would carry on its work in such a way that as many Ceylonese as possible would receive technical training. It was intended that within five years its direction should be entirely, and its staff primarily, Ceylonese.

Dr. Godwin, formerly associate director of the Armour Research Foundation, has managed a similar research institute in Mexico. (International Bank, Washington)

F. SOUTH-EAST ASIAN TREATY. — Deposit of Instruments of Ratification. - Treaty in Force.

The South-East Asian collective defence treaty (the SEATO pact) came officially into force on Feb. 19, when instruments of ratification were deposited in Manila by the eight signatory countries—Australia, France, New Zealand, Pakistan, the Philippines, Siam, the United Kingdom and the United States.

The treaty was ratified by the U.S. Senate on Feb. 1, with only one dissenting vote (Senator Langer, Republican), by the Philippine Senate on Feb. 15, and by the New Zealand Government on Feb. 17. It had previously been ratified by the United Kingdom (see 13974 B), France (14026 E), Australia (13891 C), Siam (13806 B), and Pakistan (on Jan. 19, 1955).
(Times - New York Times) **(Prev. rep. SEATO Pact, 13761 A.)**

A FRANCE. — Campaign against Alcoholism.

Towards the end of 1954 the Government of M Mendès-France launched a determined campaign against excessive alcoholism, which had for some time been recognized as one of the gravest social evils in France. As a first step the Government issued on Nov. 20 a number of decrees intended to combat alcoholism by restricting the manufacture and sale of alcoholic drinks, the main provisions of which were as follows :

(1) Duties on all forms of alcohol except beer, cider, and light wines were increased by 20 per cent.

(2) The manufacture and sale (except for export) of *aperitifs* with a wine basis containing more than 18 degrees of alcohol, of spirits containing more than 30 degrees, and of aniseed drinks containing more than 45 degrees, was forbidden.

(3) The number of persons not engaged in agriculture who would be licensed to distil small quantities of alcohol free of duty (*bouilleurs de cru*) would be restricted to those exercising this privilege during 1954-55, and persons with mobile distilling equipment would be subject to strict controls

(4) The sale, installation, and repair of stills without the previous permission of the excise authorities was forbidden The authorities were empowered to purchase apparatus owned by persons no longer licensed as distillers, and to destroy illicit stills.

(5) A special committee responsible to the Prime Minister was set up to study the problem of alcoholism, to make recommendations to the Government, and to carry out a publicity campaign on the subject

The Government also submitted to the National Assembly in November ten Bills directed against alcoholism. These, however, were withdrawn on Dec. 31 and amalgamated into a single Bill in order to facilitate discussion in Parliament The principal provisions of this Bill were as set out below .

(1) The sale between the hours of 5 a.m and 10 a m of wine *apéritifs*, liqueurs, and spirits for consumption on the premises was forbidden. (This was directed against the common practice of drinking spirits with coffee in the morning while on the way to work)

(2) The penalties for being drunk in a public place were increased to a fine of 1,000 to 5,000 francs (about £1 - £5) for the first offence , eight days' imprisonment for the second ; and 15 days to three months' imprisonment, in addition to a fine of 24,000 fr to 300,000 fr., for the third, if it occurred within a year of the previous conviction. Habitual drunkards might also be deprived of civil rights for periods of between one and five years, and of the right to drive a car. Persons convicted of having made a minor under 20 drunk would become liable to imprisonment ranging from one month to a year, and a fine of 24,000 fr to 1,000,000 francs Barmen serving customers who were obviously drunk might be sentenced to a fine of 4,000 fr to 24,000 fr., and to imprisonment or loss of civil rights for a second offence

(3) Infringements of the decree limiting the alcoholic content of spirits, *apéritifs*, and aniseed drinks would be punishable by fines of from 1,000,000 fr. to 4,000,000 fr., whilst persons selling drinks containing more than the legal alcoholic content would become liable to fines of from 24,000 to 500,000 francs.

(4) The unauthorized sale, installation, or repair of stills would be punishable by fines of 100,000 fr. to 2,000,000 fr., and a second offence by a term of imprisonment ranging from one month to a year and a fine of not more than 10,000,000 francs

(5) The opening of new bars in towns already containing more than a fixed number of such establishments was forbidden

(6) Infringements of existing legislation restricting or forbidding the advertisement of spirits and *apéritifs* with an alcoholic basis would be punishable by fines ranging from 200,000 to 2,000,000 francs (Legislation against such advertisements had been passed in 1951, but in practice had remained virtually ineffective)

Further decrees were adopted by the Cabinet on Jan. 29, 1955, and a third series of decrees prepared by the Mendès-France Government was published in the *Journal Officiel* on Feb. 10.

The decrees of Jan. 29 amended the existing legislation on drinks licences by creating, both for shops selling drinks and restaurants serving them for immediate consumption, four different kinds of licences . (1) for non-alcoholic drinks ; (2) for wine, beer, cider, etc ; (3) for drinks of the first two groups as well as *apéritifs* , and (4) for any other alcoholic drinks. Licences would in future be divided into those allowing the sale of groups (1) and (2) or those for all four groups. Automatic machines for the sale of drinks would be treated like shops or restaurants, would become subject to licensing, and would be allowed to sell as a rule only non-alcoholic drinks. In order to encourage the consumption of pure (i.e non-alcoholic) fruit juices, or those containing less than one degree of alcohol, the turnover tax on these was considerably reduced.

The decrees of Feb. 10 provided *inter alia* that no bar might be opened by a person under 21, or by a person who had been imprisoned for more than a year ; that new bars might not be opened near hospitals, schools, sports grounds, prisons, or barracks , that women under 21 might not be employed in cafés , and that all bars must stock soft drinks.

In addition to these measures against alcoholism, M. Mendès-France's Government also took a number of steps designed to encourage the consumption of milk. At the end of November instructions were issued to all educational authorities to provide free milk for all primary schoolchildren throughout France, whilst on Dec. 8 the Government promulgated a decree adding milk to the obligatory food allocations for soldiers, and ordering (as from Jan. 1, 1955) that all Servicemen should be issued with one-eighth of a litre of milk daily with their morning coffee.

The Government's measures were largely inspired by a series of semi-official reports which revealed that alcoholism had become more widespread in France than in any other country for which statistics were available. Figures published by the *Institut National de la Statistique* showed that the average adult annual consumption of pure alcohol was 28 litres (just over 6 gallons) a head, as compared with 14.2 litres in Italy, 12 in Switzerland, 8.8 in the U.S.A., and 8 5 in Britain. [The maximum annual consumption compatible with health has been estimated at 23.2 litres.] The Institute's weekly statistical bulletin stated on Dec. 5 that the number of deaths in 1953 directly due to alcoholism had totalled 15,776, and had exceeded those due to tuberculosis (15,687). Although the number of deaths per 100,000 from alcoholism had fallen from 1.8 in 1940 to 0.5 in 1946, as a result of restricted supplies during the war, it had subsequently risen to 4.7 in 1953. Admissions to mental hospitals due to alcoholism had similarly fallen from 5.9 per 100,000 in 1940 to 1.9 in 1946, but had risen steeply to 17.5 in 1951. The number of deaths from cirrhosis of the liver (an ailment due to excessive consumption of alcohol) had risen from 3,490 in 1946 to 10,860 (6,630 men and 4.230 women) in 1952, or from 12.3 to 37.1 per 100,000. The highest death-rates from alcoholism and cirrhosis of the liver in 1953 occurred in Brittany (reaching 38 and 54 per 100,000 respectively in the Morbihan *département*) and in Normandy, whilst the lowest death-rates were found in Corsica (8 per 100,000 from cirrhosis of the liver, and none from alcoholism).

Another serious aspect of the problem was the widespread evasion of the law which had hitherto been practised. Although the number of licensed *bouilleurs de cru* had increased from 2,000,000 in 1940 to 3,650,000 in 1953, illicit distilling had become increasingly common and 33,000 litres of illegally distilled alcohol had been seized by the police during the six months January - July 1954. In certain *departements*, notably in Britanny and Normandy, attempts by excise officials to investigate the activities of *bouilleurs de cru* had met with forcible resistance.

The membership of the special committee against alcoholism (*haut comité d'étude et d'information contre l'alcoolisme*) was announced on Dec. 31, 1954. Dr. Robert Debré, a professor of medicine, was appointed chairman of the committee, whose nine other members were independent persons drawn from various parties and representing the major economic and financial interests. The committee's principal tasks, it was stated, would be " to ensure continuity of action on the part of the Government in the fight against alcoholism, and increased anti-alcoholic propaganda among the general public, and in schools, barracks, etc."—(Le Monde, Paris - Le Figaro, Paris)
(Prev. rep. 12792 A.)

B. SYRIA. — New Government.

The Cabinet headed by M. Faris el-Khoury tendered its resignation to President Atassi on Feb. 6 after the National Party (which held three ministerial portfolios) had decided to withdraw from the Government. A new administration was formed on Feb. 13 by M. Sabry Assali, secretary-general of the National Party, with the following membership :

MM. Sabry Assali, Prime Minister and Interior ; Khaled el-Azem, Foreign Affairs and Defence , Fakher Kayali, National Economy ; Léon Zammaria, Finance ; Abdulbaki Nizam ed-Din, Public Works ; Azem Mulki, Education ; Hamed Khouja, Agriculture ; Mamoun Khuzbery, Justice ; Wahib Ghanem, Health

The new Cabinet was a coalition of Nationalists and Independents, with one Socialist and one Tribal representative. Only one of the Ministers (Fakher Kayali) held office in the former administration, whilst two (M. Zammaria and M. Wahib Ghanem) were newcomers to ministerial office. Dr. el-Azem, a former Prime Minister, is leader of the Independent group in the Syrian Parliament, whilst M. Khuzbery was formerly Speaker of the National Assembly

M. Assali headed the first " caretaker " government after the overthrow of President Shishakli in 1954. (Le Monde, Paris)
(Prev. rep. 13889 C.)

C. ISRAEL. — Mr. Ben-Gurion rejoins Cabinet.

Mr. David Ben-Gurion, who retired from the Premiership and from political life in December, 1953, was appointed Minister of Defence in the Israeli Government on Feb. 17 in succession to Mr. Lavon, whose resignation was announced on the same date. No reasons were given for the resignation of Mr. Lavon who, like Mr. Ben-Gurion, is a member of the Israel Labour Party (*Mapai*). During his 14 months' absence from political life, Mr Ben-Gurion had been living in the southern desert (the Negev) as a shepherd and agriculturist.—(Times)
(Prev. rep. Cabinet, 13383 B ; Mr. Ben-Gurion, 13354 A.)

A. UNITED KINGDOM. — Wage Increases, Trade Disputes, and Industrial Accidents in 1954.

A general review of wage increases, working hours, industrial disputes, and accidents in British industry in 1954 was published in the January 1955 issue of the *Ministry of Labour Gazette*, and is summarized below :

Wages. The average increase in weekly wages during the year was about 4½ per cent. compared with about 3 per cent in 1953 and 6 per cent in 1952. This compared with a rise in the average level of retail prices during 1954 of about 4 per cent. as against a rise of only 1 per cent in 1953.

About 10,117,500 workers received increases totalling £3,487,600 weekly, an average of about 6s. 10d. per worker. The following table shows the approximate number of workers affected in each of the principal groups of industries, and the net amount of the weekly changes in wage rates :

	Approximate number of workers affected	Estimated net weekly increases £
Agriculture, Forestry, Fishing	55,000	18,000
Mining and Quarrying	452,000	172,600
Treatment of Non-metalliferous Mining Products other than Coal	201,000	58,900
Chemicals and Allied Trades	203 000	54,900
Metal Manufacture	231,500	91,100
Engineering, Shipbuilding and Electrical Goods Vehicles Metal Goods not elsewhere specified	2,353,000	823,100
Textiles	825,500	191,600
Leather, Leather Goods and Fur	50,500	11,000
Clothing	501 500	174 200
Food, Drink and Tobacco	430.500	129.200
Manufactures of Wood and Cork	189,000	54,300
Paper and Printing	284,500	44,000
Other Manufacturing Industries	46,000	13,000
Building and Contracting	1,190.000	518,200
Gas, Electricity and Water	239.500	56.100
Transport and Communication	1,224.000	543,500
Distributive Trades	651.500	245,300
Public Administration	773,000	240,500
Miscellaneous Services	216,500	48,100
Total	10,117,500	3,487.600

Of the wage increases granted, £1,577 200 (45 2 per cent) was obtained through direct negotiations, £811,600 (23 3 per cent) through joint industrial councils, 414.100 (11.9 per cent) through arbitration and mediation, £291,100 (8.3 per cent) under sliding scales based on the index of retail prices, £264,800 (7.6 per cent) through wages councils and other statutory wages boards, and £128,800 (3.7 per cent) through other standing joint councils or conciliation boards.

The index numbers of weekly rates of wages (June 30, 1947 = 100) for each month are shown below :

Date (end of month)	Men	Women	Juveniles	All Workers
1953 :				
December	136	143	149	138
1954 :				
January	137	143	150	139
February	137	143	150	139
March	138	144	150	139
April	140	145	152	141
May	140	146	153	142
June	141	146	153	142
July	141	146	154	142
August	141	147	154	143
September	141	147	154	143
October	142	148	155	143
November	142	148	155	144
December	142	148	155	144

Industrial Disputes. Industrial disputes involving stoppages of work during 1954 numbered 1,994, compared with 1,746 in 1953. About 446,900 workers (1½ per cent of the working population) were directly affected, the total number of working days lost being 2,470,000 (an average of about 5½ working days for each worker involved).

The biggest single stoppage (causing the loss of 485,000 working days) occurred in the Thames-side ship-repairing industry, where 8,700 men ceased work in mid-September in protest against the dismissal of certain workers, and resumed work only in December. The largest number of stoppages (1,468, accounting for nearly one-fifth of the aggregate time lost and for about two-fifths of the workers involved in all stoppages) occurred in the coalmining industry ; the most important strikes occurred in Co. Durham in February-March (39,000 working days lost) and in Yorkshire in May (15,000 days lost). Transport strikes accounted for nearly two-fifths of the aggregate time lost : about 748,000 working days were lost through the dock strikes at London, Hull, and Merseyside in August - November (see 13970 A), 82,000 days were lost in October in a stoppage of passenger transport workers in the London area in protest against revised schedules, and 24,000 days were lost in May in a protest strike of Western Region enginemen against the introduction of additional lodging turns. During July about 3,800 coke-oven and other workers employed by South Wales steelmakers stopped work in support of a wages claim (35,000 days lost), whilst aircraft workers struck at Gosport, Dunbristle (Fife), and Belfast in May-July as a result of a dispute between two craft unions (22,000 days lost), and also at Coventry in December in protest against the dismissal of four shop stewards. Stoppages also occurred in the electrical contracting industry (140,000 days lost in London—see 13572 A) ; the light engineering industry (22,000 days lost at Treforest Glamorgan, in October in protest against the employment of alleged " blackleg " labour) ; and the film industry (21.000 days lost at Elstree in March through a stoppage of laboratory workers).

A strike of printers broke out at midnight on Oct 10 at the printing offices of the *Daily Sketch*, as a result of an inter-union dispute Owing to an agreement between members of the Newspaper Proprietors' Association that, if one newspaper could not be printed, the others should not appear most of Britain was deprived of London newspapers on Oct. 11. The strike was, however settled on the latter date

The number of fatal industrial accidents (excluding accidents to seamen and fishermen) during 1954 was 1,324 (1,401 in 1953), comprising 436 in mining and quarrying, 721 in factories, foundries, engineering works, gas works, power stations, docks, and building operations, and 167 in the railway service. The number of fatal accidents among seamen and fishermen was 175. (Ministry of Labour Gazette) **(Prev. rep. 13394 A.)**

B. UNITED STATES. — The Petersen Case.

Mr. Joseph S. Petersen jr., a research analyst in the National Security Agency, was arrested on Oct. 9 and formally indicted on Oct. 20 on three charges : (1) that he had taken secret documents with the intention of using them to the detriment of the United States and to the advantage of a foreign Power ; (2) that he had " knowingly and wilfully used in a manner prejudicial to the safety and interest of the United States classified information concerning communications intelligence activities of the United States and foreign Governments " ; and (3) that he had unlawfully removed and concealed documents in his custody. Although he at first pleaded " not guilty " to all the charges, he subsequently changed his plea on the second charge to " guilty." He was sentenced on Jan. 4 by the Federal District Court at Alexandria (Virginia) to seven years' imprisonment on this charge, the other two charges against him being withdrawn.

The Netherlands Embassy in Washington stated on Oct. 19 that Petersen had been exchanging " secret intelligence " with its agents for years, and that it had assumed that he had been acting on the authority of his superiors. The U.S. State Department, in reply, said that it had " no reason to question the good faith of the Netherlands Government," but affirmed that Petersen's activities were " completely unauthorized by his Government and were carried out under his own personal responsibility without the knowledge of his superiors and in violation of the laws of the United States."

(New York Times - New York Herald Tribune)

C. POLAND. — Purge of State Security Officials.

The dismissal of three leading officials of the Ministry of State Security was announced on Jan. 17 in the newspaper *Trybuna Ludu*, official organ of the Polish Communist (United Workers') party. The officials concerned were Jacek Rozanski, director of the Ministry's investigations department, who had been arrested and would be put on trial for " gross misuse of his office " and for using " forbidden methods of investigation " ; Anatol Feygin, a departmental chief, who had adopted a " harmful attitude " towards the Communist Party and had been expelled from it ; and Roman Romkowski, the deputy Minister of State Security, who had been expelled both from the party's central committee and from the party itself, and who was accused of " gross cases of despotic action " and " ignoring the laws of justice."

It had been announced in Warsaw on Dec. 8, 1954, that the Ministry of State Security would be divided into two separate departments : a Ministry of Home Affairs (with control over the people's militia, the internal security forces, and frontier guards), headed by M. Wladyslaw Wicha, and a State Security Committee headed by M. Wladyslaw Dworakowski. It was announced at the same time that General Stanislaw Radkiewicz, Minister of State Security for the past eight years, had been relieved of that post and appointed Minister of State Farms. (Times - Manchester Guardian - Le Monde, Paris) **(13573 A.)**

D. CEYLON. — First Ceylonese Army Commander.

It was announced in Colombo on Jan. 31 that Colonel Anton Muttukumaru had been appointed Commander of the Ceylonese Army, with the rank of brigadier, in succession to Brigadier F. S. Reid. Brigadier Muttukumaru will be the first Ceylonese head of the Dominion's Army. (Ceylon Government Information Dept.)

A. SHIPPING. — World Construction and Tonnage Figures. - First Gas Turbine-driven Merchant Ship.

Lloyd's Register returns of merchant shipbuilding for the fourth quarter of 1954 gave the gross tonnage under construction at the end of 1954 throughout the world (excluding the U.S.S.R., Poland, and China, as well as vessels under 100 tons, barges, etc.) as 5,854,247 tons, of which 36.57 per cent was building in the United Kingdom and 63.43 elsewhere.

Ships building in Great Britain and Northern Ireland numbered 327 of 2,140,752 tons (steamers 1,236,896 tons, motorships 903,856 tons), including 2 steamers of over 30,000 tons, 20 steamers of 20,000-25,000 tons, and 14 steamers and 1 motorship of 15,000-20,000 tons Of the total, 239 ships (1,366,393 tons) were building for Great Britain and N Ireland, 23 (54,755 tons) for other British Commonwealth countries, 29 (379,370 tons) for Norway, 8 (132,700 tons) for Panama 7 (63,420 tons) for Liberia, 2 (42,000 tons) for the U.S A., 5 (34,450 tons) for Greece, 1 (6,500 tons) for Honduras, 5 (4,750 tons) for Burma, 1 (4,500 tons) for Peru, 2 (1,000 tons) for the U.S.S R, 1 small vessel each for Brazil and Iraq, and 3 ships (49,900 tons) for unspecified countries. Principal shipbuilding centres were . the Clyde (94 ships of 680,039 tons), the Tyne (38 ships of 376,195 tons), Belfast (20 ships of 248,780 tons), the Tees (22 ships of 239,496 tons), Sunderland (30 ships of 226,765 tons), Liverpool (18 ships of 133,798 tons), and Barrow (5 ships of 107,140 tons).

Ships building abroad numbered 842 of 3,713,495 tons (steamers 1,449,252 tons, motorships 2,264,243 tons), divided as follows . Germany 204 (772,012 tons), Netherlands 136 (529,679 tons), France 55 (449,096 tons), Sweden 65 (433,191 tons), Japan 47 (376,565 tons), Italy 42 (195,189 tons), Norway 54 (194,408 tons), Spain 62 (186,817 tons), Denmark 30 (130,533 tons), British Commonwealth countries 44 (117,181 tons), Belgium 17 (110,868 tons), the U S.A 15 (99,568 tons), Finland 29 (49,202 tons), Yugoslavia 16 (40,454 tons), Portugal 8 (20,122 tons), Turkey 10 (6,330 tons), Indonesia 5 (1,150 tons), the Irish Republic 1 (730 tons), Iceland 2 (400 tons). The total included 1 motorship of over 30,000 tons in the Netherlands, 1 steamer of 25,000-30,000 tons in Japan, 2 motorships of 20,000-25,000 tons in Sweden and one each in Italy and Norway, and 8 steamers of this size in France, 6 in Japan. 5 in Germany, 2 in the Netherlands, and 1 in Sweden.

Tankers of over 1,000 gross tons building throughout the world numbered 243 of 3,098,226 tons, including 86 (1,123,008 tons) in the U.K., 27 (374,000 tons) in the Netherlands, 24 (333,711 tons) in Germany, 17 (303,669 tons) in France, 20 (266,669 tons) in Sweden, 10 (180,700 tons) in Japan, and 15 (130,443 tons) in Norway.

The Cunarder *Ivernia* (22,000 gross tons), the second of the three liners of this size ordered for the Canadian service (see 13849 B), was launched from the Clydebank shipyards of John Brown and Co. on Dec. 14, 1954.

Figures published on Feb. 22 gave the total tonnage launched during 1954 as 5,252,581 tons, compared with 5,096,000 gross tons in 1953, the 1954 figure being the highest (apart from the war years) since 1920. Ships launched from British shipyards totalled over 1,400,000 tons (compared with 1,309,000 tons in 1953, and the highest since 1930), representing 26.8 per cent of the world total. Vessels launched abroad totalled 3,852,581 tons (3,787,000 tons in 1953), the largest amount of tonnage having been launched in Germany (963,114 tons), followed by Sweden (544,311 tons) and the U.S.A. (476,984 tons). Motorships launched throughout the world during 1954 comprised 55 per cent of world tonnage, compared with 58 per cent in 1953 and 65 per cent in 1952.

Statistical tables published by Lloyd's Register of Shipping on Feb. 3 gave the total of world shipping at June 30, 1954, as 97,422,000 gross tons, compared with 93,352,000 gross tons at June 30, 1953. The sizes of the principal national fleets (excluding ships under 100 tons, sailing vessels, and barges) at June 30, 1954, are shown in the following table, with 1953 figures for comparison :

	1954	1953
United States*	27,344,000	27,237,000
United Kingdom	19,014,000	18,584,000
Norway	6,805,000	6,263,000
Panama	4,091,000	3,907,000
France	3,841,000	3,826,000
Italy	3,798,000	3,455,000
Japan	3,578,000	3,250,000
Netherlands	3,443,000	3,372,000
Sweden	2,701,000	2,575,000
Liberia	2,381,000	1,434,000
Soviet Union	2,371,000	2,292,000
Germany (Western)	2,226,000	1,749,000
Denmark	1,614,000	1,529,000
Spain	1,309,000	1,271,000
Greece	1,176,000	1,222,000
Argentina	1,057,000	1,057,000

* Reserve fleet estimated at 14,000,000 gross tons at June 30, 1954 (13,000,000 tons at June 30, 1953).

Of the total world tonnage, the largest group consisted of ships of 6,000-8,000 gross tons, including a large number of U.S. and other wartime-built vessels now laid up. By far the greater proportion of ships built during the past five years, however, were of the 10,000-15,000 tons class, 82 per cent of ships of this size and age, and 91 per cent of those between 15,000 and 20,000 tons, were tankers

The world tanker fleet at June 30, 1954, totalled 24,624,000 gross tons, or about 25 per cent of all steamers and motorships, compared with 24 per cent at June 30, 1953. The largest tanker fleets were owned by the United Kingdom (4,955,000 tons), the U.S.A. (about 4,500,000 tons) and Norway (3,795,000 tons), but considerable expansions took place in the tanker fleets of Liberia (which increased by 666,000 tons to 1,696,000 tons) and Italy (increased by 433,000 tons to 1,144,000 tons).

Of world tonnage of all types, 33 per cent were motorships and 56 per cent oil-burning steamers, making a total of 89 per cent using oil fuel.

It was announced on Jan. 11, 1955, that the " Shell " tanker *Auris* (8,221 gross tons), one of whose four diesel engines had been replaced in 1949 by an experimental gas turbine unit, would be stripped of all her machinery and that a single 5,500 h.p. gas turbine of improved design would be substituted, making her the first merchant ship in the world to be powered entirely by gas turbines. (Lloyd's List and Shipping Gazette) **(Prev. rep. Construction, 13849 B ; Tonnage, 13612 A.)**

B. UNITED KINGDOM.—Wholesale and Retail Prices in Fourth Quarter of 1954. - Price Movements in 1954.

The movement of wholesale and retail prices in the fourth quarter of 1954 is shown below :

	October	November	December
Wholesale Prices (1930 = 100).			
Intermediate products	363.3	364 3	369.6
Iron and steel	369.3	369.7	372.0
Food and tobacco	301.2	305 6	315.4
All items	329.0	330.8	335.7
Retail Prices (Jan. 15, 1952 = 100).†			
Food	116 1	116 9	118 2
Rent and rates	112 5	112.7	113 2
Clothing	96 3	96 4	95.8
Fuel and light	111.0	113 7	114.5
Household durable goods	95.1	95 1	95.1
Miscellaneous goods	100 2	100 3	99.5
Services	112.2	112.4	112.5
Alcoholic drink	101 6	101.6	102.6
Tobacco	100.3	100.3	100.3
All items	108.7	109.2	109.8
All items (June 1947 = 100)	144.0	144.7	145.5

* Provisional † At Oct 12, Nov. 16, and Dec 14 respectively.

Over the year as a whole the retail prices index rose by four percentage points—from 105 8 in January to 109.8 in December. The principal rise was in the food index, which rose from 110.2 in January to 118 2 in December, though with fluctuations during the 12-month period, this increase was largely attributable to a rise of 4.4 percentage points in July as a result of the ending of rationing and price control on meat and bacon, and of a sharp increase in the price of eggs. The fuel and light index rose by 3.8 percentage points over the year; the rent and rates index by 3 3 points; and the services index by 3.0 points. The other five groups (clothing, household durable goods, alcoholic drink, tobacco, and miscellaneous items) remained more or less unchanged.

The Board of Trade Basic materials index in the last quarter (June 1949 = 100) was 132.2 in October, 132.5 in November and 133.1 in December.—(Board of Trade Journal) **(13948 C.)**

C. NEW ZEALAND. — Defence Appointments.

The N.Z. Defence Minister (Mr. T. L. Macdonald) announced on Jan. 28 that Brigadier C. E. Weir would succeed Major-General W. G. Gentry (retiring) as Chief of New Zealand General Staff. On Jan. 30 Mr. Macdonald announced that Captain J. E. H. McBeath, Commodore of the Royal Naval Barracks at Devonport (England), would succeed Commodore Sir Charles Madden as Chief of New Zealand Naval Staff, with the rank of rear-admiral. Sir Charles Madden's services had been loaned by the Royal Navy to New Zealand, and were due to expire in the present year.

It was explained by Mr. Macdonald that the Chief of New Zealand Naval Staff would in future hold the rank of rear-admiral, instead of commodore as hitherto, in recognition of the growing strength of the Royal New Zealand Navy and its increasing responsibilities in the Pacific. As a rear-admiral, he added, the Chief of Naval Staff would rank with the New Zealand Chief of General Staff and the Chief of Air Staff.
(Directorate of Information, Wellington) **(Prev. rep. 12110 D.)**

D. UNITED STATES. — Atomic Energy. - Sale of Heavy Water to India.

The U.S. Atomic Energy Commission announced on Feb. 12 that it had sold ten tons of heavy water to India for use in research into the peaceful application of atomic energy. The sale was authorized under President Eisenhower's " atoms for peace " proposals.—(New York Times)

(Prev. rep. U.N. Resolution, page 13994)

A. PAKISTAN. — Sind Chief Court's Ruling on Unconstitutionality of Dissolution of Constituent Assembly and Appointment of Ministers from outside Assembly. - Government Appeal to Federal Court.

A full bench of the Sind Chief Court, in a unanimous judgment given on Feb. 9, declared the Governor-General's proclamation of Oct. 24, 1954, dissolving the Pakistani Constituent Assembly to be illegal. It also ruled that the five members of the Central Government who were not members of the Assembly were not entitled to exercise the office of Minister. The Court was giving judgment on the petition filed on Nov. 8 by Mr. Tamizuddin Khan, President of the Constituent Assembly, in which he had applied (*a*) for a writ of *mandamus* against the Federation of Pakistan, Mr. Mohammed Ali (the Prime Minister), and members of his Cabinet to restore him to office and to restrain them from obstructing him in the exercise of his functions, and (*b*) for a writ of *quo warranto* against the above-mentioned five Ministers to determine the validity of their appointments.

The petitioner contended that the Assembly was a sovereign body and could pass any law without the Governor-General's consent As the Assembly had made a rule that it could not be dissolved without the consent of two-thirds of its members, the Governor-General had no authority to dissolve it, and he [Mr Tamizuddin Khan] was still its President and should be allowed to function as such. On the other hand, he contended that Major-General Mirza (Minister of the Interior), General M. A Khan (Defence Minister), Dr Khan Saheb (Minister of Communications), Mr. M. A. Ispahani (Minister for Industries), and Mir Ghulam Ali Talpur (Minister of Education), could not legally hold office as Ministers because they were not members of the Assembly.

When hearings on the petition opened on Dec 6, Mr. Fayyaz Ali (the Advocate-General) challenged the jurisdiction of the Court on the grounds (*a*) that the Governor-General had not given his assent to the Bill empowering the High Courts to issue writs ; (*b*) that the Governor-General could not be sued, nor could his Council of Ministers be cited as respondents in the case ; and (*c*) that the Federation of Pakistan was outside the competence of the Sind Chief Court. The Indian Independence Act of 1947, he maintained, had vested in the Governor-General the former royal prerogative of dissolving the Assembly, consequently, the Assembly's rule making a dissolution dependent on the consent of two-thirds of its members was *ultra vires* and could not be enforced. If, however, the Court required the respondents to submit proof of the facts asserted in the Governor-General's proclamation, they were prepared to show that the constitutional machinery had broken down, that the Assembly had lost the people's confidence, and that it could no longer function in accordance with the terms of the Indian Independence Act.

The Court granted Mr. Tamizuddin Khan the writs for which he had petitioned, but, at the request of the Attorney-General, granted 14 days' stay of execution to enable the respondents to file an appeal in the Federal Court.

In giving judgment, Chief Justice Sir George Constantine stated that the dissolution of the Assembly was "a nullity in law," and that both the Assembly and the office of President were still existent He affirmed the Court's power to issue a writ against any Government, including the Federation of Pakistan, and rejected the contention that the Governor-General's assent was necessary for all laws passed by the Assembly Mr. Justice Bachal concurred in this decision.

Mr. Justice Vellani expressed the opinion that the Independence Act did not bestow the power to dissolve the Assembly upon the Governor-General, whose only prerogative was that of pardoning convicts The supreme prerogative to amend and repeal existing laws and to frame and bring into force a new Constitution, which was the essence of Her Majesty's sovereignty, had been granted solely to the Assembly, and as the grant was without any limiting words the Assembly could exercise it as fully as Her Majesty could. Under the Government of India Act, the Governor-General could exercise no power of Her Majesty's unless it was assigned to him , the Assembly, on the other hand, being in place of Her Majesty, was a sovereign body of no prescribed life or duration, and was subject to no agency or instrument outside itself to affect its dissolution or to give its laws validity. The Ministers who were not members of the Assembly, he added, were not qualified for appointment under the Government of India Act as amended by the Assembly on Sept. 21, 1954. [This amendment provided that Ministers must be appointed from among the members of the Federal Legislature—see 13893 A.]

Mr. Justice Muhammad Baksh pointed out that there was no provision in the Government of India Act that the Governor-General could issue a proclamation, and observed : "It will be noticed that no provision of law has been cited in the proclamation. It does not say in clear words that the Constituent Assembly is dissolved. The language shows that those responsible for the draft could not think of any provision." In reply to the argument that the Governor-General was the Queen's representative in Pakistan, he maintained that he was only symbolic of the Queen, who "reigns but does not rule."

Major-General Mirza, commenting on the Court's judgment on Feb. 10, said that "these events should not cause any doubts in the minds of the public regarding the fate of matters like the unification of West Pakistan and the production of a healthy Constitution for the country. These necessary steps will be taken in any case."

The Government subsequently lodged its appeal with the Federal Court, which, on Feb. 22, ordered that the stay of execution should be continued. Mr. Mohammed Ali stated on Feb. 13, on his return from the Commonwealth Prime Ministers' conference in London, that the Government would regard the Federal Court's decision as binding, but that preliminary work on a new Constitution would meanwhile go ahead.

Mr. Tamizuddin Khan announced on Feb. 12 that he intended to summon a meeting of the Constituent Assembly on March 7. (Pakistan High Commissioner's Office, London - Dawn, Karachi - Times - Manchester Guardian) **(Prev. rep. 13893 A.)**

B. PANAMA - UNITED STATES. — Revision of Panama Canal Treaty.

A new U.S -Panamanian treaty on the Panama Canal, revising the provisions of the 1936 treaty (which themselves represented a revision of the original treaty of 1903), was signed in Panama City on Jan. 25 by the Panamanian Foreign Minister, Sr. Octavio Fabrega, and the U.S. Ambassador, Mr. Selden Chapin. Its principal provisions were as follows :

(1) The annuity paid by the U S A. to Panama for the use of Panamanian territory in the Canal Zone was increased from $430,000 to $1,930,000 [It was reported that Panama had asked for $5,000,000 a year or, alternatively, for some fixed percentage of annual receipts from the canal tolls.]

(2) Panama received the right to tax the incomes of some 17,000 workers in the Canal Zone who were not U.S. citizens and who lived outside the Zone. [These workers, mainly descendants of British West Indians who were employed as labourers on the construction of the canal, had not hitherto been taxed either by the U.S. or the Panamanian Governments] At the same time the privilege of buying from U S stores in the Zone, which these workers had hitherto enjoyed, was curtailed

(3) Certain areas of land—of an estimated value of $20,000,000 to $30,000,000—no longer needed by the U S A were returned to Panama.

(4) Distinctions between local employees and U.S. employees of the Canal Company (which operates the canal for the U S. Government) were abolished All jobs would in future be open on equal terms to all qualified persons, and there would be no discrimination in rates of pay on the basis of nationality.

(5) Supplies mined, produced, and manufactured in Panama and bought by the Canal Zone were exempted from the provisions of the "Buy American" Act, which gives certain preferences to U.S producers

(6) Panamanian ship chandlers would in future have the right to supply everything required by ships in transit through the canal, except fuel

(7) The U S.A received a 15-year right to a military manoeuvre area at Rio Hato , a 75 per cent reduction in the taxes on alcoholic drinks consumed in the Canal Zone ; and permission to build a military road within the Zone which might, if necessary be closed to civilian traffic

The treaty will come into force on ratification by the two Governments.—(New York Times - New York Herald Tribune) **(Prev. rep. 13368 B ; 2009 A.)**

C. NEW ZEALAND. — Immigration Policy.

The Minister of Immigration (Mr. J. R. Hanan) announced on Feb. 15 that the New Zealand Government had adopted the following recommendations of the Immigration Advisory Council : (1) an annual intake of 15,000 new settlers would be aimed at ; (2) there would be virtually no limitation on the immigration of British nationals , (3) selected immigrants from Scandinavia and Western Europe would also be encouraged. Mr Hanan explained that the total of immigrants was dropping from 17,000 to 10,000 a year, mainly because of favourable business conditions in Britain and Western Europe. He added that special encouragement would be given to the immigration of tradesmen and of single women from Britain, Scandinavia and Western Europe

It was announced in The Hague on Feb. 10 that the Netherlands and New Zealand Governments had agreed on a target figure of 2,000 - 3,000 Dutch immigrants into New Zealand during the current year. In 1954 only 1,000 Dutch emigrants went to New Zealand, compared with the peak figure of 5,000 in 1952.—(Directorate of Information, Wellington) **(Prev. rep. 13527 C ; 13538 E.)**

D. ARGENTINA. — Subsidies withdrawn from Roman Catholic Schools. - Priests dismissed from Teaching Staffs.

It was announced in Buenos Aires on Feb. 10 that the Argentine Government had withdrawn subsidies from some 80 Roman Catholic schools and had dismissed over 200 priests and nuns from their posts as teachers or inspectors in State-aided schools. These actions were taken under President Perón's recent decree aimed at abolishing ecclesiastical influence in schools receiving aid from the Ministry of Education. (Times - Manchester Guardian) **(Prev. rep. 13983 A.)**

A. UNITED KINGDOM. — Bank Rate raised to 4½ per cent. - Reintroduction of Hire Purchase Restrictions. - Support for Transferable Sterling.

The Bank of England announced on Feb. 24 an increase in the Bank Rate from 3½ per cent (the level to which it had been raised on Jan. 27) to 4½ per cent. Later the same day Mr. Butler, the Chancellor of the Exchequer, announced in the House of Commons two further measures to curb inflationary tendencies and to improve the position of sterling in international markets: (1) the reimposition of restrictions on hire purchase agreements, and a request to the Capital Issues Committee and the banks to cut down finance for hire purchase; (2) intervention by the Exchange Equalization Fund in transferable sterling markets abroad to discourage sterling being traded in at a discount to the disadvantage of U.K. traders and the sterling area's gold and dollar reserves. Mr. Butler's statement was as follows:

"The Government's policy is, and has been, to maintain a sound balance of payments position, which can be founded only on a healthy internal economy. I have on several occasions recently indicated that I was watching the balance of payments position closely and would not hesitate to take such action as appeared necessary to maintain a satisfactory balance in our external accounts.

In assessing the position and the action to be taken, we have borne in mind that our economy is fundamentally stronger than it has been at any time since the war, and that the industrial base is sound. What is needed, and what the Government now propose, are steps to moderate excessive internal demand and so to match the increase in our imports, which results from our ever increasing production—with which it is related—with a corresponding increase in our exports It is my policy to act as soon as there are signs that this is not happening, and I am determined not to allow an unhealthy position to develop in which the very prosperity we have enjoyed should have unhealthy effects on our balance of payments.

I have of course been in consultation with the Bank of England The Bank took the view that a further increase in the Bank Rate would be appropriate in present market conditions I agreed that such a step would be helpful in dealing with the general economic situation, of which I have just spoken. Accordingly, the Bank Rate has been increased to 4½ per cent.

There has recently been a marked expansion of hire purchase. As part of our general policy of limiting home demand, the Government have decided on certain measures of restraint For this purpose Orders have been made to restrict the terms on which cars, wireless, television sets furniture, and a wide range of other consumer goods may be bought by hire purchase. The Orders are designed to deal with the immediate situation. It is the Government's intention, as soon as opportunity offers, to seek permanent powers for this purpose.

At the same time I am asking the Capital Issues Committee and the banks to adopt a more restrictive attitude towards finance for hire purchase.

Then there are technical problems arising from the international use of sterling. Apart from the official market, there are other markets through which sterling is traded at a discount to the detriment both of our traders and of our reserves. I have now, in the interests of the whole sterling area, authorized the Exchange Equalization Account Authorities to use wider discretion in operating in these markets, so that they may be in a better position to carry out our general exchange policy and to make the most prudent use of our reserves.

In these and other ways H.M. Government propose to guard the best interests not only of our country but of the sterling area as a whole, and thus to maintain the living standards and full employment of our people."

Mr. Gaitskell (Lab.) said that the Chancellor's "grave statement" would come as "a very considerable surprise and shock to many people" who had been "gravely misled by the complacent and optimistic statements from the Government side of the House." He asked Mr. Butler if he intended by these measures not merely to restrict consumption, which was evidently the purpose of the hire-purchase restrictions, but also to diminish the scale of investment

Mr. Butler replied that he had taken every opportunity of putting the facts, as he saw them, before the nation "Only a short time ago," he added, "in a town in the North-West of England, I made perfectly plain what my opinion was of the situation directly the facts had come to my attention in the January trade figures" With regard to investment, the Chancellor said: "I am very glad to say that as a result of the measures in the last Budget there are very distinct signs of a marked improvement, not only in factory building, but also in machine-tools and in industrial investment generally."

Mr. Gaitskell then asked whether the Chancellor, if he desired to restrict consumption and not investment, would also take action to restrain the increase in dividend payments. **Mr. Butler** replied that he had always expressed his opinion that there should be restraint in dividend payments. He had never concealed the opinion that in many businesses the distribution of dividends might result in an increased flow of money which would lead to greater investment. He would not fall into "the error made by Mr. Gaitskell of attempting some artificial control of dividends, which would not be likely to work."

Mr. Harold Wilson (Lab.) asked whether the threat to the sterling area was largely due to the "reckless decontrol in commodity trading and oversea finances." Was the Chancellor telling the House that he was instructing the Equalization authorities to lose gold in operating further in some of the commodity markets? **Mr. Butler** replied that if there was any intervention it would mean expenditure of reserves He was satisfied, however, that the authorities, who had operated already with such skill, would so conduct their operations that the resultant loss would be less than if there had been no intervention.

Mr. Strachey (Lab.) asked whether it would not be far more logical, as the Chancellor had said that the prime cause of the critical situation was excessive imports, to re-establish the import controls he had scrapped, rather than indiscriminately cutting down the standard of living of the British people, which was what the statement amounted to. In reply, **Mr. Butler** described it as "a little exaggerated" to say that restrictions on hire purchase, which had got "out of bounds," meant restricting the standard of life of the British people. It would not be in the national interest, he added, to restrict imports or to re-impose controls, which would only result in retaliation against British exports.

In reply to another question, the Chancellor said it would be premature at the present moment to make a statement on the interest rate on local loans until the market adjustments after the Bank Rate change had been completed.

An Order reimposing restrictions on hire purchase deposits and repayment periods in respect of a wide range of goods was issued the same evening by the Board of Trade.

Under the Order, which came into effect on Feb. 25, the minimum deposit was fixed at 15 per cent of the cash price, and the maximum repayment period allowed was 24 months, for a list of goods which included radio and television sets, radiograms, and gramophones,; gas and electric fires; washing-machines, refrigerators, irons, wringers and mangles, floor polishers, vacuum cleaners, and water softeners; pressure cookers, food-mixing machines, electric kettles, electric cooking utensils, electric dry shavers and hair-driers, and sewing machines: domestic furniture, floor coverings, and mattresses, cars, motor-cycles, and bicycles, lawn-mowers, garden rollers, portable sheds and garages, perambulators and push-cars, etc., cameras, lenses, projectors, and binoculars, trunks, bags, and suitcases, and jewellery, clocks, and watches.

A repayment period of 48 months was allowed for a short list of items, including cookers, water heaters, and wash boilers

The Order covered a wider range of goods than those which were revoked when the restrictions were relaxed in July 1954; e.g., furniture, cameras, cookers, and jewellery were included for the first time. On the other hand, the new restrictions were less onerous than those which operated from February 1952 until July 1954, as the minimum deposit during that period was 33⅓ per cent with repayment over 18 months, except for bicycles (25 per cent deposit and 12 months repayment).

Expressly excluded from the Order were commercial vehicles, motor-coaches, taxis, ambulances, invalid carriages, and vehicles for disabled people, as well as office furniture, office machinery, and photographic equipment for industrial and scientific use

The Order also contained a revised definition of hire purchase which made it no longer possible to circumvent the restrictions by using "hire agreements"

It had been known for several months previously that the growth in hire-purchase business had been much larger than had been anticipated when the previous restrictions on consumer credit were removed in July 1954. Estimates published in the Press put the total amount of hire-purchase contracts outstanding at present at approximately £450,000,000, over half of which related to furniture; it was also estimated that about £100,000,000 of this amount had been contracted during 1954.

Figures available from *Hire Purchase Information* showed that the number of new cars sold on H.P. terms rose from 23,364 during the first half of 1954 to 29,430 during the second half, compared with 12,384 in the first half of 1953 and 14,100 during the second half of that year The number of H.P contracts for new cars in January 1955 was given as 6,069.

Used cars sold under H.P. agreements rose from 117,744 during the first half of 1954 to 135,720 during the second half, compared with 78,408 during the first half of 1953 and 89,233 during the second half of that year; in January, 1955, the number of new contracts amounted to 18,026. The total number of new cars sold under H.P. agreements in 1954 represented 14 per cent of total home sales, compared with 9 per cent in 1953. According to the Society of Motor Manufacturers and Traders, it was believed that about 17 per cent of all recent new car purchases had been financed by hire purchase, whilst it was also estimated that one in every three used cars was sold on hire purchase

Although the Chancellor did not specifically mention "commodity shunting," his concern about the growth of this practice in recent months was shown by the new powers conferred on the Exchange Equalization Account.

"Commodity shunting" is based on "transferable" sterling as opposed to "official" sterling. Transferable sterling, though not available to U.K. and sterling area residents, is widely used by traders on the Continent and in other non-dollar countries, and is quoted in a number of overseas centres, the most important of which are Zurich and New York. When transferable sterling stands at a substantial discount on official sterling—recently it had been around $2.72 against $2.78-$2.79 for official—commodity shunting becomes profitable.

The following example (taken from *The Times*) shows broadly how "shunting" is done. A Dutch trader buys tin from Malaya (a sterling country), paying in sterling borrowed from a London bank. He then ships the metal to the U.S.A., receives the dollars, and uses them to buy transferable sterling at a low rate in New York. The London bank is then repaid with this sterling. The Dutch trader, by "shunting" in this way, cuts out British metal traders. Because of the discount on transferable sterling, he can offer a rather better price to Malayan producers and charge a rather lower price to U.S. buyers than could British merchants.

The speech to which the Chancellor referred in his announcement, and in which he had given an earlier warning about the economic position, was made at Liverpool on Feb. 11 to the Merseyside Chambers of Commerce.

Speaking on the country's economic development during 1954, Mr. Butler said that the latest published figures showed signs of rising investment, new factories going up in larger numbers, and more of some types of new productive plant being ordered. In the first nine months of the year (the latest period for which figures were available) the floor area of new factories started had been the highest on record, and nearly double the rate of two years earlier. The value of new home orders for machine-tools was rising sharply, and judging by the latest figures 1954 looked like being "about half as high again as the year before and as good as the best previous post-war year." Early estimates of probable gross fixed investment in 1954 suggested a rise during the year in both the public and the private sectors. Mr. Butler added that the Government, which had a special responsibility for development in the basic industries, was "following its own prescription," referring in this connexion to the expansion schemes in the coal, electricity, and steel industries and the new plans for road and rail development.

Referring to the balance of payments, Mr Butler said that in 1954 the U.K. had a surplus big enough to pay off some foreign debt, to add £87,000,000 to the reserves, and to provide a margin for investment abroad. Nevertheless, the gain in the first half of the year had not been maintained in the second, partly owing to the repayment of debt. But even when allowing for the fact that all big debt repayments fell in the second six months, the result in that half-year had revealed the growing burden of imports. The country had used 7,000,000 tons more coal, so that they had had to import more and export less of it. They had imported more food and feeding-stuffs—the latter partly as a result of the bad season. Exports for the year had been above 1953 both in value and volume, but had not been rising fast enough to keep pace with imports. At the end of the year the prices of imports were rising again: by one per cent in November and by another one per cent in December. "While our exports have been rising," the Chancellor added, "those of our main competitors have been growing fast, so we have had difficulty in keeping up our share of the total of world trade. I undertake to watch the situation and to act wherever I can in the right way."

"A rising volume of production," he went on, "is calling for more imported raw materials and for more food and consumer goods to match the rising earnings that flow from higher output. We must make sure that this increase in imports is not allowed to get out of step with the increase in our exports. That means that if the standard of living is to rise as we want it to, the level of our exports must rise correspondingly. That imposes a duty both on industry and on the Government. If industry can continue its post-war record of ever-expanding overseas earning power, all will be well on that score. It has produced and sold a whole range of new exports—aircraft, tractors, harvesters, petrol, nylon yarn and stockings—so that nearly a tenth of the present great total comprises goods we neither made nor sold on a significant scale before the war And it has multiplied many times over the volume of some of our older exports.

"That is the mixture for industry—a blend of the well-established and the brand new, the proved and the promising. That, and aggressive salesmanship to keep us abreast of our powerful competitors, especially in markets where they have been showing a particular turn of speed of late years. The Government's duty relates to the maintenance of a due balance in our home economy so as to ensure that its demands do not conflict with the need to export. We want our economy to move forward and expand as far as possible—but not faster than our capacity to pay the bigger import bill that our home expansion presents to us. So a hand must be kept on the reins—even a gentle tug given now and again to keep us on a straight path."

In another speech in Manchester the same evening, Mr. Butler stated, with regard to his earlier remarks on new investment in productive industry, that expenditure on machine-tools in the third quarter of 1954 had been £13,200,000, compared with £7,500,000 in the previous year, and that new factory buildings approved in 1954 amounted to 16,800,000 sq. ft., compared with 9,800,000 sq. ft. in 1953. He also announced the provisional trade figures for January as follows: exports £248,700,000; re-exports £10,500,000; imports £332,600,000; excess of imports £73,500,000.

Following the action taken by him on the previous day, the Chancellor said in an address on Feb. 25 to the National Production Advisory Council on Industry: "The first signs are that sterling has recovered—whether on the official or the other rates. We have already taken the necessary turn. Whether we can hold on to that turn I would not dare to prophesy. But I am satisfied that we have taken it. By increasing production and increasing productivity we can hold the situation."

Mr. Butler explained in this speech that in the first half of 1954 the trade figures had been better than in the corresponding period of 1953, but in the second half the opposite had been true. There were two reasons for this. First, the terms of trade had recently moved against the U.K. By January, import prices had been 6 per cent higher than a year earlier, and a 6 per cent rise had added almost £200,000,000 a year to the cost of imports. Export prices, on the other hand, had been steady since the middle of 1953 as a result of keen competition in oversea markets. Second, the volume of imports was rising, without any evidence as yet of a marked forward movement in exports. In the four months October-January the value of imports had been £92,000,000 higher than in the corresponding months a year earlier. Coal was an important item in the increase in the import bill, and, in addition, the need to reduce exports had lessened its earning power abroad.

"The changes in our oversea trade which I have described are not violent," Mr. Butler went on, "and the fundamental position is sound. But we cannot afford a growing import bill unless we can look for a corresponding increase in export earnings. . . . The key to expansion in oversea trade lies in healthy conditions of the domestic economy. To get the best out of the highly competitive trading world, we require a tough, muscular home economy, able to cope with all comers and to turn changing circumstances to its own advantage."

Although production had risen by 6 per cent in 1954, Mr. Butler added, the rate of rise had tapered off in the final quarter. There might be a further rise in the working population in 1955, but the nation could not count on as much as the 350,000 by which it rose in 1954 In January of that year there had been 17¼ per cent more vacancies unfilled than a year earlier, whereas in January of the present year the difference had grown to 29 per cent. It was essential that the many-sided development programme for "future Britain" should continue without overstrain to the economy, and without interference from excessive demands for goods for immediate consumption; this explained the action on hire purchase—to try to take off some of the consumer demand and to keep it to what were the real essentials. "We want our rising standard of life," the Chancellor concluded, "but we must be sensible enough to take our progress at a reasonable pace—it will be all the surer in the end."

Prices of securities on the Stock Exchange fell heavily on Feb. 24 on the news of the higher Bank Rate and the reintroduction of hire purchase restrictions, but recovered somewhat on Feb. 25. Sterling improved further on Feb. 25, closing in terms of the U.S. dollar at $2.78\frac{3}{8}\frac{3}{7}$, against $2.78\frac{11}{16}$ on Feb. 24 and $2.78\frac{3}{4}$ on Feb. 23. Transferable account sterling was being dealt in on the Continent at about $2.75, compared with about $2.72 earlier in the week.

The new Bank Rate, at 4½ per cent, was the highest for 23 years.—(Times - Daily Telegraph - Manchester Guardian - Financial Times - Board of Trade Journal) **(Prev. rep. Bank Rate, 14013 A; Hire Purchase, 13755 A; 13696 D; Transferable Accounts, 13483 A.)**

A. ITALY. — Opening of Rome Underground Railway.

Rome's first underground railway, the Metropolitana, was officially opened by President Einaudi on Feb. 8. The line, which is approximately seven miles long, starts at the Termini station (the new main-line station in the centre of Rome, completed since the war) and passes under the Via Cavour, the Colosseum, and the Circus Maximus before emerging into the open air at the Pyramid of Cestius. It then runs through the old city walls to San Paolo fuori le Mura, and so on to its terminus at Laurentina, in open country south-west of the city. There are eight intermediate stations between the two terminals. The Metropolitana was originally conceived in 1938 by Mussolini, who intended it to run from the centre of Rome to a site on which it was planned to hold a World Fair in 1942. During the construction of the Metropolitana a number of mosaics, frescoes, and statues were found, as well as an early Christian crypt under the Via Cavour. The cost of construction was equivalent to about £10,000,000. (Giornale d'Italia, Rome)

B. SCIENTIFIC RESEARCH. — Ratifications of Convention of European Nuclear Research Organization.

Italy's instrument of ratification of the convention setting up the European Organization for Nuclear Research was deposited with the U.N. Educational, Scientific, and Cultural Organization (UNESCO) on Feb. 25. As Norway and Yugoslavia had previously ratified the convention, the Italian action completed the ratification process by all countries which had signed the convention.—(Neue Zurcher Zeitung) **(13889 A.)**

C. CANADA. — Sale of Toronto "Globe and Mail."

It was announced on Feb. 13 that the *Globe and Mail* (Toronto), one of Canada's leading newspapers, had been sold by the executors of the former owner (Mr. George McCullagh, who died in 1952) to Mr. R. Howard Webster, of Montreal. The purchase price was not disclosed. Mr. Howard Webster, the son of the late Senator Lorne C. Webster, is a director of a number of Canadian and U.S. companies. (Montreal Star)

FEBRUARY 26—MARCH 5, 1955

A. FRANCE. — Resignation of M. Mendès-France. - Defeat in National Assembly on North African Policy. - New Government formed by M. Faure.

The Government of M. Mendès-France was defeated in the French National Assembly on Feb. 4 on a vote of confidence in connexion with the Government's North African policy, on which a debate had been opened on Feb. 2. The debate was held after 15 "interpellations" had been addressed to the Government in respect of its North African policy by members of the centre parties, the Communists, and the Gaullists, as well as by a Moslem deputy from Algeria. Although the "interpellations" were all on developments in North Africa, the Government's general policy also came in for strong criticism during the debate, especially by M. Rene Mayer, deputy for Algiers and a member of the Prime Minister's own party (the Radicals).

General Aumeran (Ind. Republican *apparenté*), who opened the debate, asserted that it was "the arrival of M Mendes-France to power, his policy in Tunisia, his declarations, and those of his Minister of the Interior (M Mitterrand), which have set off the terrorist movement in Algeria" He complained that the Government had failed to take adequate measures against the "separatist" leaders or to prevent journeys to French Africa by leading British and U S trade unionists [a reference to recent visits by Mr Fenner Brockway, M P., and Mr Irving Brown], "in whose wake there always follows a recrudescence of disorder." He also accused M. Mitterrand, "this neophyte metropolitan reformer," of wishing to deprive the French population of Algeria of effective political representation and of introducing "ruinous" reforms without giving first priority to the restoration of order As regards the Franco-Tunisian negotiations, General Aumeran declared that the Tunisian Government aimed at making the French position "untenable", that Tunisian demands for the control of the police and the judiciary were based on a wrong conception of the internal autonomy which France was willing to grant; and that the signing of the Franco-Tunisian conventions would mean "giving complete independence to Tunisia, which would result in the whole of North Africa following Indo-China into anarchy."

MM. Bardoux (*Paysan*), **Dronne** (Gaullist), and **de Villeneuve** (*Paysan*) all protested against the evacuation of French forces from the Fezzan, as had been demanded by Libya. **M. Bardoux** strongly attacked Britain and the U.S A., referred to "foreign intrigues for the expulsion of France from North Africa," and alleged that British and American support had enabled the Libyan Government to flout French protests against the supply of aid by Libya to the Tunisian *fellaghas* **M. Dronne,** who described the Fezzan as the "key to the security of the Sahara and French Africa," alleged "sinister designs" on the part of Britain and expressed the fear that British forces might intervene "on the pretext of restoring order," in the same way as they had "expelled the French from Syria in 1945." After describing the policy of the Mendès-France Government as one of "scuttle," he declared "You have given half of Indo-China to the Communists and the other half to the Americans You have handed over the French possessions in India to Nehru . . The Government must recognize its errors and change its policy, otherwise the national interest demands that the Assembly should eject it" **M. de Villeneuve** warned M Mendès-France that any agreement with Libya for the relinquishment of French bases in the Fezzan would be "a crime to be judged by the High Court."
